—Encouraged by the great success of his milk depots and gratified by the benefits conferred by sterilized milk in saving the lives of sick children in New York City, Nathan Strauss has decided to erect a permanent plant which will be open at year round.

—Water at high temperature cannot be raised any considerable distance by suction, as the vapor discharged from the water so heated follows the receding pistons of the pump and resists the entrance of the water; consequently, to pump hot water always place the supply above the pump, so that it will be supplied from a head.

—The largest search light in the world is now in operation at the government proving grounds at Sandy Hook, at the entrance to the outer bay of New York. The estimated candle power of the light is 104,000,000. It is claimed that its rays can be seen at a distance of nearly one hundred miles, and that vessels can be detected at twenty miles.

—Dr. Buisson, of Paris, is the author of a pamphlet treating of a certain prevention and cure of hydrophobia by vapor baths. The author has tested his plans for years with it, claimed, almost invariable success, and is so convinced of its infallibility that he offers to submit himself to inoculation with the virus of a rabid dog.

—Nedkivich, a German engineer, proposes that in building foundations in quicksand the sand itself should be turned into solid concrete by blowing into it through a tube by air pressure, powdered hydraulic cement. The air insures a thorough mixture, and the concrete formed in this way is very satisfactory, though taking several weeks to harden and requiring months to attain full strength. It is found that the mixture of the sand and cement occupies less space than the sand alone before the operation. The method has already been successful in cofferdam construction and sewer work in quicksand.

—R. J. Grosse has just registered a trademark in Germany for a new thermometer, in which toluol is substituted for the mercury and alcohol that have been employed up to the present. The advantages of such substitution are claimed to be many. In the first place, toluol is a liquid of a deep black color, which renders the column very visible; in the second place, the freezing point of this liquid is very remote from its boiling point, and, finally, it is less than mercury, and the manipulation of it is attended with no danger to the health of the workmen. —The Naturist.

—The Alaska Treadwell Gold Mining Company of Douglas Island, Alaska, has declared a bonus dividend of 75 cents per share, of \$100,000. The Treadwell mine, which cost the company \$1,000,000, has produced \$150,000. About \$800,000 has been spent developing the mine; \$300,000 was spent experimenting with chlorination. About 600 tons of ore is milled daily, at an average cost of \$1.25 a ton. The ore averages in value \$1.50 a ton. The company has already been refused \$150,000 for the mine. It is thought there is nearly \$25,000,000 in sight. —Mining and Scientific Press.

WHERE THEY SWAP WIVES.

On the Islands of the Maine Coast, Fishermen Have Strange Ways.

An old sailor in Portland Harbor, who had just returned from a trip along the Maine coast, says that they have a very convenient custom of swapping wives down among the group of islands. A fisherman's wife died and left him with several small children. One day he sailed up the bay to a settlement, looked over the feminine contingent with some discrimination, and finally had a short colloquy with a woman whose husband was away fishing. She consented to go with the lone fisherman to his home down the bay. When the husband returned he was filled with righteous wrath, and away sailed he in his Hampton boat in search of his recalcitrant spouse. He found her, but she wasn't willing to go back with him. "Say," said the man to whom she had cleared, "you've always liked Joe Allen's wife better than you have your own. You go and take her. If you'll just get off this island without any trouble, I'll give you 100 lobsters and two gallons of gin." The husband took the gifts and sailed away. But however much he admired Joe Allen's wife, he didn't not take her for her husband was a man to be feared. Nevertheless, in a few months Joe Allen's wife went down in a gale, and twenty-four hours later his widow was appropriated by the man who had waited so patiently for her. —Lewiston Journal.

In the Tidewater Quarter.

Adams.—What's going on over at your house? I hear music and dancing.

Brown.—Yes, we have got a little family celebration.

—What's the occasion?

"One of the boys has just got home from the penitentiary." —Texas Siftings.

The Republican.

BENJ. H. SMITH, Editor and Proprietor.

RATES OF SUBSCRIPTION:
The Republican is published every Thursday morning at the following rates:
One copy one year.....\$1.50
One copy six months......75
One copy three months......40
One copy one month......15
Single copies......10

ADVERTISING RATES.
First insertion for square of ten unparalled lines, each additional line one after first at one-half rate. For longer space, see rates on page one. For space on page one, see rates on page one. For space on page one, see rates on page one.

REMITTANCES:
Remittances made by money order, postal note, registered letter or bank draft will be at our 10c. If made otherwise, at the risk of the sender. Address, THE REPUBLICAN, Oakland, Cal.

THURSDAY, AUG. 23, 1894.

REPUBLICAN PRIMARIES.

The Republican voters of Cal. precincts are requested to assemble in their respective districts in primary meetings on

Saturday, Sept. 1st, 1894,

to elect five delegates from each precinct to the Republican Congressional Convention to be held in Frederick City on

Wednesday, September 5, 1894.

ANDREW SLATZGER,
Chairman Republican State Central Committee for Garrett County.

No matter what President Cleveland may do about the tariff bill, the brand of "party perfidy and party dishonor" is on it. That brand never was on any Republican tariff measure.

Not content with expelling Mr. German from the Democratic party, the Baltimore Sun nominates him as the Republican candidate for President in 1896. In order to make the joke more preposterous the Sun nominates Thomas B. Reed for vice-President.—Exchange.

A GERMAN paper pithily says:—"The Republican party makes millionsaires—the Democratic party, tramps." Choose ye, which of the evils. We are authorized to announce that the Republicans will resume business at the old stand in the next Congress, and in the country at large after 1896.

The President will not veto the tariff bill. That measure will become a law and with it wool goes on the free list. So the slight recent advance in wool is off, wool drops back and the American producer is about to see whether he can get the old price under the new conditions. The waiting will not be long.

Cheap Men and Women.

Rev. Dr. Harcourt, of Grace M. E. church Baltimore, who is now in Europe, occasionally dashes off a letter to the Sun giving his observations and experiences in foreign lands. In view of the loud demand for cheap things which is being made by the Democratic party, we invite attention to what Dr. Harcourt saw near the capitol of Saxony, a country famed for its cheapness:

A few miles from Dresden we came to a company of women at work grading the railroad track, and a little further on we came to another group, just after they had eaten their noonday meal. They were sitting upon the ground fast asleep, stretched out side by side. I inquired of a gentleman who occupied the compartment with us in the car if this was a common sight throughout the country. He smiled and replied: "Very common. Our women do our hardest work. We employ them on our railroads for making and grading, and in our coal mines for digging and tunneling."

"What wages do you pay women for working on your railroads?" I asked.

"Oh, a little less than 25 cents per day, and they can afford to live well on that amount," he replied. I said I thought that was impossible. "No, indeed," was the reply. "They have coffee and bread in the morning for breakfast; potatoes, bread and sausage for dinner and bread, coffee and lard for supper."

And this he called good living? "I know," he continued, seeing my astonishment, "that you Americans do not treat your women in this way, but here they are to be had for much lower wages than men, and they do as good work. Cheap labor is what we want." A little further on we came to a place called Bodenbach, in Bohemia, where a number of brick buildings were being constructed, and here we saw women engaged in mixing mortar and carrying the hod up and down the ladders.

Prices and Percentages.

Our Democratic friends are very fond of juggling with percentages to convince the people that the reduced tariff is a "relief to taxation." For instance, one of the advocates of the new tariff bill declares that the percentage of duty in the McKinley bill is 98.58, while that of the Democratic bill is but 48.68. Intelligent men, those who stop to think, will not accept these statements as indicating a lower rate of living without first investigating. If they expect that they are to have a burden removed from their shoulders they are doomed to disappointment.

The New York Press takes up this question at length, and shows that duty percentages, as representing the cost of commodities to consumers, are always misleading, for the reason that the percentage of duty rises as the price falls. The Press cites as an instance that a duty of \$25 a ton upon steel rails was a 25 per cent duty when rails cost \$100 a ton; but it became a 100 per cent duty when rails fell to \$25.

Although, says the Press, the actual duties in the McKinley tariff have remained unchanged, the percentage duty has risen in many cases because prices have fallen since the act was passed. What consumers care for is the price they must pay, not the arithmetical relation of the duty to the price. That practically all prices are lower than they were four years ago is an unquestionable fact but the free traders endeavor to disguise it with a percentage juggle which confuses unlearned men.

Many duties have, indeed, been decreased by the framers of the new tariff. But, then, as an offset, to this, duties have been placed upon articles which have long been free. The tax upon articles which have long been free. The tax upon articles which have long been free. The tax upon articles which have long been free.

Many duties have, indeed, been decreased by the framers of the new tariff. But, then, as an offset, to this, duties have been placed upon articles which have long been free. The tax upon articles which have long been free. The tax upon articles which have long been free.

not abuse or make fun of the town in which you live. Such people are better out of a place than in it and the least they can do is to get out—go where they are wanted, if they can find such a place on this earth. If you conclude to stay, take our advice and give up talking against a place you like well enough to make your home.

Like every other place, the town in which you live has advantages that others have not and your modesty should not prevent you from making the fact known whenever the opportunity presents itself. At home or abroad, whether pursuing pleasure or engaged in business, do not neglect to give those with whom you come in contact to understand that you live in a live town, populated by enterprising, go ahead, progressive people and one that is advancing instead of retrograding.

If there are drawbacks to your town it is not your duty to parade them, the residents and newspapers of other places will do that, but if you can truthfully speak in commendation of the ability of your professional men, the square deal methods of your merchants, the excellence of your mechanics, the superiority of your churches, schools and public institutions and the industry, energy and sobriety of your citizens generally, let nothing prevent you from exercising that privilege. You should learn to believe, if you do not already, that you have all these, and in addition, the handsomest women, the best located town, the finest country surrounding it, with the most fertile farms, tilled by the most intelligent farmers to be found in the whole country.

Those seeking a location are always greatly influenced in favor of any place whose citizens are enthusiastic in its praise. No city or town can expect to attain prominence over its rivals unless its own inhabitants appreciate the excellence and virtues of each other and will collectively spread abroad their faith in the present prosperity and future greatness of their own locality. Talk is cheap and it should be utilized for the benefit of the place in which you live. By all means praise your own town. If you don't like it and must say so, move to some other town. But if the town suits you and you suit the town, stay, you are right where you belong. Don't fail to acquaint the world with this fact.—Cumberland Times.

Sam Jonesism.

The following article, clipped from the Mountain Echo, published at Keyser, W. Va., by the Rev. J. O. Thompson, was handed us by a resident and property owner of Mountain Lake Park with the request that we reproduce it in our columns. We are not in sympathy with the views contained in the article and publish it only through courtesy to the lady who requested its publication:

"We have no personal objection to Sam Jones, as a man, for we know very little of his personal character and conduct. We have never assumed to criticize him personally. We criticized Mr. Jones, after hearing him last year. We understand that he took occasion, in his recent lecture at Mountain Lake Park, to prove our criticism correct. We said, in substance, that his platform language and manners were those of a low blackguard. In his attack on us for the unpardonable sin of criticizing so great a man he proved exactly what we asserted. His characterization of us as good proof of our assertion as we could ask. We thank him for thus publicly corroborating our statement and justifying our criticism. If he could have heard the criticisms of his lecture this year that we have heard from men of all classes, and had not been encased in an armor of self-conceit as thick as the plating of a line-of-battle ship, he might have a little less self-complacency, but he would have a good deal juster estimate of his true value.

He is quoted as saying that if he did not use the coarse and vulgar speech to which he is so much addicted people would not go to hear him any more than they would to hear other ordinary men, and it is, no doubt, the truth. But it is a confession of the fact that he is extraordinary in nothing else but in the command of a perfect vocabulary of billingsgate. Off the platform he may be a gentleman. We do not pretend to say. On it he has not one of the characteristics of a gentleman.

"It is with reluctance that we criticize the conduct of the Mountain Chautauqua management. We have the highest esteem for them, and their program has, so far as we know, been above criticism except in this one thing. In putting Sam Jones upon their platform they are entering to a depraved taste, and they are aiding to further deprave the taste of the public. What refined Christian father or mother would be willing to have their sons

and daughters, just budding into manhood and womanhood, come home from Mountain Lake Park and use such language as they would hear from Sam Jones on the platform? A gentleman of this town said to us, after hearing Jones this year, "The young people heard more slang and vulgarity in that lecture of sixty minutes than they would hear in our streets in a year." We do not believe he overstated the case. The other members of the church, another, not a church member, said to us, after stating that he had heard Jones' attack upon us: "Why, he cannot be a Christian! Christianity is love, and he does not show a bit of it." For the Mountain Chautauqua management to employ such men as Prof. Lane, and others upon their platform, and then to employ Sam Jones, is very much like a cow giving a splendid mess of rich milk and then putting her foot in the pail and fouling the whole of it."

Getting Back to the Old Home.

On Monday a man and his family passed through this place on his way to Maryland, his native state. Some years ago he, like hundreds of others, went west, and located near Kearney, Neb. In conversation with some of our people he said he had grown tired of that country because of the drouth that was so frequent. He said this year Nebraska is scorched by drouth and the crops are parched. The family were traveling in a covered road wagon. The man said he had saved enough money to buy a small farm in his native state. They had been on the way seven weeks. Some times we think the people here do not fully appreciate this section. We do not suffer from a general failure of crops like the people of some sections do. Taking everything into consideration there is no better agricultural section than our own, and the young man who came ought to consider himself fortunate if he owns a farm in it.—Waynesburg Independent.

The Tax on Playing Cards.

The new tariff bill imposes a tax of two cents on every pack of playing cards in the hands of manufacturers or dealers and on every pack manufactured after the law goes into effect. It also provides a penalty of \$50 for the sale of every pack of cards after the law becomes operative without a two-cent stamp attached. Every one who has playing cards intended for sale is required to forward to the internal revenue collector of the district in which he does business a sworn statement of the number of packs of cards he has on hand the day the bill becomes a law. There are no manufacturers of playing cards in Collector Vandiver's district. Importers of playing cards will also be required to affix a two-cent stamp to every pack imported.

Pea Ridge.

After remaining silent for some time I will endeavor to pen you the happenings of the past few days. The farmers here are through harvesting and have gone to plowing for fall crops.

Preaching services at Cherry Grove next Sunday at 10:30 o'clock a. m. Everybody invited to attend. Mr. Henry Duckworth has taken a contract threshing rye for Hiram Coleman.

Mr. Wesley Metz, of Mount Pleasant, Pa., has taken a contract of clearing for Amos Broadwater. Several of our people attended a Sunday school picnic held at New Germany Saturday, August 18.

Mr. Walter Lancaster purchased a buggy recently. Messrs. Wm. Bradley, of Lonaconing, and Oscar Robeson attended services at Mt. Union Sunday.

Messrs. Henry and Delbert Durst of New Germany, were the guests of Stephen Broadwater recently. Several of our people contemplated taking a trip to North Glade to attend the Sunday school convention.

We are glad to note the convalescence of Mrs. John Wilhelm.

Married.

BROWNING-SIPES.—On August 16, 1894, by the Rev. Geo. W. Kepler, at the M. E. Parsonage, Oakland, Mr. Thomas Browning, of Grant county, W. Va., and Miss Mary Sipes, of Mineral county, W. Va.

Ripans Tabules relieve scrofula.

When Baby was sick, we gave her Castoria.

When she was a Child, she cried for Castoria.

When she became Miss, she clung to Castoria.

When she had Children, she gave them Castoria.

TANTALUS OF THE DESERT.

The Ever Present Mirage That Increases the Suffering of the Thirsty.

The Millard party, which left Campo in April for a prospecting trip on the desert of Cocopah, and who were afterward reported as having perished, succeeded, after terrible suffering and hardship, in making their way to the Lost Horse mine, in the Piuon district. Charles F. Millard has arrived in this city from the desert north of Indio. He was one of the party. The other members of the party were Nathan Millard, the father of Charles; "Diamond George" Simonds, and the West Indian, Leon Eugene. Young Millard told a reporter a graphic tale of his experience in the desert:

"At Mesquite Lake we found the deserted cabin of Johnson, the cattleman, who has cattle there in the season. A light spring wagon was standing there. We took it, leaving our heavy wagon, with a note explaining the situation. We left also our seine, fodder and a large quantity of food. The next day we struck out for the railroad, going due north. We expected to find water at short intervals and took only a half barrel with us.

"There it was that I first noted the mysterious movement of the sand hills and even mountains. We would note a large range of hills at some point on the horizon and look the next day to see where it was. Often it would be in an entirely different direction. The sand is continually shifting, often so silently and lightly as to be unseen, but surely just the same. This, I have no doubt, is one reason why men get lost. Another is the mirage, which is continually deceiving a person. In every direction, whether on level or rolling ground, we saw little cool lakes, fringed with palms. Sometimes we saw solid rock hills, with trees and lakes at their feet. Invariably there was nothing to cause this delusion, except possibly the low bushes that were seemingly magnified by the rays of heat and light.

"At noon on the day after we left the lake our water was exhausted. Then for 24 days we went thirsty. I was surprised to see that my father, an old man, stood the torture better than I. Diamond George, too, seemed not to suffer. The negro and I, though, were greatly affected. I will describe as closely as I can how I felt.

"After the ordinary sensations of thirst my tongue began to swell, and the most intolerable feeling came over me of pain wherever anything touched me. If my clothes happened to rub me, I was seized with an irresistible desire to throw them off to the last stitch. My father cautioned me to keep my senses, and I argued with myself continually, but nevertheless I would find myself tearing my clothes off. The most intense anguish, of course accompanied the feelings of physical discomfort. I dreamed of water, thought of water, talked of water, and always before me I saw the cool little lakes just a few yards off the road or just ahead. My tongue swelled, filling my mouth and feeling like a dry sponge. I could not talk, but if I could I would have cursed those fresh little lakes that mocked me. The thought of eating filled me with sudden disgust and ugly temper. In spite of that I tried to force myself to eat something in order to allay the suffering, but no sooner had I touched food with my dry tongue than I flung it away involuntarily. To my tongue food was as tasteless as sawdust.

"In the evening of the third day, when I felt myself going mad, with objects taking the most grotesque shapes and the noise of the wagon sounding as if miles away, we saw the smoke of a passenger train rushing across the desert. Without a word father and Diamond George began piling food, barrel, traps and everything out into the sand. The sand was heavy, but they urged the horses through, and we reached the railroad at Flowing Wells. Never shall I forget the first drink of water. I was sick for two days—out of my head, they said.

"One of the horses was sick, and we had to wait at Flowing Wells nine days. The train whizzed by, never stopping, and our grub began to give out. We had started from Mesquite Lake with 150 pounds of flour. At Flowing Wells we began to divide it with our poor horses. At night the horses gnawed the telegraph poles clean through and the bottom of the wagon, where they had licked up the flour. As soon as possible we started for Indio, pushing the wagon, the horses being to weak to haul it.

"At Walters station we were overtaken by a sandstorm. We tied a wagon sheet to the section house and crawled under. The next morning we were under two feet of sand and had to burrow out. The horses were wading around as if in a snowdrift. After great tribulation we reached Indio and got food

and water and a good rest.

"I noticed many peculiar phenomena in that region, among which were the electric storms. I have seen flash after flash of lightning, followed by peals of thunder, although the sky would be perfectly cloudless."—San Francisco Examiner.

Real Estate Transfers.

The following transfers of real estate have been made and entered upon the record books in the Clerk's office since August 1st.

Levi W. Weakland and wife to Heary E. Clark and John W. McCulloch, a tract of land called "Bear Creek Iron Works," 6294 acres; "Orme's Delight," 154 acres; "George's Fancy," 764 acres; "Eike's Adventure," 284 acres; military lots Nos. 2695, 2696, 2706 and 2707, 200 acres; "Long Boat," 284 acres; \$16,500.

T. W. Casteel and wife to Ephraim J. Fringer, 10 acres of a tract of land called "John and Mary," \$700.

John H. Friend and wife to W. H. Friend of John, a part of a tract of land called "Sweet Pink," 75 acres; \$200.

Samuel Faulkner to Martha J. Faulkner, a piece of land called "Laurel Dale," and a piece of vacancy, 209 acres and 43 perches; also military lots Nos. 2357, 2958, 2959 and 2960, also a tract of land called "Elder Spring," 111 acres; \$300.

Gilmer S. Hamill, attorney, to Charles H. Bill and Henry Bonig, one half interest in a tract of land called "Governor's Neglect," 1031 acres; also one-half in a tract of land called "Chestnut Grove," \$760.

Henry Dash to Samuel R. Critchfield and R. A. Pangborn, military lots Nos. 2478, 2479, 2480 and 2481, 200 acres; \$100.

William Camp and wife to Amelus C. Wagner, 1 acre and 90 perches of land; \$235.

Amelus C. Wagner to Peter Nathan, 1 acre and 90 perches of land; \$200.

George W. Wilson and wife to D. R. Harvey, military lot 297, 50 acres; \$350.

Truman F. Root and wife to Harriet Leach, 50 acres of "Elk Garden," \$600.

Gilmer S. Hamill, mortgagee, to Barbara E. Lohr, one acre of land; \$50.

Truman W. Casteel and wife to Kate C. Taggart, lots Nos. 4 and 5 of the subdivision of "John and Mary," 10 acres; \$800.

Charles M. Miller and wife to C. J. Otto, 27 acres of land; \$50.

George M. Steele and wife to George Shartzer, lot No. 22 and part of lots 21 and 20 of block B in Steele's addition to the town of Friendsville, 6525 square feet of ground; \$200.

The Mountain Home Company to Annie Flynn, lots Nos. 31 and 32 in Loch Lynn Heights; \$110.

The Mountain Home Company to Henry Beckman, villa QQ in Loch Lynn Heights; \$100.

THE SECRET OF THE BROOK.

The great sea called me, and I came
From the far hillsides, bleak and brown,
And many grateful blessings mine
The trouble of my silver foot
As I pass singing, singing down.
The happy birds my waters drift,
The mosses grow so velvet green
I that touch them, at my brink,
The pastoral cattle stand and drink,
And life is still a softening scene.
I spend my wealth for others' good,
And thus, in turn, their best I take:
The wild delights with every mood,
Sun, storm or quiet over me I make,
And such a never-ending chain of fate.
My strand will not let me stay
In any spot, though fair it be:
Even while you watch I slip away,
By day and night, by night and day,
To find my ripple to the sea.
Which even needs a brook like me,
—Charlotte M. Packard, in S. S. Times.

WHAT SELIM COULD NOT FORGET.

THE McNAIR girls had company. Cadence and Ruth Wheeler, two blonde-eyed New England maids with white locks.

Cadence was so named by a fond mother, who detected in the first-born baby lamentations unappreciated by the mother alone.

A number of articles were needed in the McNAIR household, which somebody must get in Lewisvale.

Home duties claimed Julie and Marie McNAIR—not starchy-butter-making, pen-and-ink, but practical, necessary house-keeping, such as looking for next day's league picnic, and the churning—three gallons of sour cream must speedily be churned.

"I cannot drive to town," laughed Julie. "That golden butter must be churned. Horrid! Buzzy is only a little boy, I can't send him shopping," sighed Mrs. McNAIR.

"Thoughtful Mr. McNAIR said: 'Why not Caddie Wheeler? Caddie isn't timid, Selim is a trusty animal, works well in the girls' picnic.'"

"Oh, father, you dear!" cried Julie, joyously. "Three cheers! Rally cry, your bonnet, Caddie, I'll show you how to hold the lines and guide. Father, you may get to your work. I can hitch up. You girls need not be kindest, smartest old horses, go around all the bad places. You'll have nothing to do, only avoid the crowded streets. You know, too, just where to go."

"Laws, now," said the hired man. "I do wonder, Buzzy, if your pop's going to let them strange girls have Selim and drive to the city 'bout company?"

"Philip, Selim's gentle as a dog. They've been to the city a dozen times. Selim likes to poke along slow."

"Did you ever see him run to a fire?" inquired Philip.

"Fire? I suppose Selim hasn't been in the fire service the last eight years. He was only in the service two years," said Buzzy, conclusively.

"I don't care. He was one in a fire team. He was disciplined every day. He was young and learned his lesson by heart. He will never forget it either. Neither folks nor horses can quite unlearn things that's most serious to learn. Selim is a beauty, gentle and obedient, but he can't be trusted in the city. He's been tested. A gentleman in the city wanted him had for a family carriage horse, then they made start him again. Selim had to find a home in the country, where the fire boys—"

"Did he see?" laughed Buzzy.

"Wouldn't it be fun to see old Selim clip it?"

"It wouldn't be fun for the girls."

"I don't want hands to come to them. I thought, Philip, you said discipline was so helpful."

"I did," curly replied Philip.

"But it makes Selim unreliable!"

"Selim's a good horse—biddable, too."

"I don't understand you, Philip. I do not believe even a fire going will wake up that sleek, fat, lazy fellow. The girls will drive home in safety," said Buzzy.

"If I really feared anything would happen 'em, I should have warned your pop. I say there's a risk that Selim'll lose the fire alarm, catch sight of the hose carts and fire teams."

an' mind his own past trainin'. A horse isn't supposed to know when to quit obeyin' signals. Boys may learn when to do or leave off doin' things. Now s'pose you tell your pop to come here."

The moon limb was eaten. Two clock and the Wheeler girls were not in sight. Julie kept watch at the attic window, looking far down the road.

"If an accident has happened, Selim

IS NOT TO BLAME," STOUTLY DECLARED MR. McNAIR.

"They're coming up the hill," cried Julie, rushing down the stairs. "Selim must have poked dreadfully."

"Did you have a pleasant drive, dear?" inquired Mrs. McNAIR.

Two girls hastily jumped from the phaeton.

"The hateful, mean old thing!" cried Ruth Wheeler, two tears standing in her eyes. "The pig-headed creature. He just would go. I could neither turn nor guide him. A gentleman attempted to restrain him, but—"

"Did Selim run, Cadence?" inquired Mr. McNAIR.

"Run? He galloped—galloped madly."

"Did he spill you out?" timidly inquired Marie.

"No," replied Cadence. "Only it was so ridiculous—two girls in a phaeton galloping to the fire down on the level, following the hose carts. I pulled on the lines, but the faster the firemen drove the faster Selim ran. A gentleman assisted us in turning the infuriated old fellow toward home. He said our horse had certainly once been in the fire service, but we really must not be too severe on the faithful, spirited old fellow."

Julie laughed merrily. The Wheeler girls laughed. Mr. McNAIR laughed, too. Selim stood in his harness, docile and gentle.

"I had forgotten that Selim was once in the fire service. I had no thought of this happening. Girls, it is my fault. My good fellow, you are a faithful old horse, but you can't be trusted in the future in the girls' picnic when they drive to town. Buzzy, take Selim to the barn," said Mr. McNAIR.

"It has happened just as you said, Philip. Selim hasn't forgotten. I think Ruth Wheeler will not trust him again. Old fellow, you'll not get future treats, lumps of sugar and bits of fruit from the girls."

"When the girls have thought a bit I think they'll not cherish a grudge against the horse. They'll understand he did his best in his way. Buzzy, s'pose you an' me always fell into line when duty calls—"

"Whom, Selim? You are impatient for your dinner," said Buzzy, holding out a tempting ripe daisy apple.

"You an' me aren't fond of work. There now, take the apple. Philip, I detest hateful, everyday chores. I do sometimes make a fuss when the girls find extra errands for me to do. A boy needs time for play. I'm not a slave. Julie calls me one sometimes. When I think I'll work for all the family, you'll see," Buzzy thrust his hands

into his pockets, held up his head and looked defiant.

"You'll improve by an' by—by an' by,"

"Yes, and I'm tired being called careless, idle an' thoughtless. Julie need not call me 'Tad Hooper, junior.' I shall not grow up like him. I do want fun and a good time now. I mean to—"

"Buzzy boy," said Philip, "you have every help to grow into such a man as John McNAIR. If I were you I'd begin now, checkin' an' holdin' in my faults. Every good man will tell you he has had to discipline himself. I'd take special pains to learn good ways. You are of pleasantness—the ways one never desires to unlearn. Nobody is ever too old to cease to do evil, learn to do well, but old habits cling like Spanish needles."

On the following day the league picnic in the McNAIR grove was a happy event.

Selim, in the phaeton shafts, stood quietly beside a maple tree, Julie McNAIR holding the lines.

"Dr. Love is coming our way with little Bess," said Marie.

"Cadence," whispered Ruth Wheeler, "it is our friend."

Dr. Love had not forgotten. A twinkle gleamed in his brown eyes.

"We—we did not expect to see you again, sir," stammered Cadence. "We are grateful to you."

"The old fellow gave you no more surprises," said the doctor.

"No; but wasn't it dreadful—two girls in a phaeton trying to keep up with the hose carts?" laughed Ruth Wheeler.

"Selim is a lovely horse for the country. He certainly doesn't forget. A horse is a wonderful creature. One of the world's famous military men who understood men and horses said: 'A horse craves kind words—a little kindly expressed sympathy from men.'"

Buzzy was quite proud that Selim attracted general notice. Compliments, sweets and loving pats were lavished upon the handsome, sleek-coated horse.

Selim yet makes frequent trips to Lewisvale. The ladies do not drive him, since he still responds to the fire signals. Selim evidently is in spirit, one of the book and ladder company, disclaiming to be retired from active service.

Buzzy is earnestly striving to learn newer, better ways. Julie does not now call him "Tad Hooper, junior."—Edith Alger, in Prairie Farmer.

—Lulu B. George, a wall paper designer in New York, drew a Chinese pattern which proved so popular that 300,000 rolls of the paper have been sold.

WHEN WILL IS USELESS.

Some Queer Manifestations of Mental Affliction.

"There are some persons, and they enter into all the daily circles of life, whose wills are so soft and pliant that they need the strength of another will to be joined to theirs before they can act. This common phase of a weak will is accentuated in disease to a degree hardly deemed possible by the unobservant. Persons suffering from this form of diseased volition can will themselves according to the dictates of reason. They can feel a desire to act, but they cannot make a move toward that end. They are powerless to translate that desire into an act."

Espinoza mentions the case of a magistrate highly distinguished for his learning and his power as a speaker, who was seized with monomania in consequence of certain troubles of the mind. He regained his reason, but would not go into the world again, though he acknowledged himself to be in the wrong in not doing so. When advised to travel or to attend to his neglected affairs, he would say: "I know that I ought to do so, but I am unable. Your advice is very good, and I wish I could follow it. It is certain that I have no will save not to will, for I have my reason unimpaired. I know what I ought to do, but strength fails me when I ought to act."

The case of the magistrate, however, is hardly as strange as that recorded by Prof. J. H. Bennett, of a man who frequently could not carry out what he wished to perform, even to the simplest acts of daily life.

Often, on endeavoring to undress, this man was two hours before he could get his coat off. All his mental faculties were perfect, but his will was impaired. Once he ordered a glass of water. When the servant brought it he was utterly unable to take it off the tray, though he was most anxious to do so. The servant waited half an hour before him, at the end of which time the glass was drunk down its contents. He described his feelings afterward as if another person had taken possession of his will."

The abuse of opium produces a somewhat similar condition. Dr. Dubney says: "The opium addict loses none of his moral sensibilities or aspirations. He wishes and longs as earnestly as ever to realize what he believes possible and feels to be exacted by duty. But his intellectual apprehension of what is possible infinitely outruns his power of execution, but even the power to attempt."

An analogous instance, quoted by Dr. Billod, of Nancy, is that of a man who was greatly frightened at thirty years of age by certain evil tumors in which he, unfortunately, became involved. Thereafter, though he retained perfectly his mental faculties, he would not remain alone, either on the street or in his chamber, but was always accompanied. If he went out alone, he would not remain alone, which he rarely did, he would soon halt on the street and there remain indefinitely, until another person turned back, unless some one told him.

"He seemed to have a will, but it was that of those around him. Whenever the attempt was made to overcome this hesitance of the man, he would fall into a swoon."

A disease of the will that is even more curious is that which prevents the sufferer crossing an open space. It is a common form of insanity in France, where it is called by the people the "fear of space," or "peur des espaces."

An instance of this class noted by Westphal tells of a soldier of strong constitution and robust mind and imagination who was suddenly seized with alarm at the sight of an open space.

"If he has to cross one of the great squares in Berlin he fancies the distance to be several miles and despairs of ever reaching the other side. The fear grows less if he follows the line of houses or has some one walking with him."

Dr. Bennett tells of a man, a patient of his, who was sure to be stopped by an unobstructed space in the street. Crossing a street was always a fearful and anxious proceeding for him, and he was always arrested for some minutes.

The above cases of disease of the will come from lack of impulse. Those which are caused by excess of impulse are even more strange. Suicide of a certain sort comes under this head. Dr. Layton mentions a case of a strong constitution and robust mind and imagination, in which the patient did not perceive the intelligence of the methods they employed.

This woman who attempted suicide whenever she saw a table-knife, did not notice the other knives, which, though present, she had substituted for the knife a harmless instrument. Another patient tried to hang herself with a half rotten cord that was not strong enough to bear even slight tension.

There are dozens of persons who very often take refuge in asylums because they are tormented all the time with the impulse to kill those who are dear to them.

"Sometimes," says Ribot, "fixed ideas of a character of violence or unreasonable hatred lodge in the mind, which, though present, she has substituted for the knife a harmless instrument. Another patient tried to hang herself with a half rotten cord that was not strong enough to bear even slight tension."

Westphal tells of a man who was haunted by the thought that he might perchance commit to writing that he had been guilty of some crime and found the paper, "He accordingly carefully procured every bit of paper he found and even piles them up on the street and examines them." He knows it is folly, but he is powerless to dismiss it.

THE TIME OF MOONRISE.

It Is Fifty-One Minutes Later on Any Day Than on the Day Before.

The time of moonrise on any day is on the average about fifty-one minutes later than on the preceding day. This retardation is, however, by no means constant in amount, being at times very much less than the average and at times very much greater. A very marked diminution in the time of retardation occurs about the time of the full moon which falls in September. This moon is called the harvest moon. The same phenomenon in a less degree occurs at the time of the next following full moon, which is known as the hunter's moon. The time of retardation during the harvest moon is less than half an hour in our latitudes, instead of its average value of nearly an hour, and for several successive nights the moon seems to rise at nearly the same time.

Briefly stated, the cause of the phenomenon is this: At the time of the rising of the harvest moon the apparent path of the moon among the stars is much less inclined to the horizon than it is at other times, and the ordinary day's motion of the moon along this path makes an unusually small change of the position of the moon with reference to its distance from the horizon.

A more detailed explanation may make the matter a little more easily understood. In addition to the ordinary apparent daily motion which the moon has in common with all other heavenly bodies, it has another motion by which it completes the circuit of the heavens relatively to the sun once a month, and the direction of this motion is generally not parallel with the direction of the diurnal motion, it being generally northward or southward as well as eastward. Anyone may see this motion by an hour's watching of the relative positions of the moon and star near it. The diurnal motion is always on a line at right angles to a line drawn from the body to the celestial pole, the point in the heavens approximately indicated by the pole star. It is always perfectly uniform about this pole as a center, and it is this which we take as our ordinary measure of time.

Now consider the position of the moon and the sun at the time of full moon. The moon rises just as the sun sets. On the next evening at sunset the moon will still be below the horizon, because it has moved eastward among the stars relatively to the sun, and it will not rise until the diurnal motion of the heavens brings it above the horizon. If the moon's motion were uniform and always along the line of ordinary diurnal motion, this retardation of the time of rising would always be the same, and would, as stated at the outset, be fifty-one minutes per day. But at the time of harvest moon the direction of motion of the moon among the stars is considerably northward as well as eastward, and at the time of moonrise this line makes a comparatively small angle with the horizon, very much less than it does at other times of full moon during the year. Therefore, at sunset on the day after the full, the moon having moved along a line which is inclined to the horizon at a much smaller angle than usual, its distance below the horizon will be less than the average, and hence a smaller amount of diurnal motion will bring it into view—that is, the retardation of time of rising is less than it is at other times. This condition continues for several days.

Several other things, notably the inclination of the moon's orbit to that of the earth, and the varying rate of motion in the orbit due to variation of distance from the earth, tend to change the amount of daily retardation, but they do not depend on the time of the year, and they sometimes intensify and sometimes diminish the peculiar phenomenon of harvest moon. Latitude has a strong effect, and in northern Europe the phenomenon is a much more noticeable one than it is in the United States. In fact, it only goes far enough north, the harvest moon may rise even earlier on any night than it did on the night preceding.—N. Y. Sun.

How Shrimps Are Caught. The shrimp sold in our city are caught during the night before by "seiners," who go two in a boat, to some favored locality and there "cast" all night long for the delicious little crustacean that is served up at nearly every breakfast table in the city in the morning. "Casting" is the throwing of the net into the water of a circular leaden balls and provided with dravine strings which, passing through the center of the net, are attached to the edges. The net when cast in the water, of course, sinks more rapidly at the edges than in the middle, and confines within its meshes the shrimps over which it may have fallen. The rope to which it is attached the drawing string being pulled, the net closes at the bottom and is lifted into the boat with its contents. When an anchor begins its work of tiding the eastern sky, those hardly crustaceans are on their way to the city. Here they land over their booty to men who carry them about the streets, measuring the shrimps out to them from their boats by the "plates" or pan, the seller agreeing to sell the shrimps and land over the proceeds, less the usual commission.—Charleston (S. C.) News and Courier.

A Poor Catch. "Are you getting any bites?" asked one man of another, who was angling in a New Jersey stream. "Plenty," was the laconic reply. "Are you catching many?" "Not one."

"How's that?" "Play it away." "Fly! The fishes fly away!" repeated the questioner in amazement. "Who is talking about fish?" "I am."

"What are you talking about?" "Mosquitoes."—Pittsburg Chronicle Telegraph.

UP TO DATE. "Mary, you want to get the parlor into shape for to night, I expect a surprise party."

Obedience to the Letter.

A story is told in central Maine of a young woman who distanced paternal families, so to speak, in a matter of parental authority. "Now, Mary Jane," said the stern parent, "I will consent to your going to the dance at the Corner tonight only under one condition." "What is that?" asked Mary Jane, meekly, her eyelids drooping pathetically. "It is," said the father, "that you won't let that young scapegrace, —, bring you home." "I'll promise," said the maid, and she went to the dance.

Some next morning: "I thought you promised me not to let that fellow bring you home," said the angry parent, with fire flashing from his eyes. "He didn't bring me home," said Mary Jane, archly. "But he came home with you, for I saw him." "Yes, but he didn't bring me. I told him what I had promised, so we walked home and he led the horse."—Lawiston Journal.

And He Never Was Cross Again. "Hullo, during the tiff—I suppose now that you will be going home to your mother in the morning?" "Wife—I just won't. I have tried that, and it doesn't seem to do any good. I am going to bring mother here this time.—Peabody's.

OUT ON THE FLY.

"Adversity has uses sweet, And this one I do declare. If you're a bald head, soft and neat, Your wife can never pull your hair."—Texas Siftings.

Had Passed That Danger.

Miss Antique—How I dread the humdrum existence of middle age. Miss Canstique—Don't fret. That will never trouble you.—Chicago Record.

Different Results.

Jack—Women spend too much time looking in the glass. Jess—But they walk all the straighter for it, which the men sometimes don't.—N. Y. World.

The Hammock.

It's nice to lie and while the time away These summer days, by truant fancy led; But while you doze you do not feel so gay To wake and find you're standing on your head.—Judge.

BETTER LEFT UNSAID.

"Oh! You are leaving us early, Mr. Brown." "Yes, Mrs. Park, and I am very sorry that I must leave, but not expecting to have such a pleasant time this evening, I had made another engagement."—Harper's Bazar.

Did Her Best.

Husband—Our bills for household expenses are as large as ever. I told you to reduce them. Wife—I did. I took from ten to twenty dollars off of each one, but the tradesman acted so about it I thought you'd better go around and reduce them yourself.—N. Y. Weekly.

Taking Down a Noble.

Not long since a certain noble peer in Yorkshire who is fond of boasting of his Norman descent thus addressed one of his tenants, who, he thought, was not speaking to him with proper respect: "Do you know that my ancestors came over with William the Conqueror?" "And maybe," replied the noble Saxon, nothing daunted, "they found mine here when they came." The noble felt he had the worst of it.—Spare Moments.

GREATEST NERVE IN THE WORLD.

"Waddles," remarked Dismal Toddlar, tearfully, "I have worked the district between Chicago and Peory for thirteen years, and I thought I'd seed all kinds of nerve, but I hope to be caught working if I haven't just struck nerve for the first time—and in a woman, too."

"Who's the matter?" "I called at that house over there and asked for a child and when I had sprung my tale of woe the lady asked me if I wouldn't whistle for the dog so that she could set him on me."—Chicago Tribune.

SHE WAS RIGHT, OF COURSE.

After St. Paul.

May Blum—What an apostle Blanche would have made. Frank Beach—Why so? May Blum—Did you ever see a greater fisher of men?—Funny Folks.

FOR YOUNG PEOPLE.

THE DREAMER.

When I am sleeping in my bed,
The little people in my head
All sport and frolic, dance and play,
As they will never do by day.

They play at being king and queen,
Or catch the fairy folk unseen;
They act out giant, troll, or gnome,
Or in far Africa's forest roam.

They go with Sunday on his trips,
Or take command of pirate ships,
And capture galleons of Spain,
Pearl-freighted on the Spanish main.

Yet each one still pretends he's me;
While I am sound asleep, you see:
They play I run and shout and leap—
And yet I'm lying fast asleep.

They have such jolly lots of fun,
And see such sights! Yet never one
Will wake me up that I may go
To share the joys that please them so.

And if I wake, and try to hear,
Or at their frolics try to peer,
Then all the sky-tips in a trice
Are quiet and demure as mice.

—Arlie Bates, in St. Nicholas.

THE DRUM-MAJOR'S DUTY.

A Gaudy Personage Who Is Useful as Well as Ornamental.

When I was a boy in New York, as many of us youngsters walked in front of a procession as there were soldiers in it. The platoon of mounted police which now clears the street for blocks ahead, was then—and it was not so many years ago, either—unknown for there were no mounted police. To us the real drum-major seemed little more than an ornament and a harlequin, a soldier-acrobat who would have been as much in place in a circus as at the head of a regiment. The drum-majors were fine-looking fellows then as now: tall and shapely, their natural height increased by their great bearskin caps, so that they all seemed sprung from a race of giants. When ever the drum-corps had been playing for some time, we would look back impatient for the drum-major's signal to the band. How it thrilled us to see his stick flourish in the air; and when, as he brought it down, the band broke in upon the drums with a crashing chord, our forms straightened up and our steps became more buoyant! In those days, I thought the duties of the drum-major were limited to specifying all matters to the drum-corps, and the band, and between times looking as large and handsome as possible. But, while the drum-major cannot, under any circumstances, be said to have been born to bluish music, he performs many duties of which the looker-on at a street parade knows nothing. It requires a visit to a state camp or a United States army post to learn what the tall man in the bears-

THE PRIDE OF THE REGIMENT.

skin hat has to do. For there he is busy even when he isn't on show. The drum-major is to the band what the first sergeant is to a company. He drills the musicians in marching, sees that they are rightly equipped, that the brasses are bright and the music in order. The band, of course, practices under the band-leader, but the drum-major has full charge of the field music—the trumpets and the drum-and-bugle corps. In fact, the drum-major derives his name from the fact that he was formerly the chief drummer of the regiment. He has been an ornament of the British army since the reign of Charles II., and has long furnished the continental services. He is drum-major in the French army, and he wears the same name in the German service until the gradual giving up of French terms after the Franco-German war converted him into the *Regiments-trouffeur*, the regimental drummer—a term which well expresses the original duties of the office, but lacks the swing of "drum-major" and "tambour-major." And what is a drum-major without swing?

At "parade" at an army post, or state camp, the drum-major leads the band and field music to the front, and brings it to a halt facing the color-line. At the approach of the adjutant he gives the command, "Open ranks," and when the arms have been inspected, "Close ranks." He then marches the band back to its place on the color-line.—Gustav Kolbe, in St. Nicholas.

DOG ADOPTS A CHICKEN.

A Spaniel Who Stunned and Jealously Guarded an Orphan Bird.

Many stories have been told of what one animal will do for another which is its natural prey. A remarkable instance of a dog with sporting blood in its veins caring for a chicken has just occurred in New York city.

Beatty is the name of the dog. She is owned by Dr. Frederick A. Lyons, of 50 East Sixty-third street, New York. Dr. Lyons is very fond of dogs and he once owned a valuable St. Bernard, a prize winner, now dead, but whose countenance and presence adorned the walls of his study.

But Beatty ought to win a prize any-

where. She has watched with motherly care the tender footsteps, carried off to places of safety when danger menaced, and coddled in her warm furry coat. What more could an old hen do? Beatty is a spaniel, a Welsh cocker, about four years old. It is a long while since she had a family. She has a black, glossy coat, with white undermarking, and white paws and a white streak down the middle of the head. When the farm show was in progress in Madison Square garden Dr. Lyons' children visited it and one of the boys was given a chick from the incubator. The chick died, but Dr. Lyons got another, also hatched by artificial means.

Beatty's protégé, therefore was brought into the world without father or mother. The fact that it was an

BEATTY AND HER PROTEGE.

orphan did not in the least excite the spaniel's sympathy—that is, at first. A box was procured for the newcomer and its quarters comfortably fixed up. Dr. Lyons' little boy told his father that Beatty was disposed to be unfriendly toward "Chicky."

"That is because Beatty has not been introduced," said the child's father.

Early with the doctor had the chick brought out, and Beatty, came nosing around as if to find out how good "chicky" might be on the half shell. The doctor gave the dog a gentle slap, and after awhile Beatty came to regard the feathered newcomer as one of the family. By and by the dog would lie down at the door or the chicken's box and watch for its coming and attempt to play gently with it.

The chick at first did not like these attentions, but soon seemed to be responsive. At last it was quite evident that Beatty had grown to be very fond of the bird. She would lick it all over, just as if it were a pup, and fondle it as if it were one of its own kind.

The chicken was missed one night. It was found at last in the cellar with Beatty. The dog was coiled, and there was the chicken cuddling close up to its warm body and quite contented. The spaniel had taken it in its mouth and carried it downstairs.

It was quite a common thing for Beatty to catch up the chicken in her mouth and carry it off to a corner. The chicken had a great objection to this common-carrier business. It could stand anything but that, even the bite, for its tiny and its tender used to get very much ruffled. But Beatty would stand no nonsense. She in her superior wisdom knew what was best for the young and inexperienced thing committed to her care.

Beatty was extremely solicitous for its welfare. She was very jealous of any outside interference and fearful of what strangers might do. When the butcher, the groceryman or other tradesmen came into the basement the spaniel would bark furiously and make a rush for the chicken, over which it stood guard until the suspected danger had passed.

Any one of the family might fondle the chicken, of course, but no stranger dared do it or Beatty would want to know the reason why. If the chicken were too near the door when the bell rang Beatty would grasp the bird in its mouth and carry it off to a place of safety.

But, alas! Notwithstanding all the motherly care of Beatty and the fact that there was a doctor in the house the chicken died the other day. Beatty was grief-stricken and refused to be comforted. She would sniff around the little chicken house and gaze here and there expecting her protégé and and there expressing her protest and her loss of appetite. I saw the spaniel a few days ago and if ever a dog had a mournful feeling plainly expressed Beatty certainly had.

EXTORTION REQUIRED.

Uncle Silas Wouldn't Pay a Quarter for Park and Buses.

One day lately a lanky individual in a long and faded brown overcoat dropped into a city restaurant, took his seat at one of the tables, placed his hat on the floor by the side of his chair and looked to one of the waiters.

"Have you got any stewed punkin?" he asked.

"I think not," replied the waiter.

"Got any fried onions?"

"No."

"Well, teenies?"

"No."

"What have you got that a man can eat, anyhow?"

"Here is our bill of fare."

"I can't read it without my specs, and I didn't bring 'em. S'pose you was hungry yourself, what'd you want?"

"Well, here's porterhouse steak, roast turkey with cranberry sauce, well-oiled, broiled saddle of venison, minced clams on toast, pork and beans."

"Pork an' beans! That'll do. Bring me some pork an' beans and a cup of sassafras tea purty soon."

"We haven't any sassafras tea."

"Hain't got no sassafras tea? What kind of an eatin' house are you runnin'?"

"Don't you know everybody ort to drink sassafras tea? How mach do you charge for pork an' beans?"

"Twenty-five cents."

The stranger stooped and picked up his hat, put it on his head, rose deliberately and said to the waiter in a tone of withering rebuke:

"Young man, when I want to get roasted on pork an' beans I'll go to a first-class tavern and have it done in style. Any charge for the time I've been settin' down here? No? Well, good day!"

FARM AND GARDEN.

ALL UNDER ONE ROOF.

Plan of a Barn Which Is Suitable for General Farming.

Your correspondent who asks for a plan of barn, the roof of which shall cover horses, cows, sheep, pigs, poultry, hay, grain, straw, tools, carts, everything useful where general husbandry is in practice, asks for something that a great many people would like to see. I do not wish to be regarded as advocating the desirability of bringing every farm interest under one roof, for such a plan is not in all respects desirable; but yet there are many excellent features, particularly in the line of economy of labor and likewise economy of building, if one has natural conditions that are favorable. Your correspondent appears to have one of the natural conditions that aids greatly in making the plan of "everything

ALL UNDER ONE ROOF.

under one roof" feasible. A bank twenty feet high adjacent to the proposed site of the building can be so utilized as to aid greatly in reaching the desired end.

An illustration is given herewith that shows how a building may be constructed against a bank in a way to give entrance at grade to three different floors, and that, too, without leaving very much of any floor under ground. A floor-plan is given of the main or feeding floor. There are located the horse and cow stalls, colic pens for young calves, a feed room, a granary, hay bay and a silo. Scaffolds and floors above the feeding floor afford room for the storing of additional hay, straw and grain, a horse fork and carrier raising these materials and placing them in any desired position. At one end of the manure gutter on this floor is a trap door covering a chute that conveys the manure to the lowest basement. Communication can be had with the same chute on the floor below the main feeding floor, which is devoted to the use of young cattle, sheep, pigs and fowls, feeding chutes coming down to this floor beside the mangers in the horse and cow stalls. This floor should be excavated back the full size of the barn, and the excavation lined with rock-work laid in a mortar of lime, cement and sand. To insure perfect dryness, a tile drain should be laid outside the base of this rock-work when the wall is built.

The lowest floor of all extends back under about one-third of the barn, and so requires but little excavation. This floor has a manure pit upon one side, while the remaining space is devoted

FLOOR PLAN OF BARN.

and set the three-pound pall in the center, soldering the two together in two or three places, so as to leave a space of three-quarters of an inch all around the bottom of the pall for water (see Fig. 2.) The water will come to about three-fourths of the distance to the top of the rim, but will not run over. It can be filled by putting it in a pail of water, upside down. The chicks can drink, but cannot get wet. The same may be made of a tomato can and a small, deep tin plate, or even with a tin cup and plate. The whole thing need not cost more than five or ten cents, according to its size, and if it is too tight, it may be held in place by using a piece of brick on the edge of the can. Fig. 1 shows a three-pound pall with the holes cut near the bottom. Fig. 2 shows the top of a five-pound pall soldered to the bottom of a three-pound pall—the arrangement ready for use.—Farm and Fireside.

NOTES ABOUT HORSES.

No part of a breeder's time is more profitably employed than that employed in looking after young foals.

KING WILLIAM, the largest horse in the world, being 27½ hands high and weighing 3,025 pounds, died recently in Indiana.

The only Derby winners in twenty years which have done really well as four-year-olds are Ben Or, St. Gatien, Genoa and Ayrshire.

The present low prices have discouraged production so that it seems plain that by the time the foals of '24 and '25 are marketable the supply will be much reduced.

ANIMALS MUST show speed nowadays, or they will be sold for little money. It is useless to tell a man that a horse is fast. He won't believe it unless it is demonstrated to him.

In England, in old times, when wet ground covered with moss was being drained and worked before it was thoroughly dry the plow horses were shod with boards ten inches square to prevent their sinking into the drains, which were covered with turf.

At a recent sale in England good driving horses sold briskly at \$150 each, good hunters and saddle horses sold for \$1,000 dollars each, while fine, well-matched carriage horses sold for \$1,000 to \$1,500 a pair. England has plenty of horses and uses electricity, yet there is a demand for good horses which are bred for special purposes.

Dipping Hens for Lice.

It is not pleasant work to dip a lot of hens in order to rid them of lice. The best substances to use are some of the well-known sheep dips. The hens should be held by the legs, heads down, with one hand holding the head. Dip them with the head under first, and let the solution cover every portion of the body, not even the toes excepted. Pull them out and fro in the tub two or three times and set them free. It should be done only on warm, clear days.—Farm and Fireside.

PIGEONS FOR PROFIT.

Experience of a Man Who Has Made the Business a Success.

My manuscript to get the most profit at the least outlay has been as follows: I aim to have only mated pairs and never to break them up. There should only be as many pairs as can have two nesting places each, safe from disturbance by the others. Those that have chosen nests and have used them for breeding will generally defend and hold them for life. They often have eggs in one nest while feeding squabs in the other. Young pigeons can be sold as squabs as long as any yellow down shows on the head, but the best time to kill them is when they are feathered out, and just before they are ready to leave the nest. If too young, they are soft; if they fly away, they get thin. They should be collected every week, or two weeks at least. If eggs are broken in the spring, all may be brought in the about the same time, and squabs will be nearly the same in age.

If it is desirable to increase the number of old birds, the late reared ones, if allowed to remain, cause less disturbance, as they are not likely to mate before spring. Early reared birds are more hardy, but they soon mate and fight for nests at a time when there is the most breeding season, and cause much loss of eggs and young. They are also more apt to seek a home elsewhere.

If several mated pairs are kept, and mated where grain is spilled, but little feed will be needed, but feed given them makes them attached to their home, and is as well invested as when fed to chickens for market. Taxidermists use many white pigeons, but of late pay so little for them that it is more profitable to sell them as squabs.

Dry pigeon manure may be sold at tanneries for sixty to seventy-five cents per bushel, delivered, if free from straw and grit. The loft need not be cleaned of this but once in several years. The time to clean is in winter, when the birds have ceased to breed.

Keep your loft clear of all mated birds, have double compartments well secluded for each pair of nests, and market all the squabs before they fly.—Samuel Cushman, in Farm and Home.

WATER-CAN FOR CHICKS.

How to Make Excellent Use of Three-Pound Lard Pails.

A water-can for little chicks, which is easily made and very handy, is the design of Mr. M. H. Douglas, Wisconsin. Take a three-pound lard-pail and solder the cover on airtight. Then punch six or more holes as near the bottom of the pail as possible (see Fig. 1), and take the cover of a five-pound

pail and set the three-pound pall in the center, soldering the two together in two or three places, so as to leave a space of three-quarters of an inch all around the bottom of the pall for water (see Fig. 2.) The water will come to about three-fourths of the distance to the top of the rim, but will not run over. It can be filled by putting it in a pail of water, upside down. The chicks can drink, but cannot get wet. The same may be made of a tomato can and a small, deep tin plate, or even with a tin cup and plate. The whole thing need not cost more than five or ten cents, according to its size, and if it is too tight, it may be held in place by using a piece of brick on the edge of the can. Fig. 1 shows a three-pound pall with the holes cut near the bottom. Fig. 2 shows the top of a five-pound pall soldered to the bottom of a three-pound pall—the arrangement ready for use.—Farm and Fireside.

The Poultry and Egg Industry.

The census report for 1899 shows the value of eggs produced annually to be over \$100,000,000, while the value of poultry (chickens, turkeys, ducks and geese) amounted to about the same. Or, to make it plain, the total annual production of poultry and eggs amounts to \$200,000,000. At the present prices of wheat, the poultry and eggs are more valuable, and the market is here at home.

It is safe to say that the report does not include all, as a large number of persons were not visited during the enumeration of poultry and eggs, but the figures are sufficient to enable those interested to arrive at a partial knowledge of the poultry and egg production. In a single decade the poultry and eggs of the United States amount to enough to pay off our national debt, and the money invested in that direction finds its way into all other business channels.

Where Alsike Clover Is Best.

For those who wish to keep land in clover only a single year the alsike variety is probably best. It bears its seed in the first crop of the second year's growth. When that is not the plant dies. But alsike hay is sweeter than hay from the first crop of common red clover. It does not have long tap roots reaching into the subsoil as red clover does, but instead a network of roots that run through the soil nearer the surface. It is probably the greater amount of warmth that alsike clover roots get early in the season that makes its hay better than that of red clover. When the soil warms deeper later in the season the red clover hay becomes more nutritious.

CARROTS yield about fifteen tons per acre in Scotland, and sold for fifteen dollars a ton in Glasgow last winter. They exceed the price of potatoes, although potatoes have more nutritive matter in them.

A Marvellous Showing.

The U. S. Government, through the Agricultural Department, has been investigating the baking powders for the purpose of informing the public which was the purest, most economical and wholesome.

The published report shows the Royal Baking Powder to be a pure, healthful preparation, absolutely free from alum or any adulterant, and that it is greatly stronger in leavening power than any other brand.

Consumers should not let this valuable information, official and unprejudiced, go unheeded.

ROYAL BAKING POWDER CO., 106 WALL ST., NEW-YORK.

A WONDERFUL STORY.

Realization of a Druggist Who Missed His Calling.

The reformed druggist was talking to the man with the cracked lip. "Now, collodion," he said, "collodion is just the thing to put on that lip of yours. It is a great thing to promote the growth of new skin. Just brush that lip with collodion and it will be well in no time. But," he continued, warningly, "you want to be very careful. One of the worst accidents I ever saw was the direct result of collodion."

The man with the cracked lip shivered apprehensively. "How was that?" he asked.

The reformed druggist lighted a fresh cigar and stuck his feet upon the radiator. "Yes," he continued, reflectively, "that was a bad accident, and the worst of the whole thing was that I was responsible for it in a way."

"But what was it?" insisted the man with the cracked lip.

"It was just like this: One day before I reformed, and while I was keeping a drug store, a man came into the store with the worst pair of lips I ever saw. Why, that fissure on that lip of yours wasn't a marker to the only man who was in his lower lip, I saw in a minute that he must be suffering for those lips, and he told me that I had guessed right. Then I told him just what I have been telling you. I explained to him the action of collodion, and he told me to put some on his lips."

"I got the bottle and picked out a camel's hair brush. Then I painted those lips in a way that no man's lips were ever painted before. I just dabbed the collodion on by the spoonful. Pretty soon I had them all fixed out, and then the accident occurred. What an accident that was! Why, the man's head was just blown clear off his shoulders, and instead of getting a half dollar for my job, I was out ten cents for telephoning for the ambulance to come and take him away."

"I don't think I catch the drift of your remarks," said the man with the cracked lip. "Did I understand you to say that the man's head was blown off?"

"You did," said the reformed druggist. "His head was blown clear from his shoulders."

"That how?" Did he have a dynamite cartridge in his mouth, or something of that kind?"

"O, no." The reformed druggist laughed a bit. "You remember I said that he had protruding teeth, and that I also said I put a great deal of collodion on his lips? Well, collodion is made of gum cotton and ether, and when it got in the sore spot he kinder brought his teeth together with a snap. Some way or other those teeth struck a spark that set off the gum cotton, and there was a big report and the man's head was blown into bits."

The man with the chapped lip sat for a moment in silence. Then he said, slowly: "I don't wonder that you got out of the business. Your proper place is press agent for a fishing club."—Buffalo Express.

Frankly Stated.

Demson Elbonnie—Kimmel, I've come to ax a favor ob you.

Col. Fairfax—To help you out of debt?

Demson Elbonnie—No, sah, to help me into debt—wif yerself. Truth.

Don't make two bites at a cherry. What's the use of taking one thing for coarse, and another for fine, washing. Pearl-line will do it all. For washing wood-work, tinware, silver, marble, glass, dishes, carpets, or anything you can think of, Pearl-line is the best. It saves not only work, but wear. Let it help you in all these ways. You musn't think that the easy washing of clothes is all that Pearl-line is made for.

Send it Back. Peddlers and some unscrupulous grocers will tell you "this is as good as," or "the same as Pearl-line." IT'S FALSE—Pearline is never peddled, and if your grocer sends you something in place of Pearl-line, he honest—send it back.

Were You Ever South in Summer?

It is no hotter in Tennessee, Alabama, or Georgia than here, and it is positively delightful on the Gulf Coast of Mississippi and West Florida. If you are looking for a location in the South go down now and see for yourself. The Louisville & Nashville Railroad and connections will take you to all points South, for trains of August 7th at one fare round trip. Ask your ticket agent about it, and if he cannot sell you excursion tickets write to C. P. Atkins, General Passenger Agent, Louisville, Ky.

THURSDAY, AUG. 30, 1894.

REPUBLICAN PRIMARIES.

The Republican voters of Garrett county are requested to assemble in their respective districts in primary meetings on

Saturday, Sept. 1st, 1894,

to elect five delegates to represent Garrett county in the Republican Congressional Convention to be held in Frederick city on Wednesday, September 3, 1894.

Oakland, Md., Tuesday, September 3rd, 1894, at 2 o'clock p. m.,

to elect three delegates to represent Garrett county in the Republican Congressional Convention to be held in Frederick city on Wednesday, September 3, 1894.

Chairman Republican State Central Committee for Garrett County.

DURING the first week in July we sent out from this office nearly half a thousand statements of arrears for subscriptions, amounting in the aggregate to over sixteen hundred dollars. The returns have been altogether too slow and we wish to call the attention of those receiving statements at the time mentioned to the fact.

We only want what we have labored for and we want it badly.

We dislike this method of calling the attention of our friends to a matter that has likely slipped their minds, but it has become a case of necessity.

Of the sixteen hundred dollars we have received less than two hundred and it is impossible for any person of limited means to carry on a business of this kind without money, so come right along friends, and settle your bills.

Our esteemed friends the enemy have acquired such a habit of objecting, through thirty years of opposition, that they are bound to object even to their own tariff bill. They objected to Lincoln's inauguration, to his war measures, to the abolition of slavery, to the resumption of specie payment, to the McKinley law, and now to the Gorman bill.

A Striking New Departure.

For the first time in its history the country has a new revenue measure which has become a law without the President's signature. Moreover the President has branded it as the embodiment of "party perfidy and party dishonor," language which was intended to be as severe and caustic as the vocabulary affords.

This is the sort of measure which the Democratic party has put upon the country, and the country may make the best of it. The whole performance is without a parallel in our history.

Use Broken Stone.

The Hagerstown despatches to the New York Sun has the following to say about the public roads of Washington county and the methods employed to improve them:

"The present board of county commissioners of Washington county are levying \$18,000 a year for public roads and bridges. They require that three-fourths of the amount spent on the roads shall be used for macadamizing. The result of this wise provision is already apparent. If the same policy had prevailed for the past twenty years Washington county would probably have at this time the best roads in the United States. Repairs made with broken stone are permanent, and do not have, like those made with clay or soil, to be made over again the next year. In travelling over the public roads, or the 'mud roads' as they are appropriately called to distinguish them from the turnpikes, here and there short stretches which have been macadamized, may be seen. These are

lengthened and increased each year, and as the worst places are mended first, the roads become substantially improved.

In every portion of the county there is an abundance of stone and there is no excuse for using any other material. Every good farmer picks up the loose stones from his fields. Along the turnpikes this stone is sold to the companies at 25 cents a perch or a little more, a perch being in bulk about equal to a ton of coal. Where there is no turnpike near the farm the stone is dumped on the public road and it is broken by the road supervisors. In the Clearspring and Kinggold districts there is much public spirit and an abundance of stone is supplied, giving those districts as a result the best roads in the county. Where stone cannot be obtained gratuitously the supervisors are authorized to pay 10 cents a perch for it, a sum which assists in paying for picking up the stone."

Renovating Wornout Lands.

At a recent meeting of the Vansville Farmers' Club of Prince George's County, Md., the question under discussion being "The best method of renovating and improving wornout lands," the following method, recommended by Mr. William S. Powell, president of the Powell Fertilizer and Chemical Company of Baltimore, Md., whose experimental farms are located at Annapolis Junction, Md., seems to meet with general approbation and is well worth a trial by those who are endeavoring to "make a living" and "improve the land" at the same time. Mr. Powell said:

"My plan, Mr. President, based upon theory and followed out in practice, for the improvement of wornout lands, is, taking them as a class, where lands have not been recently cultivated: it follows they are occupied by bushes, briars and weeds; therefore I grub them in August, as this is the best month to kill the bushes, as the sap is then largely in the body and at its fullest flow. I then break the land up deeply, I then turn under completely all the weeds, to get a benefit from these weeds as green manures, thus setting in motion what is known in chemistry as nitrification, and further to bury the weed seeds before they are sufficiently ripe to germinate, and thereby largely prevent a return crop of weeds in the spring I harrow with a spring-tooth harrow and cross-harrow. I then drill with a wheat drill a fertilizer containing only phosphoric acid and potash. This can be made of acid phosphato and kainit, equal parts, say 400 pounds to an acre, which supplies these two elements of plant food in excess of what any crop can use. I plant to corn, and under the corn at planting time I put 100 pounds of fertilizer to the acre; this is quick-acting ammoniated fertilizer, composed of equal parts of blood, tankage 7 per cent, and nitrate of soda which starts germination quickly and pushes the young corn ahead fast enough to get it beyond the cut-worm age.

"Of course, the corn is worked thoroughly as the season and other farm work will allow. After the corn is removed I seed with wheat or rye using fertilizer, 300 pounds to the acre, which is low in ammonia from bone tankage and high in potash from muriate of potash and medium quantity of phosphoric acid, which is gotten partly in a reserved state from the tankage used as an ammoniate, and in a soluble form from acid phosphate. With the grain I sow half the usual quantity of timothy. In the spring 100 pounds of nitrate of soda to the acre is broadcasted as soon as the frost begins to come out of the land; the balance of the timothy and clovered is sown at the same time. After the wheat comes off, I topdress the young clover with 100 pounds of Nova Scotia plaster to the acre, which helps to attract and retain the moisture, thus preventing the usual killing out of the young grass in the August droughts.

The next season I cut the grass, but in the fall I topdress with lime, and repeat the same crops in rotation until I get to a good grass stand then I can reasonably expect good crop returns. If I do not wish to raise the small grain, but recrop to corn, at the last working of the corn I sow row peas, 15 bushels to the acre, in the corn ground. I turn under when fully ripe, making a small application of lime to the plowed ground, in the spring harrow and cross-harrow, drilling in a fertilizer containing only potash and phosphate acid, as it will not do to apply ammoniated fertilizers and lime to the same crop as the lime drives off the ammonia; in fact, the peas turned under furnish all the ammonia the corn crop needs.

"I believe under this plan paying crops can be raised and land permanently improved."

WITHOUT HIS SIGNATURE.

The President Greatly Desires Free Coal and Iron Ore.

WASHINGTON, D. C., Aug. 27.—President Cleveland has written the following letter to Representative Catchings, of Mississippi, in which he sets forth his views of the new tariff law and gives his reasons for not approving the bill:

EXECUTIVE MANSION, WASHINGTON, D. C., Aug. 27.
Hon. T. C. Catchings:

MY DEAR SIR:—Since the conversation I had with you and Mr. Clarke, of Alabama, a few days ago, in regard to my action on the tariff bill now before me, I have given the subject further and most serious consideration. The result is I am more settled than ever in the determination to allow the bill to become a law without my signature.

When the formation of legislation which it was hoped would embody Democratic ideas of the tariff reform was lately entered upon by Congress, nothing was further from my anticipation than a result which I could not promptly and enthusiastically endorse.

It is therefore with a feeling of the utmost disappointment that I submit to a denial of this privilege. I do not claim to be better than the masses of my party, nor do I wish to avoid any responsibility which, on account of the passage of this law, I ought to bear as a member of the Democratic organization, neither will I permit myself to be separated from my party to such an extent as might be implied by my veto of the tariff legislation, which, though disappointing is still chargeable to Democratic effort. But there are provisions in this bill which are not in line with honest tariff reform, and it contains inconsistencies and crudities which ought not to appear in tariff laws or laws of any kind. Besides there were, as you and I well know, incidents accompanying the passage of the bill through Congress, which made every sincere tariff reformer unhappy, while influences surrounded it in its latter stages and interfered with its final construction, which ought not to be recognized or tolerated in Democratic tariff reform counsels.

And yet, notwithstanding all its vicissitudes and all the bad treatment it received at the hands of pretended friends, it presents a vast improvement to existing conditions. It will certainly lighten many tariff burdens that rest heavily upon the people. It is not only a barrier against the return of mad protection, but it furnishes a vantage ground from which must be waged further aggressive operations against protected monopoly and governmental favoritism.

I take my place with the rank and file of the Democratic party who believe in tariff reform and who know what it is, who refuse to accept the results embodied in this bill as the close of the war, who are not blinded to the fact that the livery of Democratic tariff reform has been stolen and worn in the service of Republican protection, and who have marked the places where the deadly light of treason has blasted the counsels of the brave in their hour of right.

The trusts and combinations—the communism of self—whose machinations have prevented us from reaching the success we deserved, should not be forgotten nor forgiven. We shall recover from our astonishment at their exhibition of power, and if then the question is forced upon us whether they shall submit to the free legislative will of the people's representative or shall dictate the laws which the people must obey we will accept and settle that issue as one involving the integrity and safety of American institutions.

I love the principles of true democracy because they are founded in patriotism and upon justice and fairness toward all interests. I am proud of my party organization because it is conservatively sturdy and persistent in the enforcement of its principles. Therefore I do not despair of the efforts made by the House of Representatives to supplement the bill already passed by further legislation, and to have engrained upon it such modifications will more nearly meet democratic hopes and aspirations.

I cannot be mistaken as to the necessity of free raw materials as the foundation of logical and sensible tariff reform. The extent to which this is recognized in the legislation already secured is one of its encouraging and redeeming features; but it is vexatious to recall that while free coal and iron ore have been denied us, a recent letter of the secretary of the treasury discloses the fact that both might have been made free by the annual surrender of only about \$700,000 of unnecessary revenue.

I am sure that there is a common habit of underestimating the importance of free raw materials in tariff legislation, and of regarding them as only related to concessions

to be made to our manufactures. The truth is, their influence is so far-reaching that if disregarded a complete and beneficent scheme of tariff reform cannot be successfully inaugurated.

When we give to our manufacturers free raw materials we unshackle American enterprises and ingenuity, and these will open the doors of foreign markets to the reception of our wares and give opportunity for the continuous and remunerative employment of American labor.

With materials cheapened by their freedom from tariff charges the cost of their product must be correspondingly cheapened. Thereupon justice and fairness to the consumer would demand that the manufacturers be obliged to submit to such a readjustment and modification of the tariff upon their finished goods as would secure to the people the benefit of the reduced cost of their manufacture and shield the consumer against the extortion of inordinate profits.

It will thus be seen that free raw materials and a just and fearless regulations and reduction of the tariff to meet the changed conditions would carry to every humble home in the land, the blessings of increased comfort and cheaper living. The millions of our countrymen who have fought bravely and well for tariff reform should be exhorted to continue the struggle, both by challenging to open warfare and constantly guarding against treachery and half-heartedness in their camp.

Tariff reform will not be settled until it is honestly and fairly settled in the interest and to the benefit of a patient and long-suffering people.

Yours very truly,
GROVER CLEVELAND.

G. A. R. Annual Encampment.

Interest in the annual reunions of the Grand Army of the Republic and Naval Veterans' Association grows with each succeeding year, not only among the veterans themselves, but among all patriotic citizens of the republic.

The encampment this year at Pittsburg, from present indications, promises to be as interesting and enthusiastic as any reunion since the war. Thousands of veterans from all parts of the country will be present, and Pittsburg will surpass herself in showing them her hospitality.

The Baltimore & Ohio Railroad Co. will sell excursion tickets from all ticket stations on its lines east of the Ohio river, for all trains September 6th to 10th, valid for return passage on all trains until September 25th, inclusive, at one fare for the round trip.

For more detailed information write to Chas. O. Seull, Gen'l Pass. Agent, B. & O. R. R., Baltimore, Md. 35-2t

Weather Crop Bulletin.

Bittinger.—The past week has been good for farmers. A soaking rain on the 19th and fine weather the balance of the week. Oats about all cut and the crop short. Corn and potatoes will make a fair crop. Buckwheat promises well. Wheat seedling will commence about the 27th.

P. P. LOHR.

Swanton.—Rain is needed badly. Threshing has been in progress for the past ten days. Oats are good, as a rule. Wheat very poor, yielding from four to fifteen bushels per acre. The few apples grown in this section are small and wormy, and subject to rot.

C. W. SLABACH.

Thayerville.—This week has been very dry, with hot days, cold nights and easterly winds. Everything suffering for want of rain.

R. BECKMAN.

Deer Park.

Miss Bertie Hott is visiting Mr. and Mrs. Charles George.

Mr. and Mrs. Gen. W. F. Draper have gone to Bar Harbor, Maine, where they will spend a few weeks.

Mr. and Mrs. P. W. Connell and daughter Alice, formerly of this place but now of North Baltimore, who have been visiting their many friends here, returned to their home last Friday.

Mr. and Mrs. Mitchell, of Philadelphia, are visiting Mr. and Mrs. John R. Williams.

Mr. Henry Sysk, H. G. Davis' farm manager, is away in West Virginia on business.

Farmers in this locality are done harvesting except buckwheat, which promises to be a good crop.

Mr. Walter House, of Ohio, is spending a few weeks with his daughter, Mrs. C. K. Lord.

Hon. H. C. Latrobe spent last Sunday with his family here.

Governor Brown was the guest of Mr. and Mrs. C. K. Lord Sunday.

Mrs. S. C. Hoy is very ill.

Father Fosby was the guest of Hon. and Mrs. F. C. Latrobe Saturday and Sunday.

Ripans Tablets relieve pain.

FINANCIAL REVIEW.

Henry Clew's Weekly Lector on the Subject.

NEW YORK, August 25.—The past week has afforded a fair specimen of the sort of effects the end of tariff suspense has in store for Wall street. The feeling is that of universal relief from a universal obstruction. The way has been opened to a resumption of trade and enterprise in every direction; and in all interests there is a disposition to resume operations on something like a normal scale. There are no longer any great fears, nor any reasons for timidity, overhanging the markets. In every branch of trade, stocks of merchandise are in a starved condition; and the reasons which have for fifteen months caused buyers to pursue a policy of hand-to-mouth supply are disappearing. As a rule, prices of merchandise are unprecedentedly low; so that if the purchasing ability of consumers has been lessened, that difficulty is offset by a proportionate reduction in the costs of living and in the amount of outlays at large. Credits, as a rule, are in a sound and wholesome condition; so that the merchant who desires to enlarge his stock and extend his trade can have the needful time facilities, and at exceptionally low rates of interest.

These conditions certainly lay the basis for a sound and healthy revival of business. There is in the intrinsic state of affairs little to suggest misgivings as to the future; there is, in the contrary, much calculated to establish confidence in a continuous, steady, stable and conservative course of trade. The country has learned some serious lessons and therefore is disposed to be sober; but it is also very hungry for more trade and better profits, and is therefore disposed to turn to active account every chance for improving both. For the last four years, the perception of a coming change in our tariff policy has had a more repressing effect upon enterprise than is generally supposed; and the fact that that change has at last come, with little prospect of its being much disturbed for some years to come, prepares the way for many long postponed undertakings. The fact of the common cheapness of materials and of the quite general reduction of wages has a very direct tendency to invite revival in certain important branches of trade, especially those connected with building, machine plant, public improvements and railroads. How far the reduced scale of prices and the ex-ption of raw materials from duty may enable us to increase our export trade remains to be seen; in the meantime, however, it is a hopelessly significant fact that last year's reduction in values was attended by an increase in our exports of \$38,000,000, as compared with the year 1892-3.

The recovery that now seems to be setting in is something broader than a revival from the effects of last year's panic. That crisis, though immediately incident to the great silver fright, embraced also the effects of the deeper derangements that set in with the great barings suspension, and of which that failure was but a symptom. Those derangements were largely in the nature of over-production, over-speculating, over-trading, and were world-wide in their influence, and their effects still continue in the persistent depression of trade in every European nation. If the recovery from these four years of reaction first makes its appearance in the United States, it is nothing more than might be expected from the greater resiliency of our resources and from the fact that we have been less intimately connected with the disturbing causes than have other countries. It is reasonable to hope, however, that recovery on this side the Atlantic will tend to stimulate improvement on the other side, and thus it may quite possibly happen that the foreign markets, both commercial and financial, will respond to the improving tendency in our own.

HENRY CLEW.

The Wool Market.

The market is steady, but trade is moderate, sales showing a considerable falling off. A new complication has arisen that is liable to seriously effect the market for foreign wools. It is declared that foreign wools in bond will not be allowed to come in free when the new tariff goes into effect owing to the peculiar wording of the bill, but that they will have to be assessed at the present duty. There is a large amount of wool held in bond waiting for the new tariff, and if this interpretation is correct it will upset all calculations, besides causing a considerable loss to importers. The wools in this case will have to be exported, and then either be reimported or sold abroad.—Bradstreet's.

LADIES

Needing a tonic, or children who want build-up, should take

BROWN'S IRON BITTERS.

It is pleasant, cures Malaria, Indigestion, Biliousness, Liver Complaints and Neurasthenia.

Loch Lynn Heights.

The boom at Loch Lynn Heights continues in full force. Lots are still being sold at good prices. Over \$1,000 worth of property has been sold since your last issue.

E. B. Franzheim, a Wheeling architect, was here Monday and laid off the hotel grounds and is now engaged in making plans and estimates for the new hotel soon to be erected.

A new road machine has been purchased and is now on the ground. A large force of men are at work clearing off and grading the streets and alleys, which will be completed this fall.

Two new cottages have been commenced already and others will soon be under way.

Arrangements are now being made for the new water works and electric light plant.

A rule has been adopted establishing a building line at a distance of twenty feet from the street and requiring all stables and outbuildings to be located on the alleys.

Attorney Peddieord and County Surveyor Harned were here Monday surveying the George P. White farm adjoining Loch Lynn, which has been purchased by Messrs. Alderson and Somerville, and is now being laid out in lots corresponding with those of Loch Lynn, which will be sold. The same parties have also purchased the Baker farm of 250 acres adjoining the White farm, which will also be laid out into lots. This will make over 500 acres of desirable property in Loch Lynn Heights.

Dr. and Mrs. Moxey, of Edinburgh, Scotland, have been holding a series of interesting gospel meetings at Loch Lynn which will continue through the week.

Real Estate Transfers.

The following transactions in real estate have been recorded in the office of the clerk Circuit Court since Wednesday of last week.

The Mountain Home Company to Franklin E. Rathbun, lot No. 77 in Loch Lynn Heights; \$94.

The Mountain Home Company to Clarence T. Rathbun, lot No. 76 in Loch Lynn Heights; \$95.

The Mountain Home Company to Clarence J. Rathbun, lots Nos. 50, 51 and 52 in Loch Lynn Heights; \$240.

The Mountain Home Company to Warren Rathbun, lots Nos. 78 and 79 in Loch Lynn Heights; \$190.

The Mountain Home Company to A. C. Whetsell and Walter S. Wolfe, lots Nos. 5, 6, 7 and 8 in Loch Lynn Heights; \$300.

John J. and Daniel J. Brenne-man to Moses D. Yoder, military lots Nos. 2421, 2422, 2423, 2424 and 2426, 250 acres; \$1, etc.

Moses D. Yoder and wife to John J. Brenne-man, military lots Nos. 2421, 2422, 2423, 2424 and 2426, 250 acres; \$4,500.

Mountain Lake Park Association to Susan P. Pollock, lot No. 830 in Mountain Lake Park; \$200.

Marmaduke C. Best, mortgagee, to John Shartzer, a parcel of land near Oakland; \$5, etc.

The Mountain Home Company to Verona Maple, lots Nos. 17 and 18 in Loch Lynn Heights; \$120.

G. A. Shriver to the Mountain Home Company, lot No. 98 on the plat of Lake View; \$100.

The Mountain Home Company to Nelson E. Whitaker, a parcel of ground in Loch Lynn Heights; \$750.

Henry G. Davis and others to Adolph Pilsinger, 71 acres of land; \$568.

The Mountain Home Company to George E. Fisher, lot No. 36 in Loch Lynn Heights; \$50.

THE OLD HILL-PATH.

"This true, it is as graceful as when, in other days, it wound along in beauty to the top; but as I gaze this musing hour upon it, sad tears my eyelids fill. For something's gone forever from the old path up the hill. The sunlight and the shadows rest upon it with the same Dear benedictive presence as in the days when came Noaching care to haunt me, from morn till eve at will. Ere something passed forever from the old path up the hill. The breezes, as they loiter by the old air fondly croon. The little birds in the tree-tops sing as in my life's lost June. And, as then, the myriad blossoms all around their wealth dispart. But something's gone forever from the old path up the hill. Something—a face—a touch of hand—a voice—a presence—lost. A world that brought me heaven, all vanished with the flow. Of pauseless Time, and, slowly, along I wander still. With something gone forever from the old path up the hill. Would ye might come again—again on days so dear to me. And give me back the glory of my life's sweet Arcady. For though Summer renews a goddess, in my heart lives winter's chill. Since something's gone forever from the old path up the hill. Lift my wet eyes skyward, and plead: "Why must it be— This latest desolation, this awful misery? But silence meets my heart's cry, while fresh tears my eyelids fill. Ah, something's gone forever from the old path up the hill. The sun in royal splendor is flushing all the west. The day is dying—dying—till soon be time for rest; But oh, to rest for me, as all alone I wander still. With something gone forever from the old path up the hill. —George S. Levey in Youth's Companion.

A DOG COLLAR.

It Was One of the Implements of a Woman Thief.

One Sunday morning two young men sat in the smoking-room of a cozy apartment. Outside the snow was falling silently in great, white flakes. On the divan, his tail and legs ornamented with tufts of curly black hair, his body shaved in the improved fashion, a poodle shambled peacefully, and Floyd Tailer, the owner of the premises, attired in a smoking jacket of horse-play, was loling in an easy chair, his slippers feet stretched toward the fire. His companion, Arthur Van Stude, had been his greatest friend at college, and as they were sitting in their first meeting in three years. Van Stude had been in India killing big game, and had barely escaped having the tables turned, as a large scar across one cheek testified. Tailer had stayed at home, but to him had come the greater change. As he expressed it, he was "settled down, old married man with a family"—which meant that he had the sweetest little wife in the world and a tiny mite of pink-and-white humanity known in the house as Baby.

"That's rather a fine dog you have there, Arthur," said Van Stude, turning to the poodle and lazily looking over the sleepy animal. "Well, I should think so," replied Tailer. "I don't suppose you will believe me when I tell you that when he came into my possession he was worth no less than one thousand dollars. The spring after you went away, he went on, 'having finished my college course, I went over to the other side for the London season. I went to London, and in London I stayed long over the time I had allotted to that city had expired. It was there I met Edith. In six weeks we were engaged. The remainder of the summer I passed in Scotland with the family of my fiancée. They had planned to go to Nice when the cold weather came on, and, of course, I determined to go with them. We went as far as Paris together, but at the last moment I was detained in that city for a few days, and was obliged to allow the rest of the party to proceed without me, promising to join them in a week at most."

"I had run short of funds, and the remittance expected for my month's board had not arrived. This I did not consider necessary to explain to Edith and her family. I said vaguely that business kept me in Paris. Four days after their departure the letter from my father arrived. He had heard of my engagement, and, to my satisfaction, approved of it. Besides the amount expected he sent an additional one thousand dollars, with which he instructed me to buy a suitable present for Edith. As the modest diamond I had bought for our engagement had been my only gift, I was pleased and gratified with my father's generous present."

"The following morning I started out in search of something for my dear girl, whom I should be with the very next day. I visited all the leading jewelry stores on the Avenue d'Opera, and was so confused by the glittering array of gems spread out to lure the American dandy from wealthy travelers that I could decide on nothing. My one thousand dollars, which had seemed so much, now made me despair of finding anything worthy of my beloved wife, my eyes fell upon an extremely beautiful necklace, consisting of two rows of pearls caught together at intervals by small diamond clasps. It lay in a velvet case of azure blue and the moment I saw it I decided that it was just what I wanted. I asked the price.

"Five thousand francs, monsieur, replied the salesman.

"Exactly the sum I had to spend. I bought it without a moment's hesita-

tion. The little blue box was about to be wrapped up when the salesman discovered some slight imperfection in the clasp. He was profuse in his apologies, and said that it would be repaired and ready for the following morning. I explained that this would not do, as I was to leave the city on the night express for Nice. After a moment's hesitation the jeweler promised that I should have it at six o'clock without fail.

As I was leaving the store I noticed a woman standing by my side. I saw I noticed a woman. It would be more correct to say that I noticed a beautiful white hand with long taper fingers, on one of which was a diamond of unusual size and brilliancy. In this hand was leaning the counter I caught a few words spoken in a peculiarly musical voice. I was too full of the thought of Edith's happiness on receiving my gift to glance at the woman's face, and long before I had reached the sidewalk she was forgotten.

At 6 o'clock I returned, and, true to his promise, the man had the necklace ready for me. Placing it in the inside pocket of my coat I left the store and had just time to complete a few remaining arrangements before going to the station. I bought a first-class ticket and tipped the guard, after giving him to understand in my very best French that I did not want him to put other passengers into my compartment. I tucked my traveling rug around my knees, opened a French novel, and the door was opened, and a woman hurriedly entered the compartment and took the seat next the window on the other side of the car. I glanced at my unwelcome companion. She was dressed in mourning of the richest material and in perfect taste. As I was noticing these details something by her side, that I had at first taken for a cape, moved. It proved to be a black French poodle, and as he sat up and turned his head towards me I saw that around his neck he wore a broad silver collar, from which depended a peculiar heart-shaped padlock.

"Turning to my novel, I soon forgot the intruders, nor did I again think of them until, perhaps, half an hour later, when I was startled by feeling something cold and wet pressed against my hand. It was the poodle's nose. He had crawled over the top of the seat, evidently desirous of making my acquaintance.

"Cheer, come here," exclaimed a singularly familiar voice.

"The dog paid no attention to his mistress, but wagged his tail contentedly as I stroked his curly head.

"You must excuse my dog, sir," said my companion. "He is a great pet and expects everyone to notice him. I am afraid he will annoy you."

"I protested that he would not, and added that I was fond of dogs, poodles in particular. Perhaps no answer was due, in part, to the fact that the young man, who was sitting next to me, had only that minute become aware of this, the light having been too dim in the station to let me see her face. Her voice, too, affected me singularly; it was low and sweet, and I was sure that somewhere I had heard it before. I sat for some time vainly trying to recall the circumstances of our meeting, but the more I pondered on it the more hopeless seemed the task.

"A little later, on looking up, I found that my companion was without books or papers, so taking an illustrated magazine from my suitcase, I offered it to her. She thanked me and smiled sweetly. After a time I grew tired of my novel and resolved to attempt a little conversation with my neighbor. I asked her if she was going to Nice. She replied that she was, and went on to say that her sister, whom she had expected would go with her, had disappointed her at the last moment. She, however, could not wait until the following day, as her father, who was at Nice for his health, had wired her to return at once.

"She spoke of her dislike for traveling alone, particularly at night, and explained that as the compartment reserved for ladies was full she had been obliged to enter mine. She was sorry to intrude, but the train was about to start, and the guard told her all the other seats were taken. I hastened to assure her that I was glad of the chance that had given me so charming a companion. She smiled and asked me if I was to be long in Nice. She chatted on about the place, mentioning the names of many well-known people who she said, were her friends and whom she would undoubtedly meet. As the evening wore on she opened a basket containing a dairy lunch. "Would I share it with her?" The cook evidently had a ridiculous idea of her appetite. "Why, there was enough for six!" This seemed to be the case, so, as we were by this time very well acquainted, I accepted her invitation, and we were soon doing justice to a really excellent lunch.

"What a charming creature she is," I thought. "How Edith will like her." Growing confidential I spoke of my visit to Nice and of the dear girl who was awaiting me there. She seemed interested, and listened patiently to the recital of my fair one's many charms.

"You will meet her and can see for yourself if all I say is not true," I exclaimed. "She will be very grateful to you for having made this stupid journey so pleasant for me."

"We will drink her health," cried my companion, gayly, drawing a small silver flask of exquisite workmanship from the depths of her basket. "I always carry a little cognac with me in case of sickness," she explained. Opening the flask and filling a dainty glass with the amber liquid, she handed it to me with a radiant smile. "To Edith's health," she said.

"I drained the glass. It was brandy of the finest quality I had ever tasted. She seemed to read my thoughts.

"You are a judge of good liquor. That is Otard of 1870."

"Taking the glass from my hand she poured a little of the liquor into it and barely touched it with her lips.

"You must not judge my good wishes by the amount I take. I wish you all the happiness that life can give, but I can not drink as you men do, to me it is simply a medicine."

"Soon after that I began to grow sleepy, and as my companion did not seem inclined to talk, I made myself as comfortable as circumstances would permit. I turned my head towards the window, through which the surrounding country could be seen dimly in the moonlight as we rushed along, put a roll of rug under my head and resigned myself to a night of discomfort. The next thing I was broad daylight. I awoke with a dull pain in my head, and a sense of weariness that my sleep had rather increased than diminished.

"My companion was sitting by the window reading the book I had given her the night before. On perceiving that I was awake she put down her book and remarked that I was evidently a sound sleeper, and that she envied me. She had passed a wretched night, and was glad that we would soon be in Nice. I thought of Edith, whom I should now see so soon, and then of the surprise I had in store for her.

I hoped that the necklace would please her, and then for the first time it occurred to me that perhaps it would have been better if I had consulted some woman of taste before buying it. A brilliant idea struck me—my companion was just the one to decide. I would ask her opinion. It was not too late to change the necklace for something else if she thought it not suitable. I was sure she would tell me candidly just what she thought.

"Unhappily my coat I drew the package from my pocket and laid it on my lap. Removing the wrappings I opened the little blue case. For a moment I could not believe my eyes—it was empty.

"I turned quickly to my companion. She was leaning forward motionless, breathing, her face pale and in her eyes I could see that she never forgot. One hand was pressed convulsively over her heart. She had removed her gloves worn the night before, and on one finger blazed a diamond—the one I had seen the day before at the jeweler's. In an instant I saw it. Springing across the aisle and grasping her wrist—roughly, I'm afraid—I cried:

"Give me back the necklace, you thief!" I cried. "I know you. You stood by my side yesterday in the jeweler's shop on the Avenue de l'Opera. I remember that jewelry store, and I remember that you said that I was going to Nice by this train. The liquor you gave me was drugged, and you thought to escape before your theft was discovered. It was a very clever scheme, but it failed. Give me the necklace, or I shall turn you over to the police."

"I stretched out my hand, still thinking of the folly of further excitement and the uselessness of denial, she would return the stolen property. I was wrong. She drew herself up laughingly and looked me fully in the face. When she spoke it was in a voice that showed no trace of the coyness which had brought it into my view. "You have brought a serious charge against me," she said, "and one of which I am innocent. I am alone, and a woman—this with a man's money—has been at my side, and somehow made me ashamed of my own voice. I have spoken to her, 'If, as you say, you have lost a necklace, your only reason for accusing me of having stolen it is that we have been the only occupants of this compartment. The instant you opened to me and found it empty I saw your awful position that I was placed in. Fortunately, however, I can prove my innocence."

"Perhaps you may hesitate before again attempting to blackmail an unprotected woman. As soon as we arrive at Nice I shall insist on going to the police station, where a thorough search of my baggage and person shall be made. I shall then ask you to prove that you ever had a necklace." This remark was accompanied by a smile that was not pleasant to see. "Until we reach Nice you shall not address me again."

"She leaned back in her seat and turned her face toward the window, I felt rather than saw that she was crying.

"I began to feel uncomfortable. What if, after all, she was right? Had I been mistaken, and had been mistaken. Was it not possible that the box might have been empty when I received it from the jeweler's? I had not seen the necklace after it was left to be repaired, as the box was wrapped up when called for it. My companion insisted on an investigation that might prove her innocence—an investigation that a guilty woman would never have proposed. Besides, this, she had expressed a doubt as to the existence of the necklace and had accused me of an attempted blackmail. The more I thought of it the more unpleasant my position became.

"Suddenly my eyes fell on something bright on the floor of the carriage. I stooped to pick it up. It proved to be the little heart-shaped padlock I had noticed the night before on the poodle's collar. Like a flash a thought came to me: here might be a solution of the problem at any rate, I would put it to the test. No time must be lost, as we were just entering the station, and in a moment more the guard would open the carriage door.

"Reaching across the seat with a quick motion I drew the sleeping animal to my side. The woman sprang forward to prevent me, but she was too late. I had already torn the collar from the dog's neck and was holding it to the light that entered dimly through the window from the station. I breathed a sigh of relief; the inside of the collar contained a hollow groove, and in this groove, securely fastened, lay the missing necklace. I turned triumphantly to my companion. The door was open; she was gone.

"That morning as I entered Edith's parlor the little poodle trotted contentedly at my side, and instead of the collar he wore the necklace. As for the woman, I never saw her again."—Kate Field's Washington.

FIRESIDE FRAGMENTS.

—Currant Catsup.—Four pounds red currants, one and one-half pounds of sugar. Stew till thick, add one pint of vinegar, and spices. Boil up and bottle.—Housekeeper.

—Eccentric Cream Pies.—Two eggs, one cupful of sugar, one small teaspoonful of soda, two of cream tartar, not quite half a cupful of cold water, and one and three-quarters cupfuls of flour. A pint of cream is sufficient for the two pies.—Good Housekeeping.

—Custards.—To make a custard take one can of Gail Borden Eagle Brand condensed milk, to which add one quart of water, four eggs beaten light, a pinch of salt; flavor and sweeten to taste. This will make an excellent custard.—N. Y. Observer.

—Bread Cakes.—Four cups of bread dough (very light), three cups of sugar, one cup of butter, three eggs, one cup of raisins, one cup of currants, one teaspoonful each of all-spice, cinnamon and cloves, one teaspoonful of soda dissolved in hot water. Rub butter and sugar together, then add the eggs, spice, soda and fruit, then the dough mixed in very thoroughly. Put into pans, let stand fifteen minutes and bake. Excellent for lunch.—Home.

—Keep on hand plenty of bowls, not only one or two big ones for mixing up cake and sponge, but three or four of the small sized ones for which you will find more uses than I can tell you are, and a "nest" of little bowls. They are so easily cleaned, take up little room, and are convenient for holding remnants of food to place in the ice chest or elsewhere. Put in a small one and turn over it a larger one.—Farm and Home.

—Manchester Pudding.—Beat the yolks of two eggs thoroughly, add three ounces of bread crumbs, and two ounces of sifted sugar. Dissolve one ounce of butter in one pint of milk, flavor with grated lemon peel, and pour over the bread crumbs and eggs. Beat well together, pour into a greased pudding-dish, and bake carefully for an hour. Then spread a little good preserve over. Cover lightly with the well-beaten whites of eggs, sprinkle sugar over, and brown slightly in the oven.—Liverpool Mercury.

—Potato Souffle.—Take a pint of cold mashed potatoes and heat over the fire with two tablespoonfuls of sweet cream, beating with a fork until smooth and light. Add four beaten eggs, pepper, salt and a little nutmeg, and press through a sieve; beat one tablespoonful of butter in a saucepan and cool half of this mixture like an omelet. It is delightful with bacon or ham cut in thin rashers and fried crisp.—American Agriculturist.

—A Dish of Snow.—Heap a grated coconut up in the center of a handsome dish and ornament with pretty green leaves or ferns. Serve it up with snow cream, made as follows: Beat the whites of five eggs to a stiff froth, add two large spoonfuls of fine, white sugar, one large spoonful of rose water or pineapple; beat the whole together, adding a pint of sweet, thick cream. Put several spoonfuls over each dish of coconut.—Farm, Field and Fireside.

—To Make Iced Tea.—Soak the tea-pot, put in the tea while the pot is hot, turn in a little boiling water and let it stand about five minutes; then fill up the teapot with boiling water. The quantity depends upon taste. Do not let the tea stand in the pot, but turn it at once into a pitcher, and as soon as it is sufficiently cool place it on the ice until it is icy cold. Serve with a dish of cracked ice and slices of lemon. This is a delightful, refreshing drink on a hot day. The secret of making good tea is in using freshly-boiled water.

HABITS OF THE WOODCOCK.

Some English Methods of Capturing the Shy Bird.

Every sportsman knows that woodcocks are here to-day, gone to-morrow. He often finds that where there were plenty yesterday not a single cock remains. I have once seen the cart of a sportsman short fifty brace in one day. This feat was the result of a wager, and the bag was made by two o'clock in the afternoon with a single-barreled dintlock. The birds were shot in a moist wood, and it is in such spots that the woodcock finds its favorite haunt.

In England the birds affect coppice woods, frequenting most those which are wet and such as have rich deposits of dead and decaying leaves. Most of these copes are of oak and birch and hazel, and being only of a few years' growth are thick in the top. Killing cocks as they dash through the top of these, seldom rising above the bushes, is one of the greatest tests of a sportsman's skill. Then the birds have a habit of dropping down at a short distance, which almost invariably deludes the inexperienced gunner.

When they are put up from their resting places during the day the flight is rapid at evening it is slow. It is now that they are easiest to shoot, though in some parts of the country they are still taken in nets as they fly at dusk through the paths of the woods. Notting woodcocks was at one time the common way of taking them, for they have always been highly esteemed as food.

Another method of capture was by "glens" and "springs" and it would seem that in times past the "woodcock" was considered a stupid bird. None of the denizens of the woods, however, better or more closely to its environment. The browns and dusks and yellows of its plumage all have their counterpart in the leaves among which it lies, and it has been pointed out that the one conspicuous ornament of the bird is covered by a special provision from the gaze of those for whose admiration it is not intended.

This is the bright coloring of the tail feathers, which cannot be seen except at the will of the bird in flight. The protection lacks in one thing, however, and that is its large dark eye; this is full, bright, and so to speak, obtrusive. It is not often that a special provision of this kind is injurious to its owner, but the luster which bonnas from the eye seems to negative the advantage of its protective coloring.—St. Louis Republic.

MAKING AN OX-YOKE.

A Boyhood Experience of a Noted Educator.

In the olden time a jack-knife was indispensable to the contentment of a Yankee boy. Its honed horn handle and blade of the best steel made him an expert in whittling useful things for the house and farm. With it he learned his first lesson in the school of the carpenter and wheelwright. In those days almost any Yankee farmer could build a frame house, or make all of an ox-cart except the wheels. In "My Life and Times," Dr. Cyrus Hamlin, the missionary, tells how whittling enabled him and his brother to make an ox-bow and a cart when they were boys on a farm.

Their mother, a widow, had only money enough to buy a new plow and a pair of cart wheels. The two boys determined to make a cart's tongue, axle and body, and an ox-yoke. They had become experts in whittling, and though one was only thirteen years old, and the other fifteen, they thought that boys could do some things as well as men.

They cut down a yellow birch and obtained two lengths for poles. Boring a hard pattern they began boring the log to the pattern, having for tools an ax, drawshave, jack-plane and auger.

The log was soon in shape so that it could be worked upon before the kitchen fire at night. As it was difficult to work the curved surface with nothing but a drawshave, they borrowed a spokeshave, and with it nicely finished the yoke. They scraped it with pieces of glass and polished the surface by hard rubbing with a dry stick.

They bored the holes—and ruined the yoke. The boys were not parallel, and the boys would not enter. Their hearts broke. A neighbor comforted them by praising the work, telling them that in attempting to bore the holes they were trying to do what few men could do.

Make mother just like this one, but have it straight on the back, and I will come and bore the holes," said he. They made another yoke, but as the neighbor did not come at the moment they expected him, they invented a way of making the four angle holes parallel to each other.

The next morning, an improvement on the first yoke, and the boys were glad of their misfortune. The neighbor came along, and seeing the finished yoke, asked:

"Well, boys, who bored those holes?"

"We."

"Then you have spoiled another good yoke."

When, however, he found them perfect, he exclaimed: "Don't tell me a lie; you never did that."

They showed him how they had worked, and he laughingly said: "When I make a yoke you shall bore it."

They then made an axle and tongue for the new cart-wheels, and a potato body, or box body, and a hay body.

There was an education in this hard work. It prepared both boys for the battle of life. Years after, one of them, Cyrus, won a college education, became a missionary, and built on the banks of the Brahmaputra a factory and a laundry, by which he washed clothes and baked bread for hundreds of British soldiers during the Crimean war.

He did more—he built Robert college, whose magnificent edifice proves what the drudgery of a New England farm can do in educating boys for the work of life.—Youth's Companion.

HINDOO ATHLETES.

Exercises by Which They Harden Their Muscles.

The Hindoo are great devotees of wrestling and the Punjab district produces giants.

Indeed the best wrestlers come from the north. There men are trained from early infancy. The wrestler trains from babyhood. He is picked out on account of his strength, and his exercises commence when he is but a small tot. Every muscle is strengthened by an appropriate exercise. To harden their calf-muscles these wrestlers, sometimes six feet and over, leap about the floor for hours together in a squat position, while for increasing the dimensions of their hips and the chest they first lie flat on the ground, then raising themselves on the tips of their toes and with hands well turned in commence to move up and down, putting all their weight on their arms. They continue this until they have done it one thousand times.

Coolest exercise when he is but a small tot. Every muscle is strengthened by an appropriate exercise. To harden their calf-muscles these wrestlers, sometimes six feet and over, leap about the floor for hours together in a squat position, while for increasing the dimensions of their hips and the chest they first lie flat on the ground, then raising themselves on the tips of their toes and with hands well turned in commence to move up and down, putting all their weight on their arms. They continue this until they have done it one thousand times.

After exercising they drink milk and a coarse sweetmeat made of ghee, clarified butter and sugar. Being Hindoos they only train on milk and ghee and sugar. The wrestlers are not independent. They generally attach themselves to some ardent sport, who pays them so much a month. They form part of his entourage and these sports offer enormous sums to get wrestlers away from their rivals. Occasionally the sport issues a challenge to another sport, coached in the same language as a man would offer to wager his bird against another man's bird. The pailwar, or wrestler who wins, is always handsomely rewarded.—Chicago News.

A Spirit of Accommodation.

A prisoner before the police judge scorned the services of a young sprig of an attorney who not only was a very unsympathetic younger man, but he brought he knew about tenous as much as the judge knew he knew. When the case was called the attorney arose.

"May it please your honor," he said with great formality, "my client wants more time."

"Very well, very well," interrupted the judge in the kindest way, "I'll be glad to accommodate him. He was arrested for abusing his wife, wasn't he?" "That's the charge of the arresting officer, your honor."

"Very good," said his honor. "I had intended giving him only three months, but since he wants more I'll make it six. I always strive to please. Call the next case, Mr. Clerk."—Detroit Free Press.

BOX CAR MERCHANTS.

Arrested for Selling Fraudulent Groceries.

An Attempt to Banish Old-Fashioned Box Car Merchants in the West seem to have been transferred, on account of the recent exposure in that locality where some of the parties were arrested, to this state, in several sections of which they are now operating.

The method of parties engaged in this business is to obtain orders for well-known and popular brands of baking powder, coffee, spices and other goods, at prices below those charged for these brands by local dealers, and then to deliver a bogus article to the purchasers. When delivered, the articles are found not to be in original and usual cans or packages, but some kind of excuse is made to deceive the customer into taking them.

Consumers should be on their guard against deceptions of this kind. While the purchasers may think they are saving a few cents a pound by dealing with these people they are actually being swindled. Not only are they paying for a very inferior article several times its market value, but they are purchasing goods that in many instances are actually adulterated and injurious for use. It is well understood that popular and high-class baking powders, coffees, spices, etc., are invariably put up in sealed packages with the manufacturer's name upon them, and whenever they are offered by these peripatetic merchants, in bulk, or in other than such sealed packages, there is a fraud against the transaction.

Reputable grocers have an equal interest with the consumers in breaking up these frauds, for by them the country is filled with adulterated goods which the farmer is buying at a rate far beyond their value, while the trade of the legitimate local dealer is being destroyed.

"The Feast of Asses."

The "Feast of Asses," reference to which occurs so frequently in the investigative journals and the general literature of two and three hundred years ago, was a ceremonial of the Roman Catholic church during the middle ages, and seems to have been peculiar to Rome and a few other French cities. The event which the feast commemorated was the flight of the Virgin Mary and the Child into Egypt. In carrying out the curious program a young woman bearing an infant in her arms was seated upon the back of a donkey, which was led to the cathedral, followed by bishop and clergy in solemn procession, where services were held in honor of the "mule beast" that had so aided in the perilous flight from the wrath of Herod. The services, which generally lasted the greater portion of the day, were given up to sermons and songs, each having special reference to the animal ridden by the Virgin. The "Feast of Asses" finally became so offensive to the hierarchy of Catholics that it was suppressed by the council of Basle in the fifteenth century.—St. Louis Republic.

Sleepless Nights

Make you weak and weary, unfit for work, indisposed to exertion. They show that your nerve strength is gone and that your nervous system needs building up. The

Hood's Sarsaparilla Cures
rarest remedy is Hood's Sarsaparilla. It purifies the blood, strengthens the nerves, creates an appetite, and gives sound, refreshing sleep. Get Hood's and only Hood's.
Hood's Pills cure all liver ills. 25c.

DR. KILMER'S SWAMP-ROOT
THE GREAT KIDNEY, LIVER AND BLADDER CURE.
Rheumatism
Lumbago, pain in joints or back, brick dust in urine, frequent urination, irritation of the bladder, gravel, rheumatism or catarrh of the bladder.

Disordered Liver
Biliousness, headache, indigestion or constipation. Swamp-Root invigorates, cures kidney difficulties, Bright's disease, urinary troubles.

Impure Blood
Scrofula, malarial, general weakness or debility. Swamp-Root builds up quickly a run down constitution and makes the weak strong. At Druggists 50 cents and \$1.00 size. "Herald" Guide to Health" free. Cash-refund free. DR. KILMER & CO., BINGHAMTON, N. Y.

The Greatest Medical Discovery of the Age.

KENNEDY'S MEDICAL DISCOVERY.

DONALD KENNEDY, OF ROXBURY, MASS.

Has discovered in one of our common pasture weeds a remedy that cures every kind of Humor, from the worst Scrofula down to a common Pimple.

He has tried it in over eleven hundred cases, and never failed except in two cases (both thunder humors). He has now in his possession over two hundred certificates of its value, all within twenty miles of Boston. Send postal card for book.

A benefit is always experienced from the first bottle, and a perfect cure is warranted when the right quantity is taken.

When the humors are affected it causes shooting pains, like needles passing through them, the same kind as the Liver or Bowels. This is caused by the ducts being stopped, and always disappears in a week after taking it. Read the label.

If the stomach is foul or bilious it will cause squishy feelings at first.

No change of diet ever necessary. Eat the best you can get, and enough of it. Dose, one tablespoonful in water at bedtime. Sold by all Druggists.

TEMPERANCE NOTES.

WRECKED BY DRINK.

The Sad Story of a Mother's Heart Broken by a Wayward Son.

In the late fifties, amid the mountains of north Georgia, in the comfortable home of a well-to-do farmer, was a young man just past his majority. He was a splendid physical specimen, warm-hearted as the glow of a southern sun, tender, as a brave man ever is. His general loquaciousness won countless friends. Little children found in him a comrade and a hero. Personal friendship with Christ seemed to be the one thing lacking to round a character so naturally attuned to the highest.

He studied law in the neighboring town, was admitted to the bar. The mother waited and hoped. But the atmosphere of "good-fellowship" around him, his own warmth of nature, the prevailing intemperance of the times—alas! there were no "enslavers" then to raise a voice of protest "against the slave trade"—all these were cultivating tastes and habits that made the mother anxious.

The California gold fever had reached even his quiet community, and that Moses of youth and pluck and enterprise drew him with the irresistible force that to us, of a later generation, fills all that time and the western Eldorado with romance. So, one day, the mother's wayward, yet loving boy, said good-bye to his friends, with hope high in his heart and ringing in his voice: "I am going to California to seek my fortune. I will be back in six months, and you will see me with a fortune."

The four corners of the earth were made a great silence between him and his home. The war over the letters frequent at first, in a clear, bold hand, gladdening the mother's misty eyes, became few and unsatisfactory. A fortune of thousands and thousands was made several times, with the quickness and readiness of their peculiar conditions, made easily, lost easily—recklessness became the order of life, glimpses of the old tender, lovable nature were given. Preachers returning from missionary tours out there told of his successes, his losses, his popularity, his carelessness of life. The mother wept and loved and prayed and waited.

Fifteen years passed; twenty, twenty-five. The father died; the sisters married; the brothers scattered; the old home was broken up. To the younger members of the family the absent brother became almost unreal.

But as a figure seen in early dawn, Down at the far end of an avenue— Going unknown when—

The letters now had almost ceased, poor fellow! The last one the aged mother carried in her old-fashioned leather pocket-book. It was an irregular scrawl, barely legible; lines so wavering that it seemed one might see the writer's head nodding and his hand shaking. She could never find a word of blame—it was all love and hope and prayer with her. Sometimes when her grandchildren gathered about her she would tell them of their uncle's frolics, some childhood and boyhood, his brilliant success in his later escapades, his tender, cheerful love to everything weak and defenseless. When they asked: "Do you think he will ever come back to see us, grandma?" she sigh that gave an answer made them feel that they must not talk any more, but must run and leave her alone.

One day, when she was alone, she found a letter from her son, dated from a certain date, that mother's boy, now himself a middle-aged man, nearing fifty, had, in an attack of delirium tremens, cut his throat! The child's letter, carried for many months in the poor wanderer's pocket, the last feeble link between him and home and hope, was the only clue to the address of his family. The paper bore testimony to his success at fortune-making only to lose again, his noble possibilities, and the traits that won him admiration and esteem. Can anyone ever know a mother's thoughts as she pillows her head at night, not to sleep, but that her heart may break in the silence of darkness, where none but God can know? There was no complaining—she knew in whom she had believed. The day after she heard it found the blessed old saint in her own bed, the power of prayer, I believe she somehow felt that her prayers for nearly fifty years could not remain unheard. God knows.

But the tired body with the weight and wear of eighty-three years which she had tried to make last until she could see her boy again in the flesh, and could read in his face and life "the victory that overcometh the world," the weary body failed rapidly, and soon the lifelong heartbreak was ended. But oh, the pity of it, and the sadness of it, this pitiless slaughter of its sons by permit of a nation that pretends to guarantee "life, liberty and pursuit of happiness" to ever generation under its flag.—Emily M. Allen, in Under Signal.

Do you ask me to give up what to me is a lawful gratification because another man is a drunkard? Yes, if you do not need the total abstinence pledge for yourself sign it for the sake of those who are weak and need help.

John B. Gould.

A WONDERFUL MESSAGE.

The Fruitfulness of a Warning Word Against the Deadly Cup.

They had been introduced, of course, but he spoke to her first drinker.

"May I pour you a little wine?" he asked.

"Thank you," she said simply. "A little. I drink only claret."

"You don't care for sweet wines?"

"I don't think I really care for any wine, but this is what we drink at home. You did not pour any for yourself," she added a moment after.

He smiled.

"It would be for the first time in my life if I had."

"How strange!" She looked at him point blank with a pair of clear and very kind blue eyes. "Have you scruples? Do you think it wrong?"

"Well—he drew a long breath—hardly. Yet, for me it would be wrong."

The color deepened on her cheek a little. He saw her cheek back a word from her lips, and the shadow that swept over her face was sweeter than any brightness. But he could not appropriate her unmerited sympathy.

"No—no," he declared, laughing slightly. "It is not at all a temptation to me. I have never known the taste of any sort of liquor. I think I have a great advantage against fate in this, and I mean to keep it."

"Then you are afraid, after all."

"Sometimes we recognize danger, though we may not fear it."

"It is dangerous you must fear it. Yet do, or you would not take precautions."

He looked down and met her earnest glance. She was forgetting her dinner. "If you were not afraid," she went on impulsively, "wine would seem to you as harmless as water. It is because you have a fear that you will not touch it."

He was at a loss just here. It was difficult to match her candor without a touch of seeming discourtesy.

"Suppose I drink to your better courage," she said. A roguish smile showed itself. "The deadly cup has no terror for me."

He raised his crystal goblet and drank to her in sparkling water, saying gently:

"But of my cup no one need be afraid."

There was a pause. She had not lifted the wine to her lips. A servant came to remove the course and someone spoke to her across the table. When he could claim her attention again he was ready with a bright remark about the beauty of some roses in a vase near them.

"Yes—so pretty—pretty," she said, vaguely, and then with purpose in her tone: "We had not exhausted our topic, I think. May I ask—is it your conviction that liquor should not be used in any form?"

"Yes, it is unmerciful," he deprecated. "Think how ungrateful it would seem to object to anything among such surroundings."

"Never mind about being complimentary," she replied, gravely. "I am trying to reflect—to decide. I have never before given one serious thought to this question of temperance. The people I live among—and they are all upright, intelligent and refined—regard a moderate use of liquor as almost indispensable. Surely you must admit that there are thousands and thousands who are not in any way injured by its use?"

"I know," he said quickly, "but there are millions and millions—the jails will tell you—the hospitals—"

He stopped abruptly.

"Yes," she said thoughtfully. "Yes, but why not take the good and avoid the evil? We need not become drunkards because we use liquor?"

He met the appeal of her earnest eyes with a look as earnest.

"Since you desire it," he answered steadily, "let me say one word, and then I think I will say no more. If you never touch liquor, you not only need not, you can not become a drunkard. But, if once it crosses your lips, the first step is made."

"There was a long silence between them. The rest of the guests went on talking gayly. Presently she spoke, but so low that he had to bend his ear to listen.

"You have given me a wonderful message," she said. She set aside her glass of wine, and in the simple net she knew, there was consecration.—N. Y. Advertiser.

NOTES BY THE WAY.

In the Durich lunatic asylum one-fourth of the cases were ascribed to drink.

A statement was recently made in the German Reichstag that there are eleven thousand persons in hospital in Germany who are suffering with delirium tremens.

The slave trade has been to Africa a great evil, but the evils of the rum trade are far worse.—Rev. James Johnson, Missionary in Africa.

In 1801 one in seventeen deaths which occurred in Switzerland were ascribed to drinking habits (including women and children).

Is the city of Fort Worth, Tex., fifteen hundred arrests of women were made in the last year, nine-tenths of the number, at least, for drunkenness.

The Canadian Temperance league recently presented a gold medal to the pupil in the public schools of Toronto who passed the best examination in the study of temperance and physiology.

The Massachusetts legislature adopted an investigation law, giving the state bureau of statistics five thousand dollars with which to conduct an investigation of the relation of the liquor traffic to crime, pauperism and insanity.

Two native kings are petitioning the government to stop the liquor traffic. It is ruining their people. One king says, if they continue, it will cause him to leave his country and go where the white man's rum can not reach his people.—Hon. R. B. Power, United States Consul at Sierra Leone.

"Hark, the glad sound!" is regarded as the masterpiece of Philip Doddridge. It was written by him to be sung at the close of a Christmas service in 1735.

MISCELLANEOUS.

The launcers were the invention of Joseph Hart in 1819. The title page of his original edition of the music says it was danced by the nobility and gentry at Tenby in that year.

"Safely Through Another Week" was written by John Newton. It was originally intended for a Saturday night service, and has been materially altered to adapt it to Sunday.

Peru, too is noted for the remarkable versatility of its style. This was due to the fact that he moved from city to city, and wherever he went he adopted the style that was popular in that place.

"O might my lot be cast with these" is part of a hymn by Charles Wesley on the primitive church. It had originally been very long. Many of Wesley's hymns were very long, some having forty or fifty stanzas.

—Louisville was called California Gulch from 1829 to 1834. It was then a gold-mining point, and from 1834 to 1876 was almost abandoned. The discovery of the great beds of carbons gave it new life.

A spoonless mustard pot is a recent invention. By pressing a piston rod in an airtight receptacle the requisite amount of mustard is forced through a suitable spout. The air being excluded, the mustard is always fresh.

—The public building of Philadelphia, when finished, will have the highest tower on any building in the world. It will be 537 feet high. The building covers four acres, and will be finished next year at a cost of \$10,000,000.

—Ben Jonson was the bricklayer, from his occupation. He was also designated Father Ben, Honest Ben, Old Ben, Rare Ben, Young Ben, the English Jonny, the Father of Poets, the Son of Numbers and the English Coryphæus.

—Well Worth the Winning.—Albino Lady.—The Armless Wonder looks so happy. He must have won his philosophy from the Fat Lady. What a thing to bring on back by the "Man of Iron"—"A box of gloves, I believe."

—Landlord of Ball's Head to customer who has tendered him a bad dollar: "I know as how you're the covet as steals my pocket-books, but hang me if I am adding insult to injury by bringing on back by the 'Man of Iron'—"A box of gloves, I believe."

—Bismarck is credited with having recently said: "My trust in man, my trust in the future, rests in the conviction of German women. The conviction of a woman is not so changeable. It forms slowly and not easily, but once formed it is less easy to shake."

—The railroads of the country carry in a year 400,000,000 passengers and transport 300,000,000 tons of freight. The earnings from freight business are about three times greater than those from passenger business. The railroads of the United States earn, from all sources of revenue, about \$1,200,000,000 in a year.

—The greatest known depth of the ocean is midway between the islands of Tristan d'Arenal and St. Paul, and is reached at a depth of 46,235 feet, or eight and three-fourths miles, exceeded by more than 17,000 feet, the height of Mt. Everest, the loftiest mountain in the world. The average depth of all the oceans is from 12,000 to 15,000 feet.

—An American inventor has provided himself with a pair of bicycles for his feet. The wheels are about four inches in diameter and are strapped to his feet like skates. They have rubber tires and glide over the concrete pavement with great ease. They are very light, and the inventor has patented them, and the owner moves along almost as fast as the bicyclist.

—Jamaica (Long Island) has lately been invaded by a "black bugger," who was brought to bay the other evening by a Miss Benson. He threw his arms around her, and, making a dash for it, was walking toward her home, when she suddenly did the same for him and yelled the high C forte in staccato style. The gentleman who captured him (and who also gave him a very nice little thumping) recognized him as Michael Benson, a famous pugilist. When it came to hugging—well, he isn't in it just now.

—Attendants of all sorts in the law libraries of this town require a noteworthy acquaintance with the dates and uses of law books. This is true even of the boys, whose duty is merely to fetch and carry, while the law books ought to know constitutions, statutes, and even decisions almost by heart. William Winters, of the law institute library, is, perhaps, the most famous for his knowledge of law books, but there are others who can pick out a needed volume almost instantly from among thousands of volumes, and know the date and compiler of the latest revision of laws in any state of the Union.

—One hundred years ago Benjamin Franklin left a bequest of \$5,000 to the city of Boston, the same to be held in trust, the interest each year to be added to the principal until the end of the century. It now amounts to \$430,000. One hundred thousand of this, by the terms of the will, must be reinvested and allowed to accumulate for another hundred years. The other \$330,000 Boston will apply to the building of an industrial school. The \$430,000 ought to amount to a very good-sized fortune at the end of one hundred years. At 4 per cent, compound interest the school boys ought to find in this a "good example."

—Dr. J. L. Wilson, of Terre Haute, Ind., has in his possession a bell with an interesting history. It was cast in Spain in 1708, and during Bonaparte's invasion of Spain it was captured and carried to France. In 1831 it was presented to Joseph Piquet, heading a group of French emigrants, who finally settled at St. Mary's, Jasper county, Ill. Mr. Piquet presented it to the church at St. Mary's in 1832, and it was used in summoning the people to worship until it was cracked by an accident and had to be removed. Recently it attracted the attention of Dr. Wilson, who found it lying neglected in the churchyard and he purchased it. The bell weighs 27 pounds and is made of copper with a mixture of silver.

SUGAR-CANE CULTURE.

It Calls for Special Training in Practical and Scientific Methods.

After many years of experience the sugar planter has realized the necessity of inaugurating a school wherein can be taught the practical and scientific methods of cane culture and sugar manufacture, and with that end in view, in 1885 there was organized at the expense of the Louisiana planters, a corporation known as the Louisiana Scientific and Agricultural association.

This corporation made up the sum of twelve thousand dollars for the purpose in view, and subsequently, when by virtue of the congressional appropriation known as the Hatch bill the Louisiana State University and Agricultural and Mechanical college was enabled to establish experimental agricultural stations in the state, the legislature authorizing the consolidation of one of the Hatch bill fund with the sugar planter fund to establish and support the station near New Orleans.

The two other stations of the State University are in Baton Rouge and Calhoun. The first-named station was located some fifteen miles above New Orleans, and is now under the management was made with the city whereby a portion of ground some fifty acres in extent was allotted from what is known as Audubon park for the use of the experimental station. It will be remembered that in this park the Cotton Centennial Exposition was held in 1884, and strange to say, this same park was the former De Bore plantation, where he successfully made his first sugar crop one hundred years ago.

Here a sugar-house has been erected with a nine-roller mill and every style of modern improvement and machinery, at a cost of sixty-five thousand dollars, with necessary laboratories and accessories, and in 1890 it was formally opened. Besides the experimental feature it has a regular sugar school with a corps of professors, at the head of whom is Prof. W. C. Stables, professor of agriculture at the State University and Agricultural and Mechanical college.

This sugar school aims to give a three-years' course in chemistry, sugar-making, mechanics, drawing and practical agriculture, and it seems fitting and proper that at the centennial year of sugar raising in Louisiana, on the very grounds where sugar was first made, the rates of tuition for Louisiana students should be reduced to one hundred dollars per year for Louisiana students, and two hundred dollars for outsiders, while all graduates of the state university should be given a special discount. There were forty pupils at the sugar school this year, of whom eight came from Cuba, one from the island of St. Croix, two from Hawaii, one from California, one from Kansas City, one each from Chicago, St. Louis, and twenty-three Louisianians.—Harper's Weekly.

UNHAPPY CREATURES.

Deplorable Social Condition of Some Indian Women.

The position of the native ladies of this country is singularly deplorable. Perched in their hazy world within the narrow limits of the zenana, they are cut off from all contact with the outer world, with which they communicate only through their slave girls, seeing, not only in men, but in women, some few ladies of sufficiently high rank living within visiting distance of each other. They are quite uneducated, unable to either read or write or work; nothing therefore remains to them but their natural affections, and these are outraged; husbands are missing, and occasionally their children being taken from them at a very early age, and placed under the guardianship of men, their mothers being considered unclean, and alas! truly, to bring them up. Is it to be wondered that such an education, such a life, such a state of being, should produce creatures singularly depraved?

Such a fate—the normal fate, I believe, of the Indian noblewoman—is miserable enough; but the name of misery is reserved for the lot of the Indian woman, whose father has had his high rank turned by the European ideal, while his heart is far from it. This luckless woman, belonging to two civilizations, obeying contradictory conventions, falls between two stools; her sphere of action from being small, she comes off all the ladies of the zenana, and the present regime were at any rate allowed to be wicked; gambling and drinking filled their lives with excitement, and death freed them early. The ladies of the present regime have to be respectable. To be good and wise is to be happy; to be bad, is, we are told, in the long run to be miserable; to be nothing is intolerable.—Temple Bar.

PISCATORIAL KNOWLEDGE.

Habits of a Fish That Were Exceedingly Disappointing.

"Yes, an' he's a chopper, too. I ain't quite sure whether I've hooked him. Yes, there he is. I feel him 'sawgrin' on the line. He's a great big striped bream."

"How do you know what kind of a fish it is?"

"How do I know?" repeated the old man, as he began to reel in with a deliberately to hand in his line, and he threw supreme pity for the ignorance implied by the question into his voice.

"How do I know? Why, young man, I am tell what kind of a fish it is by the way he hiles. Now, there's an eel; he kind o' makes little holes in the mud, and when he takes hold and swims away with your line, sort o' easy like, then there's the pike; he snels yer bait, an' ye can't hardly feel him pull. An' then there's the perch; he takes hold right away and swims off like a streak."

"And how does the bream bite?" interrupted the young man.

"O, he monkeys around a whole lot and then he takes hold all of a sudden and swims away down stream. I knowed right away when this fellow took hold he was a bream. I never made no mistake. I—"

Just then the old man's catch came to the surface. It was a cast-off boot.—Tid-Bits.

THE FIRST HANGING.

John Billington, Who Came in the Mayflower, Was Executed for Murder.

John Billington (then spelled Billington) was executed for murder in 1630. In the enumeration of the Mayflower passengers, made by one of their sons, her, Gov. William Bradford, is the following entry:

"John Billington, and Eleu, his wife, and 2 sons, John & Francis."

In 1630, or thirty years subsequent to the landing of the Mayflower, Gov. Bradford, in taking a view of the passengers, and such changes as had passed over them and theirs, in this 30 years, refers to John Billington in these words:

"John Billington, after he had been here 10 years, was executed for killing a man; and his eldest son, who was married, & had 8 children."

Gov. Bradford, in his "History of Plymouth Plantation," thus refers to the circumstances attending Billington's crime, trial and execution:

"This year (1630) John Billington, ye elder son of some of the first settlers, was executed, and both by grand and petty jury, found guilty of wilful murder, by plain and notorious evidence. And was for the same accordingly executed. This, as it was ye first execution amongst them, so it was a matter of great sadness to them. They used all the means about this trial, and took ye advice of Mr. Winthrop and others ye ablest gentlemen in ye Bay of ye Massachusetts, that were then newly come over, who concurred with them yt he ought to dye, and ye land to be purged from blood. He and some of his friends were punished for mismanaging before, being one of ye profane families amongst them. Ye came from London, and I know not by what friends shuffled into their company. His facts were, that he waylaid a young man, one John Newcomb, about a fence, and stole his gun, and shot him with a gun, whereof he dyed."

The ancient Hubbard, in his "History of New England," says: "The murder of John Billington, who was executed for the murder of a man, was a matter of great sadness to them. They used all the means about this trial, and took ye advice of Mr. Winthrop and others ye ablest gentlemen in ye Bay of ye Massachusetts, that were then newly come over, who concurred with them yt he ought to dye, and ye land to be purged from blood. A SENTRY'S LOVE.

It Is Rewarded After Years of Waiting.

AID the president of the military court to Trofim Stoyan: "You have been found guilty of the crime of aiding the escape of a prisoner. The court desires to hear from you your version of the circumstances of the prisoner's escape, and the motives which induced you to be false to the trust imposed on you. We understand that you dispute the correctness of some of the witnesses' statements. We warn you to speak the strict truth. Stand attention."

As the president finished, a slim young fellow, standing between two glittering bayonets, drew himself up to "attention," glanced at the spectators and faced the court.

"To on," said the president.

"Your excellency," began the soldier, "I don't want mercy, and I don't expect it, but you have asked me to tell the truth, and I tell it. It was on a Saturday night, snowing hard and bitterly cold. Serdt Petroff marched me up to the entrance of Gorkaya-Balka mine and I relieved the sentry on duty there. I was to remain until midnight, and I received the usual orders to stop anyone who tried

to enter or leave the gallery, and to shoot them if they persisted. I was shivering with cold, and kept tramping about in front of the entrance to keep warm. After the barometer clock had struck ten, I noticed some one crouching in the shadow of the old tunnel-house. I thought, 'It seemed darker than that out in the open. The snow was driving in my face. I felt queer and timid that night. Turning sharply round at the end of my last furtive look from the house, I saw approaching me the figure of a woman in black. I got opposite the entry into the gallery, and stood still. I don't know why I felt scared. There was no one else about or nearer than the overseer's house. She came swiftly over the snow and her face was covered with a veil. I couldn't speak; it was as if my tongue was frozen. She put her hands on my shoulders, and looked up into my face.'

"What was she like?" demanded the president.

"Your Excellency, I cannot describe her. I only saw her eyes, then, and they were on fire and went right through me. She told me much that I cannot recall, for I was looking, not listening. But at last I understood her to be talking of her brother in the mine. She said she had come all way from Russia to see him, and that he was dying."

"She said that if I would let her into the mine for a few moments she would always pray for me, and devote her whole life to making me happy."

"Her great black eyes bewitched me, and I believed her. I said nothing, but pointed to the mine, and in a moment she had fled into the dark opening of what I was doing. I was dazed, and stood stock still, and the snow kept falling all the time and the night was growing darker. I had my eyes fixed on the entrance, and saw the figure emerge and run toward me."

"Soldier," she said, "you have made me happy for life. Make yourself happy and live with us. Let my brother pass. I will lead you and him to a place where we will be happy together. Be good to me, soldier, and I will give you all you ask from me. I will be yours; I will live for you and die for you."

"Don't smile, excellency. I was intoxicated with her words. I believed her. Her arms were around my neck and her face was lovely as the Madonna's. I seized my rifle and flung it with all my strength out into the snow. She put a file into my hands and I followed her to the gallery. There the darkness was thicker still, but we groped our way to where a man stood chained to a thick wooden station. I knew what I had to do. The man said nothing, but the woman kissed me—kissed me, excellency. So I worked like a madman. He was soon free. We reached the entrance as the barometer clock was striking eleven. There was a whole hour yet before the guard would be changed. We ran through the little wood and crossed the frozen river, and away beyond a wide, open space, where the snow was very deep, we entered the pine woods. I believed her. Her arms were around my neck and we found clothes and food. I buried my uniform in the snow. All that night we moved rapidly through the woods, hardly speaking to one

another at first. But the man and woman went on in front, walking arm in arm, and often they kissed one another, laughing and crying in turns. When I was close to them, they sometimes spoke French. As soon as it was light I never let my eyes leave her face. Her eyes were large and dark, but her hair was like gold, and hung down her back wet on her black cloak."

"Stand at 'attention,' sir," said the president, sharply.

The prisoner stood erect again and resumed his story.

"The morning was clear and frosty. The man had fallen several times during the night. His strength was gone. I saw he was as pale as death, and blood oozed from his mouth. The woman grew frantic with fear that he would be caught. The man, however, could go no further. He lay down on the snow, just as we were leaving the woods and coming out on the steppe. I thought he would have died. I took him in my arms and carried him verst after verst until my strength was gone, and I felt fever coming over me. But the woman never noticed me, and once or twice, when I turned to look at her from under my burden, I saw that her eyes were fixed on the face of the man I carried. I could hold out no longer. I fell on the snow and fainted. How long I lay there I cannot say. Whether or not I dreamed I am unable to tell the court. I don't think it could have been a dream. I thought I saw a troika come noiselessly over the snow and heard the breathing of horses."

"Do you mean to tell the court this was a dream? Can you give no further particulars about the troika or its driver?" interrupted the president.

"No, your excellency; the horses were black, I thought, and I know their eyes shone brightly; the sledges also seemed to be black. It came silently, it went away with gently clanging bells, like silver bells. When I came to my senses it was snowing hard. The wet flakes woke me, I think. I gazed around me on all sides. I was alone. I thought of my dream. There were no hoof marks, no traces of sledge runners, nothing but the level, trackless snow. Perhaps the snow had filled up the track, perhaps perhaps there was some other reason. Your excellency, I felt myself forsaken. I could not understand it. I was mad and cried aloud. Suddenly I noticed, pinned to my coat, a scrap of paper with pencil writing on it. It was taken from me when I gave myself up, but I'll never forget the words: 'We cannot take you with us further. Save yourself as best you can. My husband and I will always pray for you.' Oh, excellency, I saw it all then and sat down in the snow and wept and cursed. I loved that woman. Yes, I was a fool."

"And a traitor, if your excellency says so, but I did not think of that then. I thought only of my love, of how I had been betrayed, of my hurt pride. Your excellency knows the rest."

"The sentence of the court is that Private Trofim Stoyan take the place of the escaped prisoner in the mine at Gorkaya-Balka. He will remain there during the pleasure of his imperial majesty."

"That evening the young soldier was chained to the station."

Three years later a man and a woman on Ellis island suddenly encountered each other.

She starts and gasps:

While he exclaims:

"The woman!"

"There is no time for more. She has passed the inspectors and hurried to the little steamer that is to convey her to New York. He is pushed back, for the inspectors may not reach his case for a day or two."

But he hands at last. Where shall he find her? He finds employment, and then for six months spends all his leisure in the quest. At last he meets her. She is coming out of a theatre. He touches her sleeve. No word is spoken then, but, as if by mutual instinct, they enter the nearest cafe.

Five minutes later he has said:

"I have always loved you. You belong to me. Since you say your husband is dead, you are mine."

"But you have no money," glancing at his shabby clothes.

"I can earn it," he pleads. "A man who loves as I do can fail in nothing."

The next day they were married by a priest of the Greek church. Was it love or gratitude that prompted the woman, upon her third brief meeting, to grant so much?

The priest, gazing after them as they departed, murmured:

"I have united a goddess and a hero."

—N. Y. Journal.

Susie's Explanation.

Little Susie carried to a neighbor's house a beautiful pat of butter all covered with fanciful markings.

"How does your mother make the butter look so pretty, my dear?" some one asked.

"Oh, she did that with our brand new comb," said Susie.—Toledo Blade.

THE QUESTION OF LINGERIE.

Drop Your Collection of Bows, Bones and Buttons and Dress Needles and Pins.

Most women overdress themselves. They wear too much clothing. The symmetry of the figure is destroyed by the collection of bands, bones and buttons about the waist; grace of movement is destroyed by the overlapping and ill-fitting skirts, and not only comfort, but health, is destroyed by their weight. Vests of clumsy construction and ridiculous length make caricatures of the women who wear them, and the average woman stands accursed. With the big sleeves, the full skirts, the coats and shirt waists, the undergarments, the little women suggest rag-bags and the big women are monstrous.

When a stranger goes to a French modiste and is charged \$120 or so for a toilet she pays for more than the goods received. It is worth something to sit at a waist over a wholebone harness or decape a skirt over a starched petticoat. She will not use a cotton lining, either, knowing that the gown will certainly not be satisfactory. Durability cuts no figure in the matter. A lady never wears out her dresses. Fashion spurs her to new fashions. A garment may be good for one season's wear; after that its usefulness is ended. And so it behooves every intelligent person to buy her garments—gowns, bonnets, wraps, shoes or frocks—for the moment and get a fresh supply when needed.

But to return to the quantity of dress. A few years ago an agent for the so-called equestrian tight-waist through clubman lecturing on dress reform. She carried copious notes and a case of woolen and silk goods in various weights and colors. The riding breeches were worn by the lady as a substitute for undershirts.

THE ALPINE CHASSEURS.

France's Picturesque Corps Trained to Fight in the Mountains.

There is scarcely a body of troops in any army whose duties are more striking to the imagination than the French chasseurs, who guard the long line of the Alps. His cap hanging lightly over his ear, his rifle strapped across his knapsack, his open tunic showing his sunburned neck, his wrist encircled by his wide blue sash, and his muscular calves swathed in the woolen bands, the Alpine chasseur, careless of the weight of his heavy marching equipments, picks his way easily along the rocky cliff, treading solidly over the rock from which the iron of his alpenstock strikes out sparks, and gazes far down into the ravines with the deep eye of a mountaineer. Perhaps he dreams while he keeps guard, for the life is one favorable to contemplation as well as hardihood, and very likely this touch of sentiment attracts the recruits, who come to the famous corps from the great cities, though these men are in a minority, for most of the men are recruited among the mighty mountains which they guard.

The Alpine chasseur undergoes a training all his own. The first thing taught to the young recruit or to the young officer fresh from the academy is that his new life demands of him special obligations. The youth's morale must be carefully cultivated, for he is in constant danger of vertigo, slips and false steps; all trace of timidity must be eradicated. As for falls there are numerous mortal accidents every year. A stone tumbles beneath the foot, a crevasse opens in the snow, a peg rolls across the precipice; against such catastrophes there is no guarding. It is so with the landslides, which happen in every season of the year from the rains. Three years ago in the valley of the Tignes the chasseur of the rear guard of the twenty-third battalion were thus swept away, their companions escaping by but a few seconds. And the avalanches and the deadly vertigo, which will suddenly seize on the hardest men and the foot-holders faint under the strain of bravado. Truly it is a life of constant peril.

There are no book rules for the special tactics of marches and conflicts, but a body of tradition based on the experience of past wars and the annual maneuvers is the guide. These are early taught to the chasseur and he is made free of a valuable lesson, that the same the signs and a pocketful of compasses are of no earthly use to him; what he needs to know is the lay of the land and the trend of the mountains and valleys and ranges.

The chassours leave winter quarters at the beginning of summer for three months' campaigning in the mountains. It is the time to see them at their best—gay, alert and enduring, marching night and day over terrible roads, drenched with rain or with perspiration, heavily laden, but always keeping the unalterable gaiety of the French soldier, and what lessons they learn during the maneuvers of the troops the mountains have in store for them. You hear an infernal fusillade, a fearful thimble, a roll of musketry close beside you, surely the attack is being made just there, around that point of rocks. The point of rocks is turned, is behind you, the noise dies down, and lo! the battle is raging in the rear. And now again, what is that gentle murmur that whispers among the branches, a distant rolling sound whose muffled hum does not hush the ripple of the brook? There is fighting in the valley across the range. The column advances, undisturbed and scarcely has it gone a hundred paces higher when the din breaks out with intolerable force and the projecting rocks hurl it pitilessly in your ears. The advanced guard is engaged and you already smell powder. The mountain has deceived you again.

And what difficult fighting it is! The battalion comes on in Indian file and spreads out in open order among the rocks, firing as it advances in broken, irregular front. All at once the enemy appears in force. A retreat is hastily ordered and the column makes the best of its way back again in Indian file once more. Suddenly there is a halt. What has happened on the rear guard? A piece has fallen or a landslide has blocked the way. The engineers go hastily to work, and soon a line of the platoon of a demolition cartridge, and the way is clear again. Nor is the chasseur battling only against men, but with elements, with the terrible snow storms which blind him, the whirlwinds of winter, and in summer the furnace-like ravines where no air stirs, and whose rocks have been blanched by the pitiless sun. Fortunately for him these very dangers will diminish the occasions for combat between himself and his hardy rival on the Italian side if war breaks out between the two countries, for men cannot fight each other when nature has decided to make one with them. Between the French and the Italian chassours, by the way, there is great emulation and respect. They sometimes meet on the frontier line during the maneuvers, and it has frequently happened that they have sat down to a meal together at a table down to a meal together at a table in France and two in Italy, with the simple soldierly dishes and the country wine in the middle.—Philadelphia Times.

A Venerable Grapevine.

Hampton court's famous old vine has survived another winter, and once again its branches are heavily laden with bunches of grapes. The number of bunches is about twelve hundred, which is about the average, although many as twenty-five hundred have been picked in one year. The clusters are not quite so large as they have been, but this is hardly a matter of surprise considering the vine is now one hundred and twenty-six years old. Much of the fruit, which belongs to her majesty, finds its way into the wards of the London hospitals. The gardens of the palace are now in their full beauty.—London Telegraph.

WOMAN'S PATIENCE.

There are no book rules for the special tactics of marches and conflicts, but a body of tradition based on the experience of past wars and the annual maneuvers is the guide. These are early taught to the chasseur and he is made free of a valuable lesson, that the same the signs and a pocketful of compasses are of no earthly use to him; what he needs to know is the lay of the land and the trend of the mountains and valleys and ranges.

The chassours leave winter quarters at the beginning of summer for three months' campaigning in the mountains. It is the time to see them at their best—gay, alert and enduring, marching night and day over terrible roads, drenched with rain or with perspiration, heavily laden, but always keeping the unalterable gaiety of the French soldier, and what lessons they learn during the maneuvers of the troops the mountains have in store for them. You hear an infernal fusillade, a fearful thimble, a roll of musketry close beside you, surely the attack is being made just there, around that point of rocks. The point of rocks is turned, is behind you, the noise dies down, and lo! the battle is raging in the rear. And now again, what is that gentle murmur that whispers among the branches, a distant rolling sound whose muffled hum does not hush the ripple of the brook? There is fighting in the valley across the range. The column advances, undisturbed and scarcely has it gone a hundred paces higher when the din breaks out with intolerable force and the projecting rocks hurl it pitilessly in your ears. The advanced guard is engaged and you already smell powder. The mountain has deceived you again.

THE ALPINE CHASSEURS.

France's Picturesque Corps Trained to Fight in the Mountains.

There is scarcely a body of troops in any army whose duties are more striking to the imagination than the French chasseurs, who guard the long line of the Alps. His cap hanging lightly over his ear, his rifle strapped across his knapsack, his open tunic showing his sunburned neck, his wrist encircled by his wide blue sash, and his muscular calves swathed in the woolen bands, the Alpine chasseur, careless of the weight of his heavy marching equipments, picks his way easily along the rocky cliff, treading solidly over the rock from which the iron of his alpenstock strikes out sparks, and gazes far down into the ravines with the deep eye of a mountaineer. Perhaps he dreams while he keeps guard, for the life is one favorable to contemplation as well as hardihood, and very likely this touch of sentiment attracts the recruits, who come to the famous corps from the great cities, though these men are in a minority, for most of the men are recruited among the mighty mountains which they guard.

The Alpine chasseur undergoes a training all his own. The first thing taught to the young recruit or to the young officer fresh from the academy is that his new life demands of him special obligations. The youth's morale must be carefully cultivated, for he is in constant danger of vertigo, slips and false steps; all trace of timidity must be eradicated. As for falls there are numerous mortal accidents every year. A stone tumbles beneath the foot, a crevasse opens in the snow, a peg rolls across the precipice; against such catastrophes there is no guarding. It is so with the landslides, which happen in every season of the year from the rains. Three years ago in the valley of the Tignes the chasseur of the rear guard of the twenty-third battalion were thus swept away, their companions escaping by but a few seconds. And the avalanches and the deadly vertigo, which will suddenly seize on the hardest men and the foot-holders faint under the strain of bravado. Truly it is a life of constant peril.

There are no book rules for the special tactics of marches and conflicts, but a body of tradition based on the experience of past wars and the annual maneuvers is the guide. These are early taught to the chasseur and he is made free of a valuable lesson, that the same the signs and a pocketful of compasses are of no earthly use to him; what he needs to know is the lay of the land and the trend of the mountains and valleys and ranges.

The chassours leave winter quarters at the beginning of summer for three months' campaigning in the mountains. FOR YOUNG PEOPLE.

PIGS AND SHEEP.

White pigs has baby, ten.
For each little pig a toe;
Five on this foot, five on that,
All drawn up in a row.
Eight white pigs are dainty and small,
And the two big toes are the parents of all.

White sheep has baby, ten.
And each little finger a sheep;
How the shepherd folds his lambs
When baby's count asleep.
Eight white sheep are dainty and small,
And the two great thumbs are the parents of all.
—R. W. Lewis, in Our Little Ones.

THE GRIZZLY'S PLUCK.

He Can Do Plenty of Damage When He Is "Nonchalantly Dead."

Personally I have more respect for his majesty, the grizzly bear, than for any other animal I ever trailed, the tiger not excepted, writes W. T. Hornaday in an article on the bears of North America in St. Nicholas. It is quite true that many an able-bodied grizzly is caught napping and killed "dead easy," as the baseball language says, but so are big tigers also, for that matter. In fact, I know of one large tiger weighing within five pounds of five hundred, who was promptly laid low by two bullets from a mere pop-gun, of a rifle, and there was no fuss about it, either.

It is easy enough to kill a grizzly at a good safe distance of a hundred yards or so, which allows the hunter to time the teeth and claws get dangerously near but tontack a fully-grown and wide-awake Ursus horribilis in brushy ground at twenty or thirty yards distance is no child's play. As an old hunter once quothly expressed it to me: "A grizzly, he'll git up and come at ye with blood in his eye after he's nonchalantly dead." The point of it is, this bear is so big, and so enveloped in long, shaggy hair, his head is so wedge-like, his strength and tenacity of life so great, and his rage when wounded so furious that at that short range he is hard to kill quickly, and kill so dead that he cannot get a blow at the hunter.

The strength in a grizzly's arm is tremendous, and when the blow comes accompanied with claws five or six inches long, like so many hooks of steel on a sledging hammer, it tears to shreds what it falls to crush. There are many authentic instances on record of hunters and trappers who have been killed by grizzly bears, and I believe it could be proved that this animal has killed more men than all the other wild animals in North America combined, excepting the skunks and their allies.

In the days of the early pioneers, the only rifles used were the muzzle-loading, hair-trigger squirrel-rifles of small caliber, and they were no match for the hairy grizzly, either in speed or strength. As a result, brain had the best of it, and in time brought about a perfect reign of terror among the frontiersmen who trespassed upon his domain. For any part, I certainly would not want to attack a big grizzly at short range with my father's old Kentucky rifle of 32 caliber, unless I had my will made, and all my earthly affairs in shape to be left for a long period. But with the rise of the breech-loading rifles, and the use of the rifle, and other dangerous animals, the grizzly soon found that the odds were against him. To be sure, he kills his hunter now and then, sometimes by one awful stroke of his paw, and sometimes by biting his victim to death. But he has almost ceased to attack men wilfully and without cause, as he once did. Unless he is wounded or cornered, or thinks he is cornered and about to be attacked, he will generally run whenever he discovers a man. But when he is attacked, and especially if wounded, he gets mad, and especially if wounded, he will fight anything, even a circular saw, so it is said, and give it five turns the start.

A FAMILY OF GRIZZLIES.

A Neighboring Neighborhood.
Boy—Mother wants to know if you won't lend her your carpet sweeper?
New Neighbor—I haven't any.
"We saw one unloaded from the wagon."
"That wasn't a carpet sweeper. It was a lawn mower."
"Gee whizz! I don't know what I'll do now. If I tell her it was a lawn mower she'll want to borrow that, and then I'll have to push it. I wish you'd send out and buy a carpet sweeper, and please don't use your lawn mower until we move away."—Good News.

BUMMER AND LAZARUS.

Story of a Generous Dog Who Protected a Friendless Old Cur.

A homeless dog strayed into a San Francisco engine house, and was made welcome by the fully firemen. Though they named him Bummer they treated him kindly, fed him, made him a bed and gave him the freedom of the house. Bummer repaid their kindness by devoting himself to his new friends. He ran with the engine to every fire, marched with it proudly on parade, kept other dogs out of its way and guarded the men if they needed his care. He was seldom off duty unless hunger prompted a visit to a neighboring restaurant, where a friend of his engine kindly fed him.

One day, after eating a hearty meal there, he crunched his mouth with meat and bones and trotted off. He did the same the next day, and the next. Then he was followed. Going through several streets he entered a small, dark, dirty alley, and at its further end laid the food before a half-starved dog, then, wagging his tail in satisfaction, he kept guard while the old creature ate.

Learning that Bummer was supporting a friend the firemen went to see what attractions there were about the old dog. They found a miserable, dirty skeleton with a broken leg. Much of his hair was gone and his body marked with sores and scars, telling of recent and earlier battles. Though they saw nothing desirable in the old fellow, Bummer's kindness and virtuous look conquered.

The old creature was taken to the engine house, his leg put in splints, an addition made to Bummer's bed, and the newcomer given a share in the other's rights. To the dog with sores the firemen gave the name of Lazarus. Kind treatment and good food showed their effect on Lazarus, but could not make him young again. He regained strength, recovered the use of his leg and was able to walk about, but never to run far with the engine. His duty seemed to be to guard the house while his younger friend attended to the engine in the streets.

The old fellow appeared to be the butt of every cur in the ward. The meanest and most cowardly canine of the street need only see Lazarus away from his business and there followed a

HE ENTERED A SMALL, DARK, DIRTY ALLEY.

fight, with the old fellow invariably the under dog. Too old and weak to battle successfully, yet he seemed to know nothing about victory. He was a dog of peace when he had his way, of defeat when the other had the chance.

After a few battles Lazarus was let alone when Bummer was near, but never if his champion was out of hearing. The strong dog need not hear the faint yelp for aid of his venerable friend and there came like a black flash through the streets some thing and over without knowing what had struck him. If the scamp desired to fight he must meet Bummer's strength and prowess; usually the battle ended with the champion's first charge.

Though kindness and care prolonged the life of Lazarus, they could not stop the later approach of death. It came slowly but surely. The old dog ceased to eat, nor would he try the nicest dainties. Bummer's watching and the attention of the firemen, appreciated by the old fellow, made his end easy.

The men made a box, placed the body of the dead dog in it, and, followed by Bummer, carried it out to a vacant lot and gave it decent burial.

A change came over Bummer after his friend's death. He lost friskiness, refused to follow the engine, declined food, could not take medicine, and seemed to be grieving himself to death. Though he received the attention of the firemen kindly, he showed no interest in them nor anything they did. Sitting at the door of the engine-room, or lying in his bed, he allowed time to pass though he had lost all interest in life. Thus he gradually wasted away, died from grief and starvation. A few weeks after the death of Lazarus Bummer's dead body lay in the same bed.

The firemen made a nest box for a coffin and carried their friend to a pleasant vacant lot than had been used for the other, and, while some dug a grave for Bummer, others dug up the other dog, and in the new grave they laid the friends side by side. Over the mound they raised a stone, on which they had the names of the faithful friends; and, unless the stone has been removed recently, it yet marks in that vacant lot the last resting place of Bummer and Lazarus.—Chicago Inter Ocean.

The Eiffel Tower Dissected.
The total weight of the ironwork in the Eiffel tower is 7,767 tons, and the foundations of each of its four independent legs are sunk to a depth of fifty feet. It is constructed of iron throughout (most people think it is of steel), the pieces of the metal used in its construction being 115,000. The exact height of the great iron skeleton is 984 feet (usually given as even 1,000), and it is to be the property of the builder for twenty years, beginning with 1889, after which time the sole ownership reverts to the city of Paris.

FARM AND GARDEN.

PROGRESSIVE FARMING.

Why Draining Is Much More Effective Than Open Ditches.

Drainage is being studied now by farmers as never before, and in all sections of the country it is becoming a matter of first importance. There are less tiles could be used with great profit, and as a rule the farmer who begins to drain his farm will be so fully convinced of the benefits derived therefrom that he will continue putting in drains until he has finished the whole farm. A heavy clay soil can never be farmed to the best purpose unless it is drained and except for special crops, most of mucky and low-lying lands are benefited by a thorough system of drainage. A very few sections of the country have a subsoil that is in such condition that drainage is not necessary. These are the sections where the soil rests on a stratum of gravel that allows the surface water to pass away through underground channels. In some places a stratum of clay lies above the gravel, and this must be cut through before the water can reach its outlet. These places are so few and limited in area that in comparison with the whole country or that part of it where drainage is needed, they are of little importance in considering the subject.

Drainage acts in two ways. It allows the surplus water to run away quickly, leaving the soil in a shape to be tilled in a short time after heavy rains, and paradoxical as it may seem, it keeps the soil in a condition to retain more moisture than it would if undrained. A hard, compact clay soil that in dry times will become baked and lumpy if not drained, will, when a proper system of drainage is in operation, become loose and friable and retain moisture enough to withstand a drought that will wither crops on low black lands. This is because the drains running through the land do not only pipes for carrying off water, but they also allow air to penetrate every part of the soil and this air carries the moisture with it and results in benefit to the growing crop. It took a long time to convince farmers that draining was cheaper than open ditches, and much more effective. In these days there are few who will dispute the fact, and these few are among the unprogressive who do not read the papers.—American Farmer.

ABOUT CELLAR STAIRS.

They Can Be Constructed So That They Will Last Many Years.

As usually constructed, the outside cellar stairs become very much dilapidated after a few years of use, and many serious accidents occur by falling or slipping from and upon the decaying steps. If stones of the right length and size material for the steps, the next best being plank, though neither can be depended upon unless the whole space underneath the steps, down to the level of the cellar floor, be laid up in masonry. If possible, make the steps either round or flat, as at hand, lay up

DURABLE CELLAR STAIRS.

the stairs of this material thoroughly imbedded in mortar, making the steps of the needed height. When this is done, cut a plank step of the proper width and length for each step, and place them on top of the stone step, as shown in the accompanying illustration. Upon each side fit a retaining board, and the result will be stairs that are durable and generally satisfactory. If possible, make the steps from two-inch pine planks, covering the whole with folding doors, in the usual manner.—American Agriculturist.

AMONG THE POULTRY.

This brooder should not be dark. Light is essential.

It stands to reason that raw corn meal is not good for young chicks as cooked meal is.

Avoid high roosts, if you would not have humble foot, especially if the fowls are large ones.

It is both cruel and injurious to prevent fowls from having all the water they want in hot weather.

Wine feeding whole grain to fowls scatter it well. If thrown to them in a heap they will gorge themselves.

Trachycloasis in poultry is a new discovery. It is said that feeding too much corn produces the disease. We are inclined to doubt that, however.

Continued health will be found in pure water, good food, clean quarters and in not overfeeding. Neglect these things and likely your fowls will sicken and die.

Wine fowls go on the roosts with wet legs in cold weather, the feet may be frozen. Some remove the roosts, under such circumstances, and let the fowls rest on straw.—Farmers Voice.

Ons as a Food for Hens.

Oats are highly recommended as an egg-producing food for hens. Oats contain more mineral matter and less starch than wheat or corn, and for that reason they should enter into the ration, not only by way of variety, but because they will aid in supplying the hens more completely for producing eggs. Ground oats, sifted, make the best food for little chicks and may be fed dry. Our farmers do not feed enough oats and thus get their hens too fat by allowing them corn and wheat in excess. A change of grain will be beneficial and highly relished.—Breeders' Gazette.

LIGHT POULTRY CRATE.

Some Valuable Hints Relating to the Shipment of Live Fowls.

Express charges on live poultry being double rates, it is desirable to make the crate in which poultry is shipped as light as is consistent with strength. The illustration shows what is perhaps the best framework for such a crate. An empty grocery box of the requisite size may be saved in the middle, making the top and bottom of the crate, though if the box is at all high some three or four inches only, of the top and of the bottom should be taken. The corner post of inch and a half pine should be well nailed to the box, and the sides and ends then covered with burlap or cotton cloth. The top may be of slats or of boards as shown in the sketch. If of the latter, a hole should be cut both for ventilation and for convenience in handling. Straw should be placed in the bottom, and plenty of oats or wheat scattered into it. If the birds are to be shipped but a short distance, no water should be placed in the crate, but if sent a long way a tin cup should be provided, and notice pasted on the outside that the fowls within are to be watered by the express messenger. If food is provided for a long journey it should be placed in some receptacle so that the birds will not soil it before it is all eaten. Do not crowd birds that are to be shipped a long distance. If they are to be on the way but twenty-four hours, or less, some little crowding will not injure them.—American Agriculturist.

If they are to be on the way but twenty-four hours, or less, some little crowding will not injure them.—American Agriculturist.

LEAVES AS FODDER.

Interesting and Valuable Tests Made by French Farmers.

About a year ago M. Girard created great interest in agricultural circles by his statement advanced that of tree leaves as cattle food. He held that the leaves of trees, as compared with other fodders, showed a high nourishing ratio, whether fresh or dried, and that certain tree leaves are not surpassed as fodder by the products of natural prairies or of cultivated lands.

European farmers, among whom the French have taken the lead, have been systematically testing M. Girard's ideas by placing their cattle on a tree-leaf diet. The results are said to be most encouraging. The leaves after being picked are spread on the ground to the depth of 4 inches, and are turned once a day. The process of drying takes from three to five days, according to the weather, and when dried the leaves are piled up ready for use. It is found advisable to prepare each day's supply twenty-four hours beforehand, when a small quantity of chopped turnips is mixed with the leaves, and the whole is left to ferment. Much cows thrive surprisingly on this fodder. The degree of nutrition afforded by different trees varies considerably; in fact, some trees were entirely rejected. The final selection of the French farmers was narrowed down to the leaves of five trees, the hazel, aspen, ash, elm and willow.

RELIEF OF HEAVES.

There Are Several Ways of Alleviating This Painful Disease.

Heaves, the common name for broken wind in the horse, is susceptible of great alleviation by attention to the character and quantity of food to be eaten by the animal, as everyone knows. If a horse suffering from the disease is allowed to distend his stomach at his pleasure, with dry food entirely, and then to drink cold water ad libitum, he is nearly worthless. But if his food be moistened and he be allowed to drink only a moderate quantity at a time, the disease is much less troublesome. A still farther alleviation may be obtained from the use of balsam of fir and balsam of copaliva, four ounces each, and mix with calcined magnesina, sufficiently thick to make it into balls, and give an evening and morning for a week or ten days. This gives good satisfaction. Lobelia, wild turnip, elecampane and skunk cabbage, equal parts of each. Make into balls of common size, and give one for a dose, or make a tincture by putting four ounces of the mixture into a quart of spirits and, after a week, put two tablespoonfuls in their feed once a day for a month or two. This remedy is also good.—Farmers Voice.

A History of Green Manuring.
A history of the practice of green manuring, by J. Kuhn, in an official publication in Saxony, bears the conclusion that green crops can be used more economically in feeding for meat and milk than in plowing under merely as a manure. It is assumed that the search for a profitable crop for green manuring of the better class of soils is still at a standstill. But the plowing under of the stubble or remains of a crop is proper and profitable. It is held to be a mistake to plow into the soil for manure a pound of albuminoids which could be used for making flesh or milk. The practice makes no headway in farm management, except with lupines on light sandy soils. It is recommended to take advantage of recent discoveries in agricultural science, and instead of manuring the soil with nitrogenous matter, utilizing to the fullest extent the nitrogenous and carbonaceous materials derived from the air by feeding them to farm animals.

We should not feed broken glass to fowls. Feed gravel. It is quite as easily obtained as broken glass and generally more easily obtained.

Royal Baking Powder

ABSOLUTELY PURE

Useful at Last.
Flying machines, like schemes for the securing of perpetual motion, are apt to be better in theory than in practice, but the Washington Star reports one partial exception to the rule.

"Hello, Timmins," said a friend; "have you done anything with your flying machine yet?"
"Yes."
"Anything practical?"
"Oh, yes, certainly so. Part of it I used for kindling, and by putting rollers on the rest I made it into a first-class cradle for the twins."—Yonth's Companion.

"Boy, is your father in?" "I guess so. Heard him call somebody a dunce just now. 'Twant me, coz I want there. She would be dazed to call the cook such names; so I guess it must have been dad."—Boston Transcript.

Chop Excessions to the West.
An exceptionally favorable opportunity for visiting the richest and most productive sections of the west and northwest will be afforded by the Home-Seekers' low-rate excursions which have been arranged by the North-Western Lines. Tickets for these excursions will be sold on Sept. 11th and 20th, and Oct. 20th, to points in Northwestern Iowa, Western Minnesota, North Dakota, South Dakota, Manitoba, Nebraska, Colorado, Wyoming, Utah, Montana and Idaho, and will be good for return passage within twenty days from date of sale. Stop-over privileges will be allowed on going trip in accordance with the tickets are sold.

For further information, call on or address Travel Agents of connecting lines. Circulars giving rates and detailed information will be mailed, free, upon application to W. A. Thrall, General Passenger and Ticket Agent Chicago & North-Western Railway, Chicago.

The Republican.

RATES OF SUBSCRIPTION: One copy per week, in advance, \$1.00; in arrears, \$1.25. Single copies, 5 cents.

ADVERTISING RATES: One square of ten lines, first week, \$1.00; second week, 75 cents; third week, 50 cents; fourth week, 25 cents.

REMITTANCES: Remittances made by money order, postal note, registered letter or bank draft will be at our risk.

THURSDAY, SEPT. 13, 1894.

REPUBLICAN NOMINATION.

FOR CONGRESS: GEORGE L. WELLINGTON, OF ALLEGANY COUNTY.

During the first week in July we sent out from this office nearly half a thousand statements of arrears for subscriptions.

We only want what we have labored for and we want it badly.

We dislike this method of calling the attention of our friends to a matter that has likely slipped their minds, but it has become a case of necessity.

Of the sixteen hundred dollars we have received less than two hundred and it is impossible for any person of limited means to carry on a business of this kind without money, so come right along friends, and settle your bills.

Republican Meeting. A mass meeting of the voters of Oakland and Garrett county is called for next Thursday night, the 20th inst., at 7 o'clock at Offutt's hall, Oakland, at which addresses will be made by Hon. George L. Wellington.

COMMITTEE MEETINGS. The county Executive Committee and the State Central Committee of Garrett county will meet in Sturgiss' hall, Oakland, next Thursday afternoon, the 20th inst., at four o'clock.

REPUBLICAN MEETINGS.

The voters of Garrett county are requested to assemble in mass convention at the following places in the county at the time and dates specified below:

- Crellin, Monday, Sept. 24, at 7 p. m.
- Sang Run, Tuesday, Sept. 25, at 2 p. m.
- Friendsville, Tuesday, Sept. 25, at 7:30 p. m.
- Selbysport, Wednesday, Sept. 26, at 2 p. m.
- Accident, Wednesday, Sept. 26, at 7:30 p. m.
- Bittinger, Thursday, Sept. 27, at 2 p. m.
- Grantsville, Thursday, Sept. 27, at 7:30 p. m.
- Deer Park, Friday, Sept. 28, at 7:30 p. m.
- Blaine, Saturday, Sept. 29, at 2 p. m.
- Wilsons Mills, W. Va., Saturday, Sept. 29, at 7:30 p. m.

These meetings will be addressed by Hon. G. L. Wellington, Hon. Milton G. Prince and Hon. Norman B. Scott, of Hagerstown, and others.

Music will be furnished at the meetings by a brass band.

THERE are no Democrats in Maine, to speak of.

Let it be the duty of every Republican to see that his Republican neighbor is registered next Monday, the 17th inst.

EVERYTHING has gone Democratic during the last eighteen months. But the November elections will not.

Don't fail to register.

Mr. CYRELAND has recognized the Hawaiian republic, and it will be seen by the endorsement at the southwest corner of the document of recognition that W. Q. Gresham is "by the President."

By the workings of the new tariff bill no bounty on sugar will be paid by the government. This is a Democratic measure and will keep hundreds of dollars out of the pockets of the people of Garrett county.

The price of refined sugar has advanced to the consumer as the direct result of Democratic taxation. The good old McKinley days when 24 pounds of granulated sugar could be bought for a dollar have passed into obscurity.

The Maine Election.

The election in Maine on Monday showed a largely increased Republican vote in that state. Never but once before in the history of the commonwealth has so large a majority been given to any candidate for governor as was polled for the successful ticket.

No Protection for Plagiarists.

"Oh for a tongue to cease the slave, When treason, it is exactly right, comes on, the end is but to die."

"I take my place with the rank and file of the Democratic party, who believe in tariff reform and know what it is, who refuse to accept the results embodied in this bill as the end of the war, who are not blinded to the fact that the livery of Democratic tariff reform has been stolen and worn in the service of Republican Protection, and who have marked the places where the deadly blight of treason has blighted the counsels of the brave in their hour of need."

It is highly important that every Republican in Garrett county be registered.

Lighten the Burden.

The burden of Free-Trade is already upon us. How can we lighten it? The rush of imports to secure their foreign goods from the Custom House at the lower rates of duty has told the story.

THE following point on politics was taken from the Baltimore News of Sunday:

"The Republican party in Maryland was never in better shape to make a strong, aggressive fight. This arises not so much from its own strength as from the weakness of the Democratic party organization, which condition has to a large extent been brought about by the absolute and unbridled tyranny of the corrupt junta of bosses, most of whom have grown rich and arrogant through their long lease of almost absolute power in the State and city."

As a result of the discontent among the Democrats with the performances of their self-constituted leaders, the Republicans are full of hope and confidently assert that they will carry at least three districts, with a fighting chance to win in two others."

THE burden of Free-Trade is already upon us. How can we lighten it? The rush of imports to secure their foreign goods from the Custom House at the lower rates of duty has told the story.

Let it be the duty of every Republican to see that his Republican neighbor is registered next Monday, the 17th inst.

EVERYTHING has gone Democratic during the last eighteen months. But the November elections will not.

Don't fail to register.

The foreigners are determined to have and to hold our markets. Shall we surrender them? We do not desire—no true American desires—that American wage earners should be compelled to sell their labor in open competition with the cheaper labor of other countries.

What can be done to lighten the burden? The manufacturers should not be expected to pay higher wages than their foreign competitors and to sell their goods at the same prices.

It is the duty of every Republican in the county to see that his name is on the registration books.

Great Republican Victory.

At Ocala, Me., Sept. 11.—The Republicans regard the result of yesterday's election as the biggest victory they have ever achieved in this state.

The vote for governor, which two years ago was 130,000 was reduced to 70,000, but even with this it is alleged that Cleaves has received 70,000 votes.

The returns show nothing but Republican gains. The returns so far indicate that Johnson (Dem.), will not get over 35,000 votes to 55,000 cast for him two years ago.

In the house of representatives, which consists of 151 members and which two years ago stood 107 Republicans and 44 Democrats, the Republicans, it is believed, have elected 110 members, while the remainder have been elected by the Democrats and Populists.

The latest returns indicate that the Democrats will have but 14 in the house of representatives, against 137 Republicans.

No Sugar Bounty Inspectors.

WASHINGTON, Sept. 11.—Secretary Carlisle to-day in a letter addressed to Senator Caffery, of Louisiana, officially decided, as predicted in the Associated Press dispatches last week, that under the new tariff law it would be unlawful to appoint inspectors, weighers and testers of bounty sugars under the McKinley act, and further that Congress having made no appropriation for the employment of such officials, the laws of the United States prohibit the employment of such persons to serve without pay.

The letter of Secretary Carlisle to Senator Caffery does not decide the main question in which the sugar-growers are interested, namely, whether the sugar bounty for this year earned up to the time the tariff bill went into effect will be paid.

The decision to-day is simply an official refusal on the part of Secretary Carlisle to appoint sugar bounty inspectors and testers and does not decide the other question, although there seems little doubt that he will hold that he has no authority to pay bounties earned this year before the tariff bill went into effect.

The law says it shall be unlawful after the passage of this act to pay such bounties. The only recourse left to the sugar-growers for bounties earned would in that case be to sue in the Court of Claims.

Bucklen's Arnica Salve.

THE BEST SALVE in the world for Cuts, Bruises, Sores, Ulcers, Salt Rheum, Fever Sores, Tetter, Chapped Hands, Chilblains, Corns, and all Skin Eruptions, and positively cures Piles, or no pay required. It is guaranteed to give perfect satisfaction or money refunded. Price 25 cents per box. For sale by all druggists.

FINANCIAL REVIEW.

New York, Sept. 8.—As indicated in our last advice, the slight reaction in the price of stocks in the last week of August has been followed, during the past week, by a general recovery of tone and an advance in quotations.

The general outlook is interpreted as favoring a continuance of the present symptoms of recovery. Everywhere there is a scarcity of goods; and the unprecedentedly low scale of prices encourages buying.

The general outlook is interpreted as favoring a continuance of the present symptoms of recovery. Everywhere there is a scarcity of goods; and the unprecedentedly low scale of prices encourages buying.

The last week of that month the decrease was less than two per cent. August opened with a merely fractional falling off, and the third week of that month showed an increase over last year of 31 per cent.

It is to be noted, however, that August of 1893 showed a decline of thirteen per cent as compared with 1892; but the traffic of that month two years ago was large beyond all precedent.

Henry Clews.

Thirty-two Years Ago a Period of Deep Gloom in the War for the Union.

Yesterday thirty-two years ago fell on a period of deep gloom. McClellan's peninsula campaign had failed, Pope had been defeated at the second battle of Bull Run, Lee had invaded Maryland, and the authorities at Washington were almost in a panic over the defense of that city.

Such was the program, and yesterday thirty-two years ago the Confederate army was on the point of executing the first part of the programme—the capture of Harper's Ferry.

It was a fixed point of policy with Halleck, while he was commander-in-chief, to keep a large force at Harper's Ferry with the idea that it would hold the line of the Potomac river, which it never did.

When McClellan had been hurriedly restored to command to meet Lee's invasion, he strongly urged that the division, 10,000 strong, at Harper's Ferry should be withdrawn and added to the main army where it would be of use, but Halleck would not listen to anything of the kind, and the division was left there to be gathered in by the Confederates.

The troops at Harper's Ferry were under the command of Col. Dilon S. Miles. Harper's Ferry is on the Virginia side of the Potomac at the junction of the Shenandoah. On the Maryland side are the high bluffs known as Maryland Heights, overlooking the town.

On the east side of the Shenandoah is Loudon Heights, also commanding the town. Back of the town in the angle of the Potomac and the Shenandoah, is Bolivar Heights several hundred feet lower than the other heights and under a plunging fire from them. Against the division left in this trap a third of Lee's army, under the command of Jackson, was moving yesterday thirty-two years ago.

Of Col. Miles' force 2,000 were posted on Maryland Heights, 7,500 on Bolivar Heights, and the remainder, about 1,000, guarded the bridge and other points on the river. On September 13 two divisions of the Confederate army under McLaws and Anderson, attacked the small force stationed on Maryland Heights. It made a gallant fight, but when the Confederate troops were attacking its rear, abandoned the position, retreating to Harper's Ferry.

On the same day another division of the Confederate army under Walker occupied Loudon Heights, no attempt to hold which had been made by the Federal forces. Also on the same day Gen. Jackson himself with a still larger force reached a position in front of Bolivar Heights so that the single division of the Union army was completely in the grip of an overwhelming force.

Gen. Jackson began a flanking movement on the right of Col. Miles' position on the afternoon of September 14 and there was a sharp engagement lasting until nightfall, when the Federal troops retired within the lines of their defenses on Bolivar Heights. It was evident to all that the position was an untenable one and the question of retreat was discussed. Col. Miles held that under his orders he had no right to evacuate his post, and that moreover it was impossible for the infantry and artillery to get away.

Col. P. F. Davis and Col. Hasbrouck Davis, of the cavalry, contended that they could get their troops safely away, and finally induced Miles to issue the necessary orders. On the night of the 14th the cavalry stole away as secretly and quietly as possible, and under the direction of the two Davises, who rode together at the head of the column, they reached the Union lines without the loss of a man, capturing on the way a Confederate ammunition train of 97 wagons and its escort of 600 men.

As soon as there was light enough to see, on the morning of September 15th, the Confederate artillery opened on the Federal position from front and sides. The Confederate artillery posted on Loudon Heights outflanked the Federal lines and no effective reply could be made. At 8:30 the artillery fire slackened and it was evident that an assault would be made. Col. Miles then came to the determination that further resistance would be a mere waste of human life and calling a council of war urged that terms of surrender should be made.

Some of the brigade commanders were reluctant to comply with his recommendations, but at last agreed unanimously. Immediately after the council broke up Col. Miles was mortally wounded and died the next day. Gen. Julius White arranged the terms of the surrender which took place on the 14th, the same day that the battle of South Mountain was being fought by McClellan against Lee, who had with him two-thirds of his army. Gen. McClellan had been advised by Col. Miles that he could not hold out longer than the 15th. As it was the resistance was sufficiently protracted to prevent the divisions of A. P. Hill, McLaws and Anderson from rejoining Lee until the 17th, just in time to take part in the battle of Antietam. Four days before that a copy of Lee's orders had fallen into McClellan's hands disclosing the fact that a third of Lee's army had been detached to attack Harper's Ferry. On the 14th he sent Gen. Franklin, commanding the Sixth Corps, to force Crampton's Gap and proceed to the relief of Harper's Ferry, but the force at the disposal of Franklin was not strong enough to accomplish this purpose.

Don't fail to register.

Weather Crop Bulletin.

Bittinger.—The weather continues warm and dry, but at this writing the indications point to rain. Wheat seedling finished; about the usual acreage sown. Buckwheat cutting in progress, and the crop is excellent. Pastures getting short and water low.

Grantsville.—The past week has been remarkably warm and dry up to the 7th, when some local showers occurred, and the prospects are that we will have enough rain. Wheat mostly sown. Good corn weather.

Sunnyside.—A good rain on the 8th put an end to the drought which was beginning to grow very serious. Although pastures and all growing crops were greatly refreshed, much more rain is needed to be of lasting benefit. Buckwheat harvest is in progress.

Marianna Licenses.

Clerk Tower has issued marriage licenses to the following parties since our last report: Thomas Grant Taylor and Matilda Cate.

Jacob Spiker and Mattie Martha Taylor.

Newton Barnes Hare and Georgia A. Adams.

Eliza Jacobs and Genie Anderson.

Burk Knight and Tracy Caroline Shrader.

Alexander Harvey Brown and Sarah Alice Lippard.

Miner Scott Dawson and Zana May Windle.

Jefferson J. Curry and Florence Minnie Findlay.

Norman Hooyer and Lydia Catharine Myers.

Joseph Edward Harned and Emma M. Bauer.

Dead Letter List.

List of mail matter remaining unclaimed in the postoffice at Oakland, Garrett county, Maryland, for the week ending September 15th, 1894, the parties addressed being unknown to the postmaster.

One cent on each article is chargeable for advertising. Parties calling for this matter, will please say it is advertised, otherwise they may not receive it.

E. H. BARTLETT, Postmaster.

Notice to Trespassers.

All persons are hereby warned not to trespass upon the lands of the undersigned lying in District No. 8, either by fishing, hunting, or trespassing in any other manner.

J. W. ARNATHY.

Monday is registration day.

FOR THE SAKE OF SELF.

fracts of the relationship of causes is of little value. The evils that we deplore and seek to remove remain until we find the causes, and when the causes have been found the effects disappear. In human life the range of causes are complex, and the point of departure from the normal is obscure, that only a critical study will indicate a given cause, and the present condition. The line that represents a wide range of effect that have concentrated into the definite for spirits. This is simply an effect some lowered state of the nerve centers, and functional disorders, and find relief from the uncertainty of the mind. The early causes of inebriety rank unified and have a distinct

CATHOLIC prelates are laying a conservatism on the liquor question and coming out boldly for temperance. The recent utterance of Bishop V. J. Peterson, of Ohio, supported by the delegate, Mgr. Stollati, is further endorsed by the circulars of Bishop Keane. "Surely it is time," he pointedly said, "for them (the conservative prelates) to notice that the bar-tender is the panderer to vice, and the saloon-keeper to every species of depravity and crime."

THE REPUBLICAN.

VOLUME 18.

OAKLAND, MD., THURSDAY, SEPTEMBER 20, 1894.

NUMBER 28.

NEWS OF A WEEK.

Happenings in and about town told in short paragraphs.

Attend the Republican meeting at Offutt's Hall to-night.

FOR RENT.—Mrs. D. Tasker's cottage on Liberty street. 27-2t.

James P. Riley, of Grantsville, has been granted an original pension.

Monday was the thirty-second anniversary of the battle of Antietam.

Read our offer of a handsome bound volume to new and old subscribers.

Smith's Military Band gave another of its street concerts last Friday night.

Blank deeds for sale at this office. The deeds are specially ruled and printed very neatly.

There will be a Sunday school picnic and festival held at Underwood Chapel Sept. 29th.

Don't have your horses shod until you see Miller Bros. posters Oct. 1, 1894, at Deer Park. 27-3t.

Mr. John McCrobie, who has been ill for a number of weeks, is slowly improving, as is also Mr. A. G. Ross.

Mr. A. F. George, of Swanton, is superintending the erection of C. T. Sweet's large green houses at Loch Lynn Heights.

WANTED.—An industrious man to make a start in the woods, free of rent. Apply in person to H. P. Tasker, Oakland, Md. 3t.

Frederick Johnson, of Frostburg, who attended the G. A. R. encampment at Pittsburgh last week, died there on Tuesday morning.

Remember that Dr. I. L. Ritter will be at the Commercial Hotel Oct. 2nd, and remain a few days. Teeth extracted without pain. 28-2t.

Dr. D. O. McKinley will be at Friedesville, Md., Oct. 1st and 2d; Hays, Oct. 3d; McHenry, Oct. 4th. Teeth extracted without pain.

Dr. J. G. Robinson, dentist, of Baltimore, has located in Oakland for the season and is prepared to do all kinds of dental work. Office with Dr. M. C. Hinebaugh. 20tf.

Mr. C. L. Hoge, of near Thayersville, brought to this office on Monday a radish raised in new ground, which measures 18 inches in length and 18 inches in circumference.

There will be a lecture in St. Mark's Ev. Lutheran church, by the Rev. G. H. Nock, on next Monday evening at 8 o'clock. Topic, "Our Boys." Admission free.

FOR SALE.—An excellent cow, in full milking after first calf, dropped in April. Also a cobby built, powerful young black mare. JOHN W. WILLIAMS, Deer Park, Md. 28-3t.

All persons are hereby warned not to trespass upon my lands lying in districts Nos. 8 and 10, either by hunting, picking chestnuts or trespassing in any other manner. 28-3t. E. W. KELSO.

Col. R. S. McCulloh, of Louisiana, who has been an annual visitor to Oakland for more than forty years, died very suddenly at the home of his brother in Glencoe, Md., last Saturday morning. Col. McCulloh was an uncle to Wm. McC. Brown, of near Bayard.

A. M. Bailey, a well known citizen of Eugene, Oregon, says his wife has for years been troubled with chronic diarrhoea and used many remedies with little relief until she tried Chamberlain's Colic, Cholera and Diarrhoea Remedy, which has cured her sound and well. Give it a trial and you will be surprised at the prompt relief it affords. 25 and 50 cent bottles for sale by Oakland druggists.

As announced in these columns last week, Mr. John W. Stanton, of Chicago, was united in the holy bonds of wedlock to Miss Elizabeth Gertrude Burke, of Westernport, last Monday evening. The ceremony was performed by the Rev. W. J. Stanton, brother of the groom. The wedding party came to Oakland the same evening they were married and on Tuesday morning took their departure for Chicago, where they will reside.

Garthright has just received a very large stock of all wool flannels the best that ever came into our county, together with an immense stock of broad cloths, fancy dress goods, all wool blankets, and other good and cheap things. He is now paying 16c. per pound for wool in trade for all goods. 28-2t.

Mr. Scott T. Jones, who attended the Presbytery at Kearneysville, W. Va., last week, returned to Oakland Friday night. Mr. Jones told THE REPUBLICAN that Rev. S. M. Eagle, of Hedgesville, W. Va., has accepted the call to Oakland and would be here the first week in October.

Miss Deborah Procter, of Baltimore, an old lady who has been spending the summer here for a number of years as the guest of Miss Lou A. Thayer, was paralyzed last Sunday at an early hour. Her condition is very critical. She was removed to her home in Baltimore Monday night on train No. 1.

The lands of H. G. Davis and all his cottages at Deer Park, except the one lately occupied by him, have been sold to C. K. Lord, H. C. Frick and a Mr. Gill for \$50,000. This tract will be laid out in building lots. Also the farm of Henry Beckman near Altamont has been sold to a party whose name we have not heard, who will erect shortly a large stone mansion.

A number of geologists in the employ of the United States Government are encamped near the Washington spring. These gentlemen will remain here a few days longer and then move to Altamont. They report finding some very valuable minerals. Their camp is a complete one consisting of a number of tents, a wagon and several fine horses.

On Thursday night, August 19, Warnick Bros. saw mill on Savage river, near Gregg's Mills, was burned down incurring a loss of about fifteen hundred dollars. The fire consumed several thousand shingles belonging to Mr. William H. Jacobs and is supposed to have been of incendiary origin. Mr. Warnick's house was burned just two weeks previous to the saw mill fire.

John G. Mauger Editor of the *Sunbeam*, Seligman, Mo., who named Grover Cleveland for the Presidency in Nov. 1883, while he was Mayor of Buffalo, N. Y., is enthusiastic in his praise of Chamberlain's Colic, Cholera and Diarrhoea Remedy. He says: "I have used it for the past five years and consider it the best preparation of the kind in the market. It is as simple as sugar and coffee in this section. It is an article of merit and should be used in every household. For sale by Oakland druggists."

While in Chicago, Mr. Charles L. Kahler, a prominent shoe merchant of Des Moines, Iowa, had quite a serious time of it. He took such a severe cold that he could hardly talk or navigate, but the prompt use of Chamberlain's Cough Remedy cured him of his cold so quickly that others at the hotel who had had colds followed his example and half a dozen persons ordered it from the nearest drug store. They were profuse in their thanks to Mr. Kahler for telling them how to cure a bad cold so quickly. For sale by Oakland druggists.

The grand jury for the September term of the circuit court for Garrett county, adjourned Tuesday after being in session for eight days, which was the longest term known since the formation of the county. Twenty-four indictments were found; nine for larceny, two for carrying a deadly weapon, one for carrying with intent to kill, one for arson; rape, one; assault and battery, two; sale of liquor without license, two; adultery, one; bastardy, one; defrauding hotel keeper, one; sale of liquor to minors, two.

A splendid chance to save money at Garthright's store: First, by paying up old notes that are past due and old book accounts. Second, by taking advantage of his great offer for cash or good produce. He is now offering his entire stock of boots and shoes, hats and caps, dry goods and notions, hardware and queensware at cost. All the old stock must go at some price. Splendid bargains in everything. I hope the above hint to those who are in debt to me will promptly respond. 27-2t. P. T. GARTHRIGHT.

HERE AND ELSEWHERE.

(Subscribers or readers having friends visiting them or acquaintances visiting other places will please make note of the fact and send to THE REPUBLICAN for publication.—Editor.)

Hope Loraw, of Terra Alta, was an Oakland visitor last Saturday.

Mr. and Mrs. Gus A. Bolden, of Terra Alta, spent Sunday in Oakland with relatives.

Messrs. Patrick and James Stanton, of Chicago, Ill., are here on a visit to their parents.

Mr. J. E. Otto, of Cranesville, was here on last Saturday and made this office a pleasant call.

Mr. John A. Wolf has built a very handsome rustic fence in front of his property on Oak street.

Mrs. Harrison Teats, of Brandywine, is visiting her sister, Mrs. W. M. Coddington, in Oakland.

Mr. E. L. P. Anderson attended the marriage ceremony of his sister at his home in Newburg last Wednesday.

Col. A. G. Sturgiss, who attended the Grand Army encampment at Pittsburgh last week, returned to Oakland Sunday morning.

Mr. C. E. Offutt, who spent his vacation in Oakland with his parents, returned to Annapolis Tuesday morning to re-enter school.

Misses Nellie Sturgiss and Nellie Offutt went to Poolesville, Montgomery county, Tuesday morning to attend school there during the winter.

Mr. and Mrs. George W. Moose, who were on a visit to relatives at Belington, W. Va., several days last and this week, returned to Oakland Monday afternoon.

Mrs. Mollie Gunning and daughter, Miss Gaudette, of Cumberland, and Miss Mamie Brown, of Elk Garden, were the guests of the Misses Stanton a few days this week.

Dr. E. H. Bartlett has gone to Buffalo, N. Y., to appear in the United States court now in session in that city, as a witness in the case of the United States vs. Ferguson.

A Garrett county boy, Mr. Chas. Friend, of Swanton, took the first prize recently at Westminster for composition, the prize being two volumes of Prescott's History of Peru.

Miss Sallie, the charming daughter of Capt. J. M. Jarboe, of Oakland, Md., spent Saturday last in Terra Alta, the guest of friends. Mrs. Silas E. Shurr and little daughter, of Oakland, were here last Tuesday, the guests of Mrs. G. A. Bolden.—Oracle.

A party of eight persons from Oakland went to Maple Run last Saturday night to attend the Dunker love feast there. Those in the party were Miss Gesner, Miss Hattie Bartlett, Miss Lillian Morris, Mrs. E. H. Sincell, Messrs. E. H. Sincell, C. E. Offutt, Dr. Blades and Benj. H. Sincell.

LOST.—A young Gordon setter dog, color black and tan. Long ears and white feet. Anyone returning him will be suitably recompensed. Return to Rev. B. Ison, Oakland, Md. 28-1t*.

Communion services will be held in St. Mark's Ev. Lutheran church next Sunday morning at 10:30 o'clock, at which time members will be received into the church. There will also be services in the same church at 7:30 p. m.

Last night the editor was agreeably surprised by receiving through the mail a box of beautiful and highly flavored strawberries grown at Mount Pomona by Messrs. Sweet & Shackleford, the market gardeners. The berries were eaten by a number of our friends who pronounced them of extraordinary sweetness.

Irving W. Larimore, physical director of Y. M. C. A., of Des Moines, Iowa, says he can conscientiously recommend Chamberlain's Pain Balm to athletes, gymnasts, bicyclists, foot ball players and the profession in general for bruises, sprains and dislocations; also for soreness and stiffness of the muscles. When applied before the parts become swollen it will effect a cure in one half the time usually required. For sale by Oakland Druggists.

Dentistry.

Dr. I. L. Ritter will make his regular monthly visit to Oakland October 2nd and remain a few days. Call early and make engagements. Office, Commercial Hotel. 28-2t.

Trespass Notice.

All persons are forbidden hunting, fishing or trespassing in any manner upon my lands in district No. 8, Garrett county, under penalty of the law. W. McCULLOH BROWN.

Valuable Advice.

Avoid lawsuits and loss by consulting H. P. Tasker and examining his abstracts of the "conflicting titles" before paying for Military Title. Charges reasonable. Office in Soladieu Cottage, opposite the bank, Oakland, Md. 41-1f.

Will You Suffer

With rheumatic pains, sciatica, sleepless nights, dropsical accumulations, or nervous headaches when Messrs. Cober & Boyer will cure you if their directions are followed. Can be consulted at the Central Hotel or at their room in the Pritchard building, Oakland, Md.

For Sale Cheap.

The Vetch residence on Oak Street, between 3rd and 4th. House contains eleven rooms and is in good condition. Stable and all other necessary outbuildings. Well of good water. There are two lots with this property, each containing a full quarter acre. FRED. A. THAYER.

Office in Felty Building opposite postoffice.

Notice.

To the farmers of Garrett county. Having accepted the agency for the sale of "Natural Plant Food," one of the very best fertilizers now known, I am prepared to fill all orders promptly. For terms and particulars apply to MICHAEL W. DURST, Grantsville, Md. 7-26t.

A Quarter Century Test.

For a quarter of a century Dr. King's New Discovery has been tested, and the millions who have received benefit from its use testify to its wonderful curative powers in all diseases of the Throat, Chest and Lungs. A remedy that has stood the test so long and that has given so universal satisfaction is no experiment. Each bottle is positively guaranteed to give relief, or the money will be refunded. It is admitted to be the most reliable for Coughs and Colds. Trial bottles free at all Drug Stores. Large size 50c and \$1.00.

Of Interest to Fair Visitors.

No doubt you intend visiting Cumberland during our fair and if so we wish you to bear in mind to call on H. H. Mansbach, 121 Baltimore street, and examine our line of piece goods for fall and winter suits, overcoats and pants. We will give you correct styles, and our prices will be the lowest. We are exclusively merchant tailors. Established 1856. H. H. MANSBACH, 121 Baltimore St., Cumberland, Md. 28-2t.

Rogers' Sarsaparilla.

A specific for all. 100 doses for 75 cents. Rogers' Little Liver Pills, best on the market; Cough Cure, Liniment, Appetite and Worm Syrup, sold by A. G. Sturgiss, Oakland; Cuyper Bros., McHenry; J. A. DeBerry, Cornith; C. F. White, Hutton; P. T. Garthright, Hayden & Eckles, Md. Lake Park; Dr. Laughlin, Deer Park; Wm. Frederick, Friendsville; Yough Store Co., Jonas Frazee, Robert Liston, Selbysport; W. Wass, Mineral Springs; J. E. Gnagay, Accident; Smith & Callis, Hays, and by all general dealers.

Died.

KEMPFER.—The estimable wife of I. N. Kemper, residing corner Nineteenth and Colfax streets, died last night from the effects of cancer and a complication of diseases. She was 40 years of age, a staunch, true woman, and noble friend; and leaves a husband to mourn her loss, together with a large number of friends and acquaintances. The funeral will take place from the residence at 2 o'clock to-morrow afternoon, with interment at Springvale.—LaFayette (Ind.) Paper.

Another Barn Burned.

Barn burning is something of an everyday occurrence. Mr. William Bray, residing in this district, is the latest victim to suffer. His barn was burned to the ground, with all its contents, consisting of hay, grain, machinery and tools, on last Tuesday night. The loss is heavy and there was no insurance.

THEY HAVE FLOWN.

Two Convicted Criminals Escape From Castle Wexman.

Last night about seven o'clock two convicted criminals, Archibald King, convicted of burning the saw mill of Columbus Paugh, and Thomas Cornell, convicted of larceny, made their escape from jail via the old route—through the closet.

They secured a bar from the jail door with which to knock out the bricks and with this together with a knife made a hole large enough for them to creep through. It is thought by some that they had assistance from the outside as pieces of brick and mortar were found there. The sheriff and a posse of men are on their trail and may recapture them.

Do not fail to read Garthright's advertisements in this paper offering his old stock at cost and less than cost for some goods. Fine lot of remnants very cheap, and new and pretty things coming in each week. 27-2t.

Conference Appointments.

The West Virginia Conference of the M. E. church in session at Charleston, W. Va., last week, made the following appointments for Oakland district:

N. L. Baumgartner, presiding elder—Abrightsville, B. B. Brooks; Aurora, T. B. Faulkner; Bayard, E. R. Skidmore; Blaine, J. L. Boylen; Brandywine, D. B. Orr; Cranesville, S. P. Idolan; Davis, G. W. Keyser; Deer Park, W. W. Loyd; Evansville, L. Cross; Friendsville, C. W. Cox; Grantsville, J. H. Enlow; Newburg, G. H. Williams; Oakland, S. K. Arbutnot; Rowlesburg, W. Anderson; Sinclair, J. N. Sharp; Terra Alta, W. J. Harkness; Thomas and Parsons, H. E. Friend.

Married.

HANSHAW—HOGG.—On Sept. 18, at the residence of the officiating minister, by the Rev. Dr. Ison, James Edgar Hanshaw, of Grafton, W. Va., and Elizabeth Alice Hogg, of Pennsylvania.

HENDERSON—DONLEY.—On Sept. 19th, by the Rev. Dr. Ison, at the Commercial Hotel, Joseph Alexander Henderson and Plessia J. Donley, both of Mount Morris, Greene county, Pa.

STOCKENIOUS—EYE.—On Sept. 19th, at the residence of the officiating minister, by the Rev. Dr. Ison, Harry Stockenious and Maggie Eye, both of Grant county, W. Va.

It May do as Much for You.

Mr. Fred Miller, of Irving, Ill., writes that he had a severe kidney trouble for many years, with severe pains in his back and also that his bladder was affected. He tried many so-called kidney cures but without any good result. About a year ago he began the use of Electric Bitters and found relief at once. Electric Bitters is especially adapted to cure of all kidney and liver troubles and often gives almost instant relief. One trial will prove our statement. Price only 50c. for large bottle. At all Drug Stores. 6

Not Luck, but Work.

"Twenty clerks in a store, twenty hands in a printing office, twenty apprentices in a shipyard, twenty young men in a town, all want to get on in the world, and expect to do so," says an old merchant.

"One of the clerks will become partner, and make a fortune; one of the compositors will own a newspaper, and become an influential citizen; one of the apprentices will become a master builder; one of the villagers will get a handsome farm and live like a patriarch—but which one is the lucky individual? Lucky! There is no luck about it. The thing is almost as certain as the rule of three. The young fellow who will distance his competitors is he who masters his business, who preserves his integrity, who lives cleanly and purely, who devotes his leisure to the acquisition of knowledge, who gains friends by deserving them, and who saves his spare money. There are some ways to fortune shorter than this dusty old highway, but the staunch men all go this road."

Chamberlain's Eye and Skin Ointment.

A certain cure for Chronic Sore Eyes, Tetters, Salt Rheum, Scald Head, Old Chronic Sores, Fever Sores, Eczema, Itch, Prairie Scratches, Sore Nipples and Piles. It is cooling and soothing. Hundreds of cases have been cured by it after all other treatment had failed. 25 cents per box.

IF YOUR BACK ACHES. Or you are all worn out, really good for nothing. It is general debility. IT WILL CURE YOU. Chamberlain's Iron Bitters. It will cure you, cleanse your liver, and give a good appetite.

In Poor Health

means so much more than you imagine—serious and fatal diseases result from trifling ailments neglected. Don't play with Nature's greatest gift—health.

Brown's Iron Bitters

It Cures

Dyspepsia, Kidney and Liver Troubles, Neuralgia, Headaches, Constipation, Bad Blood, Malaria, Nervous ailments.

Women's complaints. Get only the genuine—it has crossed red lines on the wrapper. All others are substitutes. On receipt of two stamps we will send you a copy of our beautiful book, "Fair Views and Book-keepers." BROWN CHEMICAL CO., BALTIMORE, MD.

SAMUEL LAWTON, DEALER IN—

Steam and Water Fittings, Hand and Power Pumps, Pipes, Valves, Etc., Etc. Telephones, Electric Bells, Line Material, Etc., Etc. Bicycle 23-1yr. Repairing.

\$50 REWARD.

I hereby offer \$50.00 reward for the apprehension of any person or persons trespassing upon my property known as the "West," or are instrumental in removing or carrying away property or any of the personal effects belonging to the said property. CHARLES J. DONAPETER, 218 St. Paul St., Baltimore, Md. 21f.

MILLINERY!

I desire to inform the people of Oakland and vicinity that I am now prepared to furnish them, at very reasonable prices, Millinery Goods, Flowers, Ribbons.

STRAW AND FANCY GOODS, NOTIONS, ETC.

42-Store on Oak street at east end of Davis bridge. Give me a call, examine my goods, and be convinced that my stock is complete in every particular. 11 3m. MARIE CUNNINGHAM.

PLACE YOUR ORDERS FOR

Monuments, Headstones, AND Chimney Pipe WITH J. B. WILLIAMS.

FROSTBURG, MD. AGENTS WANTED. 4193-37-4

Why Pay More When You Can

Get Them For Less?

Look at These Prices:

25 lbs. granulated sugar, \$1.00; all package coffee, 25c; Mocha and Java coffee, 31c; good green or black tea, 21c; Baker's cocoa, 16c; Van Houten's cocoa, 16c; California prunes 12c; evaporated peaches, 15c; 3 lbs. choice apples, 25c; 5 lbs. choice oranges, 25c; LENOX soap, 4 cents per bar; 2 cans choice pie, 25c; 3 cans choice choice peaches, 50c; 3 cans corn, 25c; 3 cans beans, 25c; 4 cans tomatoes, 25c; early June peas, 11c; per can; French peas, 20c; per can; fine baking powder, 30c; per pound, guaranteed to be as good as Royal.

We Can Save You Money on Any

thing in Our Line.

We receive daily a full line of choice fruits and vegetables. Everything the market affords at a reasonable price.

We have just received a full line of fresh crackers and cakes—the finest line ever in the city.

Call and see us and we will make it to your advantage to call again.

W. H. MALETTE,

Oakland, Md

FOR YOUNG PEOPLE.

WAITING AT THE DOOR.

I've had a lot of blissful in my time, but never known
The pleasure of enjoyin' every violet that
An' every streak o' sunshine, beamin' brighter
Than the sun, an' every drop o' dew, an' every
"Till Mandy went to meetin' an' I waited at the
door."

I'd been a-lovin' Mandy almost too long to tell;
I only know 'twas nat'ral, an' she seemed to
like it well;
But there come a little coolness an' we hadn't
spoke before
That day she went to meetin' an' I waited at
the door.

Two weeks—or three's more like—we'd kinder
walked apart,
With her a-tossin' of her head an' hidin' her
heart;
An' I wasn't first for speakin', being proud as
well as poor.
"Till that day she went to meetin' an' I waited
at the door."

I don't know why I waited, for I thought the
sermon long.
An' I could seem to be the child never thinkin' up
a song;
An' I waited like all the village knowed my
heart was feelin' sore,
An' that Mandy was in meetin' an' me hangin'
round the door.

But I waited—couldn't help it—in a state o'
hope an' doubt.
"Till I heard em sing 'Old Hundred' an' they
come a-troopin' out;
An' here come Mandy, cryin'! Never seen her
so before.
For you see, she'd got religion while I waited
at the door."

She run to meet me! "Mandy," an' she an-
swered, weepin' "John!"
An' we supplid behind a little, while the rest
went walkin' on;
But I didn't know that minute—all my senses
in the lurch.
If the church was on the steeple, or the steeple
on the church!

"O John! I've been so triffin', but a better life
I'll live!
It was sweet in you to love me, an' it's sweeter
to forgive."
But I couldn't speak for chokin', till I said—
three times or four,
"It's me that needs forgiveness, out here wait-
in' by the door!"

Well, we went home in the sunshine—happy,
happy on the way.
An' I took an' left ten dollars at the preacher's
house that day.
An' I would ha' made it twenty, an' kept run-
nin' up the score.
For the love that come to meet me for that
waitin' at the door.

—Frank L. Stanton, in Atlanta Constitution.

PARALYZES THE NERVES.

Why Ice Cream or Ice Water Sometimes
Causes Pain.

When the weather is very warm you
often run into an ice cream saloon to
try and cool your body by a suener of
the frozen delicacy. If you are in a
great hurry you are apt to munch the
mixture rather large. This almost im-
mediately gives you a violent pain in
the temples, or somewhere in the re-
gion of the eyes.

Why is this? Did you ever stop and
think?

One man, who has studied the physi-
ology of the case, says it is caused in
the following manner: The frozen
mixture, coming into contact with the
nerves of the throat, temporarily par-
alyzes them. The sensation instantly
shoots to the center of the nerves,
which is in the brain, but there is a
side connection, the great facial nerve,
which starts from the front of the ear
and extends its branches over the side
of the face. This great facial nerve
sidetracks the pain which proceeds
from the chill, throwing it out along
the nerve which particularly bites and
stings, the pain being keenest at the
point where the nerve branches.

SMART LITTLE GIRL.

Fannie Erdosy Knows a Language for
Every Year of Her Age.

Little Fannie Erdosy is only four
years old, but she is one of the most
accomplished young ladies in New
York. She speaks four languages
fluently, and her father promises to
teach her two more before she reaches

her fifth birthday. She does not care
for dolls or other toys, but plays only
with irregular verbs, ablative abso-
lutes, moods, tenses and syntactical
puzzles. She speaks German like a
Bohemian, French like a Parisienne,
Hungarian like a Magyar and English
with a Harlem accent.

Miss Fannie's gift illustrates the law
of heredity. Her father, Arthur
Erdosy, who is an interpreter at Ellis
Island, was born in Budapest, Hun-
gary. He has the special linguistic aptitude of his
race, having command of not less than
ten languages. Mrs. Erdosy speaks
English, Hungarian, German, French
and Slavonian.

It is said that the difficulty is not in
teaching Miss Fannie a new language,
but in preventing her from overtaxing
her strength learning one without in-
struction.

DIFFICULT TO TRANSLATE.

It was the duchess of Gordon, a clever
and beautiful Scotch woman, who
successfully dumfounded a pretentious
party, and in order to gain her good
graces, effected a liking for the Scot-
tish tongue, declaring there was not a
Scottish phrase he did not understand.

"Rax me a sprawl o' that hubbly-
bobbly," replied the duchess, without
changing a muscle of her face.
The exultant looked appalled, and
then slunk away in confusion, while
the commission was performed by a
cavalier hailing from the north of the
Tweed. She wanted a turkey-wing.

CLEVER LINK PUZZLE.

If You Follow These Instructions You Can
Make One Yourself.

The puzzle is simply of construction.
To succeed, however, you must pay
careful attention to my instructions:
You require two pieces of steel wire
(or brass, if you prefer) $\frac{1}{4}$ of an inch
thick and $2\frac{1}{2}$ inches long. Carefully
round the ends with a file, or by rub-
bing them on a piece of tile or brick.
Bend the wire to the shape of A and
B respectively Fig. 1. If you use steel
wire you can bend it to shape cold

(as you will do if you use brass wire),
but in case of stout steel wire it may
be better to heat it a dull red, and
gently hammer it round an iron rod of
the required size. You can get the re-
quired turn with a pair of pliers, or
by any other means your ingenuity
may suggest.

One reason why I prefer steel wire is
that you can nicely burnish the links,
either with emery powder or by sim-
ply rubbing between the hands. If you
happen to have a lathe and burnishing
wheel, why, there you are.

Another reason—and an important
one—is that the steel link can be made
of finer wire than I have given, and
still retain the required stiffness neces-
sary to prevent them being forced to-
gether, in fact, no force is required at
all.

I must now call your attention to
some important points, unless you ob-
serve which you will fail to gain the
desired end. First, take particular no-
tice that the ends A and B overlap the
bends from which spring the straight
ends. Though not shown in the illus-
tration, it must be distinctly under-
stood that the ends A and B do not
touch the bends, the bend being a space
between them almost the width of the
wire.

You may now proceed to put the puzzle
together. If you carefully study

Fig. 2 you will easily succeed; next,
however, if you have A and B too close
to their respective bends. Also, if you
have too much space the links will
"fall" together. What you want is to
so regulate this space that you "leave
in" "have it done"—have difficulty to
accomplish the feat. It will then test
your friends' ingenuity before they
succeed.

To take the links apart again—well,
suppose you exercise your ingenuity.
—Golden Days.

A SAGACIOUS DOG.

The Newfoundland Was Bound to Have
His Evening Walk.

There is a story of a French dog
whose breakfast was forgotten, whose
supper was not brought, and who, re-
turning with a sprig in his mouth,
deposited it at his master's feet. It
was a sprig of forget-me-not. The
truth of this story is perhaps open to
question, but a story almost as remark-
able has been furnished to Cassell's
Saturday Journal by a gentleman
whose veracity is said to be undoubted.

The story runs:
Jack is a handsome Newfoundland
dog. Every evening, at nine o'clock,
he is taken for a walk by his master,
who has an orange-wood stick and usually
carries a cane. Every evening at the stroke
of nine Jack rushes to the hat rack in
the hall, noses about among the walk-
ing-sticks and umbrellas until he finds
the orange-wood stick, and immediately
afterward appears before his master,
carrying it in his mouth. He wags his
tail and prances delightedly about, and
shows as plainly as possible that he
will be a broken-hearted dog if his
friend and master omits the usual evening
stroll.

One evening the family were in the
dining-room with some guests. A
shower had come on and it was raining
hard when the clock struck nine. The
stroked had hardly died away when
Jack danced gayly in the room with
the orange-wood stick in his mouth.
"No, Jack," said his master, "you can-
not go to-night. It is raining too hard.
We should get wet. Just listen to it,
Jack." With that the host turned his
attention once more to his guests, and
presently they heard Jack pulling over
the things in the hat rack. They sup-
posed he was putting away the walking
stick, like the clever dog that he is.

A few moments later a beseeching
little bark was heard. There in the
sitting-room door stood Jack, with an
umbrella in his mouth. Every one le-
vel for the water-proof and hat of the man
of the house, and that gentleman
bearing the umbrella so persuasively
offered him, took Jack out for his walk
without further delay.

THE DIFFERENCE IN VOICES.

One's surprise at the fact that no two
persons' voices are perfectly alike
ceases when one is informed by an
authority on the subject that, though
there are only nine perfect tones in the
human voice, there are the astounding
number of 17,592,190,044,413 different
sounds. Of these fourteen direct mus-
cles produce 10,383, and 30 indirect mus-
cles produce 17,592,190,044,413, while all in co-
operation produce the total gives
above.

TEMPERANCE NOTES.

TOUCH NOT THE WINE.

Children, do you see the wine
In the crystal goblet shine?
Do not tempt by its charm,
Children, have it never,
Touch it never,
Fight it ever.

Do you know what causeth woe
Bitter as life or death can know?
'Tis that self-same ruby wine
Which would tempt that soul of thine.
Children, have it
Touch it never,
Fight it ever.

Never let it pass your lips,
Never even let the tips
Of your fingers touch the bowl;
Hate it from your inmost soul.
Touch it never,
Fight it ever.

Flight it! With God's help stand fast
Long as life or death can last.
Hurl the demon from your land,
Oh, then hate it!
Touch it never,
Fight it ever.

—Union Signal.

EVIDENCE OF INEBRIETY.

Uniformity of the Origin and Development of Most Cases.

The study of the phenomena of in-
ebriety is beset with great difficulties.
The patient may both consciously and
unconsciously mislead and conceal fac-
tual truths, and observe will from
various conclusions. Many of the
facts depend upon the statements of the
inebriate and can only be verified
with difficulty. The drink history,
comprising a record of when and where
and how spirits are used, is open to
various sources of errors, which may
be corrected by persons who have ob-
served these facts. But the facts of
the origin, causes and conditions of
the drink impulse depend largely
on the conceptions of the
victim, and such statements are
the most difficult to confirm.

Such persons often have congenital abnor-
malities of consciousness analogous to
astigmatism, or color blindness, and
are unable to judge correctly of a mo-
tive or conditions which seem to lead
to certain acts and lines of conduct.
In "how it's done" have defective
brain developments and organic per-
versions, followed by states of exhaus-
tion and depression, for which alcohol
or some other allied narcotic is the
most fascinating means of temporary
relief. In addition to this the im-
portant and meaning of his conduct,
and hence will deceive the investigator,
exaggerating certain facts and con-
cealing others. Often following some
sensory suggestion, and always keenly
sensitive to any form of peculiar pres-
sure, such as the supposed theory of
his case, entertained by others, or any
conception which will appear to him
to lessen the gravity of the drink of-
fense, or in some possible way create
sympathy in his behalf. If in a court
for some crime associated with drink,
he will deny everything or confess to
acts not true, and at all times his con-
fession will be exaggerated and often
describe motives and conduct that are
unreal and unnatural. The reasoning
may be clear and accurate on matters
not concerning himself, but utterly un-
reliable concerning his drink acts and
motives.

The statements of a drinking man in
a police court or a hospital, and in a re-
form meeting, will vary widely, and
yet no apparent design be present. If
these variations are brought to him for
explanation, he will show confusion,
and deny them in general. A case was
recently an example of vice at first,
the history carefully studied by a com-
petent observer. My inquiry revealed
an exactly opposite state, and from the
same history which to a large extent
was based on the statements of the in-
tegrate man, a one-continued study of
facts, and confirmed the experience of
all students as to the worthlessness of
evidence based on the inebriate's con-
ceptions of his case.

Practically a full statement is re-
corded of the inebriate's theories, and
the evidence is sought to disprove or
confirm it. Exceptions to the natural
history of such cases are regarded with
suspicion and doubted unless sustained
by other facts. Inebriety is usually
found to be uniform in its origin and
progress. A few general rules may
be common to each one, and the same
general growth and development
will be found in each one. Investiga-
tion and study of these cases requires
long patient gathering and comparison
of facts, always open to error and cor-
rection. —Journal of Inebriety.

RUINED BY EXAMPLE.

Young Men Led to Drinking Through See-

ing Moral Force of Satan's

The great moral force of Satan's
support of Bishop Watterson's stand
against allowing men concerned in the
liquor traffic to become members of
Catholic societies will do much to make
their employment respectable in the
eyes of all good Catholics. And it
leads us to remark upon the terrible
force of example in fostering the drink
habit. So long as wines and liquors
are allowed on the tables of fashion-
able people, so long will there be
drunkenness admitted into good society.
So long as fathers or employers indulge
in the vice of drunkenness, so long
will their sons and younger employees
be in great danger of adopting the
drink habit.

Nothing is more true than that the
habit of drinking in an older work-
man or in a forman, or in an em-
ployer, may bring down to the mire of
drunkenness and poverty many of the
younger employees. The genteel tip-
pling of the merchant is a danger to
his clerks. The sparkling wine upon
the table of the lady who is a leader of
the town may work ruin to hundreds.
Is there not in all these things a lesson
for us all to learn? It will not do to

answer with Cain's question: "Am I my
brother's keeper?" It will not do to
say that you, individually, can control
your appetite, and that you wish the
liberty of indulging in an occasional
glass. The Apostle Paul reminds us of
our duty to our fellow-men when he
says: "That take heed lest by any
means this liberty of yours becomes
a stumbling-block to them that are
weak."

It is a fact which is too often forgot-
ten that the vast mass of our people do
not yet realize the fearful nature of the
alcoholic poison that is the active prin-
ciple in all varieties of liquor. They
condemn drunkenness, which is simply
the result of the excessive use of rum,
but are blind to the fact that the mod-
erate use leads up to the excess, and
that there is absolutely no way to pre-
vent the excess save by stopping the
sale and the use, even in the most mod-
erate quantities. There are few people
who can use rum in moderation for any
length of time without drifting by in-
sensible degrees into its immoderate
use. Those who are in possession of
which their example may act injuriously
upon others owe it as a duty to their
fellow-men not to touch nor taste the
infernal poison. The blood of the lost
may otherwise be required at their
hands in the great day of reckoning.—
Toledo Blade.

GREAT BEER DRINKERS.

Americans Becoming Large Consumers of the Demoralizing Drink.

In Philadelphia last year the beer
consumed aggregated one million eight
hundred thousand barrels. This fact
is conveyed in a newspaper item. It is
probably overestimated, but the fact re-
mains that the Americans are slowly
but surely becoming a beer-drinking
people. In Des Moines the consump-
tion of beer in saloons has largely
taken the place of whisky in probi-
tion-day stores. In Des Moines
today is beer. Beer is compara-
tively harmless, compared with
whisky. Few men get drunk on a
lunch. It is generally taken with a
dinner. If it does not make
drunk, it stupifies. It coarsens, and
even brutalizes, if long continued.
And the worst feature of it all is that
we have not beer as drunk by the Ger-
mans from the time before Tacitus
lived and wrote, but an adulterated
live. At the World's fair tests it
was shown that modern beer is a
chemical product, instead of a bever-
age brewed of barley and hops. The
young man who begins the daily con-
sumption of beer must bravely stare
in the face increasing adipose tissue
and increasing consciousness, physically,
mentally and morally. These facts we
regard as the best temperance lectures
that can be embodied in words against
beer. —Iowa State Register.

VARIOUS NOTES.

The consumption of wine in Nimes,
France, averages a bottle a day for
every man, woman and child in the
city.

The average character of boys and
young men in Kansas is said to be much
higher since prohibition of the liquor
traffic than before.

LONDON hospitals are finding less use
for alcohol in medical treatment. At
one hospital the amount expended
yearly is reduced eighty-five per cent.
in ten years.

The Leipzig (Germany) university
clubs have decided to drop the ancient
academical custom of morning beer
drinking on the ground that it inter-
feres with work. This from Germany
is indeed "news worth telling."

GUINNESS are growing dissatisfied
over the enormous consumption of beer
among the Teutons. "Our country-
men," writes one disgusted German,
"have drunk during the past year 3-
450,000 liters of beer."

As the alcohol ingested escapes from
the body in an unaltered state, it can
be said, in a manner, to be a powerful
poison. A man who is looked upon as
possessing any alimentary value. Accord-
ing to Dr. E. Smith, alcohol does not
increase the production of heat in the
body as a chemical agent, but by the
power it possesses in stimulating the
activity of the vital functions.

The Westminster Gazette, whose fig-
ures are indisputable, gives the pro-
portion of drunkenness as one to every
twenty-six of population in Gothen-
burg, compared to one to every two
hundred and six and one to every four
hundred and six in Cardiff and South-
ampton. Surely not a convincing argu-
ment in favor of the Gothenburg sys-
tem.

The minimum penalty for serving
drinks on Sunday in western Australia
is fifty pounds. A hotel-keeper in Perth,
the metropolis, was recently fined
in the sum of one hundred and fifty
pounds for illegally refreshing a party
of three on the Sabbath, the court re-
fusing to regard the three drinks as
constituting a single offense. Another
curious feature of the licensing law in
western Australia is that the licensee
must not absent himself from his house
for more than twenty-eight days in a
year, except by special permission of a
stipendiary magistrate, a restriction on
personal liberty that has long been the
source of much irritation and indigna-
tion to the trade.

The most conspicuous object in Ameri-
can social and political life today is
the saloon. What does it stand for in
its relation to our interests as citizens?
Is it an aid or an hindrance to the
benefits which ought to accrue from
association together as units in one
conservative life? There can be but one
answer. The saloon lets loose upon
our land forces which, so far from aid-
ing us in the preservation of our in-
alienable rights, threaten their total
destruction. The poverty, misery,
crime and desolation of our land may
be traced, in an overwhelmingly large
proportion, directly to that source as
its fountain-head. From those baleful
doors there issues nothing which tends
to the uplift of society, but rather to
its downfall and total disintegration.
—Union Signal.

Twins brothers may be eccentrics, but they
are never odd.

MISCELLANEOUS.

—He who merely knows right prin-
ciples is not equal to him who loves
them. —Confucius.

—Oh! many a shaft, at random sent,
finds mark the archer little meant;
and many a word, at random spoken,
soothe or wound a heart that's broken.
—Scott.

—Cawley, the English poet, spent his
boyhood in a grocer's shop. He often
waited on customers, who, in later
years, reminded him of the fact, to his
no small disgust.

—Masolino's works have almost all
been recovered by removing the coat-
ings of whitewash which covered them
in the church of Castiglione di Olona,
not far from Milan.

—The Pullman Palace Car Company
have sent to the internal revenue col-
lector \$12,500 in payment of the \$25
annual revenue tax for each of its 500
ballet cars on which liquor is sold.

—The Roman actors attained wonder-
ful perfection in the ballet about the
time of Augustus and ballet dancing
was popular down to the last days of
the empire. It was only in the latter
more degenerate days that women
appeared on the stage, and one of the
most famous ballet dancers was Theo-
dora, afterwards the empress of the
great Justinian.

—The waltz is claimed by both the
French and Germans. The former de-
rive it from a French dance called La
Volta; the latter from an old German
dance named the Drehtanz or turning
dance. This was introduced into
France by Louis XIV. after the con-
quest of Alsace. During the last cen-
tury it became popular in France, and
Germany and was forbidden in the
latter country by church and state.
Several imperial edicts being issued
against it in Austria.

—Chicago's new directory places the
population of the city at 1,535,000, being
an increase of about 40,000 during the
last year. The difference between this
estimate and that made by the school
board census is explained by Mr. Don-
nelly, of the directory company, by the
statement that the school board
collects the names of all actual resi-
dents in the city, while the directory
company enrolls all persons who live
in Chicago or do business there perma-
nently.

Nothing is more amusing than to
watch on a winter's day the marvelous
intelligence with which the pigeons of
St. Mark's in Venice can discriminate be-
tween residents and visitors in the
grand square of that city, the Piazza
of St. Mark. The moment a foreigner
shows his face in the piazzetta, the
set upon him in crowds, hoping to be
fed. They do not trouble the natives,
who may be summing themselves by the
hundred in the square.

—Vermont merino sheep imported to
Australia are proving very successful.
The Pastoralist's Review states that the
Common flock of improved Vermont
merinos, exhibited at the Wagga show,
secured twelve first, two second, and two
third prizes out of a possible sixteen first
prizes, besides two champion prizes,
and the national prize for the best
three combing ewes, and closely pre-
serving the grand champion ewe of the
year, which is worthy of mention.
This was bred on the same lines as the Ver-
mont flock, being also a Vermont
merino.

—An absent-minded landlord called
on a tenant to condole with him on the
death of a valuable cow. The cause of
its decease had been explained in the
mystery, and while explaining it, the
landlord, though a kind and sympathiz-
ing person, went off into the clouds.
The last words of the narrative were:
"And can you believe it, my lord, when
we opened her we found she had been
murdered by a large turnip." Here the land-
lord, who had been explaining the
mystery, and while explaining it, the
landlord, though a kind and sympathiz-
ing person, went off into the clouds.

THURSDAY, SEPT. 20, 1894.

REPUBLICAN NOMINATION.

FOR CONGRESS:

GEORGE L. WELLINGTON.

OF ALLEGANY COUNTY.

Republican Meeting.

A mass meeting of the voters of Oakland and Garrett county is called for next Thursday night, the 20th inst., at 7 o'clock at Offutt's hall, Oakland, at which addresses will be made by Hon. George L. Wellington, Republican nominee for Congress, and Hon. William M. Marine, of Baltimore. Music will be furnished by Smith's Military Band, of Oakland.

REPUBLICAN MEETINGS.

The voters of Garrett county are requested to assemble in mass convention at the following places in the county at the time and dates specified below:

- Crofton, Monday, Sept. 24, at 7 p. m.
- Sang Run, Tuesday, Sept. 25, at 2 p. m.
- Friendsville, Tuesday, Sept. 25, at 7:30 p. m.
- Selbyport, Wednesday, Sept. 26, at 2 p. m.
- Accident, Wednesday, Sept. 26, at 7:30 p. m.
- Bittinger, Thursday, Sept. 27, at 2 p. m.
- Grantsville, Thursday, Sept. 27, at 7:30 p. m.
- Deer Park, Friday, Sept. 28, at 7:30 p. m.
- Blaine, Saturday, Sept. 29, at 2 p. m.
- Wilsons Mills, W. Va., Saturday, Sept. 29, at 7:30 p. m.

These meetings will be addressed by Hon. G. L. Wellington, Hon. Milton G. Urner and Hon. Norman B. Scott, of Hagerstown, and others.

Music will be furnished at the meetings by a brass band.

During the first week in July we sent out from this office nearly half a thousand statements of arrearages for subscriptions, amounting in the aggregate to over sixteen hundred dollars. The returns have been altogether too slow and we wish to call the attention of those receiving statements at the time mentioned to the fact.

We only want what we have labored for and we want it badly.

We dislike this method of calling the attention of our friends to a matter that has likely slipped their minds, but it has become a case of necessity.

Of the sixteen hundred dollars we have received less than two hundred and it is impossible for any person of limited means to carry on a business of this kind without money, so come right along friends, and settle your bills.

One Effect of Clevelandism.

Republican plurality for Governor in Maine, 1892, 12,503

Republican plurality, 1894, 38,000

The farm and the factory have begun to answer the challenge of the plantation and the bayonet.

THE REPUBLICANS OF OAKLAND

and Garrett county should turn out in good numbers to-night and hear the issues of the day discussed by Hon. George L. Wellington and Hon. Wm. M. Marine at Offutt's Hall.

It looks as though Senator Jones, of Nevada, chose a bad year to leave the Republican party. He should have profited by the sad fate of that great and good but misguided man, Horace Greeley. Brother Jones will be missed, of course, but the Republican party will not go out of business because he has gone off from it.

THE Young Men's Democratic Club, of Boston, has adopted resolutions denying "the right of Senators Gorman, Brice, Smith and Murphy to represent the Democratic party, and demanding their removal from all positions of trust and honor within the party, as being grossly faithless to party pledges."

How does the Democrat like this bit of news?

THE sugar planters of Louisiana met at New Orleans on Monday and carried their threat of revolt into execution, and will affiliate now with the Republican party. In view of the fact that the resolutions adopted unequivocally endorse the doctrine of protection to American industries, the wonder will be that men holding such faith should have remained out of the fold so long.

THE LATEST Oakland quotation for fleece-washed wool is sixteen cents a pound. In the corresponding week of 1891 the quotation was thirty cents a pound. The fall is very nearly one-half. The farmer who has one hundred pounds of wool to sell gets \$14 less for it than he did three years ago. An excellent suit of clothes can be bought for \$14, but it will not be bought with the \$14 which the farmer will not get.

Here is Another.

Mr. Ferdinand Williams, a very respectable member of the Cumberland bar, was nominated for Congress from the Sixth district yesterday. Mr. Williams took pains to say that the nomination came to him from the people. "Rings, political syndicates and machine politics," said he, "have no hand in it." And Mr. Williams justly declared that "a nomination thus given is an honor of which any man might be proud." Such a nomination in the Sixth district ought, we think, to make a man strut.

Mr. Williams is, or was, the chairman of the Allegany County Democratic Committee, composed entirely of Gorman men. "Rings, political syndicates and machine politics" may have had nothing to do with his nomination, but they were all around it. We suspect, in spite of Mr. Williams' denial, that Gorman has another candidate and the people of the Sixth district another set of resolutions. The work of fooling the people goes bravely on.—Baltimore News, (Dem.)

Lower Wages For Lumbermen.

The threat of free trade in lumber has completely demoralized the lumber trade in every section of the country. There has been stagnation in the building trade, which, together with the uncertainty as to future values caused by delay in the tariff settlement, has naturally curtailed the output of the mills. As a consequence there have been many idle lumbermen, and their wages have fallen. Two years ago the lumbermen in Georgia were earning from \$1 to \$1.25 per day, but lately they have been only receiving from 70 to 85 cents for a day's work. They find that the loss of \$2 or \$3 in a week's wages does not compensate them for any cheapness there may be in the price of goods. They begin to appreciate that protection for lumber is also protection for lumbermen, and they wonder if the mere fear of free trade has already caused a loss of \$2 or \$3 a week in their earnings what free trade itself will do. This "object lesson" is bringing the southern lumbermen over to the side of protection.

Mr. Cleveland and the Wool Grower.

President Cleveland, in his famous free trade message to Congress in December, 1887, dwelt at considerable length on wool. He

regarded the industry as of no great importance because he thought it might be "fairly assumed that a large proportion of the sheep owned by the farmers throughout the country are found in small flocks, numbering from twenty-five to fifty."

He went on to assume further, assumptions being quite in the free trade line, that the average wool grower could not be hurt much by putting his wool on the free list nor benefitted much by keeping it on the dutiable list. Mr. Cleveland figured that \$36 would represent the total loss to the farmer on fifty head of sheep if the duty were taken off, but this would be more than made up to him when he went to buy his clothing, for that would be made of free wool.

Now the duty has been taken off the wool. The farmer goes to buy his clothing. He finds that there is no change in the duty on ready-made clothing, no change in the duty on the cloth from which it is made, and will be none until the first of next January. After January 1 the duty on ready-made clothing will be 45 per cent, and 50 per cent, according to quality.

All that the farmer, therefore, can expect to save on his suit of clothes by reason of tariff legislation is the duty of 11 cents a pound on the wool in the clothes. If he gets all this he will not think it sufficient compensation for the loss on his wool and his sheep. Besides the drop in his wool to 16 cents a pound he finds that on the latest quotations, as compared with the corresponding week of 1892, he is getting 1 cent a pound less for his extra sheep, 14 less for his good sheep, 1 cent less for common and 2 cents less for lambs. The wage earners who have been consumers of his mutton sheep are not able to buy as they used to be.

By the time the wool grower thinks it all over he can see for himself what the party of free trade has done for him, and he can easily determine for himself whether Mr. Cleveland's fine words of 1887 will butter any parsnips in 1894.

A Few Caustic Remarks.

ALLIANCE, O., Sept. 18.—Thos. Burton, president of the Daniels Steel Tie Company of Youngstown, who has been spoken of as a candidate for the congressional honors on the Democratic ticket in this district, in reply to an inquiry declares that he is in no sense a candidate and airs his views on the subject in the following caustic style:

I am anti-administration, an avowed and emphatic foe to the Wilson bill and all Wilson billyism, Ioke Smithism, and the whole anti-Democratic political policy of infamy of Mr. Cleveland and his retinue of unregenerated bills and cabinet and important missions at home and abroad. Further, I am an admirer and firm friend of that sterling Democrat, honorable gentleman and comrade of the Grand Army of the Republic, Senator Calvin S. Brice. Under these circumstances you will readily comprehend that I have not been and cannot be a candidate at this time. I hope to see Mr. Clarke or Mr. Raff the nominee, the former preferred, and let Cleveland and Clevelandism be the issue upon which the voters of the eighteenth district shall make emphatic declaration in November.

This has produced a great sensation in the Democratic camp.

Weather Crop Bulletin.

Grantsville.—Weather warm and showery, wheat sown and growing finely. Pastures improving. Springs and streams still very low. Buckwheat being harvested; crop heavy. Potatoes up to the average. Corn mostly in shock. No cloverseed this fall. J. S. MILLER.

Sunnyside.—Drought continues.

Weather very favorable for buckwheat threshing, and yield from ten to thirty bushels per acre. Farmers commenced cutting corn last week; crop good. Chestnuts a failure in this section, owing to drought. JOHN G. KNAUER.

Threatened B. & O. Strike.

WHEELING, W. Va., Sept. 17.—Employees of the immer & Baltimore and Ohio shops at this place may strike at any time. A new master mechanic has cut the wages of all hands 30 cents per day, and as this is the most important shop on the road, trouble is feared.

COAL, IRON AND SUGAR.

The President's Attack on Labor and Tax on the Breakfast Table.

The president of the United States, Mr. Grover Cleveland, has seen fit to recommend to Congress that coal and iron ore should be admitted into the United States free of duty, and that sugar should be taxed. The extent of such an evil may be briefly stated as follows:

The coal product of the United States in 1892 was 180,000,000 tons, worth \$207,566,381 at the mines' mouth. It afforded employment to 341,943 workers, who each found remunerative occupation on 312 different days in the year. Their earnings amounted to \$124,809,195, and all expenditures to \$146,536,280. The total amount of capital invested in the coal mines was \$350,000,000. The principal states of production, in their order of importance, were Pennsylvania, Illinois, Ohio, West Virginia, Alabama, Iowa, Colorado, Maryland, Indiana, Kentucky, Kansas, Missouri, Wyoming and Tennessee. The United States Senators from these states are interested in the welfare and prosperity of their state enterprises and industries.

The iron ore product of the United States for the year ended June 30, 1890, was 11,518,041 tons of 2,240 pounds each, worth \$33,351,878 at the mines' mouth. It afforded employment to 38,227 workers, who earned \$14,409,151. The total amount of capital invested was \$109,766,199, and the total year's expenditures were \$23,781,658 from 592 different mines. The principal states of production, in their order of importance, were Pennsylvania, Ohio, Alabama, Illinois, New York, Virginia, Tennessee, Michigan, Wisconsin, New Jersey, West Virginia, Missouri and Maryland. The United States Senators from these states are interested in the welfare and prosperity of their state enterprises and industries.

The sugar consumption of the United States on a basis of 78,000,000 people, at a per capita consumption of 65 pounds, is 4,420,000,000 pounds of sugar. The value of 4,420,000,000 pounds at 3 cents per pound is \$132,600,000. An ad valorem tax of 40 per cent upon this \$132,600,000 will be \$53,040,000 divided among the 78,000,000 consumers of sugar will be 78 cents upon each man, woman and child, or \$3.90 upon each family of five persons.

Our Congressional Nominee.

HON. GEORGE L. WELLINGTON.

The Frederick Examiner of last week contained the following short sketch of Hon. George L. Wellington, Republican nominee for Congress in this Congressional district: "Hon. George L. Wellington, of Cumberland, has been honored with the nomination for Congress by the Republicans of the Sixth district of Maryland. Mr. Wellington needs no introduction to the people of this county or the Sixth district. He was our standard-bearer two years ago, but met defeat. In that contest the Republicans in this district partook of the apathy that prevailed throughout the country, and although Mr. Wellington was an exceptionally strong candidate, he was sacrificed along with the gallant Presidential standard-bearer of the National Republican party."

The untoward outcome of the campaign of 1892, has admonished the Republicans everywhere, that the indifference that led to that unhappy result must not be again indulged in by them. And we feel confident that the patriotic sentiment of the people will not permit a recurrence of the culpable supineness and criminal neglect, that made that inexcusable result possible in the Western Maryland District.

"George L. Wellington was born in Cumberland in 1852. From the time he was twelve years of age he was compelled by reason of circumstances to earn his living. His first employment was in a Chesapeake and Ohio Canal store. At the age of eighteen years he was given a position in the Second National Bank of Cumberland. He rapidly rose from one position to another until he became paying teller in the

In Loving Memory.

Mr. G. A. Bolden editor of *The Terra Alta Oracle*, sometimes gets into a poetical strain. Last week the following appeared in the columns of his paper about the death of the Terra Alta Cornet Band, (peace to its ashes) and we reproduce it by request:

DECEASED.—On Thursday evening, August 16th, 1894, at its festival in Bank Hall, of spinal strangulation and premature exhaustion of necessary wind, The Terra Alta Cornet Band, aged 5 years, 7 months, 4 days and a few hours.

Gone to the land of the Pinketyplunk—
On the shores of the Mustard Sea—
Backed on the waves of the high Zelig,
In a bark of the Tamarind Tree

The bass-drummer sits on a music machine
And pounds to a tune of the past;
The bass-drummer sits on a music machine
And pounds to a tune of the past;

The cornets and plectro, silent and grim,
List to this oft unheard strain;
The clarinet's gone in the Classic West
To blow with the wind and the rain.

The snare-drum and cymbals get into a fuss
About seven times to the day;
The bass-drummer bustled his horn
While plugging a canny third lay.

So they sat on the shore of this Mustard Sea
Playing their overtures to the Moon,
While the Bass-drum weeps and cooies her
And the Clarinet times his bassoon.

O, come back to us, ye friends of the past,
Come from those regions of the West,
Come from the land of the Pinketyplunk
And give us once more a "Fraxinal."

Alas! and what! the call is unheard—
No answer save that of the Poodle;
The land is desolate—clear out of sight—
And the Clarinet chants Yankee Doodle,
Sept. 1, 1894. NVM.

Work of the Circuit Court.

Chief Judge Boyd, who was on the bench here last week, left for Cumberland Saturday evening and Monday morning his Honor Judge Henry W. Hoffman came up to Oakland to take Judge Boyd's place on the bench.

Since last Wednesday the following cases have been disposed of, as follows:

State vs. Ellen Teats; adultery; plea of guilty; fined \$10 and costs; Hamill—Sineell.

State vs. Joseph Tasker; adultery; plea of guilty; fined \$10 and costs; Hamill—Sineell.

State vs. George Marville; assault with intent to kill; first offense; plea of guilty; fine \$10 and costs; Hamill—Sineell.

State vs. George Marville; assault with intent to kill; first offense; plea of guilty; fine \$10 and costs; Hamill—Sineell.

State vs. Charles Killers; taking and using horse and carriage without permission of the owner; dismissed; Hamill—Peddicord.

State vs. G. J. Lee; rape; dismissed; Hamill—Peddicord.

State vs. W. H. Pangb; obstructing public road; tried before a jury; verdict not guilty; Hamill, Semmes—Peddicord.

In No. 8, appeals, which was held sub curia, the court announced the opinion and affirmed the judgment below, which was in favor of the Preston Lumber and Coal Company.

Peddicord for the company.

In the case of State vs. G. D. White and others vs. E. N. Casteel and others, suit in sheriff's bond for \$250, which was held sub curia, the court rendered a verdict for \$75 in favor of plaintiffs.

On Monday the case of Archibald King, charged with burning the saw mill belonging to Columbus Pangb, was taken up and consumed all of Monday and part of Tuesday.

The jury, after being out nearly two hours, brought in a verdict of guilty. Hamill for prosecution; Peddicord for defense.

The case of Col. John E. Wood, charged with cruelty to animals, which was appealed from Justice Gonder's court, was taken up Tuesday afternoon and finished yesterday morning. Jury trial; verdict guilty; Hamill—Peddicord.

State vs. Belle Jackson charged with keeping a bawdy house at Deer Park, was tried yesterday and consumed all the afternoon. Verdict not guilty.

This morning the case of John E. Barnard, charged with burning a dwelling house, was taken up and will last all day and probably part of to-morrow.

Notice to Trespassers.

All persons are hereby warned not to trespass upon the lands of the undersigned lying in District No. 8, either by fishing, hunting, or trespassing in any other manner.

A Castle in the Air

enough to say what I think and one old man is hard enough to get along with, I'm sure."

"Living here practically on Uncle John's charity, don't you think we had better leave him entirely out of the question?" asked Nellie.

"Even when he goes about spying and eavesdropping everything we do?" asked Susan. "I don't see why we should pretend to be."

"But I'm not going to pretend at all!"

"Gertrude! Helen!—one of you come down!" cried a gruff voice from below. And Nellie, obeying the summons, found Uncle John in the dimly-lit room with his newly-arrived and evidently unwelcome guest.

Left alone, Gertrude still pondered over the unexpected letter which that morning had announced to Uncle John the almost immediate arrival of the brother. Gertrude had not seen for a long time, and the old man's presence in the room had thereupon received to practice various extra economies which might tend to shorten the stay of the unwelcome visitor. So supper that night proved an even more frugal and unsocial meal than usual. Uncle John preserved his usual grumpy silence, and the two girls were always overawed and quiet in his presence, while the newcomer seemed occupied in examining his surroundings.

"Well, brother," he remarked, at last, "though some things seem to point to the contrary, I am inclined to believe that you have prospered during these last five-and-twenty years." A groan came from the grim figure at the head of the table, but the words: "You certainly have not prospered, to judge from appearances," were quite audible.

"But you can't always judge from appearances," was the newcomer's cool reply.

His retort apparently missed its effect upon all but Gertrude, and she began to wonder if this shabby stranger might not possibly prove a kind of fairy godfather in disguise. But the next afternoon she burst suddenly into the room where her sister was deep in her book.

"Well, what do you suppose he wants me to do?" she cried. "Look at this wretched old coat, with pockets torn out, and the lining in ribbons, well, this fine new one has come, and I've requested him to mend it for him! Did you ever hear of such a thing? Why don't he take it to a tailor? It's all in rags—and I'm not going to do it!"

Nellie took the dilapidated garment, while a slight wrinkle appeared on her usually smooth young brow. It quickly vanished, however, and she reached for her workbox.

"You aren't going to do it? I wouldn't touch it!" Gertrude declared.

"I'd rather mend it than have him wear it as it is! I hate to see ragged old men!" said Nellie.

"But he'll bring you his old shoes next and ask you to patch them!"

"His boots would be a step beyond me," laughed Nellie. "But this is easy enough, and it won't take long. Now, if ever I have the management of a boy I'll bring him up to sew and to keep his own clothes in apple order. He shall have a thimble and scissors and well-stocked workbox, and he shall learn to handle a needle as well as a jackknife. Why, there's something slipped down between the lining and the outside, Gertrude—a five-dollar gold piece! I'm glad Uncle Sam brought it to you, after all, else he might never have seen his money again!" Nellie's fingers flew rapidly, and it was not long before she exclaimed: "There! it's finished now, as well as I can do it. You'd better take it right back to him, and the gold piece, too."

Gertrude disappeared, but in a moment she returned with a flushed face, and, dropping the gold piece into Nellie's lap, she stammered:

"He—he told me to keep it for mending the coat, and I—I hadn't courage to tell him I didn't do it! So it's yours—for I shan't take it. And Nellie, in spite of his looking so shabby, I believe he's awfully rich, and he's come here this way just to find out what we're like, and what we need. I wish he'd adopt us and take us away from here; he's a great deal nicer than Uncle John!"

"O, Gertrude!" cried Nellie, indignantly. "No, you must keep it, for he gave it to you. But if he's ever so rich, I'd be ashamed to talk so when Uncle John has been so kind. What would we have done when mother died if he had not been willing to give us a home? And didn't he promise to take care of us at school until we were old enough to teach and support ourselves? It's very ungrateful to say Uncle Silas is miser, just because he has given you a bright gold piece!"

Gertrude was quite unmoved by her sister's indignation; on finding that Nellie utterly refused to share her sudden bright anticipations, she finally descended to the kitchen and took old Susan into her confidence, much to that good woman's astonishment.

"Law, Miss Gertrude, 'tain't possible!"

said Susan. "I've been in the family sense them men was byes, an' Mr. John was always queer, an' class, an' 'emulative—but for all that, kind an' honest as the daylight! But that there Mr. Silas—always wild an' shiftless, it nuthin' wuss—he worried your poor granma mos' to death. An' from what I see, 'tain't at all likely he's changed his ways."

The plain statement rather shook the foundations of the air castle which Gertrude had begun to build; but still, on thinking it over, she decided that old Susan might be wrong, and especially as she acknowledged that she "hadn't heard nuthin' about Mr. Silas an' his ways" since he left his home to seek his fortune in South America, so many years ago.

So Gertrude took great pains to be very polite and attentive to Uncle Silas, and especially in the evenings, when Uncle John went out for his solitary walk. She had begun to prize her position upon the impression she was making, when one night he suddenly inquired:

"Are you the one with a theory about the boy and the needle and workbox?"

"No, that was Nellie," she stammered, while she vainly tried to recall her own disparaging remarks upon the listener on that memorable afternoon.

But whatever Uncle Silas had overheard, he evidently was not angry, for he seemed to be enjoying her embarrassment.

"But you mended my coat," he persisted.

"N—no, that was Nellie, too."

"Oh, I begin to see. Nellie found the gold piece, and you spent it! I call that a fair division of labor."

"I made her keep it," said Nellie, quickly coming to the rescue of her sister. "Gertrude tried to give it to me, but there was nothing I happened to want, so I wouldn't take it."

"Oh," said Uncle Silas, "then apparently Gertrude did want something just at that moment?"

"I'm always wanting something," murmured Gertrude. "I do wish I was rich!"

Uncle Silas actually chuckled over this reply; then, as Nellie became absorbed in her book again, he bent forward and laid his bony hand upon Gertrude's arm.

"You're smart," he said, "and you're rich, too, one of those days, or I'll miss my guess."

Far from sharing Gertrude's romantic belief, Nellie did not for a moment dream of the hold it had taken upon her sister's imagination. But already Gertrude had begun to throw out mysterious hints to her classmates about her uncle's wealth, and an exaggerated story of the gold piece was going the rounds of the school. She could not help mourning a little in secret, at the possibility of being separated from her sister; for it was evident that Uncle Silas was quite indifferent to Gertrude, and so it could hardly be expected that he would treat her both with equal favor. But at the same time she was very eager for him to reveal his plans, and to enter the life of luxury he so often hinted of to her.

The girls at school were growing more and more curious, but hardly more impatient than Gertrude herself. Her castle in the air had grown so real to her that never a morning came but

she expected to see it realized before the night. Her only dread was lest some of her exaggerated stories should come to Nellie's honest ears too soon.

Then came a day when Gertrude never will forget—when it was found that Uncle Silas had gone, no one knew whether.

His oldest, but now carefully mended clothes, had been left behind, with a card bearing the laconic inscription: "For my brother John," and it afterwards appeared that he had been freely republishing his wardrobe—at his friend's brother's expense.

But this was not the worst; it soon came out that Uncle Silas had been trying to raise large sums of money in his brother's name, upon bogus South American securities; and it was his failure in this and fear of the consequences, which had led to his sudden and secret flight.

A package of the worthless securities had been left "for my charming but avaricious niece, as a suitable reward for her disinterested devotion."

Gertrude's humiliation was complete, and she foresaw a bitter punishment for her folly in the merciless teasing of her companions, when they should learn of her air castle's utter and pitiful collapse.

Nellie was honestly sorry for her sister, though she wondered how it had been possible for Gertrude to indulge in such absurdly romantic hopes; and she heartily sympathized with Uncle John's discomfiture and indignation at the discovery of his brother's utter unworthiness. But old Susan chuckled over the state of things for days.

"Jest like Mr. Silas," she said, "an' serves Mr. John right for trustin' him, when he knew—well, as I do—that Mr. Silas was born a scamp, an' wasn't likely to go ag'in his natur'! But for Miss Gertrude to be so taken in by his great yams! She ain't much like her sister; seems as if Miss Nellie's got all the family common sense. Well, I often said, an' I say again: 'Blessed be them that didn't expect nothin'—for they ain't so likely to get disappointed!'"—*Democrat's Magazine.*

SIAM'S WILD ELEPHANTS.

How the Unwieldy Beasts are Reduced to Subjection.

In Siam all the hard work is done by elephants. All the heavy lifting and hauling is done by these giant beasts, which, despite their ungainly and unwieldy proportions, are endowed with an intelligence that is almost human.

At Ayutthia is situated the chief elephant camp of the country, where the wild elephants of Siam are not only captured, but also reduced to subjection. The elephant is naturally one of the subjects of greatest interest to the traveler in Siam, for in no other country, save perhaps in India, can this animal be seen to such advantage.

Some years ago herds of wild elephants were large and numerous, but the number of herds is now greatly diminished and the herds themselves are smaller. This diminution is mainly due to the fact that there is an increasing demand for the elephant's labor, while on the other hand they rarely breed in captivity.

All of the herds of roaming elephants now practically belong to the king. They inhabit the northern part of the kingdom and although not domesticated are not so wild as they formerly were.

When there is necessity for the capture of a number of these, or when there is some celebrated personage visiting at the Siamese court, the king orders an elephant hunt, which is engaged in by thousands of persons and numbers of domesticated elephants.

The capture is effected by surrounding and driving a herd to this strong corral at Ayutthia. Sometimes the herd is driven a distance of over one hundred miles and a special hunt is organized on account of the danger that attends it. Rarely is there an elephant hunt which does not result in the death of one or two persons and the wounding of many more.

The party is thoroughly organized and under the control of certain well-trained captains of divisions. They proceed to the neighborhood of that herd from which it is intended to make the capture and draw a cord on about the entire herd. Among the elephants taken to assist in the hunt are certain animals that have been latest captured and who are only kept to lead the way.

These half-tamed elephants are driven into the forest, where they soon meet and fraternize with the wilder animals; for very likely some of these half-tamed animals have recently belonged to this herd.

After a short time, in which to allow the two classes of animals to become acquainted with each other, the half-tamed beasts are used to decoy their wild brethren to the corral, then they are overpowered and chained fast till captivity has broken their spirit.—*Chicago News.*

EXPLOSION BY SYMPATHY.

Responsive Effects of Vibrations Under Harmonic Conditions.

Musicians are well aware of the fact that if any note of the gamut be clearly sounded or sung within vibration range of any suitable instrument, the instrument will respond to the sound, and if the string, whichever it may be, be tuned to the same note, will begin to sound upon its own account, or "respond," as it is termed.

If the singer then refrains from repeating the note he began with, but sings another one, the "speaking" string instantly relapses into silence, while another responds to the new note. In the same way an organ pipe will respond, as indeed will a vase, a hollow vessel with thin sides, or even an apartment, if the particular note to which they are respectively "tuned" be first sounded.

Now, it will be noticed by many that in constructing stores for the reception of explosives it is very much the fashion to build a series of exactly the same dimensions, and to place them, with almost mathematical accuracy, at equal distances apart. They are then filled with explosives; one day an accident explodes the contents and everybody is surprised when, despite the next building being "much too far off," and with "intervening walls twelve feet thick," some or all the other stores blow up in the same sequence. What other result could ensue?

All the buildings are identical in size and capacity; hence the "note" sounded in the first—whether it be one of triumph or of tragedy—finds immediate "response" in No. 2, when, reinforced by a second explosion, the next store cannot do otherwise than follow the example of the other.

In the course of which the writer found that small quantities of these sensitive explosives placed in "sounding boxes" of precisely the same dimensions could be exploded by the detonation of one of them at greater distances from the detonator than, ceteris paribus, was possible in the open, or when in boxes of other shapes, not "relatively harmonic" to the detonator box.—*Nineteenth Century.*

In Good Company.

There are subjects at which even the scoffier must not sneer if he still wishes to be considered well bred. No one may scoff at religion and still be known as a person of good taste. When old Monsieur de Montrom, a dissipated society man of the First Empire, was in his last illness, the Abbe Petitot was a frequent visitor at his bedside. One day, in the course of a serious conversation, the abbe said to him: "You have probably, during your long life, been very often tempted to speak lightly and to joke about religion?"

"No," said the old wit, seriously. "I have always mixed in the best society."

—*Youth's Companion.*

NAPOLION LAUGHED AT BUMPS.

Made It a Rule Never to Allow Himself to Be Influenced by a Man's Goodwill.

The Emperor Napoleon was not tender toward the doctrines of Mesmer, Gall and Lavater, which troubled some brains, but which he called charlatanisms. "Mesmer and mesmerism," said he, "have never recovered from Bally's investigation made in behalf of the Academy of Sciences. Mesmer exercised a power over a person, magnetizing him as he stood face to face with him. This same person magnetized from behind, and not knowing what was going on, felt nothing. It was then on his part an illusion of his mind, a weakness of his faculties; it is the same with the charlatan who at night runs along the roofs without danger; in the daytime he would break his neck, because his senses would be agitated. One day at one of my public audiences I took in hand the charlatan, Puysegur, on the subject of his 'somnambulism' given to persons whom the 'charlatan' can put into a trance translation. He undertook to get on his high horse; I brought him down by these words alone: 'If it is so wise, let me tell you something new. In two hundred years men have made much progress. Let it specially interest you to know that I have made a step forward it has made! Let it tell what it will do in eight days! Let it make known the numbers which will be drawn at the lottery to-morrow!'"

"I did the same for Gall. I contrived much to the undoing. Gallant was his great enemy, and his life have a great penchant for materialism. It would extend their science and their domain. But nature is not so poor. If she were so gross as to make herself known by exterior forms we would make more rapid progress in our task, and we would be better informed. Her secrets are more subtle and more delicate, more fugitive, until now they escape every effort to grasp them. A little handclasp turns out a great genius; a tall handsome man is only a blockhead. A large head with a big brain sometimes contains a single idea, while a small brain is found to be endowed with a vast intellect."

"And now look at Gall's imbecility. He attributed to certain bumps propensities and crimes which spring from society and the covetness of man. What becomes of the bump of philosophy if there is no philosophy? The bump of drunkenness, if there is no fermented liquor in existence; that of ambition, without the organization we call society?"

"It is the same with that arrogant humbug, Lavater, with his relation between the nasal bone and the place of one's destiny. His philosophy is the philosophy of our nature; it is in us to guide us to the positive opinions, when we ought, on the contrary, to carefully guard against this."

"Hardly do we see a man's features before we are ready to give him an opinion of his character. Wisdom would be in rejecting the idea of such a thing, of neutralizing these delusive circumstances. Such a one has robbed me; he had gray eyes; henceforward I will never see gray eyes without the idea of being robbed; then I shall be afraid of gray eyes, and which I dread wherever I see it; but indeed is it the gray eyes which robbed me?"

"Reason, experience, and I have had great opportunity of exercising them. Show that all these signs are lies, that one cannot guard against them so easily, and that there is really no other means of knowing men than that of seeing them, trying them and associating with them."

"And after all one runs across such hideous faces. I must confess, that the most acute reason is at first put to flight and confusion, and is pronounced even against reason. Nevertheless we must not judge men by their looks; we can only know them well on trial. What faces I have had to pass upon in my life! What experiments I have been able to make! What denunciations, what reports I have heard! So I have learned that there is no more to be known of a man than to know his face by words. All the humbug of Cagliostro, Mesmer, Gall and Lavater is swept away by this one argument, simple as it is: all this can be, but it is not."

"Man loves the marvelous; it has an irresistible charm for him; he is always ready to quit that with which he is compassed about to run after what is trumped up for him. He lends himself to what deceives him. The truth is that everything around us is marvelous. It is not the marvelous properly speaking; everything in nature is phenomenal. My existence is a phenomenon; the word which we throw on the fire and which warms us is a phenomenon; the light which is there and which shines upon me is a phenomenon; all the first causes—my intellect, my faculties—are phenomena, for it all is and we know not how to define it."

"I leave you here in St. Helena, where we now are; in attending I am in Paris entering the opera; I salute the spectators; I hear the acclamations; I see the actors; I listen to the music. Now, if I go on my travels, the distance between this island and Paris; why could I not traverse the centuries? Why not see the future as the past? Would one be more extraordinary, more marvelous than the other? Not only that it is not. Here you find the chain of reasoning which will always destroy unreasonably all these marvelous fancies. All these charlatans, Cagliostro, Gall and the others, sometimes talk very intelligently; their reasoning may be correct; they believe only their conclusion is false because the facts are wanting."—*Chicago Herald.*

He Asked Too Much.

"I am so glad to have met you, as I have two favors to ask of you."

"What are they?"

"I want you to lend me ten dollars and not say a word about it to anyone."

"Two favors at once, man! That's too much of a good thing. One of them—yes! I won't breathe a word of this to a living soul."—*Almanaque de la Risa.*

The Common Kind.

She—Do you think there is such a thing as undying love?

He—O yes, I have experienced it several times.—*Albany Argus.*

Dr. Kill, the Eminent—I assure you, miss, the St. Vitis dance is something awful. Sure—Oh, is it? I never danced it, but I like the Oxford real well

Woman's Curiosity.

She—Women haven't a bit more curiosity than men, so they haven't. He—No, but it is manifested in different lines. For instance, a woman might own a sewing machine for years without finding out how it is made, but she wouldn't have a seamstress in the house a week without knowing all about her.—*Indianapolis Journal.*

HONOR AMONG THIEVES.

Her Ma—Sir, you've stolen my daughter's love. Bold Culprit—Well, didn't I return it? Her Ma (making her exit, aside)—Another case of "honor among thieves."—*N. Y. Ledger.*

A Soft Answer.

Mrs. De Pink—I am amazed, sir, that you should propose to my daughter. Why, she is just out of boarding school, and you have not known her a week. Young Man (a smart fellow)—True, madame, but I have known you for some time, and everybody says your daughter takes after you.—*N. Y. Weekly.*

Sister's Indifference.

Little Boy—You needn't worry about sister and Mr. Poorchap. She doesn't care a snap for him. Mother (much relieved)—How did you learn that? Little Boy—When they are in the parlor alone she won't even let him have a chair to himself.—*Good News.*

Country Board.

"Well," said Mr. Hollerstraw, as he entered his rural abode, "I've made a right good dinner." "How?" asked his wife. "I found a city storekeeper that wants to send his family out here to live on the farm, an' he pays in condensed milk an' canned meat an' tinned goods."—*Washington Star.*

Forgot to Put in Her Teeth.

He—I wonder how I can have offended Miss Primleight? She (a rival)—Why, what makes you ask? He—I met her on the avenue this afternoon and she bowed without her usual smile. She—Probably she had forgotten to put in her teeth.—*Town Topics.*

METHOD IN HIS MADNESS.

Also—What do you goin' marry dat of Sally Ann, Mose? She's jes' bout free times yo' age. Mose—I 'low yo' don' know Sally Ann's got de fines' water-millon patch in de kentry, does yo'?—*Judge.*

A Left-Handed Compliment.

Clarissa—Has Jack Flasher proposed to you yet? Ethel (daring up)—I'd like to see him propose to me. Clarissa—Well, Ethel, I must say that if there is a truthful girl, you are one.—*N. Y. Press.*

A Suggestion.

Mrs. Brown—Since they have become engaged they just sit in the parlor and not a word passes between them. Brown—Perhaps there is no room for it to do so.—*Puck.*

Needless Fears.

Dinah Ebony—Aunt, de papers say mabe de black plague will come to dis country. Aunt Ebony—Don't you worry 'bout dat, honey. It won't show on us.—*N. Y. Weekly.*

Not His Ideal.

The Optimist (at the summer hotel)—Say, do you want to meet some lovely creatures without a particle of affectation or deception? The Cynic—No. I want to meet some girls.—*Chicago Record.*

"I think I'll move here and run a milk business."—*Chicago Record.*

Unless They Are Watchful.

"Your city seems to be pretty well cut up by electric railways," said the visitor. "It is," responded the resident, "and so are the citizens."—*Chicago Tribune.*

Incapacitated Hero.

Harvey—Then your son didn't go through his college course with flying honors? Austen—No, unfortunately he lamed his right knee about the middle of the term.—*N. Y. World.*

Just How You Take It.

Mr. Meeks (anxiously)—Do you think my mother-in-law will pull through, doctor? Physician (encouragingly)—We can hope for the best, sir. Mr. Meeks (hopelessly)—So she's really going to die, is she?—*Truth.*

Most Distant.

Stickley—With your most distant relative, Bill? Bill Fraydout (who is known to have relatives abroad)—My cousin, John Welltoke, just across the street.—*Boston Courier.*

Needless Fears.

Dinah Ebony—Aunt, de papers say mabe de black plague will come to dis country. Aunt Ebony—Don't you worry 'bout dat, honey. It won't show on us.—*N. Y. Weekly.*

Not His Ideal.

The Optimist (at the summer hotel)—Say, do you want to meet some lovely creatures without a particle of affectation or deception? The Cynic—No. I want to meet some girls.—*Chicago Record.*

OUR WASHINGTON LETTER.

WASHINGTON, Sept. 17, 1894.

Mr. Cleveland's "they" committee of the currency has been putting its foot in it again, it seems, by expressing financial opinions. According to current gossip in inside Democratic circles, a delegation of influential Democrats from the south and northwest have been to see Secretary Carlisle for the purpose of informing him that Comptroller Eckels must be muzzled during the rest of the campaign, as his financial opinions were accepted as those of the administration and would bring on an open revolt among the silver and inflation Democrats if he persisted in publicly airing them. The relations between Secretary Carlisle and Comptroller Eckels have never been even fairly cordial, as Mr. Carlisle has never forgotten that Eckels was appointed by Mr. Cleveland without his knowledge, and Eckels has had the big head ever since his appointment, acting as though he considered himself entirely independent of Secretary Carlisle and only responsible to Mr. Cleveland. Notwithstanding these strained relations it is said that Secretary Carlisle sent for Mr. Eckels to come to his private office, and placed the campaign before him, thinking to win his consent to what was desired with pleasant argument. The result was somewhat surprising. Eckels got mad, and told Carlisle that the financial opinions he held and made public at every opportunity were precisely those held by Mr. Cleveland and that he should accept every invitation that was extended him to spread them by making addresses before financial bodies. Mr. Carlisle has a temper when it is aroused, and for the next few minutes a person in the next room might easily have imagined themselves listening to a Kentucky teamster arguing with a balky horse. It was probably the worst quarrel of an hour young Eckels ever spent. It is said that Eckels is inclined to carry the quarrel to Buzzards Bay and to appeal to his patron to stand by him. Mr. Carlisle is said to be willing to let it drop, provided Eckels does not attempt to make any more financial addresses or to get himself interviewed on financial matters during the remainder of the campaign; and that his mind is fully made up, if he does, to let Mr. Cleveland choose whether his Secretary of the Treasury or his Comptroller of currency shall resign. This row occurred before Mr. Eckels' Grand Rapids speech, which Secretary Carlisle did not seek to prevent, but to have made common place and without decided opinions.

Secretary Carlisle is so thoroughly imbued with the idea that members of the administration should keep mum on the financial question, allowing Democratic stump speakers to make the most of the recent resumption of the coinage of silver dollars by the mints, among the silver men of the west and south, that he has declined an invitation to deliver an address before the American Bankers Association, at Baltimore, on the 11th of next month. He made the excuse that it was because he had already accepted an invitation to deliver an address at Batavia, N. Y., on the 13th of October, on the life and character of Robert Morris, the revolutionary patriot, that he could not address the Bankers Association; but it is an open secret here that if it would not have furnished him a reasonable excuse for not speaking at Baltimore the people of Batavia would have been deprived of the pleasure of hearing Mr. Carlisle praise the sturdy virtues of Robert Morris. It is the old, old story, Secretary Carlisle wishes to aid the Democratic candidates for Congress to throw dust in the eyes of the voters as to what the Democratic party intends to do with the financial question. He wishes to give them an opportunity to appeal to whatever happens to be the dominating financial opinion in their respective districts.

The few Democratic politicians in Washington are quite busy gossiping over the London interview in which Representative Wilson is made to say that he doesn't believe Mr. Cleveland desires to be a candidate in 1896. The prevailing sentiment seems to be that the statement was made as a feeler in Mr. Cleveland's interest, and it is pointed out that Mr. Cleveland has had plenty of opportunities to personally announce his intention not to be a candidate; also, that he is not in the habit of making announcements of such an important nature—to himself—through third parties. The general belief among Republicans has for some months been that Mr. Cleveland was shaping all his acts with the intention of again becoming a candidate.

The tramping down of Breckenridge by the Democratic voters of the Sixth Kentucky district was the cause of much quiet rejoicing in

Washington, particularly among the women, most of whom regard him as a moral leper. The one hundred or more Federal office holders who went from Washington to help Breckenridge get renominated will be about the sickest men in town when they return.

Mountain Lake Park.
Hotels still open.
Sixty-five cottages occupied at this date.
Supt. Radisill sold last Friday and Saturday lots to the amount of \$1,400.

Conrad Michael is erecting a two story cottage on Deer Park avenue, near Wheeling avenue.

Mrs. Nesbitt, of Farmont, W. Va., will build this fall on the corner of D street and Hazel Glade Drive.

Contractor Johnson has a contract to erect this fall a two story cottage on the S. W. corner of E and Cedar streets.

Fifteen men are at work cutting out Pittsburgh avenue from I street to Crystal Spring Drive.

The past ten days Wheeling avenue has been opened from I street to Crystal Spring Drive. L, M, N, D, P and Q street have been extended from Wheeling avenue to Pittsburgh avenue.

A force of men are engaged in digging the glade south of Crystal Spring Drive, extending from beyond Wheeling avenue to the lake.

Dr. J. G. McLann, of Wheeling, has purchased eight lots facing on Pittsburgh avenue, P and Q streets, a beautiful plot of ground. He is improving it very much.

The lot sales at the Park since July 1st has exceeded \$8,000. The Park Association has a few \$50 lots yet for sale. They will be worth \$100 before next summer.

No safer investment can be made than to buy a lot and put up a cottage at the Park. The Park is no experiment, but a success. Its future as the Christian Summer and Health Resort of the land is guaranteed.

Work on the enlargement of the lake will begin in earnest in a few days. As soon as the ice house can be emptied it will be taken down and put up on the east side of the lake. The lake will be made so as to gather a crop of ice this winter.

The community of Mountain Lake Park has granted the right of way through the streets and alleys of the Park to a water company. In the near future the Park will be supplied with hydrant water and have a good system of sewerage.

W. R. Johnson has been elected the fifth member of the annual committee or town council.

Elijah Brown, editor of *Rain's Horn*, preached a grand sermon last Sabbath morning.

Rev. Lee and wife of India, are to tell us next Sabbath morning about India. This will be an interesting service.

Superintendent Radisill and wife spent Tuesday at Keyser, the guests of Rev. and Mrs. J. O. Thompson, of the *Mountain Echo*.

Fairview cottage, the delightful home of Mrs. Pierce, is now offered for sale. Mrs. P. has purchased three magnificent lots on Crystal Spring Drive, overlooking the lake, and the mountain peaks on the east and south.

Elbow.
Dry and hot. Everything burning up.

Buckwheat threshing is the order of the day.

Mr. J. W. McIntyre is working for S. Broadwater, of New Germany.

Joseph Warnick has commenced hauling the lumber for his new house.

Mr. H. A. Duckworth is working for Elias Merrill.

Mrs. Walter Warnick is visiting her sister, Mrs. C. DeWitt at West-ernport.

Mrs. D. Warnick was the guest of B. F. Snyder Sunday last.

Mrs. D. H. Guey has gone to Baltimore to receive medical treatment.

Misses Ada McIntyre and Minnie Broadwater contemplate visiting relatives at Westernport soon.

A number of our young folks talk of attending the love feast at Fox Ridge Saturday, the 22nd.

Warnick Bros. will soon have their saw mill ready for work again.

Jos. Warnick was at Barton Saturday with a load of shingles.

Mr. H. M. Miller visited Elias Merrill recently.

Mr. John Warnick is working for Benj. Barnes.

Mr. John Clark talks of going to Florida. We are sorry to have him leave us.

Mary E., daughter of Mr. and Mrs. H. M. Broadwater, died suddenly on the 11th and was buried on the 12th. She was aged 18 years, 7 months and 9 days. She was only sick about ten minutes.

North Glade.
Your correspondent from this place having been silent for a time, we will pen you a few items.

The Sabbath school convention

held here recently was largely attended and was a success beyond expectations.

There is some sickness in our community at present.

Wm. Brobst lost a little boy Sunday morning with diphtheria.

A. Fitzwater is happy over the birth of a son a few days ago.

Jas. W. White and Mrs. J. Tucker, of Ryans Glade, were visiting in this community Saturday and Sunday.

Mr. W. A. Smith and family, of Hoves, were the guests of Geo. W. Moon Saturday and Sunday.

Jas. A. Eulow, of Mt. Lake, and Mr. Miller of Cumberland, were here last week in the interest of the Washington Building and Loan Association.

Miss Jennie Smith and several other evangelists will hold meetings for us Saturday night and Sunday, 22nd and 23rd inst. A good time is expected.

Grand Jury Report.
The Grand Jury after being in session since Monday, September 10, adjourned on Tuesday of this week and was discharged. Below we append their report:

To the Honorable, the Judges of the Circuit Court for Garrett County:

The Grand Jury for the September term of 1894, respectfully report that they have carefully examined one hundred and twenty-five witnesses in the investigations of the various cases and complaints brought before them, and they have wherever the evidence together with due regard to circumstances in the premises appeared to justify, found presentments and all such cases as they deemed either of a trivial nature or inadequately sustained by facts have been dismissed and the witnesses discharged.

Our labors have been lightened and our way made clear by the ready council and obliging spirit of the State's Attorney.

The large number of irresponsible witnesses without testimony or information appertaining to any actual interest within the province of the Grand Jury's inquiries, is, probably difficult to avoid under the existing system and practice, but it so seriously impedes the progress and multiplies the costs of this branch of the court, as to persuade us to respectfully invite the attention of your Honors to the pressing need of some bar or salary restraint against a growing custom debasing to its perpetrators and burdensome to all tax payers.

Conforming with the instructions of the court and with the requirements we have visited the county jail and the various public buildings, offices and apartments and the officials in charge of each have politely met and fully shown us over the rooms, records papers and charges committed to their supervision and keeping. It gratifies us to observe in the office, vaults and methods of the County Clerk much added thoroughness in the arrangements for keeping and preserving the public records and papers. The other offices in the court house were found also in an apparently well directed condition.

Incarcerated in the jail on the lower floor are four male prisoners; on the upper floor four female prisoners with two female children under three years of age. These unfortunate people seem to be as well provided for as it is possible for the sheriff to provide for them. The jail is imperfect in all its departments and its absolute failure in sanitary consideration imposes extraordinary hardships upon its inmates, and in our estimation well calculated to breed infectious maladies.

We further recommend the erection of a wall of such construction about the jail as will prevent parties on the outside from such close communication with the prisoners as to easily pass through the window bars implements for causing their escape.

Having now discharged all duties known to us as jurors we pray that your Honors will dismiss us from further attendance.

CHAS. M. MILLER, Foreman.

Dead Letter List.
List of mail matter remaining unclaimed in the postoffice at Oakland, Garrett county, Maryland, for the week ending September 22d, 1894, the parties addressed being unknown to the postmaster.

C. B. Walker, Miss Nellie Lewis,
Chas. P. Wilson, Miss Lora E. Lippincott,
J. H. Suberlin, Miss Harriet A. Dushane,
H. Minkoff, Miss Lora Carroll,
E. A. Myster, Miss Mary A. Cole,
J. F. Wanger, Miss Samble Costner,

For full particulars call on or address Mrs. LIZZIE

FOR YOUNG PEOPLE.

TRIOLED.

If it were not for fairies, this world would be drear:
(It is sure they are true—high-ho!)
The grass would not tremble,
The bluebells would jangle,
And things would be stupid and queer, you know.
And everything dull if the fairies should go.
(It is sure they are true—high-ho!)
I love to believe in the godmother's mice,
And Hop-o-my-Thumb, high-ho!
And it is true in Willy
To call me a silly.
If brothers would only be nice, you know,
Not tease and make fun of all my troubles would go.
I'd believe in the fairies forever—high-ho!
—Mrs. Mary Jones Dodge, St. Nicholas.

A BOY LIFE SAVER.

He began his gallant career when that
Eight Years Old.
Tommy Milligan, one of the bright-
est boys in Pittsburg, Mass., made his
third rescue from drowning the
other day. He made his first
when he was eight years old. He
was twelve. Tommy is small for his
years. He is a Scotchman, having been
born in Ayrshire January 2, 1882, and
was three years old when he crossed
"the big salt pond" with his parents.
They landed in East Boston and lived
there seven years. Tommy was five
years old when he went in swimming
the first time. From that time Tommy
improved every opportunity to go in
swimming, to the great consternation
of his mother and father. He could
stay under water longer than any of
the other boys in the neighborhood. His
mother was watching him when he would
remain under so long that she was fright-
ened, thinking he was drowned. He was
not quite eight years old when he
saved the life of a companion. They
were bathing under a bridge on the
narrow-gauge railroad in East Boston,
and the latter in diving struck his leg
against a rock, the blow stunning him.

TOMMY MILLIGAN.

He said nothing about the incident at
home until several days after, when, as
the boy he rescued was passing his
home, he remarked:
"That fellow came pretty near drown-
ing the other day. I guess he would if
I hadn't seen him in time." Angus Mc-
Farland, another East Boston play-
mate of Tommy's, is indebted to him
for similar service rendered. While
bathing one day Angus fell off into a
deep hole. It was high tide and he
was going down for the third time
when Tommy reached him and got him
ashore. The latest to owe his life to
Tommy's skill and bravery was a play-
mate named Carl Remick. The Ro-
mans boy dived from a boat, but was
taken with a cramp and when he came
up screamed for help. Tommy, who
was in the water with his clothes on,
quickly addressed and swam out. Be-
fore he could reach the drowning boy
he had gone down for the third time.
Then Tommy plunged under the water
and brought him to the surface. He
was taken ashore and after a quarter
of an hour's hard work recovered. He
is now running about as well as ever.

AND DANIEL CAME.

How a Big Dog Saved a Congregation
of Worshippers.

Willie was asleep, and Dan was lone-
ly. Willie is the minister's son; Dan is
his dog. It was Sunday morning, and
everyone was at church but these two
friends. It was warm and sunny and
they could hear the preaching, for
their house was next door to the
church. In some way while Willie was
fast asleep, he fell asleep. Now, the
minister had for his subject "Daniel."
That was the name he always gave
Dan when he was teaching him to sit
up and beg and other tricks. While
the dog sat thinking the name "Dan-
iel" fell on his ready ear. Dan at once
rushed into the church through the vestry
door. He stood on his hind legs, with
his forepaws close beside the minister,
who did not see him, but the congregation
did. When the minister shouted
"Daniel!" again the sharp bark said
"Yes, sir," as plainly as Dan could
speak. The minister started back,
looked around and saw the funny pic-
ture. Then he wondered what he
should do next; but just then through
the vestry door Willie. His face was
red with sleep, and he looked a little
frightened. He walked straight to-
ward his father and took Dan in his
arms and said:
"Please excuse Dan, papa. I went
asleep, and he ran away."
Then he walked out, with Dan look-
ing back on the smiling congregation.
The preacher ended his sermon on Dan,
and as he left he said: "For as the
dog has been, so will be the man."
The minister said he would tie up
that dog.

Scotch Idea of a Broad Hint.
Sir Andrew Agnew, of Lucknow, a
well-known Scotch baronet, was long
pestered by an importunate sort of per-
son, who insisted on being constantly
"underfoot." Finally, however, he
dropped off, and Sir Andrew was asked
how he got rid of him.
"Oh," said he, "I gave him a broad
hint."
"A broad hint?" repeated the in-
quirer. "I thought he was one of
those who never could be induced to
take one."
"Ba min sarh," said Sir Andrew, "he
was obliged to take it! For as the
shiel walua gang out at the door I
just threw him out of the window!"

FABLES OF THE PHOENIX.

How He Builds His Own Funeral Pyre
and Licks It.

The paragon of all fabulous creatures
was the bird described by the ancient
writers under the title of the "Arabian
phoenix." Ovid says: "Although most
beings and things have their origin in
other individuals of their own species,
there is one remarkable exception to
this general law—the miraculous bird
called the 'phoenix,' which reproduces
itself." According to a belief which
Herodotus heard expressed at Bello-
polis, the famous Egyptian "city of the
sun," this "miraculous" bird, which
lives about every five hundred
years—always coming from the direction
of Arabia—on the occasion of its
father's death, and always buried him
with peculiar ceremonies.

According to the best evidences
which can be gathered from the
writings of Ovid, Pliny, Herodotus and
then Cassius, after the phoenix had
lived his allotted lifetime of five hun-
dred years he selected a spot and pre-
pared his own deathbed, which con-
sisted of a sort of nest, or funeral pyre,
made of leaves and branches of the
oak, ears of sweet spicuous grain, cin-
nabar, yellow myrrh, etc. Seething
himself upon this he flapped his wings
with such velocity as to cause the nest
to take fire. After bird and nest had
been consumed a little worm appeared
in the ashes and rapidly developed into
a full-fledged phoenix. The first care
of the new bird was to arrange for the
replication of his father's ashes, which
Herodotus describes as follows:
"With the myrrh and other gums it
has amused the phoenix fashions a ball
as large as it can carry. This ball it
hollows out, and in the hollow places
it puts the ashes of its dead parent. The
ball is deposited in the nest, and the
young phoenix carries the whole from
Arabia to Egypt for the purpose of in-
terring its father's ashes at the 'city of
the sun.' Having reached its destina-
tion it lays its burden down upon the
altar of Isidis, and disappears as mys-
teriously as it had come." The legends
connected with this fabulous bird vary
in some of their details, but all agree
in the statement that only a single bird
of the species was living at any one
time.

ARCHIE'S RAILWAY.

A Minnesota Youngster Who Had an Elec-
tric Road of His Own.

Little Archie Cowley, of Duluth,
Minn., is probably the youngest rail-
way manager in the world. Archie is
but seven years old, yet he controls an
entire electric railroad. It is true that
the road is but one-fourth of a mile
in length, nevertheless, it is fitted out
just as completely as any road that is
run by grown persons. Archie is pres-
ident, secretary, conductor, brakeman
and motorman, while his sisters and
playmates are the passengers. The
road was built for Archie by his father,
who is a St. Paul banker.

There are three cars on the road—
one motor car and two passenger
cars. Each car is five feet long and
two feet wide. Instead of a trolley
wire there is a long strip of iron, which
lies between the tracks and supplies
the electricity which makes the cars
move along. On the motor car is the
rheostat, which is an arrangement for
controlling the electric current. By
using it Archie can make his cars move
as fast or as slow as he pleases. On the
passenger cars are the motor and the brake,
and also the reversing switch which
makes the car move backward.

At one end of the road is the power-
house, where the electricity is pro-
duced. The electric current comes
from a small dynamo, which is driven
by a pet steam engine. There is also
a shed where the cars are stored at
night and in winter time. In the
power-house everything is arranged
just the same as if it was a large sta-
tion run by a regular company.

But Archie is the company in this
case. His road is on the hill by the
side of White Bear lake, and he is the
only boy in that region who is able to
go coasting in summer time. He him-
self will tell you, the best of all is that
in this kind of coasting you do not have
to walk back up the hill. The electric
cars pull you up. Archie is very proud
of his road, and spends the days carry-
ing his sisters and their dolls along the
road. He can stop any place on the
way, so he pretends there are several
stations, and his sisters get out. Then
he takes them on again when he comes
back, and collects make-believe money
from them. They all have a very good
time riding on the cars, and Archie is
learning a great deal about electricity.

Six-Months' Old Lawyer.

The youngest member of the Georgia
bar is Edward Harrison Bleckley, who
is not yet six months old. He was
unanimously elected a member of the
bar association recently. He is a son
of Chief Justice Bleckley's old age,
Judge Bleckley is not far from eighty,
and his wedding two years ago attract-
ed much attention in Georgia and
throughout the south.

Preferable.

Mrs. Messer—Now, Tommy, go and
kiss your auntie or mamma will whip
you hard.
Tommy (after a long look at the
auntie)—Whip me, ma.—Chicago Rec-
ord.

FARM AND GARDEN.

ROAD CONSTRUCTION.

Some Valuable Advice from a Progressive
Ohio Farmer.

I have had a great deal of experience
in building roads with the modern
road machine, and my experience is
that a very wide roadway and a com-
paratively level road, with shallow
ditches at the sides, will keep in better
condition than a road with a high crown
enough to carry off the water after
heavy rains, will keep in shape longer
and not rot as badly, as a very high
crowned, narrow pike. A great mis-
take in building and maintaining earth
roads is in putting too much earth in
the road and disturbing the soil.
The road should be built on the sides to
the center to make a good road, and
in a level country, the driveway should
be as wide as possible after leaving,
say, five or six feet outside the side
ditches next to the fence line, on each
side of the roadway, or sidewalk, on
each side of the roadway, or sidewalk,
and be nothing like as remedial.
Plums, blackberries, white and red
grapes, peaches and oranges are among
the fruits and it is difficult to say
which is the best for a pretty com-
plexion. If the skin is kept fresh and
the diet is laxative the face will be
good to look upon.—N. Y. World.

The shine on the Other Foot.
"Tommy, where is your new pair of
shoes?"
"I lent it to the man that runs the
canal boat."
"Does he want to teach it proficiency?"
"No, indeed. He said he wanted to
borrow it and get a few points."—
Washington Star.

Not Difficult.
Young Blunleigh—I'd like to see the
father that would scare me. Wait until
I meet yours. I'll make him toe the mark.
Miss Graffop—All right, dear. But
be careful where you place the mark.
—N. Y. World.

Max Morris—"You have just been thrown
out of work, eh?" Everett West—"Some-
times I said I had been thrown out of
work, sometimes I said I had been
thrown out of work, sometimes I said I
had been thrown out of work."—Indianapolis
Journal.

Professor (seeing the sign "Freshly
Painted" over the zebra's cage in the zo-
ological garden)—"How very strange! I
could have sworn that those stripes were
natural."—Fliegende Blätter.

Cures That Faith Won't Effect
Are brought about by the use of Hostetter's
Stomach Bitters, foremost among American
family remedies. Rheumatism, neuralgia,
dyspepsia, liver complaint, biliousness, and
nervous complaints succumb to this reliable
remedy. It does its benign work thorough-
ly, and those who use it reap a fruitful
harvest of health. Physicians of the first
standing commend it.

The desire of a boy to be just like his
father, extends to wearing his father's
made-over clothes.
A Dose in Time Saves Nine of Hale's
Honey of Borehound and Tar for Coughs,
Hoarseness, Sore Throat, Croup, Whooping
Cough, Asthma, etc.

Revenue will make a man walk in places
where clerical could not creep in a car-
riage.—Milwaukee Journal.

"Do not think that wealth brings happi-
ness," said a man. "I have a pocket-
book full of money, but I am not happy."
—Chicago Tribune.

"What's that I call a good deal of a take-
off," lamented the carriage horse, turning
to look at its driver, who was driving a
carriage full of money.—Chicago Tribune.

Never ask a man "What's up?" He may
be sensitive, and have a private life in his
pocket.—Philadelphia Record.

Consistency doesn't get its growth for five
years. Previous to that time children
are inconsistent, and children are not con-
sistent.—Athens Globe.

There ought to be a law whereby you
could put some people under bonds to keep
away from you.
"Why did Jewley go into the monastery?"
"He really got tired of the world."—
The Boston Herald.

Mamma—"Robbie, why didn't you speak
to Mrs. Brown when you met her last
week?" Robbie—"You said I must always
think twice before I speak, and I couldn't
think of anything to think."—Harpers' Bazar.

As a rule the life of a conscientious real
estate agent is filled with good deeds.—
Lancet.

"Do you find your new maid very tri-
ing?" Mrs. Nowitz—"No, the trouble is
she won't do anything."—Harpers' Bazar.

"Which would you rather be, a lawyer or
a fool?" asked Robinson. "I don't know,"
replied Cynthia. "What has been your ex-
perience?"—Tit Bits.

"I haven't had nothing to eat for a week,"
said the tramp. "Can't you send me some-
thing?" "Certainly," said the pedagogue.
"Fast for two months and I'll get you a
place in a dime museum."—Harpers' Bazar.

THE ONWARD MARCH
Of Consumption is stopped short by Dr.
Pierce's Golden Medical Discovery. If you
haven't waited beyond reason, there's com-
plete recovery and cure. In these scru-
pulous conditions of the blood which invite
Consumption in severe, lingering Coughs,
and Weak Lungs, this medicine is a proved
remedy.

NEW ENEMY TO GRAPE VINES.
The Kentucky experiment station
reports a new enemy to the grape vine
in some small grubs that eat the bark
from grape roots. By keeping these
grubs until they undergo their change,
it is found that they are produced by
eggs laid by a small brown beetle,
something like the rose bug, but dif-
fering from that pest. This beetle has
been noticed to feed on grape leaves,
and experiment shows that Paris green
solutions will poison them. The grubs
may be killed by putting bisulphide of
carbon around the stem of the grape,
removing the earth, and then replacing
it over the bisulphide. We have not
heard of this enemy except from Ken-
tucky, but grape growers should be on
the lookout for it.

ROSES like a rich clay soil, and well-
rotted manure is the best fertilizer for
them.
Good blood must be the starting
point for profitable pork production.

THE U. S. Government Chemists have
reported, after an examination of the
different brands, that the **ROYAL Baking Powder** is absolutely pure, greatest
in strength, and superior to all others.

ROYAL BAKING POWDER COMPANY, 126 WALL ST., NEW-YORK.

For a Pretty Complexion.
Complexion is a matter of diges-
tion. Where there is good digestion a
beautiful complexion is bound to fol-
low. A well-regulated stomach inexor-
ably produces itself in a good-looking
face. Skin-whiteners, face-washes,
creams, greases and liquid emollients
cost far more money than sour grapes,
and are nothing like as remedial.
Plums, blackberries, white and red
grapes, peaches and oranges are among
the fruits and it is difficult to say
which is the best for a pretty com-
plexion. If the skin is kept fresh and
the diet is laxative the face will be
good to look upon.—N. Y. World.

Cheap Excursions to the West.
An exceptionally favorable opportunity
for visiting the richest and most productive
sections of the west and northwest will be
afforded by the Home-Seekers' Excursion
which have been arranged by the
North-Western Line. Tickets for these ex-
cursions will be sold on Sept. 11th and 12th,
and Oct. 12th, to points in northwestern
Iowa, western Minnesota, North Dakota,
South Dakota, Montana, Nebraska, Colo-
rado, Wyoming, Utah, Montana and Idaho,
and will be good for return passage within
twenty days from date of sale. Stop-over
privileges will be allowed on going trip in
territory to which the tickets are sold.
For further information, call on address
Ticket Agents of connecting lines. Circulars
giving rates and detailed information will
be mailed, free, upon application to W.
A. Purill, General Passenger and Ticket
Agent Chicago & North-Western Railway,
Chicago.

Everybody is Going South Now-a-Days.
The only section of the country where the
farmers have made any money the past year
is in the South. The undersigned or any agent of
the Louisville & Nashville Railroad and
connections will be glad to show you the
route for trains of October 2, November 6
and December 4, at one fare round trip.
Ask your ticket agent about it, and if he
cannot sell you excursion tickets write to

OUR WASHINGTON LETTER

From the Washington Correspondent of the Bulletin-American.

The sign of Buzzards Bay wants to know if there is any way to prevent the Democratic smash-up in November, which all indications point so strongly to. He directed Secretary Carlisle to get him the opinions of those Democrats who think they know something. Accordingly Mr. Carlisle dropped the tariff, notwithstanding the presence in Washington of a committee representing the manufacturing chemists and druggists who are waiting at heavy expense for a decision as to the free admission of alcohol for use in the arts, and devoted his last day in Washington to interviews with Dan. M. Dickinson, chief Democratic rainbow chaser; Mr. Harney, the Governor of Pennsylvania; and incidentally chairman of the Democratic Congressional campaign committee, and who possesses enormous vitality or he would not have survived the defeat which has recently come to his committee, and Representative Price and several other Louisiana Democrats. That Mr. Carlisle did not carry any cheering news to Mr. Harney is certain, but it is expected here that his visit will result in some action by the administration. Looking towards a cessation of the Democratic campaign now going on, but even the most sanguine Democrats do not expect it to succeed. Democratic opinion has been pronounced. Mr. Jeremiah O'Rourke, who was compelled by Secretary Carlisle to leave one of the best paid offices under the Treasury department—supervising architect—before leaving Washington that Logan Carlisle, chief clerk of the Treasury, was at the bottom of all his woes. Logan wanted to dispute all the appointments, decisions concerning contracts, etc., in the supervising architect's office, just as he does in all other Treasury bureaus, and Mr. O'Rourke objected. Secretary Carlisle stood by Logan, as he usually does, and Mr. O'Rourke added the prefix "sir" to his name. While this would seem to be merely a Democratic family row, it is in reality something much more important. The supervising architect is charged with the duty of letting all contracts for the construction or repair of public buildings throughout the country, and there is much feeling about contractors being favored by order of Logan Carlisle. O'Rourke openly threatened to make sensational disclosures, concerning the business of the architect's office, and did say that had he favored the contractors his resignation would never have been asked for. But just then some influence was brought to bear upon him and he suddenly became as dumb as a hog, and a wild surprise nobody here expects to find the architect's office the center of a sensational scandal in the near future. Others, however, who are in possession of the facts, and they may not be easily puzzled.

Senator Manderson will this week go to Nebraska to take an active part in the campaign. The statement that he would not be a candidate for reelection was made without his authority, and probably with the hope that it would help the anti-pop combine in that state by bringing the impression that Senator Manderson did not wish to become a candidate because he did not believe a Republican legislature would be elected. As a matter of fact, the Senator says he feels absolutely certain that the Republicans will control the legislature. As to his own candidacy he did not care to talk further than to say that he had not authorized the statement referred to above. But his close friends say they expect him to be re-elected to the Senate, where he has faithfully served Nebraska.

General Mahone, who, as chairman of the Virginia State Republican Committee, advised not long ago that on Republican congressional nomination he made in that State, has changed his mind. He now says: "The bolt of the Louisiana sugar planters looks like the entering wedge in the disruption of the South. It is the most significant political event that has happened in late years. If I mistake not the example of the disaffected Louisians will prove contagious, and we shall see the solidarity of the Democratic party to the south speedily disintegrating. In spite of all the chattering that is not to be done in Virginia this year by the dominant party, the old domination will probably send three Republicans to the House. In Maryland the Republicans will win at least three districts and I think two in West Virginia. In Louisiana the Democrats will be lucky to get off with the loss of only three Congressmen. In the North it will be the nature of a clean sweep for the Republicans." Representative Hooper, of New York, who has been all over that State since the adjournment of

Congress, says the Republicans are certain to carry twenty out of the twenty-four Congressional districts outside of Brooklyn and New York City, and that he will not be surprised if all of them are carried. That's the kind of talk that every Republican who comes to Washington these days indulges in.

Court Proceedings.
When we went to press last week the case of John E. Barnard, charged with arson, was occupying the attention of the court. On Thursday afternoon the jury rendered a decision of not guilty in his case.

The court adjourned Thursday afternoon until Monday morning, when it took up the case of Conway vs. Faulkner, a slander suit. The jury rendered a verdict in favor of Conway for \$75.

Botheaver vs. Male, malicious prosecution, was next taken up and occupied the court until Tuesday afternoon. Verdict in favor of the defendant.

Murphy vs. Mays, attachment, was disposed of yesterday and a verdict for the defendant was rendered.

This morning the case of Dr. Goldsborough vs. William Broderick, ejectment, was taken up.

The jury was discharged Tuesday morning and court may adjourn this afternoon.

ORIGINALS.

No. 35, E. D. Read vs. Joseph Wagner, attachment; motion to quash; dismissed by order of plaintiff's attorney; Hamill—Peddicord.

No. 34, Same vs. same; short notice; dismissed by order of plaintiff's attorney; Hamill—Peddicord.

No. 33, Dr. J. Lee McComas vs. Chas. O. Nethkin, assumption; settled; Peddicord—Hamill.

No. 34, A. C. Norris vs. Norman Bernard; settled on terms filed; Hamill—Mitchell.

No. 41, Alice Davis vs. B. Hughes & Co.; debt; continued; Hamill—Peddicord.

No. 43, D. E. Offutt vs. John T. Davis; attachment on judgment; continued; Hamill—Peddicord.

No. 45, B. Hughes & Co. vs. John T. Davis, damages; continued; Hamill—Peddicord.

No. 46, D. E. Offutt vs. B. Hughes & Co.; garnishees of John T. Davis; continued; Hamill—Peddicord.

No. 54, Alice Davis claimant of property attached vs. D. E. Offutt; continued; Peddicord—Hamill.

No. 55, C. D. Miller vs. John Fizzell; application for a public appeal from county commissioners; proceedings amended and road granted; Sineell—Peddicord.

No. 56, J. R. Garman vs. B. & O. railroad, damages; removed to Washington county; Peddicord, Richmond, Blackiston—Hamill, Wilson.

No. 66, Richard Custer vs. John Edmonds; malicious prosecution; continued; Peddicord—Sineell.

No. 68, Baer Sons' Grocery Co. vs. Sineell Bros.; attachment; motion to quash; continued; Peddicord—Sineell.

No. 79, J. S. Silcox vs. H. A. Rasche; malicious prosecution; Peddicord—Hamill, Seames.

No. 84, Same vs. same, malicious prosecution; continued; Peddicord—Hamill.

No. 86, Same vs. same; debt; continued; Peddicord—Hamill.

No. 87, Hoye, trustee, vs. Mountain Lake Park Association; warrant of resurvey ordered on motion of defendant and case continued; Devenon, Sineell—Hamill, Peddicord.

Several large cases will go over until next court, several have been removed for trial and one or two have been amicably settled.

Real Estate Transfers.

The following transfers of real estate have been made since our last report:

Mary A. Fike to Hoss K. Burgess, "Arabia," 4 acres; \$40.

Clara B. Watson and husband to Selden E. Flowers, lot No. 1108, Mountain Lake Park; \$150.

Wm. C. Broadwater to Wm. C. Broadwater, Samuel J. Beachy and Ralph Engle, trustees of the Methodist Episcopal church, a lot of ground in Grantsville; \$100.

J. Edward George and wife to Hiram Bowser, 51 acres of military lot No. 3250; \$20.

Charles O. Nethkin to Percy Procter, lots Nos. 11 and 12 in Oakland; \$200.

The Mountain Home Company to Daniel Pleasants, lot No. 53 in Loch Lynn Heights; \$55.

The Mountain Home Company to J. M. Lee, lots Nos. 10 and 11 in Loch Lynn Heights; \$150.

Criah M. Stanton, late Treasurer, to the County Commissioners of Garrett county, part of "Lochiel," 20 acres; \$53.

Married.
The *Baltimore American* of last Friday published the following telegram from its correspondent in New York:

"There was published here today the marriage notice of Mr. William Pearre, of Cumberland, and Zerlina Lorena Robinson, nee Wesley, of the same place. The wedding took place on the 5th of September, in the church of the Rev. Dr. Houghton, known as the Little Church Around the Corner, in Twenty-ninth street, near Fifth avenue. From the story told by Mrs. Berger, who published the marriage notice there seems to be a romance behind the wedding, which was kept quiet for two weeks after it had been solemnized. Mrs. Berger stated that the lady had said that her sister in Cumberland was so strongly opposed to the union that she came to New York to be married. Mr. Berger, who is a minister, stated to *The American* correspondent that he no longer marries couples, and his wife knowing this, directed the pair to Dr. Houghton, after receiving a marriage notice which they requested her to publish in about ten days.

"According to Dr. Houghton's register, the parties were married by him in the presence of a witness named Hunter. The groom gave his age as thirty-nine, and the bride hers as twenty-nine."

The bride is a daughter of Mrs. W. S. Dunlap, formerly of Oakland, and the groom a son of the late Judge Pearre, of Cumberland.

No Enoch Arden For Him.

In 1864 Mrs. Anna M. Richardson's husband, W. H. Richardson, of Dallas, Texas, went with a bunch of horses to Mexico. He got sick, and temporarily lost his eyesight, and did not communicate with her.

After the lapse of several years without any tidings from him, Mrs. Richardson concluded that he was dead and became the wife of P. F. Terrell. After her living for nearly thirty years with Mr. Terrell, Mrs. Richardson's first husband, a few days ago, returned and explained that when he recovered his eyesight he made inquiry and was informed that she was dead. Mrs. Richardson was not long in deciding that she was the wife of Mr. Richardson, instead of Mr. Terrell. She accordingly took him in and gave Mr. Terrell to understand that she could not longer be a wife to him.

When Mr. Richardson left home thirty years ago he left his wife on a farm near Duncanville, in Dallas county, with the title to other land in that vicinity. When Mrs. Richardson married Mr. Terrell, the latter took charge of the property and proceeded to cultivate and improve it. By the time Mr. Richardson returned from Mexico the lands were wonderfully enhanced in value, were in a high state of cultivation, and stocked with all manner of pure blooded and graded horses, mules, cattle, sheep, swine and poultry, and many kinds of improved machinery. Mr. Terrell was willing to give up Mrs. Richardson, but he was not disposed to give up the fruits of his labors for the last thirty years. Mrs. Richardson said that Mr. Terrell had nothing when he married her, and that the property is nothing more or less than the natural increase of what she had.

Mr. Terrell appealed to the law, and yesterday evening Deputy Sheriff Houn Lewis sequestered the two farms and the various sundry things on and appertaining to them. The property will remain in the hands of the sheriff until the law decides the vexed question of what disposition shall be made of it.—St. Louis Republic.

Concerning Advertising.

Every business should do a certain amount of advertising to make it a success. There is cheap advertising and expensive advertising. Placing an advertisement in a well circulated, widely read paper is the cheapest kind of advertising, because it brings in the best results. To advertise in every catch-penny device that is offered is the most expensive advertising. You may not have to pay much for the space used, but no one reads the advertisements, and the money is practically thrown away. It is a mistaken idea some people have that they must notice an immediate effect following the first insertion of an advertisement; that there should be an instant demand for the wares advertised, and that their stores should be crowded from the moment their announcement appears.

A coral reef is not built in a day; neither is a successful business. Time is an element of success in everything.

Time alone will not bring success to any business. While a man is waiting for customers to come to him they are dying and he is growing old.

If you have a small business, you can make it much more profitable by advertising. It is not necessary that you should spend a small fortune in advertising the first year,

but if you should begin advertising in a prudent way you would soon find your business so increasing that you could afford to devote more of your profits to advertising. It is by such small beginnings in advertising that great business houses have in a large measure achieved their success.—Allentown (Pa.) Chronicle.

OAKLAND, MD., THURSDAY, OCTOBER 4, 1894.

NUMBER 30.

NEWS OF A WEEK.

Happenings in and About Town told in Short Paragraphs.

Take your chestnuts to Sineell Bros.

Take your buckwheat flour to Sineell Bros.

Read our offer of a handsomely bound volume to new and old subscribers.

Mrs. James C. Peddicord has been very ill for several days at her residence on Second street.

Blank deeds for sale at this office. The deeds are specially ruled and printed very neatly.

A very fine line of fine dress goods just opened at Offutt & Son's.

Largest, best and cheapest stock of men's clothing at Offutt & Son's.

Fine dress goods, ladies' coats, blouses—everything just opening at Offutt & Son's.

Sineell Bros. want 2 car loads of potatoes, 100,000 lb. buckwheat flour at the highest prices.

The Deer Park Hotel, after a very successful season, closed its doors for this year on Saturday morning.

Mr. Andrew Nelson has removed his meat store from the New Glade house to the Felty building on Alder street.

Mr. C. M. Beachy loaded over two hundred head of cattle here on Tuesday and shipped them to eastern markets for disposition.

The public schools of Garrett county will open on the 22d day of October, 1894.

Wm. Hinebaugh, Sec'y.

A large number of Oakland's citizens went to Cumberland yesterday to attend the races and Forepaugh's show.

Dr. J. G. Robinson, dentist, of Baltimore, has located in Oakland for the season and is prepared to do all kinds of dental work. Office with Dr. M. C. Hinebaugh.

Take your buckwheat flour, potatoes and chestnuts to Speicher & Nethken, Deer Park. They pay the highest prices for all kinds of country produce.

For SALE.—An excellent cow, in fall milking after first calf, dropped in April. Also a cobby built, powerful young black mare.

JOHN W. WILLIAMS, Deer Park, Md.

The frame work of Mr. A. D. Naylor's new building on Railroad street is nearly completed. Capt. J. M. Jarboe and his force of workmen are building the structure.

A few days ago Mr. Isaac I. Thompson bought a Poland-Angus bull for breeding purposes down on South Branch. The animal is a year old only and weighs over a thousand pounds.

The brick work on the new school house in Oakland is nearly completed. It is expected that the contractors will have the building finished not later than November 15th.

LOST.—At the B. & O. R. R. station, Oakland, Sept. 28, 1894, a package containing lady's tan colored coat. Party who found the same will please return to the Oakland express office.

The Baltimore base ball club passed through Oakland Tuesday morning in a special car attached to train No. 8. The club was met at the station by a crowd of base ball enthusiasts and given a royal reception.

All persons are hereby warned not to trespass upon my lands lying in districts Nos. 8 and 10, either by hunting, picking chestnuts or trespassing in any other manner.

E. W. KESSE.

We have been requested to state that the force of millers at the City Roller Mills will be doubled and that the mills will be in operation both night and day hereafter.

Mr. Fred. A. Thayer returned from Buffalo, N. Y., last night. During his absence he visited Niagara Falls and other points of interest. He was accompanied home by his family, who had been on a visit to relatives in Montgomery county.

A very elaborate dinner was given last Saturday night by Mrs. L. Stoddard at her residence on Second street. Messrs. D. Stull, O. W. Stull, Mr. and Mrs. King Delawder, Miss M. R. Peddicord and Miss Mollie Stoddard were among the guests present.

Mrs. Andrew B. Gonder gave a dinner party on last Saturday to a few of her friends. Those present were Mrs. Thomas J. Peddicord, Mrs. G. S. Hamill, Mrs. John T. Mitchell, Mrs. John B. Fay, Mrs. Arthur Townshend, Mrs. David Tasker, Mrs. Truman Castol and Miss Eva Tasker.

Having just received a car load of flour, a car of salt and also a large line of fall goods our stock is now complete and lowest prices guaranteed. A call is solicited. Speicher & Nethken, successors to John Felty, Jr., Deer Park, Md.

"I would rather trust that medicine than any doctor I know of," says Mrs. Hattie Mason, of Chilton, Carter Co., Mo., in speaking of Chamberlain's Colic, Cholera and Diarrhea Remedy. For sale by Oakland druggists.

A former officer of the German army, Herr Waethe, a wealthy man, has gone to California to purchase ground to establish a vegetarian colony. His disciples, however, are to eat fruit and vegetables only in the raw state, live in unfurnished huts, and wear as little clothing as possible. In the colony are 12 German noblemen.

"Many of the citizens of Rainsville, Indiana, are never without a bottle of Chamberlain's Cough Remedy in the house," says Jacob Brown, the leading merchant of the place. This Remedy has proven of so much value for colds and croup in children that few mothers who know its worth are willing to be without it. For sale by Oakland druggists.

Every mother should know that croup can be prevented. The first symptom of true croup is hoarseness. This is followed by a peculiar rough cough. If Chamberlain's Cough Remedy is given freely as soon as the child becomes hoarse or even after the cough has developed it will prevent the attack. 25 and 50 cent bottles for sale by Oakland druggists.

There died recently at Newburg, N. Y., Theodore B. Shelton, who was 50 years old, and before and during the civil war the biggest "plunger" in stocks in Wall street. His transactions were large and frequent. Shelton operated many times on joint account with "Uncle Daniel Drew." At one time Shelton was reputed to be worth \$1,500,000. In 1864 when the income tax was in force, he paid a tax on an acknowledged income of \$500,000 made in that year by speculation. He was a conspicuous trader in gold in war times and afterward, but he was on the "short" side of the market in the great Black Friday crash. Shelton retired from Wall-st about 15 years ago. About that time he purchased a large amount of government bonds, which he placed in trust for his children, and part of the income he applied to his maintenance.

There is no medicine so often needed in every home and so admirably adapted to the purposes for which it is intended, as Chamberlain's Pain Balm. Hardly a week passes but some member of the family has need of it. A toothache or headache may be cured by it. A case of rheumatism or neuralgia quieted. The severe pain of a burn or scald promptly relieved and the sore healed in much less time than when medicine has to be sent for. A sprain may be promptly treated before inflammation sets in, which insures a cure in about one-third of the time otherwise required. Cuts and bruises should receive immediate treatment before the parts become swollen, which can only be done when Pain Balm is kept at hand. A sore throat may be cured before it becomes serious. A troublesome corn may be removed by applying it twice a day for a week or two. A lame back may be cured and several days of valuable time saved or a pain in the side or chest relieved without paying a doctor bill. Procure a 50 cent bottle at once and you will never regret it. For sale by Oakland druggists.

Ripans Tabules relieve headache.

HERE AND ELSEWHERE.

Subscribers or readers having friends visiting them or acquaintances visiting other places will please make note of the list and send to THE REPUBLICAN for publication. Editors.

Messrs. Ira Parsons and James McGrail, of Terra Alta, were Oakland visitors last Saturday evening.

Messrs. Homer Simson, of Oakland, and Luther Bernard, of near Mountain Lake Park, were visiting Mr. Simson's parents at Terra Alta a few days the first part of the week.

Misses Minnie and Ada Leighton were in Oakland Saturday visiting relatives.

Mrs. H. C. Sineell has gone to Wheeling to visit her parents for a week or two.

Mrs. A. G. Sturgiss and little daughter Frances returned Tuesday night from Morgantown where they had been on a visit to relatives.

Mr. Wade Hinebaugh has gone to the Maryland Agricultural College to take a course of study.

Messrs. John Steward, of near Kingwood, and L. Steward, of Easton, W. Va., were the guests of Dr. and Mrs. I. D. Newman recently.

Mr. and Mrs. Isaac I. Thompson will leave this evening for a month's visit to friends and relatives in Iowa and Illinois.

Mr. Ed. P. Anderson spent Sunday with his parents at Newburg.

Mr. William H. Malette was in Wheeling several days last and this week on a visit to friends.

Miss Lizzie Leary, who spent the summer with relatives in the west, returned to Oakland Monday night and will remain here during the winter.

Ex-Senator B. T. Browning was in Baltimore a day or two this week.

Messrs. Jas. H. and Daniel Wilson, of Blaine, were here Tuesday on a business trip.

Mr. Charles E. Millery, of Gormania, was an Oakland visitor Tuesday.

Mr. Frank Legge, of Shepherdstown, W. Va., was visiting his brother Mr. George W. Legge in Oakland several days recently.

Mr. M. C. Feather, of Kingwood, W. V., was here Tuesday on business.

Miss Mattie Porter left last Thursday for Elkins, W. Va., where she goes to attend the teachers' examination.

Mr. and Mrs. George A. Walls, of Kingwood, are here this week visiting Mr. and Mrs. Robert Felty.

Mr. Samuel E. Boyer went to Accident Monday morning and returned Tuesday.

Mr. J. W. Ervin, of Elkins, is on a visit to his parents near town.

Hon. A. F. George, of Swanton, was an Oakland visitor Monday for a short time.

Mr. Eli McMillan, of Accident, was here for a short time Saturday.

Mr. James Arnold, of Wilson, was in to see us last Friday.

Mr. and Mrs. W. O. Posten, of Terra Alta, were the guests of Mr. and Mrs. Scott T. Jones Sunday.

Mr. E. H. Bartlett has gone to Baltimore to enter the Maryland School of Pharmacy as a student.

Mr. Ross McComas, of Baltimore, who has been here several weeks as the guest of Dr. and Mrs. H. W. McComas, returned to his home Sunday night.

Cashier Scott T. Jones will leave to-day for Nebraska on a business and pleasure trip extending over two weeks.

Rev. John M. Davis has gone to New York City to attend the annual meeting of the local preachers of the United States. This body may meet at Mountain Lake Park next summer.

Messrs. Perry Kimmell and Perry W. Rock started for Sherwood, O., Monday morning where they will remain for a week or two visiting friends.

Mrs. John Yellow returned to Oakland Monday afternoon from a visit to friends in the east.

Mrs. George O. Miller, who was

visiting relatives in Montgomery county, returned to Oakland Monday afternoon.

Rev. Ernest R. McCauley took his departure for Gettysburg, Pa., Monday morning where he will finish his theological course of study. Mr. McCauley made many friends during his sojourn in Oakland.

Cardinal Gibbons at Oakland.

Cardinal Gibbons confirmed a class of twenty-eight at St. Peter's Roman Catholic church on Friday last. The services were very impressive. Father Weider, of Westernport, said the mass and Father Gibbons, of Cumberland, assisted in the confirmation ceremonies. His Eminence delivered an address to the class which was full of wisdom and practical advice. His theme was thankfulness to Almighty God.

He said: "It is incumbent upon all men, especially Christians, to give thanks to God. St. Paul in all his epistles, either at the beginning or the end exhorted those to whom he wrote to give thanks to God. A great many people live as if God were under obligations to them while they are under obligations to Him for everything they have. Wash out the dirt of life and then speak eloquently of life and its possibilities, showing clearly what the great blessing of life is to them. In the second place we should give thanks to God for preserving our lives. He characterized afflictions and vexations as the raw material of spiritual life and said we should give thanks to God for them. In the fourth place we should give thanks for the spiritual blessings we enjoy as Christians. Plato gave thanks for two blessings one was that he was born in civilized Greece and the other was that he had served as his teacher. We should be thankful that we live in the civilization of the United States and have Christ who is the wisdom and power of God for our teacher. The speaker then dwelt at length upon the great blessings we enjoy as citizens of this grand republic. This part of the address was full of patriotism and made a deep impression upon the large audience present.

After the services the Cardinal held a reception at the pastoral residence where a great crowd of people called on him. Many Protestants called to pay their respects to the distinguished prelate. The great Cardinal, as he is affectionately called, is greatly beloved by the people here, and he numbers among his friends many Protestants.

Father Weider, of Westernport, also made a very favorable impression upon our people and is greatly beloved by Protestants as well as Catholics. He is certainly a very lovable man.

Cardinal Gibbons in Baltimore. Cardinal Gibbons returned to Baltimore last night from a visitation to Catholic churches in Western Maryland. During his trip the Cardinal preached from two to three sermons a day and confirmed 1,013 persons.

He left Baltimore Friday, September 21, for this city, where he confirmed a class of 153 persons in St. Patrick's church and a class of 173 persons in St. Peter and Paul's church. From here he went to Mt. Savage, where he confirmed 70 persons. Then he visited Lonaconing and confirmed a class of 158 persons, going from there to Barton where he confirmed 90.

At Westernport he confirmed 142, at Oakland 28, and at Frostburg 173. Monday morning he visited the church at Orleans, this county and confirmed a class of 20, and the afternoon of the same day he confirmed a class of 24 at Hancock. He went to Clear Spring yesterday morning where he confirmed a class of 5 and took a train for the Western Maryland railroad for Baltimore, his home—Cumberland Times.

For Sale.

The undersigned offers for sale, wholly or in part, his farm of 75 acres, adjoining Monte Vista, near Oakland. For terms and particulars call on or address

A HORRIBLE ACCIDENT.

Mr. Henry A. Rasche Almost Instantly Killed.

On last Friday afternoon about half-past four o'clock as Mr. Henry A. Rasche was engaged in making some repairs to the boiler in his flouring mill in Oakland the ladder on which he was standing gave way and precipitated him on top of the engine which was running at the time under a full head of steam. The crank shaft of the engine caught his right arm and drew him into the frame of the machine, crushing the arm almost out of semblance and otherwise injuring him that he lived but a few moments after the accident occurred.

Mr. John Baker, a farmer, who was standing in the engine house at the time of the accident, caught Mr. Rasche and pulled him out of the engine. He was able to walk to the door, with the assistance of Mr. Baker, but there was overcome and died before medical aid could be summoned, although Drs. McComas and Hinebaugh were present in less than five minutes from the time Mr. Rasche fell.

Mrs. Rasche and her children were in Pittsburgh, but were summoned by telegraph and arrived here Saturday morning.

The funeral of Mr. Rasche occurred Tuesday morning from St. Peter's Catholic church, of which he was a devout member, the interment being made in the Catholic cemetery here. The funeral discourse was delivered by Rev. Father Stanton, of Lonaconing.

The deceased gentleman was about sixty years of age and an honorable upright citizen, greatly loved by those who knew him and his loss will be severely felt by his family and a large circle of friends.

Dead Letter List.

List of mail matter remaining unclaimed in the postoffice at Oakland, Garrett county, Maryland, for the week ending October 6th, 1894, the parties addressed being unknown to the postmaster.

Joe Rosenthal—2, W. H. Gouverman, Mr. Goss, John Boyce, Frank Nethken, Charles Fackin, G. W. Steekman, James Sauer, H. B. Steward, Leonard Scheil, Jack Slone, J. E. TWO AMBITIONS.

A Brief Tale of Life at a Frontier Army Post.

The chief and first tendency of the army, individually and collectively, is to love all new arrivals, the second and lasting one is to pick them to pieces and to hew about them.

We loved Miss Rohan with true Christian spirit when she first came to the fort. It being the headquarters of the regiment, and we having a band at our disposal, we gave her a second upon the night of her entrance upon military soil. The style of the serenade was largely in what our colonel called "a minor," being his way of expressing "ultra classic." The programme had been arranged before we had had the pleasure of seeing Miss Rohan, and when we realized how entirely it was unsuited to her style, there was no time to change.

We called on her in a body the night of the day that she came, which is the delightfully barbarous custom at military posts. Like a lot of savages crowding about a newly-arrived minor who brings news of the outside world, it meant well. Most of the inane and annoying things that we do in the social life of a frontier post, which is their only excuse. Nobody stops to think that the travel-stained wanderer would like to ride to his seat of the rubbed-in coal soot and the alkali powder of the plains that she would like the first impression to be a favorable one.

We sat within the tawdry little parlour while the band played symphonies and aulantes under the window, and we watched the drop of new blood in our stagnant veins. It was not blue blood in the least; it was hearty and red and strong; but it was the better appreciated at that account.

We were four, the bachelor officers—I mean in the room, and one of us was undoubtedly doomed to become the prey of this young person. Which of us heaven had set its mark upon? I mean in the room, and one of us was undoubtedly doomed to become the prey of this young person. Which of us heaven had set its mark upon?

Miss Rohan smiled on all alike. It was a generous smile which showed the steps of teeth rather heavily upholstered in gold. They suggested that she had eaten a good deal of taffy and pickled limes in her very youthful days. As I see it now, in the light of cool reason, she would have made an ideal milkmaid, for she was plump and fair, her nose was crimson from exposure to the Arizona sun, her hair was an undecided blonde, and her eyes were blue—real Irish blue. Also, seen in the cool light of reason, her gown was more intricate than graceful; she had on a skirt ruffled with the waist—a fact that it seems, among stout women—a very large blouse, if that is the name for it, falling from the shoulder and sleeves, which were simply huge. She was very much lazed, too, which may have had something to do with her Irish skin. Her legs were short and broad and ended in red slippers. As for her hands, they were dumpy, and the tips of her fingers were square. I learned afterward that her hands were her pride. She would sit on the front porch every morning at breakfast, and I maintained them. There was no hesitation in her manner nor in her voice; in fact, she spoke loudly and not always quite grammatically.

Then I looked at my three companions. There was Blake, who was tall, fair and handsome—the kind of man that women fall head over ears in love with, who stood and looked deep into their eyes as if he read therein the story of his life. He was the son of a New England farmer, of the kind called "good, plain people," and he was about as manly and wholesome as a fellow as the cavalry held.

Then there was Thomas, who was small and trim. He had enough conceit for a much bigger man, but, then, conceit is usually a reverse ratio to a man's proportions. He was of the cavalry, too, and he rode the largest horse in the garrison. As to his ancestors, they were Philadelphians, and he felt one to be, of the good old Quaker stock.

Also there was Bayard. Now, he was what any man with his name should be—we all knew the old name. And he was so blue-blooded; his people were the very best that the United States affords. His mother—stern, refined, high-souled old lady—was dead and had left to him her diamonds for his future wife. It did not even occur to her that he would marry beneath her rank, and she gave him no death-bed warnings. His father, a tall and stately old general, with huge white mustache and a fondness for good wines, still lived in Washington, where he sat in the war department all day and at the Army and Navy club all night.

Now Bayard had not much beauty of feature, but he was well-built and refined to the last degree. His ambition was something unbounded; he was regimental adjutant now, and could have had almost any detail or appointment he chose to ask for. There was for him no aim; to rise as high as an officer may. He would have graced any rank, too, better than a good many others.

For myself, I need no description. I was out of the race from the first. I had a Welsh rabbit and could have before we left. Miss Rohan liked beer, but I think she was disappointed in the rabbit.

She came upon the porch the next morning to see guard-mounting, and she brought her manure-set with her. If you can get used to it, a woman really looks fascinating when she sits before the world in broad daylight and "does" her nails, more especially if you happen to be one of several lone bachelors who have not looked on the face of a young woman for six months.

After guard-mounting, she went for a ride with Blake and Bayard. She sat her horse splendidly, although she did hold the reins in both hands; but that was a habit she had picked up from riding hard-mouthed cart-horses, and she explained. Blake and Bayard

took luncheon with her. We sat by and betted on the outcome.

In honor of the young lady's arrival we had a hop that night. It was quite an affair—twenty couples in all, some of the best people from the neighboring railroad town having driven over. We promptly discovered that Miss Rohan could not dance; at least, her way was not our way. She went around in a circle, which was enough to make even a soldier's head swing, but then she took it so cheerfully and so sweetly when she stopped, on our patient-leather pumps, and informed us so honestly that she "guessed she never had been much at dancing," that we were only too anxious to assure her that she was a perfect fairy. In course of time she came to believe that she was, and she had no fault to find with us. She had one fault, which was delightful; it was so old-fashioned and quaint, she said: "Yes!" and "No!" "Yes!" and "No!" always. Capt. Grant said it was like a servant girl, but then he had just been on leave and was engaged to an eastern girl.

We thought she was a very good company, and so did the garrison children. They took a violent fancy to her. She played tag and prisoner's base with them; she climbed fences and wood-piles; she sat on the top of the barns; and she rode barebacked horses around the post. And then she was such a thoroughly good-hearted girl, generous to the last degree, and such a cook!

For a long time Bayard and Blake divided the honors. Miss Rohan and fate smiled on both equally. But Miss Rohan was a girl with considerable natural tendency to sin; and, in spite of her married sister had an eye to the main chance. If there was one thing more than another that she hoped for, it was to see the girl Kate Bayard.

Here is the case stated plainly: Given a blond, sweet, twenty-year-old girl, who has not had any of it for at least a year—that is, not any young feminine society given also two women, one of them married and determined, the other unmarried and not determined. It means that the young woman to see the natural outcome. Had Bayard, just then, had one redeeming womanly influence, had he broken away for a month and gone back among his equals, or had one of his equals come to him he would have been saved. As it was, he was left alone with his ambition and this girl.

He fell in love; therefore he lost his reasoning powers, otherwise he would have been bound to see that this woman and ambition could not both be in his life. He fell in love, and he married her then and there. She wore diamonds of the stately old mother, as she sat on the porch at guard-mounting with her manure-set.

The first intimation we had of the way the wind blew in that family was when the young Mrs. Bayard sat one day on the front steps and read a copy of "Don't," which she told us the "my husband" had bought for her. She was very much pleased with the gift, and took much pleasure in reading it. We noticed after that that she was most careful about breaking, biting, and cutting her food at breakfast and luncheon, but "Don't" evidently did not include any reference to manure-sets. I think Bayard told her about them, though, after a time for she ceased making her appearance in public with it, but she bit her nails nervously.

When I went away to leave about this time, when I came back, there was a little Bayard, which promised to look very like its mamma. There had been a great quarrel as to the naming of the child. There were a good many quarrels now, anyway. Mrs. Bayard had liked the name of Kathleen, she said it was her mother's name, and, for my part, it seemed that it was very musical and pretty—but the father was determined upon Beatrice, with the accent on the second syllable. The child was baptized Kathleen.

When I had gone on my leave, Bayard had begged me to give my attention and what personal influence I had to his promotion as captain and commissary at Washington. He wanted it even worse than he did a foreign attachéship.

I saw the turn affairs had taken—that man was growing stouter, uglier, and uglier; that she neglected even the manure-set for the very noisy and unprepossessing baby; that poor Bayard's spick-and-span clothing and appearance were a thing of the past; that he looked worn and did not seem to feel at ease among his brother officers. So I carried to him some encouraging news with regard to his erstwhile desired appointment. I told him that I knew it to be a sure thing; that the enviable post in Washington would soon be his; that ere long he would again be in his native land.

An anxious look came into his fine brown eyes. He shrunk back as his wife and the baby came into the room. For an instant his glance rested on them.

"Thank you, old fellow," he said. "I think I shall be content to pass the rest of my life on the frontier, far from the maddening crowd, you know," he added, with a choking laugh.

Poor Bayard! And this was the end. But I knew he was right; and I went away, leaving him with his future and with his wife—excellent old creature, in San Francisco, Argonaut.

When He Came from Heaven. A little boy was looking at the stars. They seemed a long way off.

"Mamma," he said, "is Heaven up there?"

"Yes, dear."

"Did I come from Heaven?"

"Yes."

"The little boy looked up again at the stars."

"Mamma," he said, "did God let me down easy?"—N. Y. Sun.

Dr. Saito owed his reputation to his wife. She was very positive in character, and insisted that he should keep at work and make a living for his family. He did so, and, besides that, made his fame at the same time.

NORTH POLE PROBLEMS.

he Vast Ice Region of the Arctic Zone Not Yet Penetrated.

It is a curious fact that the most cheerless portion of our globe and the region that is most awful in its desolation has for generations been the center of a most absorbing interest. The region that is the most remote from civilization and has the least to benefit mankind has presented a weird fascination to explorers, that the long unbroken line of failures has not been able to diminish. This is the great zone or belt that constitutes the vast northern circumpolar region, and which, after defying nearly four centuries of exploring endeavor, still guards its solemn secrets with grim and unbroken vigilance. A more cat-dog of the public and private expeditions that have been fitted out to penetrate this strange realm would fill pages. But whether they went forth in quiet or with the zeal born of heroic daring and endurance, or set forth with the pride and pomp of an armada, not one of the multitude has found its quest.

Now, in brief, what are the general physical conditions, what are these insurmountable impediments that have so successfully barred all penetration to this absolutely unknown region, around the pole? It is, of course, the fact that the polar points are so far from the reason that they are the focal points in the earth's rotation, and as our revolving globe presents its equatorial line to the sun, these polar points thereby necessarily are in regions most remote from the solar heat. Hence it is that in the districts of these polar points are the coldest of the low temperature of the globe finds its maximum, while the equatorial belt presents the maximum of high temperature. Now, as it happens, the polar point under consideration is in the midst of a sea; at least, so far as we know, this is the case. Singularly enough this polar basin is pretty well land-locked, the great northern land divisions of Europe, Asia, North America, and Greenland all abutting against it. It is, in fact, a sea, a solid, circular mass, of course, of this polar matter would be of much more simple solution. But there are great gaps of water that connect the Arctic ocean with both the Atlantic and Pacific basins, and we shall see how this great physical fact bears on and hampers navigation.

The chief obstacle to something of what may be termed the hydrography of the earth's meteorology will know that, owing to unequal temperature, there are great circulating currents in the ocean, caused primarily by the unequal heated seas, or parts of seas, seeking the equator. These currents also involve the Arctic ocean, and now we shall see the action of the great factor, low temperature. When the sun is low in the southern heavens, and the freezing line extends down toward the equator 55 degrees of latitude, there is then a bright circle over the pole, and the sun is in the sky, with the north pole as its center and closest point.

Of course, a tremendous conglomeration takes place, but when the sun resumes its northern journey the circle of high temperature is shoved poleward until the area that does not lose its heat is several miles in diameter. In this area there is something of a summer—more than the mere sun conditions would warrant. The matter is still considering. While the sun is still near the horizon, for months it does not sink below it, and thus the solar condition of warmth is considerable. But there is a belt of summer temperature all around this axial region, and come the currents from whence they may, they can come only from the south. There is a limit to north and south, but there is no limit to east and west, and thus it is, when the summer belt is crowded far northward, that all the following freezes are warm, that is, coming from a southern quarter, while all outgoing freezes must bear away some of the stock of lower temperature.

But this now loosens vast areas of ice. Caught on a shelf, the waters from the melting masses fall over precipices and pack ice, icebergs and fields of floating ice, large and small, all eroded and crushed, grind and break, as the currents bear them out toward other seas.

Long before this floating ice has had time to be transported the brief summer ends; the sun goes on his return journey, and the crushing ice heaved into all kinds of fantastic shapes known as hummocks, is locked; rains and snows add to it, and, though soon solid enough to bear the weight of armies, there is nothing more tiresome on earth than to journey over it. Some of the polar circles are comparatively mild, as a few years ago whalers went far in the ice flow being light, and found whales in immense numbers in scoured nooks in the arctic waters.

The worst feature is the uncertainty. What to-day may seem to be permanent ice, tomorrow may be floating and breaking into fragments, where last year was clear and seemed like the "open polar sea," this year may remain closed, and vice versa. There is probably no such thing as a permanently open sea, as not a single thing in physics warrants any such assumption.

But is there no land in this Arctic sea? There is no direct, but very good collateral evidence that there is. Millions of water fowl and land birds go poleward with the approach of the arctic summer, and it is certain that they do not journey to where there is no subsistence. Foxes, bears and musk oxen abound, and an ocean fauna exists in immense numbers. But there is still an area of 1,000 miles in diameter of which nothing is known, and of 2,000 miles in diameter of which but very little is known.

Now, as to journeying over these hummocks. These may vary in height from a few feet to fifty feet, may be close together or have level patches between; the interstices may be sound, filled, or be pools of water, depending on temperature; and in any case, to traverse them is tedious and laborious to a degree that can hardly be realized. How is a one-hundred-mile journey to

be made under such conditions, reckoning also the return, where one mile may be more than fifty yards of shore, and keeping in mind the fact that, while the outward journey may be on the stationary surface, the return may be in the midst of grinding floes and pack ice? The explorers may go forward to find themselves in a cul de sac with further advances barred entirely. All the denouement previous ice formations. At one time a locality may be clear, at another time seriously obstructed, and at another time seriously obstructed what is to be encountered. It is like piloting on the Missouri, where the channel must be learned each year, but the summer season is too short to overcome a title of the obstacles.

By water? This has been tried. Is navigation practicable even on the diminutive Ohio when the channel is full of floating ice? There are tempting and inviting openings between the floes of ice, but when these are reached each other not a vessel on the earth would have any more show than a chicken coop.

On that Arctic sea not once in a score of years is there a time when ice is not on the move from the spring melt caught on the floor by the next winter. And yet there are frogs and fowl innumerable; the latter, of course, mostly have when the rigorous season comes, and the former hibernation and hibernation prevent freezing. As the creatures breed in that insurmountable, so all who defies man. Now comes the question, how is the advance to be made with such an environment, what motive power other than dogs is available and how are subsistence and the necessary equipment to meet whatever may present to be carried? This constitutes the problem.

It is unfortunate that this polar point is not on absolute terra firma. It is this shifting, varying, changing and capricious foundation that causes the mischief and presents the difficulties that have been found insurmountable. And what have we if we have found the polar point? Smooth water, probably, at one time, pack ice or hummocks at another. The place cannot be marked with buoys, even were there a way of finding it. So the polar problem is no nearer a solution now than when midwinter frosts and blizzards and Gills, more than three centuries ago—Pittsburg Dispatch.

HUMAN SACRIFICES IN RUSSIA.
Vain Attempts to Abolish the Practice.
Revelations of a Secretary.

It is probably known to few people that the practice of sacrificing human lives under certain conditions still exists in parts of the empire of Russia. The government and the orthodox church have attempted in vain to stop the inhuman practice, but up to the present time they have been unsuccessful. Revelations regarding the custom were made in recent issues of the Gazette of Yakutsk, Siberia. It prevails among a sect known as "Tshuk-shon," not far from that city. Old people, beyond the Biblical limit as to age, and sick ones, tired of life, offer themselves as sacrifices. When a "Tshuk-shon" decides to "offer himself up," he sends word to all his relatives, friends and neighbors, who then visit him and try to persuade him to change his intentions.

But prayers, upbraidings, threats, are useless in such a case, and the fanatic prepares for his end. The friends and relatives leave his house and return in ten to fifteen days, bringing the death candidate white clothing and other necessities, with which he is supposed to defend himself in the other world against evil spirits and shoot rebound.

After completing his death toilet the candidate takes his place in a corner of his house or hut. About him gather his relatives, who offer him the choice of three instruments of death: a knife, a spear and a rope. If he chooses the knife, two friends hold his arm while a third plunges the blade into his breast. Practically the same thing is done if he decides to die by the spear. When he prefers the rope, two of those present place it about his neck and a stranger him to death. A cut is then made in the breast to let the blood flow out. All those present sprinkle their faces and hands with the blood, believing that it will preserve them from evil and bring them fortune.

The body, after this ceremony, is placed on a bed which is drawn by a reindeer to the "cremation hill," near the village. The neck of the animal is cut at once upon arrival at the place. The body is stripped of clothing, which is then cut in small pieces and placed on the altar with the dead man or woman. During the cremation and strange "songs" after prayers to the spirits, begging them to watch over those mortals still left on earth. This custom has been followed by the sect for centuries.—N. Y. Tribune.

Russian Horse Music.

From authentic records concerning the country of the czar we find account of an absorbing and pleasing entertainment, one demanding, doubtless, more genius and earnest application than absolute expense in money. It is a purely opportunity of enjoyment to the many, and is, as well, of a refining and elevating nature. The only instruments are horns, and even produce but one tone. The horns vary like the pipes of an organ. One of them sounds only every C, another only every D, and so throughout the tune. Each player is so correctly trained that whenever his instrument must speak, it is given with the greatest accuracy, and the tones of the different instruments sound as if from a single one. The players, usually seers, receive very careful training, and the works of Haydn, Mozart, and other distinguished composers, are executed with taste and skill. This pleasing style of band entertainment was invented by Nariskhin. Since his time there has been great improvement in the construction and capabilities of the instrument and skillfulness of treatment. Nearly a hundred and fifty years ago, at a great festival in Moscow, a band of twenty horns met with great applause.—Harper's Bazar.

BICYCLING EPISODE IN RURAL ENGLAND.
FAIR CYCLIST—Can you tell me the way to Wareham, please?
HONEST FARMER—Well, missie, I guess you know the way to wear 'em much better nor me.—London Sketch.

A Great Preponderance.
Tom DeWitt—1875 must have been a great year for girls.

Kitty Winslow—I don't see—
Tom DeWitt—Oh! I was merely wondering how it happened so many more girls were born that year than any other.

Kitty Winslow—How do you know there were?
Tom DeWitt—Why, every girl I have met this summer has been just sixteen.—Life.

TAFFY—FRESH EVERY HOUR.

"The man with a pull."—Chicago Record.

A Chance to Show It.
Mrs. McBride—Before we were married you often wished there was some brave deed you could do for me to show your love.

Mr. McBride—Yes, dear, and I would do it now.
Mrs. McBride—Then, love, go down in the kitchen and discharge Bridget.—Harlem Life.

Good Grounds for Prophecy.
Van Sharp—I hear Gussie Hardluck is very ill. How is he getting on, doctor?

Dr. Pillsbury—I don't think he will live a month.
Van Sharp—Who is attending him?

Dr. Pillsbury (with some hesitation)—I am.—Town Topics.

No Other Evidence Needed.
"Yes," said the young physician with pardonable pride, "my practice is among the best people of the city. Almost every family on my list has a burial lot in the most fashionable cemetery in the neighborhood."—Chicago Tribune.

An Emergency Call.
Mrs. Toots—I wish you would go for a doctor. Mr. Toots is very bad to-night.

Banxes—What doctor shall I get?
Mrs. Toots—Any one will do, and if you can't find one, bring a snake-charmer.—N. Y. World.

Talent Well Applied.
"Miss Economy will make some fellow a good wife."
"What makes you think so?"
"She can make up and wear five-cent goods so that it looks like it cost a dollar a yard."—Cincinnati Tribune.

ANOTHER DOSS COCKER.

Then the Weeds Wilted.
A year she wore her widow's weeds in quietude, until at last the proper man, who knew life's needs, said "Wilt thou?" Then they wilted fast.—Index.

How He Knew.
"How did you discover she was a woman masquerading as a man?"
"She sent me a letter with two postscripts."—Yankee Blade.

A Strong Reason.
She was having a confidential chat with her aunt.

"I can never marry Harry Westlock," she said in a tone which implied that it was useless to talk about it. "I never can."

"And why can't you?" asked the aunt. "I'm sure I should think any girl would esteem it an honor to be Harry Westlock's wife. He is very wealthy, too. Why can't you marry him?"

"Because he hasn't asked me to, and I know he never will."—Alex Sweet, in Texas Siftings.

Applying a Sure Test.
"Mr. Dinguss," said the young man, twirling his hat nervously. "I have called to ask you for your daughter Phoebe. I am not rich, but I have good business prospects, and—"

"Young man," interrupted the parent, eyeing him keenly, "before we discuss this matter further will you oblige me with a loan of five dollars?"
"I will not, sir," replied the youth, grimly.

"Then take her, my boy," said Mr. Dinguss. "You've got more sense than I thought you had."—Chicago Tribune.

Her Prayer Answered.
Miss Jackson—Do you believe in prayer, Mrs. Johnson?

Mrs. Johnson—Surely, Miss Jackson. Dar was only last week an' not a ting in de house, an' I got right down on pray'ed, an' in less'n ten minutes it comes my son Aba wid a ham from Spire Barker's smoke-house, an' Sam wid a chicken from Spire Ketchim's coop, an' Mose wid a bar'l o' flour dat de storekeeper fogot to took in when he locked up fo' de night. Whad you want is faith, child.—Judge.

PAYING FOR BAD NEWS.

Visitor—Can you tell me where Mr. Greenhorn's cottage is?
Country Youth—I can for a nickel.
Visitor—Here it is; now where is it?
Country Youth—It's burnt down.—Harper's Bazar.

Meteorological Item.
Mr. Westerner—Beautiful climate we've got out west. Did you see that sunset last night?

New Yorker—Yes, I saw it.
Mr. Westerner—Did you ever see a finer sunset in the east?
New Yorker—No; the sun never sets in the east.—Alex Sweet, in Texas Siftings.

Disinterested Advice.

Prof. Van Note—You wish to learn to play de cornet, eh? Vy not dake de mandolin first?

Youth—I like the cornet better.
"Yah, may be so, but you vas not strong enough to learn de cornet."
"I can manage it easily."
"Yah, may be, but gah von manage de neighbors?"—Good News.

A Great Improvement.

She—Papa is going to have electricity put in the house?

He—Dear me! You can't turn that down.
She—No; but you can turn it out.—Brooklyn Life.

Know from Experience.
Schoolmaster (to class in political economy)—What is the hardest tax to raise?

Boy (whose mother is house-cleaning)—Carpet taxes, sir.—Answers.

Anthropological.

Professor—Look at this skull, gentlemen; now tell me, to what human being did this belong?

Smart Student—To a corpse, sir.—Truth.

note, registered letter or bank draft will be at
our risk, if made otherwise, at the risk of the
sender. Address: THE REPUBLICAN,
Baltimore, Md.

THURSDAY, OCT. 4, 1894.

REPUBLICAN NOMINATION.

FOR CONGRESS:

GEORGE L. WELLINGTON,
OF ALLEGANY COUNTY.

MR. WILLIAMS is riding the trust
hobby at a fearful rate of speed.
As he is a member of the party
behind the sugar trust, the greatest
curse to the American people ever
inaugurated, the masses will not
place any confidence in his utterances
but will vote for George L.
Wellington, the people's candidate
and the friend of the people.

Connecticut Chorus.

The election held in Connecticut
shows unprecedented gains for the
Republicans. Towns that have not
elected Republican officers for years
went Republican by good majorities.
Cleveland carried this State
by 5,370 majority, and it is quite
probable that the official count will
show about this figure the other
way, in addition to thousands who
show their discontent with Congress-
sional doings by staying away from
the polls. Connecticut is an in-
dustrial State, where it was suppos-
able that free wool might have
attracted votes, but such appears
not to have been the case.

MR. WILLIAMS said at the Deer
Park Democratic meeting on Mon-
day night that the farmers of Gar-
rett county should be glad that the
bounty on maple sugar had been
abolished.

He might have said with the
same degree of consistency that the
farmers of the county should labor
the year around and then at har-
vest haul their products to town
and distribute them free of charge.

The Democrat had made the
assertion that times are getting
better.

Yes! "The times are getting bet-
ter!"

If you don't believe it ask the
factory boys and girls if work is
more constant with better pay than
under the McKinley law.

Ask the merchant if he is selling
more goods for cash.

Ask the professional man if
money is as easily made and col-
lected as heretofore.

Ask the workman, as he goes
to his daily toil carrying his much-
talked of "dinner pail" if he is get-
ting more work and better pay than
he did under Republican rule.

Ask the mechanic if his wages
have been increased and work be-
come more plentiful under the
Democratic dynasty.

Ask the coal miner as he delves
in the bowels of the earth for "black
diamonds" after a long strike and
at reduced wages and mark his
answer!

Ask the housewife as she makes

her preserves and sweetens her tea,
how much sugar has come down
under the Gorman law.

Ask—even the old bum, as he
puts himself outside the contents of
his pint flask, if he gets two drinks
for the price of one, with a "free
lunch" thrown in.

But if you want an *emphatic*
answer with superfluous adjectives
—sometimes having a sulphurous
odor—just

Ask the farmer as he is on his
way to town having in his wagon
the wool of last spring's clip, which
he has been holding for an increased
price under the Gorman law, and
get his opinion of "the good times"
and of the *men* who have made
them good.

After you have collected the op-
inions of these people you will vote
for Wellington and Protection to
American—not English industries.

The Reduction of the Tariff.

A great many Democratic jour-
nals have been boasting of the
reduction of duty made in the new
tariff law, but so far none of them
have given the figures or the list of
articles upon which the duty has
been reduced.

Now let us see what constitutes
their boasted reductions of duties:

On the basis of importations last
year they have reduced the tariff on
leaf tobacco and Havana cigars
\$1,432,012.

On liquors they have reduced
duties more than \$232,950. The
duty on brandy, for example, is re-
duced from \$2.50 per gallon under
the law of 1890 to \$1.80 under the
new tariff law.

On laces and embroideries they
have reduced the duties based upon
the importations of last year \$1,
337,800.

On silk goods, plush, velvets,
etc., \$2,720,605.

On ostrich feathers and flowers,
\$255,330.

On kid gloves, \$875,000.

On chinaware, \$2,229,987.

On paintings and statuary, \$432,
657.

On pearl buttons, \$224,000.

On plate and cut glass, \$215,667.

On opium for smoking, \$400,073.

On jewelry, \$76,000.

How the reduced tariff on these
articles will relieve the poor man!

What a relief these changes will
bring him! Every one is an article
of luxury. Not one has any place
in the list of necessities. All are
articles that are chiefly used by the
opulent and wealthy, the best con-
ditioned of our country.

Yet these reductions had to be
made to give the Democratic Con-
gress an excuse for putting a duty
on sugar, a necessity to every house-
hold in the land, that they might
enrich the trust already fattened,
as they allege, by its ill-gotten
gains.

What comfort will it bring
to the average American home, the
modest residence of the great
masses of the people, to be told that
the duties have been reduced on
laces, silks, Havana cigars, cut
glass, jewelry, ostrich feathers, vel-
vets, liquors and opium? But such
is the compensation the American
people get for the added burden of
a cent and one-half or more upon
every pound of sugar they con-
sume.

Sugar Legislation.

Senator Allison opened the Re-
publican campaign in Iowa at Tip-
ton, after being introduced as a
presidential possibility. His speech
was devoted largely to the sugar
question. "The legislation of 1890,
respecting sugar," he said, "com-
prehended three things—cheap
sugar to the people, the develop-
ment of this industry in our own
country, and during the process of
this development, which in the
nature of things would require a
good many years, proposed to secure
and did secure reciprocal benefi-
cial trade arrangements with sugar
producing countries. The legisla-
tion of 1894 proposes dear and taxed
sugar, destroys all hope of develop-
ing the industry during its contin-
uance, and voluntarily surrenders
all the great advantages secured by
means of reciprocal trade arrange-
ments under President Harrison's
administration.

"The Sugar Trust poured sugar
into the country with an avalanche,

so that it might reap the profit
of the lately increased price of sugar.
Whisky came out of bond in pro-
fusion to fill the pockets of the
whisky combine. The President
held the bill ten days and two sun-
days, and the speculation went on.
Then the President approved the
bill by refusing to veto it, and then
it became a law at last. Are these
the reformers to whom you are to
pin your faith in November in the
hope that in the sweet by and by
something will happen? A man
must be innocent indeed who can
thus be deceived. As burned chil-
dren dread the fire, so will disap-
pointed voters avoid the Democratic
ticket, and cast their fortune and
their votes to promote the pros-
perity of their country, that property
which prevailed before the fatal
day of 1892, when Grover Cleve-
land and a Democratic Congress
were installed in power."

The Wilson Banquet.

A brilliant company of British
merchant princes have duly honored
by a grand dinner the father of the
Tariff law. Some seventy repre-
sentatives of the English business
world expressed thus the gratifica-
tion they feel that "benefits had
already been experienced in Eng-
land, furnaces had been reopened
in Wales and Yorkshire, and an
impetus given to the textile indus-
tries." This sort of welcome,
though strictly true, was not ex-
actly opportune to Mr. Wilson, and
he took good care in response to
give the toast such a turn as would
take off the unpleasant effect it
might have at home. Mr. Wilson
claimed that our protection policy
has already served to promote the
trade of other nations; if continued
would still further promote such
trade, and pre-eminently that of
Great Britain.

Of course this sort of talk dead-
ly pursued would have been a dead
give away to his own side, and
therefore, after a few glittering
generalities, the West Virginia pro-
fessor had to commit the equally
egregious *faux pas* of denouncing
monopolies, trusts, combinations,
etc., entirely forgetful of the fact
that England is par excellence the
cradle and home of commercial and
industrial combinations of all kinds.
The East India, Hudson's Bay and
other corporations were the giant
monopolies of their days, and they
have left behind a host of associa-
tions and corporations all exploit-
ing their fields of operation in bliss-
ful ignorance of their being worthy
of condemnation, censure or criti-
cism.

Prof. Wilson's illusion that we
could "compete for the markets of
the world," in any other way than
that so successfully invented and
followed by the English, must have
raised a smile with the distinguished
company, and this must have turned
into a strong grin when the unfor-
tunate professor floundered into
the astounding admission that "we
are being sobered, though unappal-
led, by the truth forced upon us, that
of all human governments, a free gov-
ernment is the most complex and
difficult, and, judging from the
world's experience, the most uncer-
tain and short-lived."

McKinley's Tour.

KANSAS CITY, Oct. 2.—In his
speech here to-night, among other
things Gov. McKinley said: "We
are already reaping the work of
those who endeavored to tear down
the defenses to home industries.
Mexican ores are just arriving.
Australian wool is coming in by the
carload. Every foreign product
upon which the duty has been re-
duced is flowing in, and each dis-
places so much American product.
When I was here two years ago
some one in the audience wanted my
views on the eight hour question.
The chief issue then was the reduc-
tion of the hours of labor. There
is no trouble of that kind now. It
isn't shorter hours we want, but
longer hours. Senator Vest last
night quoted an old Spanish proverb
as justification for refraining
from throwing dirt upon the Presi-
dent. Yet every leader of the
Democratic party has been throw-
ing dirt upon this breakfast dish of
tariff law."

Throughout his speech he was
cheered to the echo. On leaving
the hall the outside crowd organ-
ized an overflow, which he addressed
for twenty minutes.

"W" IN PHILADELPHIA.

He Writes a Letter From the Quaker
City.

PHILADELPHIA, Sept. 28, 1894.—
The Hon. Wm. L. Wilson was
dined and wined and feted and
patted on the back yesterday by the
British Lion to their hearts content.

It was eminently fitting that the
eminent free trader should retire
awhile after his arduous labors
to rest among the people he has
been working for, who appreciate so
keenly the value of his services and
are so outspoken in his praises.

The British dignitaries dealt
rapturously on the era of good feel-
ing and friendship and the expan-
sion of trade which has already
resulted from the Wilson bill stat-
ing that many manufacturing
establishments had resumed opera-
tions since it had gone into effect;
and from their point of view every-
thing is lovely and the lion and the
lamb are about to lie down together,
and what is best of all from a British
standpoint the lamb will be
inside of the lion.

It is a pity to disturb these rose-
tinted views as entertained by the
banqueters in London yesterday,
but there is another side to this
question, another tale to be told.
There is to be a reckoning by the
American people this fall, and they
are going to have some very con-
spicuous opinions on the stewardship
of Messrs. Cleveland, Wilson & Co.

Back in the wilds of West Vir-
ginia are living today the moss-
backs who for generations have been
voting for Jackson, and who have
dwelt in ecstasy on the words of
Professor Wilson, swearing they
were sweeter than honey and true
as preachin'.

They have read their little one-
hoss county papers and listened to
the eloquence of the county and
larger bosses, always eager and
willing to "believe a lie and be
damned" if it would in any way
redound to the advantage of the
Democratic party. When told that
free wool would cause the price to
advance they believed the lie al-
though none of them could for the
soul of him tell how.

But a new light is dawning; two
years ago these mossbacks got 44
cents per pound for lambs. This
year they can get but 2 cents per
pound for them. Then they got 25
cents per pound for their wool and
now they get but 15 cents for the
outside, then they could sell sheep
for 3 to 3 1/2 cents per pound and
now they can't sell sheep at all, and
the truth is beginning to percolate
through the anatomy of the moss-
backs that they have been cheated,
deceived, lied to and that if this
is the change they have been wanting
they will have no more of it. They
now want to change again more
than they did the first time.

Then again there are hundreds of
men working on the mills in Mr.
Wilson's district who had steady
employment at good wages, and
who now find their wages reduced
and their time reduced and who are
in fact earning not over half as
much money as they did before the
change. Their occupation being
cut off by the competition produced
by the free influx of Canadian lum-
ber.

So it looks like Wm. L. will have
a very rocky road to travel and it
looks now like the Americans pro-
pose to take a hand in things this
fall, and that they mean to run the
government in the interests of the
American people awhile.

Mr. Wilson had better remain
with his friends.

Points Political.

Monday morning's issue of the
Cumberland News contained the
following from its correspondent at
Oakland:

"The Republicans are united,
enthusiastic and aggressive. Gar-
rett county will give Wellington a
very large majority. He will get
the full Republican strength and
quite a number of Democrats. An
old farmer from Grantsville district
who has been a lifelong Democrat,
said yesterday: 'Last year I got
eighty dollars bounty on my maple
sugar, but my Democratic friends
have taken that away from me and
I am going to vote for Wellington.
I am not going to vote against my
own interests.' There are some
other sugar producers in this county
who feel and will vote the same
way. On Friday last I had a talk
with a prominent gentleman in the
presence of the chairman of the
Democratic State central committee
and another prominent Democrat
of Oakland. That gentleman said:
'I am a Democrat and last fall I
worked very hard to elect Judge
Boyd, but this fall I am working
for the election of Wellington. I
think Mr. Williams an excellent
man and well equipped for the
office he seeks, but I want a tariff
on coal and I cannot vote to take
the bread and meat out of the
mouths of my neighbors and their
children. I know Mr. Williams
well and like him very much, but
he stands for a principle which I

can not endorse. I am not working
for Mr. Wellington on personal
grounds, but because he stands for
protection, and I am convinced that
the future welfare of this country
demands a protective tariff.' The
gentleman to whom I refer holds
an influence which means several
hundred votes for Wellington which
were cast for Judge Boyd last fall.
I refer to the above cases because
they came under my own observa-
tion and they pretty clearly indicate
the situation of political matters in
this end of the district."

All on Account of the Tariff.

PARSONS, W. VA., Oct. 2.—All
the coke, coal and lumber compa-
nies in Tucker county have cut the
wages of their employes 20 per cent
on account of the passage of the
Wilson-Gorman tariff bill. The
companies are composed princi-
pally of Democrats. This is in
Congressman Wilson's district.

Garrett County Aroused.

Chamberland News.
A special from Garrett county
advises us of the warm and enthu-
siastic reception Mr. Wellington is
receiving in his canvass of that
county. His progress has been an
ovation. The meetings at Friends-
ville, Saug Run and Sellsport
were largely attended, the party
thoroughly organized and working
with vigor and energy for the large-
est majority ever given in that
county.

The meeting at Accident on the
evening of the 26th was a grand
affair. Senator Ravenscraft pre-
sided. The people of the country
round turned out en masse, regard-
less of politics, and gave Messrs.
Wellington and Scott a rousing re-
ception. At Biddinger on the 27th
Messrs. Wellington and Scott ad-
dressed the largest meeting ever
held at that place. The Republi-
cans are thoroughly organized and
confident of a big majority. At
Grassville in the evening the Re-
publicans had an old fashioned
blow out, presided over by Samuel
Beachy with Dr. Lichty as secretary.
The hall was not large enough to
hold the crowd, many ladies being
in attendance. Mr. Wellington
made a strong and effective speech.
He has always been very popular
in Garrett county, and has made
many friends during this canvass.
Mr. Norman B. Scott who has ac-
companied him through that county
has greatly aided and strengthened
the "good cause." He is an able
and attractive speaker.

Baltimore Centennial Exposition.

Our readers have no doubt seen
mentioned in the papers something
about the Great Exposition which
is to be held in Baltimore during
1897.

It would be well for them to note
that it is a State affair, in which
all the counties are expected to take
part, and be largely represented by
their various industries, and to
show off their different advantages.
And this huge undertaking, al-
though inaugurated by our city
friends, to be a perfect success,
must have the whole-hearted sup-
port of all the people of the State;
so we must be up and doing that we
may show off the State's many at-
tractions in the most thorough way;
also that many of the millions of
people who will visit this great
exposition will come to believe as
every true Marylander always main-
tains. That is, our State is not
only a good place to be born in, or
to die in, but the very best place to
live in.

This Great Big Exposition in
plain words, is to be a great adver-
tisement for our State, and the
rivalry among the different States
in the Union for supremacy is so
great, these exhibitions or adver-
tisements are a necessity.

In the past we have been too
modest. The great west was built
up by showing its advantages to the
people of other sections and foreign
countries. Owing to the fact of
hard climates, low prices for agri-
cultural products, and long distan-
ces from foreign or consuming
markets, the tide of immigration is
changing, and the South is putting
forth many schemes that are
attractive to get new people to its
sections.

Why should not Maryland have
its share of new people also? It
can, if we only let other people
know what we have to offer. The
coming Baltimore Centennial is
our opportunity; let's embrace it.
We are glad to know with each day
its scope broadens, and already
many foreign manufacturers are
enquiring about space for their ex-
hibits, and even foreign govern-
ments, through their ambassadors
and ministers in Washington, are
looking the matter up, so their re-
spective countries may be properly
represented.

It is confidently asserted if the
people of the State put their shoul-
ders to the wheel, work with unity,
and help the project along, that in
1897 our visitors, who will come
from every country in the world

will see an exposition only second
to the World's Fair, held last year
in Chicago. The people coming
will have to be fed; they will con-
sume a great deal. We in the
country districts must supply the
food. Baltimore is our natural
market, therefore the direct results
in cash from the Baltimore Centen-
nial can be counted in millions.

From Florida.

To the Editor of the Republican.

It is quite right, I presume, that
every loyal citizen of this grand
country, at the turning point in the
political and commercial tide,
should take a hopeful and cheering
view of the future. Certainly
crocking, and dark prophesying
will not bring the country out of
the shadows that have hung over
every branch of industry, and every
governmental scheme, so long and
so densely. Yet though I feel the
importance of taking a hopeful
view of the future, I am bound to
confess that to me there seems very
little clear ground in any direction
whereto to build inspiring hope.
More especially do I fail to find a
cheerful outlook for that great host
whose task is sowing and reaping
the nation's bread. Many other
branches of industry are already
feeling, and will more and more
continue to feel the stimulus im-
parted by a settled administrative
policy; but there is that, I fear, in
the policy settled upon, which will
necessarily make agricultural pros-
perity on a general scale an impos-
sibility for years to come in this
country. I question whether in a
single state of the Union one could
find ten farmers in any selected
hundred willing to-day to say that
they are prosperous. And of all
classes, this one, more than any
other, should enjoy the content-
ment resulting from a reasonable
measure of prosperity. Rest-
lessness and discontent on the farm
will, of necessity, beget a like feel-
ing in the mill, the mine, the shop
and everywhere. In this I think I
am quite right, and these observa-
tions prepare the way for a few
things that I want to say to some
farmer-friends who read *The Re-
publican*. I want once more to
urge some of these people to come
and make their home in Florida.

Now let me say this: I am in no
sense a land agent, neither have I
any land of my own to sell. I do
want neighbors from the north; so
much I freely own, but much more
I desire to see some of these good
friends so situated as to enjoy a
more comfortable, because a less
harried and toilsome life. I spent
a couple of months among farmer
friends in Pennsylvania a year ago,
and I know how hard life is among
them in these times.

I have already indicated in these
columns how much more simple
and inexpensive the commoner
mode (and the natural) of living in
this country is. And now, in order
that anyone desiring to consider
the matter of coming south, may
understand the case plainly, I will
write down plainly and truthfully
the facts concerning a sixty-acre
lot in my immediate neighborhood,
and that I am myself cultivating
this year. This lot, good ground,
half clear and fenced, with build-
ings that could be occupied yet for
a year or two, and an abundance of
orange timber; with 250
good trees, 40 of which are of
bearing age, some having fruit
upon them now; six miles from
railroad station and one mile from
postoffice, store, mill, school and
church—this lot could be bought
to-morrow for three hundred and
fifty dollars-cash. The outfit for
the place—it is a one-horse place—
would cost, horse, wagon, harness
and plows, with five cows, one
hundred and fifty dollars more, so
that anyone coming with \$500
could buy and stock his place and
have \$100 to live on the first year.
This is fact concerning Columbia
county, Fla., and such chances can
be found by scores, may be by
hundreds, in this county alone.

Always respectfully and truly
yours,
J. B. SHORE.
Mikesville, Fla., Sep. 24, 1894.

Running a Newspaper.

Did you ever write an article for
a newspaper? No. Then why do
you pick up a paper and after glance-
ing over it throw it aside with the
remark, "there is nothing in it
worth reading?" You think you are
a great newspaper critic, don't you?

You are of the opinion that you
can give the editor pointers that he
has never dreamed of as to how to
conduct a paper successfully. And
yet if you were called upon to fur-
nish a column of readable news
each day for a week you couldn't
do it to save your life, perhaps you
could not even write two consecu-
tive grammatical sentences.

A paper that would publish your
matter would be the subject of pub-
lic ridicule, and if your policy was
pursued it would be compelled to
suspend publication within a
month's time.—Ex.

Registration Notice.

September and October Sittings.

NOTICE IS HEREBY GIVEN That the undersigned, Agents of Registration of Voters in and for their respective election districts of Garrett county, will sit in their respective election districts to receive applications for registration on the 17th, 18th and 19th days of September, 1894, and on the 1st, 2nd, 3d and 4th days of October, 1894, and on the 15th day of October, 1894, at the hour of 10 o'clock a. m., until 8 o'clock p. m., on each of said days for the purpose of ascertaining and registering the names of persons qualified to vote in their respective election districts who shall present themselves for registration and for the purpose of receiving and correcting the registers of voters and the lists of names of persons qualified to vote in their respective election districts and the names of all voters entered therein who shall have died or become insane or otherwise disqualified or who for any cause shall have ceased to be entitled to remain on said registers of voters.

And on the Monday next succeeding the second Monday in October, that is to say on the 15th day of October, 1894, at the hour of 10 o'clock a. m., until 8 o'clock p. m., on each of said days for the purpose of ascertaining and registering the names of persons qualified to vote in their respective election districts who shall present themselves for registration and for the purpose of receiving and correcting the registers of voters and the lists of names of persons qualified to vote in their respective election districts and the names of all voters entered therein who shall have died or become insane or otherwise disqualified or who for any cause shall have ceased to be entitled to remain on said registers of voters.

15th Day of October,

In each of the election districts of Garrett county, the undersigned, Agents of Registration of Voters in and for their respective election districts of Garrett county, will sit in their respective election districts to receive applications for registration on the 17th, 18th and 19th days of September, 1894, and on the 1st, 2nd, 3d and 4th days of October, 1894, and on the 15th day of October, 1894, at the hour of 10 o'clock a. m., until 8 o'clock p. m., on each of said days for the purpose of ascertaining and registering the names of persons qualified to vote in their respective election districts who shall present themselves for registration and for the purpose of receiving and correcting the registers of voters and the lists of names of persons qualified to vote in their respective election districts and the names of all voters entered therein who shall have died or become insane or otherwise disqualified or who for any cause shall have ceased to be entitled to remain on said registers of voters.

Agents of Registration of Voters in and for their respective election districts of Garrett county, will sit in their respective election districts to receive applications for registration on the 17th, 18th and 19th days of September, 1894, and on the 1st, 2nd, 3d and 4th days of October, 1894, and on the 15th day of October, 1894, at the hour of 10 o'clock a. m., until 8 o'clock p. m., on each of said days for the purpose of ascertaining and registering the names of persons qualified to vote in their respective election districts who shall present themselves for registration and for the purpose of receiving and correcting the registers of voters and the lists of names of persons qualified to vote in their respective election districts and the names of all voters entered therein who shall have died or become insane or otherwise disqualified or who for any cause shall have ceased to be entitled to remain on said registers of voters.

Piles.

Piles is so common that every other person you meet is troubled with it more or less. It seems to be a little thing and usually gets little attention. It may not be serious at first, but it makes a man sick—makes him nervous, cross, irritable—unfit for business. It robs him of sleep, takes his appetite—cuts down his flesh—and yet he is careless about it.

will cure Piles. It will cure other things, too, but it is particularly good for Piles. It stops the itch and the ache at once. It may take several days to wholly allay the inflammation and reduce the swelling, but it will do it—sure. Has done it in innumerable cases. Never has failed.

Good for Eczema, Ring Worm, Tetter, Itch, Salt Rheum, Dandruff, Pimples, and all Skin Diseases.

Mrs. Broom Has a Very Inexpensive and Plain Funeral.

A crowd of seemingly calm and undisturbed people were noticed in a corn field near Halfway, yesterday. It was the funeral of Mrs. Sarah Broom. The woman was buried in accordance with the customs that obtain in the class to which she belonged in Russia. There was no coffin. The body was wrapped in cotton cloth and put in an ice box furnished by Mr. Suter. It was late on Monday afternoon when the funeral party started for the Hebrew cemetery at Halfway, on the Williamsport turnpike. Mr. Suter hauled the box containing the corpse out to the cemetery. All the mourners and friends, to the number of 50 or more, walked the whole three miles distance.

No grave had been dug, and no person of the Hebrew faith was permitted to perform any labor in connection with the interment. Two colored men were procured, who dug a grave while the party waited. Rough boards were put in the bottom and at the sides, very much like the cribbing of an embankment. A small sack was filled with earth and laid on the bottom board, and the corpse was lifted from the box and put in the grave with the head resting on the eastern pillow. A board was laid on top, and the earth filled in. While these things were going on there was a great deal of crying and sobbing set up among the relatives and a weeping cry made. The bereaved husband was not permitted to enter the cemetery enclosure. He remained on the turnpike. The reason given was he did not belong to the "society."

The whole affair was exceedingly simple and inexpensive. The burial over the funeral party walked back to the city, in fact it would have been a gross violation of tradition and custom for any of them to have been transported in a vehicle.

According to custom, three men were detailed to watch the grave on Monday night, three on Tuesday night and three on Wednesday night. This is the third body that has been deposited in the Hebrew cemetery at Half Way.

The Public School Tax.
The following is the quarterly distribution of the public school tax for Allegheny and Garrett counties ending October 1, 1894, for white and colored schools, payable on the 10th inst.: Allegheny county, white, \$4,540.40; colored, \$163.03. Garrett county, white, \$1,510.06; colored, \$21.94. Total for all the counties, white, \$100,000; colored, \$24,500.

A Bewildered Bird.
On Tuesday morning Mr. E. M. Spedden was aroused from his sleep by the noise of falling glass and upon investigation found that a pheasant had become bewildered and flew against the window in his bed room smashing the glass into a thousand pieces. The bird was captured in the room by Mr. Spedden and promptly killed and eaten by him.

Garrett Moving Toward the Front.
Garrett county is now enjoying a boom in the sale of real estate. Several prominent Washingtonians have bought land both at Oakland and Deer Park and are now engaged in laying out building sites. A number of buildings are in course of erection.

Weather Crop Report.
Bittering.—Light frosts on the 25th and 26th, but they did no damage. Since then the weather has been cloudy, with rain at this writing. Buckwheat thrashing about finished, and the crop about the best we have had for some years, averaging from twenty-four to forty bushels per acre. Pastures still improving and wheat fields very green. Apples are scarce, but chestnuts are abundant.

P. P. Lonn.
Grantsville.—Weather has been cool the past week, with heavy frost on the 26th. Wheat fields getting green. Buckwheat mostly thrashed; crop extra heavy.

J. S. MILLER.

State Sunday School Convention.
The Maryland State Sunday School Convention will be held in Frederick City on Tuesday, Wednesday and Thursday, October 30, 31, and November 1. The indications are favorable to a large representation from the schools of the State. An interesting program has been arranged, an abstract of which will be printed in this paper next week. Those schools who have not sent in their statistical reports for the present year will do so at once, so we can send them complete copies of the program. Send name of Superintendent with his address, number of teachers, number of scholars, average attendance, &c. Address State Sup't W. A. Baker, 216 N. Charles St., Baltimore, Md.

Ripans Tablets cure jaundice.

Mr. Cowen Nominated.

BALTIMORE, Oct. 2.—John K. Cowen, who represents the independent as opposed to the regular Democracy, was today unanimously nominated for Congress by the Democrats of the Fourth district. He will succeed Isador Rayner, who has been the personal friend of President Cleveland.

Harry Wells Rask in the Third, and J. Fred. C. Talbot, of the Second district, were renominated to succeed themselves by the Democrats in their respective districts.

Hung By the Bed Clothes.

The following telegram appeared in the *Wheeling Intelligencer* of last Saturday:
FINDLAY, OHIO, Sept. 28.—An infant child of Norman Hassler, one of the members of the traveling musical club, known as the "Schumann Quartette," met its death in a peculiar manner this afternoon. Mrs. Hassler had gone out of the house for a few minutes, leaving the child asleep on a bed. Upon returning she found the babe had slipped off the bed and entangled itself in the bed clothes in such a manner as to strangle itself to death.

Mr. Hassler is one of the members of the Schumann Quartette who delighted the audiences at Mountain Lake Park the past summer.

Marriage Licenses.

Following is a list of the licenses to wed issued by Clerk Tower since our last issue:

Sidney A. Lewis and Amanda May Wolf.

John W. McRobie and Sella Rodcheaver.

Edwin A. Weiner and Effie May Grottel.

Virgil C. Snodgrass and Louisa Taylor.

Robert T. McRobie and Cora A. Neville.

Amelus Wagner and Fannie D. Durst.

Clark Carrioco and Laura E. Mankins.

Died.

MEHAN.—Mrs. James Mehan, an old lady residing about one mile south of Oakland, died Tuesday and will be buried to-day from St. Peter's Catholic church.

Notice.

Did you hear the crash? Everybody thought it was thunder, but it was only Miller Bros. knocking the bottom out of the prices of horse shoeing. From Oct. 1 to December 1, 1894, you can get your horse shod for 60 cents. The cash must accompany the horse. 30-6t.

Held Up.

Last Saturday evening about seven o'clock Col. John W. Rigg was met by a stranger on the railroad track in Terra Alta and commanded at the point of a revolver to give up his money, which he did. The highwayman got \$1.50 in cash and the Colonel's watch, a very valuable one, we understand.

Gone to Their New Abiding Place.

On Monday morning Sheriff Wegman, accompanied by Mr. Jacob S. Meyers, started for Baltimore taking with them Thomas Cornell, sentenced to three years in the penitentiary, and George Marville, sentenced to three months in the House of Correction. Messrs. Wegman and Meyers returned to Oakland yesterday morning.

Court Proceedings.

The September term of the Circuit Court for this county adjourned on last Thursday afternoon about five o'clock. The term was the longest one in the history of the county. The following cases were tried before the court after THE REPUBLICAN went to press on Thursday:

Samuel Murphy vs. David P. Mays; debt; trial before the court; verdict for defendant; Hamill, Semmes—Peditcord.

David Durst vs. Thomas & Sineell; debt; judgment for plaintiff by confession.

F. and C. Felty vs. Thomas & Sineell; debt; tried before the court; verdict for defendant; Hamill—Richmond.

George D. White vs. Thomas & Sineell; debt; tried before the court; verdict for the defendant, Peditcord—Richmond.

Catharine D. Miller vs. John Finzell and the County Commissioners of Garrett county; appeal from an order of the county commissioners granting a public road; report of examiners amended and road granted; Sineell—Peditcord.

Mary F. Goldsborough vs. Wm. Broderick; ejectment; submitted to the court; verdict for plaintiff for land claimed in declaration and one cent damages and costs.

When Baby was sick, we gave her Castoria.

When she was a Child, she cried for Castoria.

When she became a Girl, she clung to Castoria.

When she had Children, she gave them Castoria.

Real Estate Transfers.

Following is a list of deeds recorded in the Circuit clerk's office since our last report:

County commissioners Garrett county to Clarissa Goodwin and Jane Green, 20 acres of "Loebel's," 30.

J. H. Beekman and wife to Geo. Truesdell, part of lot No. 7, Deer Park, 303 1/2 acres; \$4000.

John E. Winebrenner and wife to mayor and council of Frostburg, 900 square feet of ground; \$225.

Chas. W. Hopkins, trustee, to Mary M. E. Bell, lot in Mountain Lake Park; \$500.

Margaret Chrystal to Mary A. Coyle, two lots in Oakland; \$150.

Vestry of St. Paul's Parish, Baltimore county, to the Vestry of St. Matthew's Parish, Garrett county, lot No. 72 in Oakland; \$1.

C. A. Ashby et al to Preston Lumber and Coal Co., part of the Smith farm, 1 acre; \$800.

John A. Cornell et al to Preston Lumber and Coal Co., part of the saw mill property; \$200.

Josiah Moon and wife to Preston Lumber and Coal Co., part of Smith farm, 2 1/2 acres; \$275.

Mountain Lake Park Association to Wyatt R. Johnson, lot No. 70 in Mountain Lake Park; \$300.

Dear Park.

Vote for Wellington.

Wilfred Chadderton is clerking for Mr. W. C. Jones.

Rev. W. G. Loyd, the new pastor of the M. E. church, preached his first sermon to a large audience on Sunday night.

Mr. Hillery has moved his family to Cumberland, where he has bought a bakery.

The Smith Military Band rendered some excellent music on our streets last Friday night.

W. B. Stallings, a lad living with Mr. E. G. Miller near Deer Park, met with a very serious accident by falling in a hole which dislocated his left elbow. At this writing he is improving.

Contrasting the crowd which attended the political meetings is enough to discourage the Democrats of this place.

The summer season has closed and its effects are being felt.

Hon. Geo. L. Wellington gave us an eloquent speech on the important issues of this campaign last Friday night which brought a large crowd of people to town.

Mr. Ferdinand Williams, the Democratic victim for Congress, gave an old time camp meeting talk Monday night to a small crowd.

HURRICANE.

Backwoods.

To-day I take the pleasure of penning a few lines regarding this place.

People are all busy threshing buckwheat at present.

A stranger has come to Jesse Warnock's and refused to go away.

Mr. C. W. Bowers expects to start for California next week, where he will spend the winter.

H. A. Groves expects to start for Baltimore on business about the 20th inst.

Mr. Lawrence Weitzell will soon start south to try and regain his health.

Mr. Wesley Hoff paid the Backwoods a visit last Sunday.

Hampton Butler, of this place, paid his father at Manadier's Ridge, a visit last Sunday.

John Blocher is expected to return home this week from Westernport, where he was employed as teamster by Mr. John Hoff.

Mr. Ashford Warnick is doing fine work with his separator in this part.

Trespass Notice.

All persons are hereby notified not to trespass upon my lands lying in District No. 1, Garrett county, about four miles south-east of Swanton, and known as a part of "Clifton," for any purpose whatever.

29-3t Wm. H. PAUGH.

It May do as Much for You.

Mr. Fred Miller, of Irvington, writes that he had a severe kidney trouble for many years, with severe pains in his back and also that his bladder was affected. He tried many so-called kidney cures but without any good result. About a year ago he began the use of Electric Bitters and found relief at once. Electric Bitters is especially adapted to cure all kidney and liver troubles and often gives almost instant relief. One trial will prove our statement. Price only 50c. for large bottle. At all Drug Stores.

Rogers' Sarsaparilla.

A specific for all. 100 doses for 75 cents. Rogers' Little Liver Pills, best on the market; Cough Cure, Liniment, Appetite and Worm Syrup, sold by A. G. Sturges, Oakland; Cuyper Bros., McHenry; J. A. Delberry, Corinth; C. F. White, Hutton; M. L. Lake Park; Dr. Langhlin, Deer Park; Wm. Frederick, Friendsville; Young Store Co., Jonas Frazee, Robert Liston, Schuylerport, W. Waas, Mineral Springs; J. E. Gnagay, Accident; Smith & Callis, Hoyaes, and by all general dealers.

CASTORIA

for Infants and Children

"Castoria is so well adapted to children that I recommend it as superior to any preparation known to me." H. A. ARBUTHNOT, M. D., 111 So. Oxford St., Brooklyn, N. Y.

"The use of 'Castoria' is so universal and its merits so well known that it seems a work of supererogation to endorse it. Few are the intelligent families who do not keep Castoria within easy reach." CARLOS MARTIN, D. D., New York City.

THE CASTORIA COMPANY, 27 MURRAY STREET, NEW YORK CITY.

A New Method of Saving Money.

OUR MOTTO:

"A Penny Saved is a Penny Made."

Our new method in business is that on

Wednesday, August 1st,

we will close our books to all credit business and do exclusively a cash or trade business. In this way we can save you many dollars by dealing with us. At the above mentioned time we will have on hand a full and complete line of

CLOTHING, DRY GOODS, NOTIONS and SHOES.

We have found it a very hard matter of conducting a credit business in a successful way, and in a cash system we do not only save money for ourselves, but save it for those who deal with us. We will have one of our salesmen to call at your door every day to take orders for anything you may need in our line. We assure you that your orders will have our best and prompt attention. We trust that all our former customers and many new ones will grasp this opportunity and help us along in our new venture.

Very truly,

SINCELL BROS.

THE WAY TO SLEEPYTOWN.

Which is the way to Sleepytown? Look in the blinking eyes of brown Or you may find the misty track. And in the half-closed eyes of black. Winding about and in and through The shimmering eyes of dreamy blue. Or staring across the eyes of gray. Oh, there you may find the drowsy way.

Follow along the crooked street. Twisting about two tired feet. Feet that the whole day long have trod Paths that lead to the Land of Nod. Keep on going until you come To weary fingers and weary thumb. Or the lips within whose gates of rest Is the languid tongue of a boy or girl.

The path you seek will leap, mayhap Into the peace of a drowsy lap. Where angels have sprinkled the dew of rest In a gracious cradle of arms and breast. Further along, and the way has led To the calm of a prayer-encircled bed. Where mother is kissing the eyelids down. And that is the way to Sleepytown.

Nixon Waterman, in Chicago Journal.

A LIVELY BEAR

FRANK M. STONE, the attorney, has but recently returned from a bear hunt in the mountains of Trinity county. With him as his guest is Col. Clark Drake, a hunter whose reputation for daring in the pursuit of big game extends far beyond the borders of the state. Both have stories to relate of a chase full of excitement and danger. Both tell of a dangerous trip into a region which in rugged grandeur of scenery is not excelled in the state, perhaps not in the world.

Each tells of the excitement of the chase, of the trailing of the noble game, the roar of the hunted animal, the wild baying of the dogs, the hunters are climbing the sides of the mountain, again their horses dash through mountain streams and down into canyons. There is an element of danger in it all. In the chase in which Col. Drake took part his only weapon against the wounded, enraged beast was a knife.

Stone left this city on June 30 last, his purpose being to go to Del Norte for a hunting expedition with Judge J. E. Murphy. His expedition was to hunt deer, bear and panther. Stone had the usual trappings of the hunter. The rifle he carried is safe to say, has no duplicate. It was presented to him by Col. Arthur W. Hooper, a college chum and old-time friend of the attorney. The rifle weighs no more than eight pounds. It is patterned after the modern rapid-firing gun, and is beautifully engraved with the figures of a grizzly bear, a wild turkey and a stag's head. The stock is made of hickory.

The strike played sail havoc with the attorney's plans. He was stopped at Red Bluffs and after a dreary wait of three days determined to push on into Trinity county in search of the same game he had expected to find in Del Norte county. He hired a team, bought provisions, engaged a half-breed Indian and started on a journey of sixty-five miles to Camp Willwood.

His purpose was to meet Col. Drake, who for fifteen years had lived in Trinity county as its most daring hunter of big game. As the attorney continued on his trip he was informed that he was sure to strike the trail of a bear before his journey was over. The region through which he was passing was a rugged one. Once in awhile a

THE ANIMAL BARKER.

house was to be found, but they were from seven to ten miles apart on the road, and leaving it one would not find a habitation for twenty or thirty miles.

Telama county was soon left behind and the hunter was in Trinity. The way became more difficult and dangerous as the country became more mountainous. Willwood was reached and it was learned that Col. Drake was still thirty-five miles away in the very heart of the mountains. The region was a wild one. Huge boulders and fallen trees blocked the road. Swiftly running mountain streams had to be crossed. The forest was swept by the wind. The prospect was nothing but that of mountains. In all the journey there was but a single valley, and that was not longer than ten miles.

Stone was making the journey in a cart drawn by a single horse. As he was going down a steep grade the animal balked, swung his head and lunged down the bank into the creek, in which the water bounded and splashed over heavy rocks. Stone fell heavily into the stream, his heels up, his head

down. In a moment he was drenched to the skin. Assistance was rapidly given and the hunter was out of the creek. He was bruised about the body, and lame. He had no change of clothing and had to be content with emptying his boots of the water. The harness was patched up and the journey was resumed. It was still twenty-five miles from the camp of Col. Drake. It was late in the afternoon and the prospect was none too pleasant. The journey was made, however, in the darkness. The trail was narrow and uneven. It was so dark that the hunter had to keep his hand before him to save his face and eyes from the thick, overhanging branches of the trees. In a few minutes the hotel at Hayfork was reached and a dinner obtained. In a few minutes the journey to Drake's camp was resumed. It was lighted at fifteen minutes past one o'clock in the morning, and the visitors set up a howl like that of Comanches. Drake was aroused, his dogs began barking and the visitors were made welcome. The camp fire was renewed, and Stone was soon rolled in his blankets.

An hour before daylight he was up again and the hunting party was formed. The horses were made ready, provisions were packed, and everything prepared for a camp if so desired. It was found necessary to establish one, which was appropriately named Camp Rattlesnake. All day the party traveled, and toward evening camp was made. Next morning before daylight the party was astride and ready for the coming hunt.

The dogs were eager, and it needed no suggestion to see that they were dangerous. There were nine of them, Russian bloodhounds. None are more savage in an attack than they. Just at dawn the trail of a bear was struck. Eight of the dogs were leashed in pairs, and the ninth, Crowder, was twenty-five or thirty yards in the lead. Suddenly he threw up his head and bayed. He had scented a trail. Drake rushed ahead and let the leader go on. The cry of Crowder made the other dogs wild. They bayed and tugged, and tugged at their collars. It seemed as if they all would be off on the trail before Drake could loose them. He did so as quickly as he could, allowing two to go at a time. They were off with a series of yowls which echoed and re-echoed in the mountains. The grizzly bear, over fallen trees, timbers and logs they bounded after the great game which had been scented.

The trail was on the side of the mountain, with a deep canyon below and a heavy ascent on the other side. The ascent was up the hill. The bear had started on the ridge of the hill, three hundred yards away from the hunters. The crash of branches could be heard as the great animal made its way through the brush. The noise was almost terrifying, as the bear could not be seen, and with the frightful baying of the dogs it was hard to locate him.

Suddenly the branches parted and a distance ahead of the hunters, and the brown body of a monster bear was seen. He was going with terrific speed, and the hunters were directly in his path. He did not see them, though. The hounds were persistent, and the great animal was blinded by the brush, but the baying hounds which were on his track.

Without noticing the hunters, he turned from them and rushed on to their back track. About one hundred yards away a horse had been left grazing. The bear saw it and turned again, retracing the ground he had traveled so rapidly. When no more than twenty-five yards away he saw the hunters in his path and swung across the canyon. For over five hundred yards he could be seen zigzagging up the side of the hill, his great body crashing through the brush. The fleeing animal uttered loudly a sound which was heard ominously. He was over seven feet long, and the hunters did not care particularly to take any chances with such a beast.

The hounds were in full cry. Their baying seemed like the cries of a thousand dogs. In a few moments the bear reached the crest of the hill and disappeared. The crashing of the branches and the baying of the hounds were becoming fainter, but, though the chase was now a long one, few minutes were lost. The splendid prospect held the hunters. Far away in the midst of the mountains the north and the south forks of the Trinity could be seen. All around the mountains were covered with snow. Far in the distance Mount Shasta could be seen and almost at the feet of those who looked was the Hayfork valley, with its golden grain. It was early morning, the air was clear, the place, with the exception of the distant baying of the hounds, was solemn in its stillness.

No further time was to be lost and the hunters dashed in the direction of the last-dying sound. They traveled over three miles. Their clothes were torn, their bodies bruised and cut, but no thought was given to such trifles. As the sounds became louder and plainer it was evident that the hounds had "treed" the bear, and in a few moments the hunters were on the ground.

The chased animal had sought refuge in a towering tree three feet in diameter. Sixty feet above the ground he crouched on a limb and watched his pursuers. He moved his jaw, chewed significantly and gave that peculiar blow which characterizes him. The hounds were frantic. They

jumped and yowled, but to no purpose.

The hunt was nearly over. As the guest of Col. Drake, Stone was allowed to take the first shot. For a few minutes he stood and watched the crouching bear. Then he raised his rifle, took aim and fired. The bullet struck the bear in the jaw, which was broken. The bleeding flesh was torn, but the great animal simply drew his paw over the wound. He began to descend the tree to fight his pursuers. With a remarkable running, he tried to descend on the side opposite to that from which the shot had come. Stone dismounted and ran around the tree until the bear was again in full view. Again the hunter fired and the tip of the horn of the hunted animal was broken. The enraged beast rushed up the tree to escape. The dogs became unmanageable. Their cries could be heard for miles. They would rush away from the tree, then dash toward it and go up the perpendicular for ten feet, only to fall in a heap on the ground.

The bear had again taken its place on the limb, and once more Stone fired. The bullet passed through the animal's body. The bear left its perch and eluded with all its paws to the tree. It was sixty feet above the ground. Quickly the final shot was fired. The bear clutched convulsively at the tree. Its claws sunk into the bark, and for a moment it seemed as if it would fall backward, dead. Its body crashed to the ground. The hounds pounced on it savagely, but were driven off. The hunt was over.

The great animal was strapped to a packhorse and taken slowly into camp. The bear passed through the animal's body. The bear left its perch and eluded with all its paws to the tree. It was sixty feet above the ground. Quickly the final shot was fired. The bear clutched convulsively at the tree. Its claws sunk into the bark, and for a moment it seemed as if it would fall backward, dead. Its body crashed to the ground. The hounds pounced on it savagely, but were driven off. The hunt was over.

The next day Col. Drake was on the hunt alone. Early in the morning the dogs struck a trail. The bear was run three-quarters of a mile, when it fell backward, dead. Its body crashed to the ground. The hounds pounced on it savagely, but were driven off. The hunt was over.

The bear looked on from his tormentors and saw Drake on the side of the hill below him. The animal rushed for the hunter, who was afraid to fire, as he might kill his dogs. Drake ran

DRAKE SEEMED IN PURSING HIS KNIFE IN THE GREAT BEAST.

to a tree further down the hill, hoping to secure a position from which he could fire as the bear passed. The dogs stopped the bear twenty feet from the tree, however, and Drake was compelled to fire again. He did so, and the great animal fell into the canyon. As the bear fell Drake kept firing.

The dogs were getting much the worst of the fight. Three of them were under the bear, and at any moment it seemed as if some of them would be killed. Drake had used all his cartridges, but he drew his knife and rushed in to save his dogs. The bear could bite, and the dogs kept him busy protecting himself from their attacks. Drake succeeded in burying his knife twice in the great beast, and the fight was over. The bear literally bellowed, and the hunter sat down to rest. He had many exciting experiences. In a period of six weeks he killed twenty-two bears and five lions.

On the following day he and Stone were out again. Two more bears and a cub were caught and killed. During the trip fifteen deer were shot, and for those who are interested in such hunting it may be said that from one hundred and fifty to two hundred big bucks were seen in droves of from three to six. Two fawns were taken alive, and are now at Mr. Stone's home in this city. He carried them both over ten miles.

An attempt was made to trail a panther, but the dogs had constantly to be taken off a bear trail, and the chase was abandoned. Stone intends to return to the mountains of Trinity for a panther and bear hunt next fall. He will again be the guest of Col. Drake.

During the trip so recently ended fishing was not neglected. Stone took his rod to the south fork of the Trinity, and with Col. Watson tried his luck. He went into the stream to his waist, and at a distance of five or six hundred yards from the head of the rifle caught eighty-seven splendid trout, the smallest being seven and eight inches in length. The next day he caught three salmon trout, weighing four pounds three ounces, five pounds eight ounces and six pounds two ounces. That ended a hunting expedition which will not soon be forgotten, even in a region which is famous to the hunters of the world.—San Francisco Chronicle.

She Meant Business. "How much is this here goods worth?" asked the woman with the business eye.

"Eighteen cents a yard," replied the merchant. "Gimme ten yards." The merchant cut off the goods and returned to himself. "Clear loss of six cents a yard. I thought she was only a shopper."—Philadelphia Inquirer.

MISCELLANEOUS.

— "What would you want first if you had a great big fortune?" Greedley—"A bigger one."—Littor Ocean.

— It is good to be rooted and grounded, provided you are not rooted in the ground.

— The bones of the skull are arched because in that form the greatest strength is combined with the least weight and quantity of material.

— If a dog should howl under your window at night, would you regard it as a sign of death? "Yes; if it was light enough for me to get a good aim at the dog."—Indianapolis Journal.

— "Why don't you try to paddle your own canoe?" growled Brown as Jones struck him for ten. "I can't," said Jones, "but I am trying to float a loan."

— A Violent Insinuation.—Ruth—"Harry told me I was the first girl he ever told he loved." Kitty—"When did he tell you that?" Ruth—"Monday night." Kitty—"No, nothing; only he must have been lying to me Tuesday night."—Detroit Free Press.

— M. Turpin, a Frenchman, claims to have invented a gun which can exterminate an army in a very few minutes. It throws 100,000 projectiles in a minute, and can thus sweep an opposing force from the earth as a tornado levels a field of corn.

— To frighten burglars, Edward Jenkins, of Louisville, kept a savage canine, and displayed this sign: "Look out for the dog." Some thieves poisoned the dog, stole fourteen chickens, and made the sign read: "Look out for the chickens."

— The lion's roar can be heard at a greater distance than the sound of any other living creature. Next comes the hyena, then the screech owl, the panther and the jackal in succession. The donkey can be heard fifty times farther off than the horse.

— The Florida gopher, a tortoise weighing eight or ten pounds, digs in sandy ridges remote from water, his burrow being eight feet or twenty feet long and descending at an angle of thirty-five degrees. Being long lived, it occupies this place many years.

— Off came the name of my business, dear," said Mildred to Amy, "but if I were you I wouldn't marry Mr. Spatters." "Why not?" "With all your money, you ought to be able to get a really handsome man."—Pittsburgh Chronicle Telegraph.

— Atlanta, Ga., was originally called Northville. Its name was changed, it is said, to Atlanta, because of its geographical position on the divide between the waters of the Atlantic and Gulf. It is, however, probable that the name was a contraction of Atlanta.

— Authorship is pretty hard business. The number of birds killed by striking light-houses is incalculable. Over 1,500 have been found dead at the foot of the Bartholdi statue in a single morning, while from Fire Island (Long Island) light we have a record of 200 birds of one species—black-poll warblers—which met their fate on the night of September 20, 1905.

— Several theories are offered to account for the origin of the dollar mark. One declares that it comes from the letters U. S., which were placed on the Federal currency, and in the hurry of writing were run together, the S. being placed over the U. A more probable explanation is that it is a modification of the figure 8, and denoted a piece of 8 reals, or 81.

— Quill pens were made in the fifth century. There is no record of their earlier use. Theodor, the Ostrogoth king, is said to have been illiterate and unable to write his own name. A golden plate was made with the letters of his name about it. This was placed over the document he was expected to sign, and he traced his name through the open spaces with a quill.

— Bottled ale rendered mellow by long keeping, was an accidental discovery. It was made by Alexander Newell, dean of St. Paul's, in the reign of Queen Mary. Newell was obnoxious to London, and the latter had sent soldiers to apprehend him; but it happened out but day Newell was out fishing, and in order to keep his beer cool had buried it in the bank. Getting information of his danger, he fled, forgetting all about the beer, and escaped to the Continent, whence, returning some years later, he remembered his beer, dug it up and found it wonderfully improved with age.

— There is a casino in Stockbridge, Mass., which is to that town what hospitals and fresh air funds are to other towns. That is, it is the beneficiary of all entertainments arranged to enlighten the village. The other day large printed signs announced that "The Ladies of the Casino" would give a reception "for the benefit of the Casino tickets one dollar." What more anti-republican than a wicked New Yorker should add a word to the announcement so that it read that "The Ladies of the Casino" would give a reception? But some people didn't seem to like the amendment and the altered signs disappeared, to be replaced by other signs in the original form.

— Of the 11,000,000 inhabitants in the slave-labor states at the beginning of the civil war, the ruling class in the south—those in whom resided in a remarkable degree the political power of those states—numbered about 1,000,000. Of these, the large land and slaveholders, whose influence in the body of 1,000,000 was almost supreme, numbered less than 200,000. In all the southern states in 1860 less than 170,000 held 2,800,000 out of 3,300,000 slaves. The 11,000,000 inhabitants in the slave-labor states in 1860 consisted of 7,000,000 small holders, non-slaveholders, mechanics and laboring men, 4,000,000 negro slaves, and 1,000,000 known in those regions by the common name of "poor white trash." A degraded population scattered over the whole surface of those states.

THE BOSTON GIRL.

She Didn't Do a Thing But Eat a Cream-her Ten Inches Long.

A young lady of Listener's acquaintance is very fond of cream-buns. Like the epicurean but dyspeptic Frenchman who was crazily partial to hushies, but never could digest the smallest fragment of one, and who said that "heaven is where we eat and hell is where we digest," this young lady can digest cream-buns without the slightest trouble. The other day she went into a restaurant for her midday meal. The proprietor was back her partially, informed her that he had some particularly nice and fresh cream-buns. She ordered one of them and it was brought to her. It was ten inches long and stout in proportion. The young lady had it peeled and dressed half of it after her own fashion, and fell to eating of it. This young lady is of the modern type of vigorous and muscular girls and she must have made a beautiful picture as she sat there, with the courage of her good health, calmly eating her big cream-bun.

At a table close by sat an elderly and dyspeptic-looking lady of the old school. She had a narrow chest and her temples were decorated with gray corkscrew curls. She observed the young lady fall to on the little end of the cream-bun and she paused and almost dropped her fork, as if she had said to herself, "Vivant heavens! Is that girl going to eat half of that great cream-bun?" She went on furtively with her own meal and graham bread, meantime watching the gradual disappearance of the cream-bun. As soon as the first half of it was gone the old lady seemed to have lost her own small appetite and ceased to eat. When the young lady with deliberate and carefulness and then attacked the second and stouter half of the cream-bun the old woman turned pale. She put her napkin on the table, called the waiter and paid her check but remained in her seat, her eyes riveted on the cream-bun. She watched until the last shred of it was gone. Then she took up her black-satin bag, which was embroidered with yellow silk, and drew out of it a little note-book and a lead pencil. She rose and went over to the table where the young lady was.

"Young woman," she said, are you willing to give me your name?" "Certainly," answered the young lady. She gave the name.

"How do you spell it?" "The young lady spelled her name. "This is your name," she said, and returned the notebook and pencil to the bag.

"Perhaps you don't mind telling me," said the young lady, "why you want my name?" "Oh, no," answered the other. "I tell you just what I want your name for. But I can look for it in the death columns of the papers. If I don't find it there within forty-eight hours, then I don't know anything about the laws of cause and effect."

She went solemnly out of the place. This happened about a week ago. The young lady's name has not appeared in the death columns, and the chances are that it won't appear there for a great many years. Not only did she digest that cream-bun without the smallest difficulty, but she has eaten two or three others since.

And the old lady has no doubt suffered pangs over her greed and graham bread. So unevenly are the gifts of nature distributed.—Boston Transcript.

THE OLD BALL PLAY.

Developments in the Game Since Olden Times.

As much as the improvement of the human mind in all exercises has placed the most important part in effecting these developments, let us take a retrospective glance at the stock in trade of ball players in olden times. It is beyond our scope to trace the history of tennis with exercise in the spheres of tennis, and tennis, which were popular in the middle ages, and other classic writers; nor need we speculate if the game described by Johannes Cimonius in 1155 as an implement with a broad curved end furnished with a network of gut, and which was used in a game which may have resembled polo, was the prototype of the modern implement.

We can form no opinion on the nature of the racket alluded to by Chaucer about 1380 in "Troilus and Criseyde," or of the reticulum mentioned in the "Colloquies" of Erasmus, which were popular about 1527. But we have abundant evidence to show that in the fourteenth century a game of handball which had been played in France, Spain and Italy, in open spaces in the country, became popular in the towns of France, and that the difficulty of finding adequate space suggested the utilization of inclosed courts or the erection of buildings suitable for the purpose.

The courts were called triports, but this word has fallen into disuse, all tennis courts in France being now termed "jeux." In this archaic game the ball was probably struck with the palm of the hand, but early in the fifteenth century attempts were made to augment propelling power by mechanical agencies. The Italians used a "braccialetto" or wooden gauntlet in their game "pallone," and a network gut, applied at first to a strong glove and subsequently attached to a handle, probably foreshadowed the implement known as known as "racquetta" in Spain, "racchette" in Italy, "racquette" in France.—National Review.

Willing to Compromise.

Bright Boy.—The paper says there's a doctor in the city who makes long noses shorter, big ears smaller and I don't know what all.

Further.—Well?

Bright Boy.—I guess you'd better send me to him to have my legs shortened, if you can't afford to buy me a larger bicycle.—Good News.

Marital Home.

"So the marquis gave you those 'doctors'?"

"Yes," and O. Mand, he actually said life without me meant nothing."

"Yes, dear; everybody says you are his last chance."—Texas Siftings.

THE HIGHEST AWARD.

Royal Baking Powder in Strength and Value 29 Per Cent. Above its Nearest Competitor.

The Royal Baking Powder has the enviable record of having received the highest award for articles of its class—greatest strength, purest ingredients, most perfectly combined—wherever exhibited in competition with others. In the exhibitions of former years at the Centennial, at Paris, Vienna and at the various State and Industrial fairs, where it has been exhibited, judges have invariably awarded the Royal Baking Powder the highest honors.

At the recent World's Fair the examinations for the baking powder awards were made by the experts of the chemical division of the Agricultural Department of Washington. The official report of the tests of the baking powders which were made by this department for the specific purpose of ascertaining which was the best, and which has been made public, shows the levenging strength of the Royal to be 100 cubic inches of carbonic gas per ounce of powder. Of the cream of tartar baking powders exhibited at the Fair, the next highest in strength thus tested contained but 133 cubic inches of levenging gas. The other powders gave an average of 111. The Royal, therefore, was found of 20 per cent. greater levenging strength than its nearest competitor, and 44 per cent. above the average of all the other tests. Its superiority in other respects, however, in the quality of food it makes up to fluffiness, delicacy and wholesomeness, could not be measured by figures.

It is these high qualities, known and appreciated by the women of the country for so many years, that have caused the sales of the Royal Baking Powder, as shown by statistics, to exceed the sales of all other baking powders combined.

The Little King of Nepal.

If his dashing, prancing Ghorka warriors make a perpetual circus for our little king, so also his forests and jungles and rivers afforded him a tremendous and varied means of amusements, with which our great Barnum's "greatest show on earth" was but a dime museum; for here were bear and wolf and leopard, tiger, hyena and jackal, elephant, rhinoceros and wild buffalo, wild goats, vultures, and falcons, and eagles, golden pheasants, and bird fowl. From his palace perch, in the cold season, he could spy the Bhootyan herdsmen leading in great flocks of sheep and goats over the mountains from Tibet, every little creature carrying its pack of small sacks filled with borax, salt and saffron, and behind these came trains of sturdy, plucky ponies and fierce, shaggy dogs from the northern highlands. Sometimes he could see great troops or long trains of carriers coming into the city, bringing tea and musk, paper-plant and yaks tails, honey and wax, beads, precious stones and coral, spices and herbs, indigo and vermilion.—St. Nicholas.

Robbins.

Robbins.—That fire at Higbee's house was a great blessing to him. Mack.—A blessing? Robbins.—Yes; his daughter's piano was destroyed.—Truth.

AWKWARDNESS is epidemic in a state of intoxication.—Young Men's Era.

The Baker's Bill

Tells of a great nervous appetite in my family as a result of taking Hood's Sarsaparilla. A friend who knew of my poor health advised me to use Hood's Sarsaparilla. After two bottles a great change was noticed. I do not have that tired feeling, no pain in the stomach, especially after eating, and in fact I feel like a new person and hold some pleasure in life. Every member of my family is using Hood's Sarsaparilla and feeling better than ever. Many Ecks, 165 Alabama Ave., Brooklyn, New York.

Hood's Sarsaparilla Cures

Hood's Pills cure Biliousness. 25c.

DR. KILMER'S SWAMP

Root

THE GREAT KIDNEY, LIVER AND BLADDER CURE.

Biliousness

Headache, foul breath, sour stomach, heartburn, pain in chest, dyspepsia, indigestion.

Poor Digestion

Distress after eating, pain and bloating in the stomach, shortness of breath, pain in the heart.

Loss of Appetite

A splendid feeling to-day and a depressed one to-morrow, nothing seems to taste good, tired, sleepless and all unstrung, weakness, debility, Swamp-Root builds up quickly a rundown constitution and makes the weak strong.

At Druggists 50 cents and \$1.00 size. "Invaluable Guide to Health"—Free—Consultation Free. DR. KILMER & CO., HINGHAMSTON, N. Y.

ELY'S CREAM BALM

Opens and clears the nasal passages, relieves pain and inflammation, heats the throat, protects the membrane from colds, restores the sense of taste and smell. The balm is quickly absorbed and affords relief at once.

A particle is applied inside each nostril and is absorbed. Price 10 cents at Druggists or by mail. ELY BROTHERS, 67 Warren Street, New York.

WASHINGTON LETTER.

Washington, Oct. 1, 1894.

The more the administration crowd thinks of the nomination of Senator Hill for Governor of New York the less they like it. Publicly it is difficult to get them to talk about it, for they are to utter the usual platitudes about their being in favor of the nominee, and peculiar circumstances surrounding the case which are not understood outside of the State; but privately they do not hesitate to say that the whole business was a put up job, for the purpose of making Hill, who was only a short time ago in danger of being publicly read out of the Democratic party by his fellow Democratic Senators because of his opposition to the tariff bill, the leader of the Democratic party. The nomination has already proved decidedly embarrassing to the managers of the Democratic Congressional campaign. They have been sending out literature in defense of the tariff bill, and especially the income tax clause of it, and here is Hill, who voted against the tariff bill, nominated for Governor of the great State of New York, on a platform that specifically condemns the income tax. They don't know what to do. If they shout for Hill they offend Mr. Cleveland, who will control the Federal patronage until March 4, 1897, and if they don't they offend Hill, who may be the Democratic nominee for the Presidency two years hence. The Republicans, while conceding the truth of Dan LaMont's comment, that "Hill is a vote-getter," are pleased with the nomination, because they are confident that it will result in the election of Mr. Morton and in making the electoral vote of New York certain for the Republican nominees in 1896. They fully agree with the administration men in believing that Hill's nomination was a put up job, and that its author was David B. Hill, but they think the administration ought to be glad of it, as Hill will be defeated and thus eliminated as a factor in National politics. The administration men would be glad enough of the opportunity to assist in the eliminating process, were it not for their knowledge that if New York elects a Republican Governor this year it will almost certainly go Republican in the Presidential election.

About the smallest piece of political work ever done by any administration was the resumption in a small way of the coinage of silver dollars, in order that the coins might be used by stamp speakers and personal workers among the more ignorant voters of the south and west to convince them that the Cleveland administration was so friendly to silver that it was still coining silver dollars. Of course this little trick will not fool intelligent newspaper readers, who know that Mr. Cleveland, who ever sat in the President's chair, but from information received here these few 1894 silver dollars are feeling some uneasy. However, they are mostly in sections where the Populists, not Republicans, are injured. Still, it is a piece of dirty work.

Secretary Carlisle evidently did not greatly enjoy his visit to Mr. Cleveland. Perhaps the bad news he carried of the Democratic Congressional outlook was not well received. At any rate, the Secretary, who is ordinarily a man of even temper and pleasant disposition, has been in a terribly bad humor ever since his return. It is said that Mr. Cleveland vetoed several propositions submitted to him by Mr. Carlisle concerning Treasury business, and that one of them was the proposed formulation of rules for the payment of a rebate upon imported alcohol used in the arts. Whether this be true or not your correspondent does not undertake to say, but it is borne out by the semi-official announcement that the Treasury Department will not undertake to put into effect the clause of the tariff law authorizing such rebate, without further Congressional legislation.

The Democratic Congressional campaign committee contained a lot of thoroughly disgusted individuals when the cabled report of that fool speech made before the London Chamber of Commerce by Representative Wilson, of W. Va., reached Washington. Some of them privately admitted that any man who had little enough judgment to make such a speech in a foreign country ought not to be elected to Congress, and few of them now think that he even has a chance to be elected. The speech is regarded as such excellent Republican campaign material that a committee from Mr. Wilson's district came to Washington as quick as they could get here after seeing the tabulated synopsis of the speech, to ask the Republican Congressional committee to secure a full stenographic report of it for general distribution in the district.

trict to know the anti-American language which was so loudly applauded by the men whose interests are all anti-American, and the Republican committee will aid in carrying out their wishes. Every voter in Wilson's district will be given an opportunity to read that speech.

The Stability of the Republic.
The people of the Second congressional district of West Virginia should seriously weigh the claim of Hon. W. L. Wilson to again represent them in Congress. This gentleman's speech before a lot of British millionaires, in which he questioned the stability of our political institutions, puts him outside the number of those who may properly ask for the votes of their fellow citizens in order to carry forward the trust of self-government and free government bequeathed to them from the founders.

Professor Wilson is a college man, and as such had peculiar responsibilities in the educational field. His learning might be considered as entitling him to hold the extraordinary views expressed, as being those of men competent to estimate the prospective fate of their country. Fortunately, he is alone. No other occupant of an academic chair in this country joins him in saying that the American republic will be short-lived. Take the most recent examples of American scholarship, the splendid work of Professor Shafter and study the hopeful views he has as to the United States. Take the fine essay of President Eliot, of Harvard, as to the stability of the republic in the current "Forum" and compare these weighty and well-settled utterances of great scholars with that of Professor Wilson, of West Virginia. It passes belief that any one can vote to put the latter again into the great council of the nation after disclosing his conviction that "of all governments a free government is the most uncertain and short-lived."—Chronicle Telegraph.

Mountain Lake Park.
Your correspondent hardly knows where to commence with local items. The past week has been full of events and pleasures.

The friends and neighbors of John Danhill a few evenings ago called on him with a pleasant and cheering donation.

Miss Jennie Smith and several others spent Friday at Harper's Ferry, Pennsylvania.

Visitors still register at our hotels.

Supt. Radisill leaves Thursday on business trip to New York.

Lot sales at the Park do not abate. The sales since July 1st will exceed \$9,000.

Thos. Mong, of Wheeling, has purchased the Beall cottage.

Dr. Watson will buy the Wilkes cottage.

Mrs. Henry Feltz will put a two story addition to her cottage, and Mrs. Dr. Watson, of Postoria, Ohio, will occupy it.

Shartzer and Spedden have the contract to erect a cottage on the corner of D street and Hazel Glade drive.

Wyatt R. Johnson has the contract to erect a two story cottage on the corner of E street and Hazel Glade drive, to cost about \$1200.

Conrad Michael and son, Clarence, are at work on a two story house located on Deer Park drive.

Concrete walks are being put down in front of Ohio cottage and the Weaver and Bardall cottage.

A good winter kitchen 13x17 has been added to the Weaver & Bardall cottage.

The Jennie Smith Hotel Co. has been chartered. Capital stock \$10,000. The board of directors are J. A. Hayden, Pres., C. Rathbun, Secy.; P. T. Garthright, Treas.; Miss Jennie Smith and J. O. Smith. The new company have bought Grace Hotel from Miss Jennie Smith.

Miss Jennie Smith has leased "Faith" cottage from Miss Sarah Harris, and she, Jimmie and grand-ma will reside there. May their joy be great.

E. C. Cline has rented the cottage adjoining Mt. View Home, for the winter.

Wheeling and Pittsburgh avenues are a surprise to everybody.

How those \$50 lots did go! Hot buckwheat cakes could not have gone faster. Only six lots left for sale.

The will of Miss Sherman has been found. In a few days the contents will be made known.

J. T. Richards, a Chicago merchant, invested \$200 in four lots on Wheeling avenue.

P. T. Garthright is putting a kitchen and dining room to his F street house. Mr. Sheets, of Pittsburgh, Pa., has rented the house for next summer.

Mrs. Lizzie Talsen will put kitchens and porches to her two cottages in cozy row, this fall.

Parson Baumgardner is having some papering done to his house.

Garthright is doing some good work on the street in front of his store—a big improvement.

C. D. Kimball, of Pennsylvania, has about completed his two story house on K street. He has had a well bored.

Charles Smouse is having a well drilled on his lot. They are down over 80 feet.

Rock is being hauled for the new bridge across the Yough.

Our "summer friends" are growing fewer every day.

Mrs. Earbougher, Mrs. Sands, Paykersburg, L. A. Radisill and wife took tea with Mrs. Geo. Brown at the Masden cottage Thursday, and met Mrs. Brown's sisters, Mrs. Welch, of Ohio, and Miss Roberts, of West Va.

W. R. Johnson and Jake Erhard are getting the material ready to plaster their houses.

Mrs. M'Ilwaine and daughters will spend the winter at Atlantic City.

Mr. Entler, who ran the Allegheny House two years ago, visited the Park last week, hunting a house for a permanent home.

S. E. Thomas purchased Dr. Watson's lot on K street for \$150. A house will be erected on it for next summer.

Hayden & Eckels are preparing to plaster the second story of their store building.

Elder.
Farmers are nearly done with their buckwheat and report a very fair crop.

Mr. R. E. and Miss Eva Friend, who were reported ill of typhoid fever in your last issue, are convalescing and we hope will soon be well again.

There were two very interesting sermons preached at the Elder Hill school house Sunday.

We have prayer meeting every Thursday night, to which all are invited. Come and help the good cause along.

There was a family reunion at R. Sterling's Sunday at which there were present twenty-two children and grandchildren, which with the two old folks made just an even two dozen. All seemed to enjoy the occasion as it has been seven years since a like affair occurred.

Mr. and Mrs. Matthias Frazee were visiting Mr. Ianlah Friday Sunday.

Mr. Geo. Shartzer and wife were visiting friends in Pennsylvania a few days last week.

S. J. and S. W. Sterling are the champion squirrel hunters of this vicinity as they can find them where others fail.

Mr. Charles Frazee was calling on friends in Friendsville Sunday evening.

Mr. and Mrs. S. F. Cuppett were calling on R. Sterling Sunday.

Mr. D. O. DeWitt and wife, of Hoves, were calling at Mrs. D's old home Sunday.

Mr. James Conway, of Krug, was visiting his brother at this place Sunday.

The reason that we did not take refuge in the barn from the rain was that the storm was nearly over.

Squinting.
The most common form of "squint" is that in which the globe of the eye is turned inward. Fifty years ago "crossed-eyed" persons must have been much an evidence, judging from the forms of treatment laid down in the standard text-books of that period for the relief of the deformity. Nothing was then known of its causation, and the treatment of it, of course was entirely at fault. Most elaborate reasons were assigned in the endeavor to account for its appearance. One distinguished author attributed "squint" to "the bad custom which nurses sometime have of laying a child in such a position in its cradle that it sees the light, or any other remarkable object, with only one eye."

Reading between these lines it is almost impossible to avoid exclaiming: "Poor nurses, poor children!" for under these circumstances a nurse would be certain to be censured for her alleged carelessness, and a child as it grew older would be certain to be subjected to a treatment of a rather excessive disciplinary character for having had the audacity to acquire a "squint."

But it was in the treatment of this affliction that our predecessors excelled themselves gravely. It was laid down that one method of curing a squinting eye was "to make a child look often in the looking-glass," because "the child will see the squint and correct it." It was further pointed out that this was a useful means of cure "when volition is sufficient, as it sometimes is, to prevent the squint."

Imagination pictures a child being dispatched to its bedroom every night for half an hour for the purpose of gazing at itself in the looking-glass, and having to perform this insane task with the same regularity as that of learning its scales on the school-room piano. Again the expression, "Poor children!" unconsciously suggests itself. When the "cure" after this method was unsatisfactory, doubtless the failure was attributed to some defect

in the "volition," for which, of course, no one could be blamed except the child. In some cases the squint was attributed to a child's bad temper, but the eventualities suggested by the mention of such a subject as this had better be left undiscussed.—Nineteenth Century.

THE REPUBLICAN.

VOLUME 18.

OAKLAND, MD., THURSDAY, OCTOBER 11, 1894.

NUMBER 31.

NEWS OF A WEEK.

Happenings in and about town told in short paragraphs.

Take your chestnuts to Sineell Bros.

Dr. Ravenscroft, of Cranesville, was in our city last Sunday.

Take your buckwheat flour to Sineell Bros.

Mr. J. M. Litzinger spent last Sunday in Grafton with relatives.

A very fine line of fine dress goods just opened at Offutt & Son's.

Read our offer of a handsomely bound volume to new and old subscribers.

A nice line of yarns, blankets, comforts and flannels at Townshend & Son's.

Mr. George S. Lee, of Swanton, was in Oakland on Tuesday for a short time.

Largest, best and cheapest stock of men's clothing at Offutt & Son's.

Mr. James S. Lakin, of Terra Alta, was in town one day last week on business.

Fine dress goods, ladies' coats, blankets—everything just opening at Offutt & Son's.

Full line of men's, women's and children's woolen underwear at Townshend & Son's.

Black deeds for sale at this office. The deeds are specially ruled and printed very neatly.

Messrs. Bert Leighton and J. W. Clary were the guests of Mr. Leighton's parents last Sunday.

Sineell Bros. want 2 car loads of potatoes, 100,000 lb. buckwheat flour at the highest prices.

Messrs. H. W. Smouse and Geo. Falkenstein were at Cranesville last Sunday seeing their friends.

Kinsinger Bros., of Grantsville, whose planning mill burned a few weeks ago, are preparing to rebuild.

A Republican campaign club was organized at Bray's school house last Thursday night with fifteen members.

Mr. J. B. Bantz, of Piedmont, was in Oakland two or three days this week on business for Hon. Henry G. Davis.

The Democrat appeared last week in a new dress of body type which adds very materially to the general make-up of the paper.

Miss Maggie Stemple, daughter of Mr. Ben Stemple, went to Dayton, Ohio, Monday morning to attend school during the winter.

The public schools of Garrett county will open on the 23d day of October, 1894.

Wm. HINEBAUGH, Sec'y.

If you are looking for or are in need of a new dress, Townshend has it either in all wool, cloth or suitings for 40c per yard and up.

The crop of chestnuts this year is unusually large and many hundreds of pounds are shipped from here almost daily to the markets both east and west.

Mr. Andrew J. Harne brought to THE REPUBLICAN office a few days ago a head of cabbage weighing twenty pounds which he raised in his garden in Oakland.

Mr. J. J. Miller, of Cumberland, was here on last Saturday for a few hours in the interest of the Washington National Building and Loan Association of Washington, D. C.

We have been requested to state that the force of millers at the City Roller Mills will be doubled and that the mills will be in operation both night and day hereafter.

Take your buckwheat flour, potatoes and chestnuts to Speicher & Nethken, Deer Park. They pay the highest prices for all kinds of country produce.

FOR SALE.—An excellent cow, in fall milking after first calf, dropped in April. Also a cobby built, powerful young black mare.

JOHN W. WILLIAMS, Deer Park, Md.

Dr. J. G. Robinson, dentist, of Baltimore, has located in Oakland for the season and is prepared to do all kinds of dental work. Office with Dr. M. C. Hinebaugh. 20tf

A stray ewe came to the farm of Mr. W. H. Chadderton near Deer Park about June 1st which he wishes the owner to take away. The animal has long crooked horns and crops out of both ears. 31-3t

LOST.—At the B. & O. R. R. station, Oakland, Sept. 28, 1894, a package containing lady's tan colored coat. Party who found the same will please return to the Oakland express office.

We call the attention of our readers to the advertisement of Shapiro & Bro., which will be found on another page. This firm has the reputation of being great bargain sellers.

Miss Charlotte Zimmerman, of Terra Haute, Indiana, who spent the summer in Oakland, departed for Baltimore last Sunday morning, where she will remain during the winter as the guest of relatives.

The walls of the new school building in Oakland are up and the roof sheathing on. The building is very handsome and will be a credit to the town. When completed it will cost about thirteen thousand dollars.

All persons are hereby warned not to trespass upon my lands lying in districts Nos. 8 and 10, either by hunting, picking chestnuts or trespassing in any other manner.

E. W. KELSO.

Hon. A. G. Dayton, Republican nominee for Congress from Mr. Wilson's district in West Virginia, was in Oakland on Sunday. Mr. Dayton is working hard for his election and seems pretty certain of it.

Having just received a car load of flour, a car of salt and also a large line of fall goods our stock is now complete and lowest prices guaranteed. A call is solicited. Speicher & Nethken, successors to John Felty, Jr., Deer Park, Md. 30-3t

"I would rather trust that medicine than any doctor I know of," says Mrs. Hattie Mason, of Chilton, Carter Co., Mo., in speaking of Chamberlain's Colic, Cholera and Diarrhea Remedy. For sale by Oakland druggists.

Rev. S. M. Engle, formerly pastor of Felling Waters Presbyterian church, Jefferson county, W. Va., has accepted the call to Oakland and will arrive here within a short time with his family. He succeeds to the pastorate of the late Dr. Henry Carrington Alexander.

Mr. S. L. Townshend has sold a four-acre lot of ground adjoining Oakland to Judge Shellenbarger, of Washington, D. C., for \$1,400. Judge Shellenbarger will begin the erection of a fine summer home at once. The property is located near the home of Judge Jeremiah Wilson on the Deer Park road.

"Many of the citizens of Rainville, Indiana, are never without a bottle of Chamberlain's Cough Remedy in the house," says Jacob Brown, the leading merchant of the place. This Remedy has proven of so much value for colds and croup in children that few mothers who know its worth are willing to be without it. For sale by Oakland druggists.

Mr. John Shartzler will soon begin the erection of a three story building in Oakland near THE REPUBLICAN building. The proposed structure will be 40x80 feet, will be heated by steam throughout. It will contain office and lodge rooms on the second and third floors and the first floor will be given to store rooms, etc.

Every mother should know that croup can be prevented. The first symptom of true croup is hoarseness. This is followed by a peculiar rough cough. If Chamberlain's Cough Remedy is given freely as soon as the child becomes hoarse or even after the cough has developed it will prevent the attack. 25 and 50 cent bottles for sale by Oakland druggists.

Trespass Notice.

All persons are forbidden hunting, fishing or trespassing in any manner upon my lands in district No. 8, Garrett county, under penalty of the law.

W. McCULLOH BROWN.

Mr. and Mrs. Chas. Falkenstein and Frank Falkenstein, of Cranesville, were the guests of Mr. J. M. Falkenstein a few days the first of the week.

During the past week Mr. Williams made a tour through the county and it is related that at Selbyport he met but one Democrat and he was the postmaster at that town. In conversation with a gentleman in Oakland after his return he related the fact and added: "Thank God he was united and harmonious."

Mr. and Mrs. L. H. Karn, of Port Orange, Florida, arrived in Oakland last Saturday afternoon and are visiting friends here. They will return to their Southern home in a few weeks and reside there permanently. Mr. Karn, who was a hay fever and asthma sufferer when he lived here has been entirely cured of the malady since he has been living in Florida.

By reference to our advertising columns it will be seen that the school authorities have called educational meetings in different sections of the county for the purpose of discussing the merits of the school house bond bill and other matters pertaining to the public schools of the county. It is hoped that the meetings will be well attended.

The remains of Henry Patterson were interred in the Grantsville cemetery Saturday last. Funeral services were conducted by Rev. J. H. Enlow. Deceased was born in this town and drifted from place to place finally becoming a brakeman on the Pittsburgh division B. & O. R. R., and was killed not far from Connellsville, as we were informed while discharging his duty, by being caught and run over by cars. His age was 25 years, 7 months and 13 days.—Grantsville corr. Meyersdale Commercial.

Benjamin Beachy died last Friday night. The remains were interred in the Amish Menomite cemetery near Grantsville Sunday 3 p. m. Funeral services were conducted by D. D. Yoder and J. S. Miller. Age of deceased was 76 years, 1 month and 6 days. The wife and five children had preceded the husband and father to the land beyond; two sons, Jacob and Paul, survive him. Jacob is a farmer and lives near Smithville, Ohio. Paul lives on the farm formerly owned by his father, which has been nearly all cleared of the forest by his labors in early life and which is situated several miles south of town. Mr. Beachy was a son of Bishop Jonas Beachy of the Amish Menomite church and long since dead; he was also a member of the same organization unto his death. —Grantsville corr. Meyersdale Commercial.

There is no medicine so often needed in every home and so admirably adapted to the purposes for which it is intended, as Chamberlain's Pain Balm. Hardly a week passes but some member of the family has need of it. A toothache or headache may be cured by it. A touch of rheumatism or neuralgia quieted. The severe pain of a burn or scald promptly relieved and the sore healed in much less time than when medicine has to be sent for. A sprain may be promptly treated before inflammation sets in, which insures a cure in about one-third of the time otherwise required. Cuts and bruises should receive immediate treatment before the parts become swollen, which can only be done when Pain Balm is kept at hand. A sore throat may be cured before it becomes serious. A troublesome corn may be removed by applying it twice a day for a week or two. A lame back may be cured and several days of valuable time saved or a pain in the side or chest relieved without paying a doctor bill. Procure a 50 cent bottle at once and you will never regret it. For sale by Oakland druggists.

For Sale.

The undersigned offers for sale, wholly or in part, his farm of 75 acres, adjoining Monte Vista, near Oakland. For terms and particulars call on or address

Wm. Roth, Oakland, Md.

29-3t.

Bucklen's Arnica Salve.

It is guaranteed to give perfect satisfaction or money refunded. Price 25 cents per box. For sale by all druggists.

5-17

On the Death of Henry A. Rasche.

Our little town was unexpectedly shocked at the untimely death of our fellow townsman, Henry A. Rasche, a man and gentleman in its literal sense. Quiet and unobtrusive, keeping within his own bosom his trials of life, minding his own business and interfering with no one. Safe and honest to be depended upon, retiring in his, a modest disposition. Few knew him. But the writer did, and thinks he can judge a man of true worth. During the early years of the California gold excitement he made his venture, went and left his family, but I learn he provided well for them. I know they never suffered. I intimately knew them. His wife was a true wife and devoted mother. He returned and gladness and joy was expressed by all. A devoted and loving father and husband, unselfish and self-sacrificing to their welfare and best interests; a man of good judgment, forbearing and just to all, ever excusing himself to make home happy and always at home with business. He did not actually call him away. Devoted to his wife and children, ever striving to please and provide for their present and future comfort, and although he, on account of his quiet and retiring disposition, was but little known, I can say he was a man of sterling integrity and an honored citizen. He is gone. His life's effort has ended. 'Twas faithful and true to all. Quick and sudden was his death. Unchecked by himself or any one he passed away. Attempting to adjust some fault in his engine he fell, and before assistance could relieve him life's vital spark was so quenched that he expired after a gasp or two. And so now he will only be one to be remembered by those who knew him, appreciated his moral worth and honored him. He was energetic, honest and faithful to all his duties. Can more be said of any man? We knew him and his family intimately. Mr. Rasche was a man of great patience and forbearance. Those who knew him best and saw him nearest, know that he had many trials, sufferings and afflictions to endure, but he ever remained a kind father and affectionate husband. His charity was not of sounding brass or tinkling cymbal, but his charity was in the words of the apostle, patient. It was kind, not provoked to anger, boreth all things and endureth all things.

Mr. Rasche was a faithful member of the Catholic church. His funeral took place on Tuesday at St. Peter's church with Requiem High Mass at 10 o'clock. Father Mattingly was celebrant. After the funeral services Father Stanton, of Lonaconing, preached an eloquent and impressive sermon. Father John Ryan, of Washington, assisted in the sanctuary.

May he rest in peace and perpetual light shine upon him.

DR. J. LEE MCCOMAS.

Mr. Brady's Flag.

Everybody in Allegany county knows Mr. Jas. T. Brady, proprietor of the Brady House at Lonaconing. For many years Mr. Brady has been an active and influential Democrat, and has frequently represented his district in county, congressional and State conventions. Two years ago he was one of Mr. McKaig's most active and faithful supporters. But Mr. Brady has undergone a change of heart. He cannot follow his party in its wild and reckless crusade against the interests of the community in which he lives, and he has come out openly in support of Mr. Wellington.

A few days ago he raised a large flag on top of his house attached to which is a streamer bearing the words "Wellington and Tariff Protection."—Cumberland News.

Valuable Advice.

Avoid lawsuits and loss by consulting H. P. Tasker and examining his abstracts of the "conflicting titles" before paying for Military Lots. Charges reasonable. Office in Colarneau Cottage, opposite the bank, Oakland, Md. 41-tf.

Will You Suffer

With rheumatic pains, sciatica, sleepless nights, dropsical accumulations, or nervous headaches when Messrs. Cober & Boyer will cure you if their directions are followed. Can be consulted at the Central Hotel or at their room in the Pritchard building, Oakland, Md.

For Malaria, Liver Trouble, or Indigestion, use BROWN'S IRON BITTERS

Ripans Tabules relieve headache.

Circular Letter to the Sunday School Workers of Maryland.

OFFICE MD. S. S. UNION, 216 N. Charles Street, Baltimore, Oct. 6, '94.

Dear Fellow-Workers:

In accordance with the recommendation of the Sunday School Union of London, (England) you are asked to observe October 21st and 22nd, 1894, as days for special prayer in behalf of the Sunday-school cause.

"Not by might nor by power, but by my Spirit, saith the Lord of Hosts." Let us earnestly pray for the Divine co-operation in our labors, without which there must be utter failure in all our efforts. We have reason for gratitude at the great advancement which has been made during the present year; but confronting us yet are many obstructions—the materialistic tendencies of the age are undermining practical faith in God—firmly entrenched evils are wooing thousands of our young into channels of vice—but if God be for us, if His power be linked with human effort, who or what can stand against us? "It is not the will of your Father which is in Heaven, that one of these little ones should perish."

The following arrangements are suggested for observance as far as practicable:—

That on Lord's Day morning, October 21st, from 7 to 8 o'clock, Private Intercessory Prayer be offered on behalf of Sunday Schools.

That the opening engagements of the Sunday School be preceded by a meeting of the teachers for prayer, or that instead of the usual school exercises a prayer meeting of the teachers, scholars, and congregation be held.

That ministers be asked to preach special sermons on the claims of the Sunday school, and the necessity for increased preparation and consecration on the part of Teachers.

That on Monday morning, October 22nd, teachers again bring their scholars, one by one, in private prayer before God.

That on the evenings of one or more of the following days special services for young people be held where practicable.

Fraternally,
G. S. GRIFFITH, Pres.,
FRANK WOODS, Sec'y.

The Disputed Boundary.

On Wednesday morning of this week there left here for Aurora a party of gentlemen engaged for the purpose of surveying the disputed boundary line between West Virginia and Maryland. The party is composed of Lawyer S. J. Poling and Surveyor John Harned on the part of Maryland, and Lawyer Prince and Surveyor Julius K. Monroe, on the part of West Virginia. They are assisted by the following gentlemen: Messrs. H. M. Ravenscroft, Geo. A. McGee, Cam Lantz, Lewis Lantz, Jas. Watson, W. W. Monroe, D. Y. Morris and Geo. Menear. The party will go at once to the beginning of the disputed line and begin work this (Thursday) morning. They are amply provisioned for the work in hand, which will occupy probably two months time.

In connection with this subject, we have heard considerable comment during the past few days upon the probability of the line being run so as to throw part of Preston county, and Terra Alta in particular, into Maryland's territory. Anyone at all familiar with the disputed boundary question will not entertain the above idea even for an instant. If the line is changed at all—which is very improbable—it will be so slight a change that it will be hardly noticeable. West Virginia would not give up so large a part of her territory without innumerable years of litigation, and Maryland would hardly put in a claim for so large a share of West Virginia's soil. Terra Altans can remain at ease—as long as they reside here they will be citizens of West Virginia and can continue the refrain of that grand old song, "The West Virginia Hills."—Terra Alta Oracle.

For Sale Cheap.

The Veitch residence on Oak Street, between 3rd and 4th. House contains eleven rooms and is in good condition. Stable and all other necessary outbuildings. Well of good water. There are two lots with this property, each containing a full quarter acre.

THURSDAY, OCT. 11, 1894.

REPUBLICAN NOMINATION.

FOR CONGRESS:

GEORGE L. WELLINGTON,
OF ALLEGANY COUNTY.

Forty-eight prominent men in Louisiana, heretofore Democrats, have asked Governor McKinley to come there to speak. The world does move.

The London friends were glad to hear of Prof. Wilson's reception at home. They would rejoice more to hear of his election. If they could vote he would have a cinch on his seat in Congress.

Mr. Wellington has spent one week in Garrett county and as a result, the Republicans of that section are jubilant and the Democrats correspondingly despondent. Garrett will give the Republican candidate a big majority.—Montgomery Press.

That she will!

Two weeks ago we invited the Democrat to produce its figures proving that the price of wool had advanced since the advent of the Gorman bill.

So far it has failed to produce which leads us to the opinion that it either had no figures or if it did they have escaped. However, the invitation stands.

It would be very sad if Mr. Williams were to be unable to take a hand in further tearing down tariff defenses in next Congress. It looks as though the people of this district have determined to give him all the time he needs to cultivate the acquaintance of the fact that the farmers of Garrett county want protection on wool and lumber and a bounty on maple sugar.

He Should be Beaten.

Gov. McKinley well said that no American chamber of commerce had yet banquetted Prof. Wilson. It is a queer spectacle that the chairman of the ways and means committee of the American Congress should be the object of such distinguished attention from a body of foreigners, whose interests are to be promoted in proportion as those of Mr. Wilson's country are to be damaged by the theories he advocates. These British gentlemen are not industrial philanthropists. Great Britain is nothing commercially if not selfish. It is solely because of the benefit that is to be derived by her from the Wilson idea that she dines and wines him.

But in receiving this British flattery Chairman Wilson need not to have gone so far as to apologize for the institutions of his own country. Here is what he said:

"We are being rapidly sobered,

though unparalleled, by the truth, forced upon us, that of all human governments a free government is the most complex and difficult, and judging from the world's experience, the most uncertain and short lived. You and your institutions are strong because they are deeply rooted in the past."

Mr. Wilson, it seems, has other qualifications for being a good Britain besides that of being a free trader. It is not true historically that free governments are "difficult" or "short lived," and Mr. Wilson should not have gone so far as to falsify history in order to confess himself ashamed of his own republic and enamored of the British monarchy.

It will probably be found next month that Mr. Wilson's West Virginia constituents do not desire a Representative whose economic theories advance foreign interests at the expense of those at home, and who goes to London to express his convictions of the stability of royalty and the weakness of democracy.

Mr. Williams, the Democratic nominee for Congress, has completed his tour of this county, and we wonder what he honestly thinks of the outlook.

We would like to know whether he thinks the Democrats of Garrett county are satisfied with his position on the tariff. Probably we are too fast in this matter for Mr. Williams failed to state what his position was and therefore the faithful and untainted cannot form any opinion as to where Mr. Williams stands.

The voters of Garrett county having heard both Mr. Wellington and Mr. Williams can form their own opinions as to who would best represent their interests in Congress.

Where does Mr. Williams stand? Is he in favor of a tariff on coal? Is he in favor of a duty on wool? Is he in favor of a bounty on sugar?

These are questions of vital importance to our people. Did he frankly declare his position on any of these questions? If he did not then how can the people of Garrett county support him at the ballot box? What sort of a Representative would he make when he has no defined position on any of these matters? Would not Mr. Williams as our Representative, simply misrepresent us as McKaig did? Would he not stand where Mr. Cleveland stands? Where the present House of Representatives stands—in favor of free raw materials and leave every interest of Garrett county open to foreign competition and foreign cheap and pauper labor?

Where does George L. Wellington stand?

He declared from every platform in the county where he addressed his enthusiastic followers, that he stood—

First for a duty of seventy-five cents per ton on coal.

Second, for a duty on lumber.

Third, for a duty on wool.

Fourth, for a bounty on sugar.

Fifth, for a high rate of wages.

Sixth, for fair and liberal pensions to the Union soldier.

This is his platform. This is where he stands. There is no equivocation or uncertainty about Mr. Wellington's position. To-day he is the champion and defender of every interest of our people and the same position which he took among the hills of Garrett was also his platform among the lowlands of Montgomery.

And upon this platform he will be triumphantly elected.

The Democratic Meeting in Oakland.

The Democratic meeting in Oakland was held on last Saturday night. "T. Jay" the Cumberland News' correspondent here reports the meeting in the following language:

"What was intended to be a grand rally and Democratic mass meeting came off according to advertisement last night in O'Fall's Hall. When the hour of half past seven arrived (the time at which the speaking was advertised to begin) there were not twenty-five persons in the hall. The band played several popular airs on the street and then went into the hall and played there. The music had the desired effect of drawing together a few

more people and by eight o'clock a fair sized audience had assembled. The meeting, however, was not as large as the Democrats usually have at this place.

"There was a church festival and oyster supper at the Glades hotel which undoubtedly kept some persons from the meeting.

"At eight o'clock chairman of the State central committee, R. T. Browning, rapped for order and announced the following officers: G. S. Hamill, president, and the following vice presidents, Swanton, C. T. West and Rudolph Beckman; Selbysport, Jasper Guard and Capt. E. M. French; Grantsville, W. R. Getty and Eli Stanton; Bloomington, John Collins and Andrew Mullen; Accident, William Dewitt; Oakland, G. W. Merrell and Edmund Jamison; Ryan's Glade, J. W. Mason and Henry Kidder; Johnson's, Samuel Johnson and Patrick Carey; Deer Park, E. Droegge and Samuel S. Hoye; Elbow, J. F. Robeson and Walter Warnick; Bittinger, C. E. Ellithorpe and James Buckle. This is practically the same list which has been read out at every Democratic rally in Oakland for several years."

"President Hamill in taking the chair made a very brief speech in which he returned his thanks for the honor of presiding and asked for the united support of the Democracy for the candidate. He said: 'I have known Mr. Williams for twenty years and he stands above reproach, and equal in ability to any lawyer in the State, and I know he will be faithful to any trust which may be committed to his hands.' This is about what the same president said two years ago with regard to the gentleman who was then the candidate. The presiding officer then introduced Ferdinand Williams, Esq., who made an address of an hour or more. He was very earnest and it was easy to perceive that he believed what he was saying. He told the audience that he would discuss the tariff and would convince them by irresistible logic that the principles of the Democratic party were right and true, and that the Republican principles were founded on error. 'It is my duty,' he said, 'in discussing the tariff to uphold the principles of the Democratic party. The Republicans appeal to the manufacturers and monopolists because they have money—to the wage earners and agriculturists because they have votes, but the Democracy appeals to the whole people and to all people alike. The Republicans say a protective tariff will set in motion the silent looms and spindles and heat up the cold furnaces which are now idle. That is probably true. But even then the wage earner gets hardly enough to keep soul and body together. They live in poor houses and command only one dollar per day.

"It would be impossible to give them less. Our wage earners are no better off than those of England, Germany and France." He innocently asked is labor protected? And said no. Our ports are open to foreign labor. Does not Mr. Williams know that American labor is better paid than any labor in the world. The voters of Garrett county know that much. If this were not true why do so many foreign laborers come here to better their condition? If it is not true why do the laboring people who come here save up their wages and send over for their friends and bring them here. Would they bring their fathers and mothers and friends if they were doing as well where they are? Mr. Williams ought to know better than to resort to such irresistible logic as that. When he admitted that a protective tariff would start up idle manufactures he gave away his whole case because everybody knows that would give employment to labor and prosperity to the country.

"He was equally unfortunate in his statements and illustrations in reference to the agricultural classes. He said the farmers were compelled to pay high prices because they were cut off from the foreign manufacturer. If, said he, you go up near the British line and on the American side you are asked two dollars for a blanket and you are asked for the same article on the Canadian side only one dollar, and if you are asked by the American ten dollars for a coat and only five for the same article by the Englishman everybody would buy from the other side of the line at low prices. This is just what we could do if McKinleyism did not post sentinels at every point to keep foreign goods out of the country. That is another sample of irresistible logic. The speaker did not tell us who would give employment to all our laboring people when our furnaces are shut down, when our mills are silent, when our coal mines are closed and all our money sent to enrich the foreign manufacturer. What do the laboring people think of the position in which such a policy would place them?"

"BILL SMARTY."

He Attends the Democratic Meeting at Friendsville.

As the congressional election is approaching I am traveling through the 6 congressional district looking up the intrins of our grate party, a kind of mack strafe the paths of our leader, Mr. Williams, who is to be elected to Congress this fall.

It was on the 2 day of October, 1894, when I arose to Friendsville, Md. I at once proceeded to procure a place for our leader to speak at night. At first it wuz thought to hire the band to play some music for the meetin, but upon secret consultation it wuz decided we could not afford it inasmuch as so much of the campaign funds had to be spent to pay a bounty to some wool buyers we are senden out over the country to purchase wool at an advance of 3 to 6 cents on the lb. above the market price, so our speakers can tell the people that wool is goin up under the present tariff system.

When the hour of 7:30 Past Meriden, arose, (which is in the afternoon) our speaker wuz promptly on hand. We succeeded in gettin together five of the faithful dimierats, and got 'em up in the 'amen' corner and elected a cheer-man to preside over the meetin, and just as he wuz ready to interduce the speaker a hnl persession of Republicans cum marchin in until the hall wuz full of Republicans and backslid dimierats. It looked offal discouragin to see so many onst dimierats backslid and got into the skepticism of unbelief.

But that is the way it always goes—when a feller backslides he gets into skepticism. Well, our orator got up to speak with us five faithful dimierats seated round him to cheer and say "amen" at the proper times which wuz twice during the speech. He commenced by qualifying himself with a oath that he wuz there to tell the truth, the whole truth, and nothing but the truth, and then dividen his subject into two parts: 1. The benefits of the present tariff system. 2. The political situation of this congressional district. With powerful eloquence and grate logical reason he showed how the people are a prosperin since Congress passed the tariff bill which Cleveland did not sign.

He made it offal plane that wool had gone up and sugar gone down and that the laborin man wuz well paid. (Cheered by the five faithful) He strongly denounced the McKinley bill as a prohibitory law, that under it no foreign ships could cum to our port. After discussin to some length along this line he took up the 2 part of his subject, and showed that he wuz the only representative of the people, that Mr. Wellington wuz not nominated by the Republicans, but by a ring, a money ring. He said that the Republicans of Garrett county did not vote in the convention for Mr. Wellington and qualified himself to that effect by sayin "I speak the truth, the hnl truth, and nuthin but the truth." A Republican who sot near me, almost spoke out in meetin and said, "that is a lie." I heard him say it, for if our leader can get the people to think that Mr. Wellington wuz nominated by a ring maybe we can get some of the backslid dimierats back into the fold. But a lot of 'em have tewed they have voted their last dimierat ticket. One fellar said to me the other day in a private conversation, "this administration has took all the dimiercy out of me" that he had always voted the dimierat ticket, but did not know why he did it, unless it wuz because his father wuz a dimierat, but says he, "I'm done now." I couldn't say no more, for I see he meant it.

Well, our orator went on to some length on this part of his subject and concluded by exhortin the faithful few to do some missionary work, and with tears in his eyes besought us to proselyte all we could from the other side and get 'em to vote for him. He said if we would elect him to Congress he would recognize that he wuz the representative of the people, and stand by the principles of the dimieratic party and see that the sugar producers of Garrett county did not get bounty on sugar. And the Republicans fairly sneered at him while we five cheered.

I learned that the Republicans had a meetin a week before and Mr. Wellington spoke and they succeeded in persuaden several to backslide into Republican unbelief, and I fear they are goin to sweep the country here. If our speaker had got here first he might have saved some of 'em.

Cleveland and dimiercy have a few faithful here who have not lost their first love. One said the other day if Cleveland would go down and jump into the river and drown himself, he would in duty be bound to do so too. O! what could sever such love? I think Cleveland will yet take him to the White House and take care of him, and to tell

the truth he needs it.

Well, I have written to some length and will close by promisin more anon and signen

BILL SMARTY

Of Interest to Landowners.

A witness in court at Dubuque, a few days ago, injected some politics into the answers of a cross questioner and expressed the feelings of a good many Democrats throughout the country. The name of the witness was Ward and this is the account of the incident:

"Mr. Ward, did I understand you to say that land is not worth as much now as it was two years ago?" "Yes sir; that's what I said."

"Will you please tell the court why it is not worth as much now as two years ago?" "Well, since Cleveland was elected the price of land and everything else has gone to the devil."

This answer brought down the house, and Democrats and Republicans alike in the court grew red in the face trying to keep from laughing outright.

"Are you a Republican, Mr. Ward?"

"No, sir; but if things keep on the way they are now, I don't think it will be long before I will be one."

—Sioux City, Ia., Journal.

Maryland Highways.

While public debt is, as a rule, to be avoided it is often merely a matter of arithmetic to show that it sometimes pays to create a public debt. Frederick county, Md., for instance, spends about \$25,000 a year in repairing roads. At 4 per cent the county could borrow \$500,000 for \$20,000 a year. With \$500,000 it could make 250 miles of macadam road, which, with the present turnpike roads, would probably cover all the important roads of the county. The sum of \$5,000 would then remain, without increasing present expenditures, for repairs of a sinking fund.

Such a policy as this is not an experiment. It has been tested in New Jersey, and the result in the public esteem is shown by the extension of the system. This leaves out of consideration the saving to the farmers and other taxpayers effected by good roads. By being able to reach market in the winter season, by the saving in time, horse-flesh and vehicles, it is estimated that the average farmer can save far more than enough each year to pay his whole tax bill. It is only a question of time that the New Jersey system will be introduced into Maryland, at least into those rich counties where there is plenty of stone.—Baltimore Sun.

Communicated.

To the Editor of the Republican.

The Democrat of last week in its frantic appeal to the voters of Garrett county to support Williams, said: "You are now getting a taste of what Democracy will do for you." Very true, and as Cleveland once said: "The people need an object lesson," and we have been having it with a vengeance. Yet, with dire disaster, idleness and financial ruin, with such a large number of unemployed which according to Bradstreet's made the frightful aggregate of 801,885 men and which afterward was increased to more than one million, with an Administration which has shown itself incompetent and which, with a large majority in Congress, has miserably failed to keep its pledges to the people, an Administration which is a disgrace to American civilization, the Democrat asks the voters of this district to return the party to power that has made such a miserable failure of the administration of public affairs that thousands of honest Democrats throughout the country are disgusted with the actions of their leaders and will no longer vote the Democratic ticket.

Yes, it is true the Democratic party gave us a tariff bill after months of wrangling. It is a bill, to use the words of President Cleveland in his letter to William L. Wilson, "means party perfidy and party dishonor," and in the same letter Cleveland asks "how can we face the people after indulging in such outrageous discriminations and violations of principle." This is what Cleveland had to say of the bill which the Democrat seems to love so much and of which it says there is more to follow.

They gave us a tariff bill that passed the House which favored free coal. Will the Democrat tell the miners of Western Maryland that it is in favor of free coal; and your party leaders who have shouted themselves hoarse telling us what friends they are to the workingman where were they when the delegation of miners went to Washington last winter to protest against free coal and McKaig, the great friend of the miner, showed his friendship by voting for free coal, and yet he could not endorse the Senate tariff bill but voted against the bill in caucus, ashamed of the bill that the Democrat says is "going to bring joy to the people." I suppose that joy will come when the bill is re-

pealed by a Republican Congress.

We are told now that it is the McKinley bill that is the cause of all the troubles in our land and yet only a short year ago Democratic papers and orators all over the land said it was the purchasing clause of the Sherman silver law that was the trouble and even the Garrett county Democrats in their platform spoke of the "Sherman silver bill by which so much disaster has come to the business interests of the people." The Republicans said it was not silver but Democratic free trade, and the Republicans in Congress helped repeal the Sherman law. But the trouble was the blighting hand of free trade Democracy had clutched the business of the country by the throat and finally gave us a bill opposed to the best interests of the American people and so much in favor of Europe that the London chamber of commerce gave their true friend, Hon. Wm. L. Wilson, a banquet at which he made a speech that we would like the Democrat to publish so that the voters of Garrett county could see what Wilson had to say. Like the Democrat he said amongst other things that there was more to follow. It was a speech that nearly equalled that of Cleveland's "Cousin Ben" to the manufacturers of Sheffield.

With devastation and ruin hanging like a pall over the land, with such a sad condition of affairs that has not been seen in the land since the Democratic days "lefo' de wah" and which perhaps has never been equalled in the history of the United States it will find its loves labor lost to appeal to the voters to elect M. Williams.

The people have tried the Democratic party. It has miserably failed to keep its pledges; its leaders have shown themselves incompetent and Democracy has proven to be a little too expensive for the good of the people and this fall the voters will bury the Democratic party like the old Welch woman said to bury the devil "face downward so the more he dug the deeper he would get."

In the Sixth Congressional District of Maryland we will send a man to Congress upon a platform of protection and you will find that "the mills of the gods grind slowly but they grind exceeding fine."

HOOSIER.

Married.

COLLINS-SANDERS.—On October 3, at the residence of the officiating minister, Rev. B. Ison, William Benton Collins and Miss Ann Sanders, both of Harrison county, West Va.

SNODGRASS-TAYLOR.—A very pretty wedding was witnessed at the parlor of Mrs. C. B. Cropp last Friday evening. The parties were Prof. V. C. Snodgrass, of Pullman, W. Va., and Miss Visa Taylor, of Pensboro, W. Va., Rev. S. K. Arbutnot, of St. Paul's M. E. church, officiating. They left Saturday morning for their new home on the W. Va. Central & Pittsburgh R. R. Their friends wish them a long and happy wedded life.

Dead Letter List.

List of mail matter remaining unclaimed in the postoffice at Oakland, Garrett county, Maryland, for the week ending October 13th, 1894, the parties addressed being unknown to the postmaster.

D. P. Mays, Mrs. J. F. Browning, Samuel Eland, Mrs. M. H. S. Wilson, G. O. Baerman, Mrs. Lavinia Speers, T. A. Moore, Mrs. Carrie Davis, J. D. Kiser, Mrs. Laura Arthur, John Sunk, Mrs. Virginia Foster, John Evers, George Neeb, Frank M. White, Wm. H. Minor, Lieut. Jas. O'Donnell.

One cent on each article is chargeable for advertising. Parties calling for this matter, will please say it is advertised, otherwise they may not receive it.

E. H. BARTLETT, Postmaster.

Dentistry.

Dr. I. L. Ritter will be at Accident, Oct. 22; Hoyes, Oct. 23; Cranesville, Oct. 24. Teeth extracted without pain. 31-2t

Notice.

To the farmers of Garrett county. Having accepted the agency for the sale of "Natural Plant Food," one of the very best fertilizers now known, I am prepared to fill all orders promptly. For terms and particulars apply to

MICHAEL W. DURST, Grantsville, Md.

Marriage Licenses.
The following persons have been granted licenses to wed since our last issue:

Lloyd Findlay Ashcraft and Pearl Martin.

William Benton Collins and Ann Sanders.

Price Smith Lish and Emma C. White.

A Quarter Century Test.

For a quarter of a century Dr. King's New Discovery has been tested, and the millions who have received benefit from its use testify to its wonderful curative powers in all diseases of the Throat, Chest and Lungs. A remedy that has stood the test so long and that has given so universal satisfaction is an experiment. Each bottle is positively guaranteed to give relief, or the money will be refunded. It is admitted to be the most reliable for Coughs and Colds. Trial bottles free at all drug stores. Large size 50c and \$1.00. 6

VOLUME 18

OAKLAND, MD., THURSDAY, OCTOBER 18, 1894

NUMBER 32.

NEWS OF A WEEK.

Happenings in and About Town told in Short Paragraphs.

Take your chestnuts to Sincell Bros.

Take your buckwheat flour to Sincell Bros.

Miss Jennie Loar, of Reedsville, W. Va., is visiting relatives in town this week.

New style fall and winter cloaks just open at M. L. Scott's Baltimore Store.

Mrs. Charles Wegman, who has been quite ill for a number of weeks, is slowly improving.

Miss Cora Hannis has gone to Wilkesbarre, Pa., to visit friends and relatives.

Major E. G. Rathbone is on a business trip to his home at Hamilton, Ohio.

Mr. and Mrs. Truman Casteel arrived from a visit to the eastern cities last Tuesday evening.

A very fine line of fine dress goods just opened at Offutt & Sons.

A nice line of yarns, blankets, comforts and flannels at Townsend & Son's.

Largest, best and cheapest stock of men's clothing at Offutt & Sons.

Fine dress goods, ladies' coats, blankets—everything just opening at Offutt & Sons.

Full line of men's, women's and children's woolen underwear at Townsend & Son's.

Blank deeds for sale at this office. The deeds are specially ruled and printed very neatly.

A full line of boots and shoes, gam goods and gloves at Townsend & Son's.

Sincell Bros. want 2 car loads of potatoes, 100,000 lb. buckwheat flour at the highest prices.

Rev. Henry P. Hamill, of Charleston, W. Va., spent last week in Oakland visiting his parents.

Mrs. E. G. Naylor, of Meyersdale, Pa., is in Oakland visiting her parents, Mr. and Mrs. Chas. Bolden.

Messrs. Thomas B. Wiley and Jonas Bittinger, of Bittinger, were here yesterday and to-day for a few hours.

Mr. J. S. Spedden, of McKeesport, Pa., is here working for his brothers and may remain during the winter.

Mr. and Mrs. Henry J. Mayers, who were on a visit to Wheeling friends, returned to Oakland last Friday.

Mr. Thomas J. Poddicord, who was on a business trip to Hamilton, Ohio, returned to Oakland Monday morning.

Mrs. Margaret Brook and son Marshall, of Addison, Pa., are visiting friends and relatives in town this week.

Mr. John Lee Harned, of Clarksburg, was in Oakland a few days this week on a visit to parents and other relatives.

Mr. David Durst has purchased Mr. John O. Michaels' property in the East End of town and is improving it very much.

Miss Sarah Norris offers her services as seamstress to residents of Oakland and vicinity. Reasonable rates. Address, Mt. Lake Park.

The public schools of Garrett county will open on the 23d day of October, 1894.

Wm. HINEBAUGH, Sec'y.

Mr. Scott T. Jones has returned from his western trip, he having been called home earlier than he intended coming by the death of his mother.

On last Thursday evening Mr. and Mrs. Chas. S. Davis gave a dinner party to a large number of friends in honor of Mr. and Mrs. Joseph E. Harned.

Garthright will offer 1 car white oats and wheat, mixed half and half of each, at a very low price; also one car Sea Foam and Old Dominion flour at low prices. These brands of flour are strictly No. 1 and very popular. Will trade for all buckwheat flour and nice large potatoes can get. 32-2t

Mr. Albert Ross, who has been confined to his bed for several weeks with typhoid fever, is able to be up and about his room.

Messrs. Perry W. Roek and Perry E. Kimmel, who spent two or three weeks in Ohio and Indiana, returned to Oakland Tuesday morning.

If you are looking for or are in need of a new dress, Townshend has it either in all wool, cloth or suitings for 40c per yard and up. 31-4t

Mr. and Mrs. J. R. Bell, of Baltimore, arrived in Oakland Tuesday night and are the guests of Mr. and Mrs. L. Stoddard on Second street.

We have been requested to state that the force of millers at the City Roller Mills will be doubled and that the mills will be in operation both night and day hereafter. 30-2t

The courts at Washington have decided that the maple sugar bounty cannot be collected for this year's crop. A great many of our sugar producers will be interested in this bit of information.

Take your buckwheat flour, potatoes and chestnuts to Speicher & Nethken, Deer Park. They pay the highest prices for all kinds of country produce. 30-3t

We have received a letter from some part of the country which has neither the name or address of the person writing it. The letter is with held from publication until the writer's name is received.

Dr. J. G. Robinson, dentist, of Baltimore, has located in Oakland for the season and is prepared to do all kinds of dental work. Office with Dr. M. C. Hinebaugh. 30-1t

Mrs. Sallie Rosenberger, of Oakland, was summoned to Harrisonburg, Va., last week, on account of the dangerous illness of her sister-in-law, Mrs. Julius Sibert, who has the fever.

There will be a Sunday School Institute at New Germany church, beginning Friday evening, Oct. 26th, at 7:30 p. m. and continuing Saturday and Sunday. The public is cordially invited.

C. J. Orro, President.

The frame work of Mr. Percy Procter's new residence in the West End is up. The building will be a credit to Oakland and to that part of town in which it is located especially. Capt. Jarboe is the contractor.

Garthright is offering 20c cash per pound for fresh roll butter or 25 in trade. 15c cash for eggs or 18c in trade. 15c cash for wool or 16 in trade. Highest market price paid for buckwheat flour and potatoes. 32-2t

Having just received a car load of flour, a car of salt and also a large line of full goods our stock is now complete and lowest prices guaranteed. A call is solicited. Speicher & Nethken, successors to John Felt, jr., Deer Park, Md. 30-3t

"I would rather trust that medicine than any doctor I know of," says Mrs. Hattie Mason, of Chilton, Carter Co., Mo., in speaking of Chamberlain's Colic, Cholera and Diarrhea Remedy. For sale by Oakland druggists.

Mr. David G. Smith and Mr. and Mrs. Prof. Smith went to West Virginia yesterday morning to attend the funeral of Prof. Smith's father, who died there on Monday afternoon. The deceased gentleman was aged about eighty-five years.

"Many of the citizens of Rainsville, Indiana, are never without a bottle of Chamberlain's Cough Remedy in the house," says Jacob Brown, the leading merchant of the place. This Remedy has proven of so much value for colds and croup in children that few mothers who know its worth are willing to be without it. For sale by Oakland druggists.

Every mother should know that croup can be prevented. The first symptom of true croup is hoarseness. This is followed by a peculiar rough cough. If Chamberlain's Cough Remedy is given freely as soon as the child becomes hoarse or even after the cough has developed it will prevent the attack. 35 and 50 cent bottles for sale by Oakland druggists.

A stray cow came to the farm of Mr. W. H. Chadderton near Deer Park about June 1st which he wishes the owner to take away. The animal has long crooked horns and crops out of both ears. 31-3t

The jail is now without an inmate, the two remaining prisoners having been discharged yesterday morning, they being Joseph Tasker and Ellen Teats, both being convicted of adultery at the September term and having served out their time.

Rev. J. M. Davis and Superintendent Rudisill, of the Park, who attended the annual convention of local preachers in Brooklyn last week, returned to Oakland Thursday morning. The next meeting of the preachers' association will be held at Mountain Lake Park some time next summer when it is expected that a very large number of delegates will be present from all parts of the Union.

Garthright's stock of dress goods is complete and certainly cheaper than was ever offered to the people of this county before. Best factory blankets, 22c per yard; best factory blankets all wool \$3.50 per pair. All buckwheat he can get will be taken in exchange for goods and on old accounts. Bring on the chestnuts, potatoes, butter and eggs. 32-2t

Mr. Ed. I. West has again taken charge of the old Glades Hotel. He has made many improvements since his advent as host and given the building a thorough cleaning and general overhauling from roof to cellar. Mr. West is a good hotel manager and no doubt he and his amiable wife will make the old Glades what it was years ago, a first class hotel in every respect. We, with a large number of friends, wish him unbounded success.

John Richardson, the twenty-one year old son of Mr. and Mrs. Geo. F. Richardson, formerly residents of Oakland but now residing in Allegany City, Pa., was killed on last Saturday afternoon by falling under a heavily laden coal wagon, which passed over his body. The unfortunate young man was buried on Monday afternoon in Allegany City. The editor of this paper attended the funeral, the deceased being a cousin.

There is no medicine so often needed in every home and so admirably adapted to the purposes for which it is intended, as Chamberlain's Pain Balm. Hardly a week passes but some member of the family has need of it. A toothache or headache may be cured by it. A touch of rheumatism or neuralgia quieted. The severe pain of a burn or scald promptly relieved and the sore healed in much less time than when medicine has to be sent for. A sprain may be promptly treated before inflammation sets in, which insures a cure in about one-third of the time otherwise required. Cuts and bruises should receive immediate treatment before the parts become swollen, which can only be done when Pain Balm is kept at hand. A sore throat may be cured before it becomes serious. A troublesome corn may be removed by applying it twice a day for a week or two. A lame back may be cured and several days of valuable time saved or a pain in the side or chest relieved without paying a doctor bill. Procure a 50 cent bottle at once and you will never regret it. For sale by Oakland druggists.

Died.
EDWARDS.—On last Sunday at her residence in Oakland, after a short illness, Miss Julia A. Edwards. Miss Edwards was born in this county on May 5, 1840, at the old homestead, Blooming Rose. She was a daughter of James and Anne P. Edwards and was one of seven children, and the only survivor of the family. Her funeral occurred on Monday morning from St. Peter's Catholic church. The services were conducted by Rev. Father Mattingly and the interment made in the Catholic cemetery.

PENDERGAST.—On last Thursday at his home near Hutton, Mr. Stephen Pendergast, aged about seventy years. His funeral occurred on Saturday from St. Peter's Catholic church.

Dentistry.
Dr. L. L. Ritter will be at Accident, Oct. 22; Hoya, Oct. 23; Cranestown, Oct. 24. Teeth extracted without pain. 31-2t

The Contract Let for the New Hotel at Loch Lynn Heights.

The stockholders of the Loch Lynn Heights Hotel Company met in this city, at the office of Hon. J. B. Somerville, Wednesday morning, and organized by electing J. B. Somerville president, Louis Walters secretary, and Major J. C. Alderson treasurer and general manager. The capital stock of the company is \$250,000, and its outlook is most promising. Immediately after the election of officers the bids for the erection of the new hotel were opened and the contract was let to Messrs. W. S. Bandy and W. E. Williams, of the firm of Enos R. Williams & Co., architects and contractors, of Cape May, N. J., and the work will be commenced at once, ground being broken for the foundations on Monday next. The new buildings will be renaissance type of architecture, with a combination Dutch and French high roof, embellished with towers, and will present an extreme frontage of two hundred and twelve feet. The entire frontage will be equipped with a porch sixteen feet in width. The hotel will have one hundred bed rooms, and the plans have been drawn upon a most liberal and extensive scale. The central lobby will be 39x49 feet, and from it will open out corridors, offices, a magnificent ball room, billiard room, etc. The dining room will be 40x77 feet, and there will be a complete system of electric lighting, hot and cold water throughout the building, bath rooms, an extensive laundry, and in short, everything desired or desirable in a modern hotel of the first class. The contractors, Messrs. Bandy and Williams, have erected five large hotels so far this year, and have contracts for four more, and promise to use all their very extensive facilities to have the building complete and ready for occupancy by April 1st next. Already a number of rooms in the new building have been rented for the coming summer by Wheeling parties, and there will be a great rush for quarters a little later on. The hotel company has secured Mrs. L. B. C. List, formerly of this city, as general manager of the entire building, and Mrs. List is now in the east, making contracts for furnishings and fittings. She will have entire charge of the practical conduct of the building, and before the plans were finally adopted they were submitted to her, and a number of changes suggested by her were made by the architects. All the hardware, glazing, corrugated work, painting, sash and doors, etc., for the hotel will be furnished by Wheeling firms, and contracts to that effect will be arranged immediately.

Matters at Loch Lynn Heights generally are progressing in a most satisfactory manner, despite the fact that the past year has not been a good one for business ventures of that nature. Major Alderson reports having sold over two hundred and fifty lots during the past season, to the very best class of people, many of them residents of this city, and so active does the demand promise to be the coming summer that a tract of four hundred acres in the rear of the hotel has been purchased, and two hundred and fifty acres of this land is now being platted. A large green house, surrounded with five acres of land, is now being erected, and arrangements are completed for setting out shade trees, etc., for lot owners. A number of cottages are now going up, and the erection of the hotel will make the time an auspicious one for the building of houses by those owning lots, as the work can be done cheaper and more expeditiously this winter than usual.—Wheeling Intelligence.

Notice.
To the farmers of Garrett county. Having accepted the agency for the sale of "Natural Plant Food," one of the very best fertilizers now known, I am prepared to fill all orders promptly. For terms and particulars apply to
MICHAEL W. DURST,
Grantsville, Md.
7-26t.

For Sale Cheap.
The Veitch residence on Oak Street, between 3rd and 4th. House contains eleven rooms and is in good condition. Stable and all other necessary outbuildings. Well of good water. There are two lots with this property, each containing a full quarter acre.
FRED. A. THAYER,
Office in Felt Building opposite postoffice.

Miss Edwards' Will.
The last will and testament of Miss Julia A. Edwards was admitted to probate in the Orphans' Court of this county yesterday morning.

By the provisions of her will she appoints Mr. E. Z. Tower executor and disposes of her real and personal property as follows:

To the Little Sisters of the Poor, of Washington, D. C., \$1,000.

To St. Peter's Catholic church of Oakland, \$250.

To the children of Thomas Sarsfield, \$50.

To St. Peter's Catholic church of Westport, \$250.

To Mrs. John C. Gelly, of Westport, parlor furniture and other household articles.

To the children of William Edwards, deceased, a tract of land known as the "The Blooming Rose" and other tracts of land in Garrett county.

To the children of Thomas Edwards, deceased, her Oakland property.

Deer Park.
Snow last Sunday.

Mr. Grant Lipscomb has moved to town.

Miss Alice Murphy has a full line of hats at W. C. Jones' store.

Mr. Jones has found another pair of shoes which was stolen when his store was robbed some time ago. They were hid in the stable.

Mr. Van Gurn and son Ed. have started a cabinet makers' and general repair shop in the old postoffice building.

Mr. H. J. Shaffer is having a well drilled on his lot.

There must be some one in town looking for an office again to judge from the way he chafes when anything is said of Mr. Williams' defeat. He will hear something drop on the 6th of November.

A vote for Wellington is a vote for good wages and better times.
HURRICANE.

Valuable Advice.
Avoid lawsuits and loss by consulting H. P. Tasker and examining his abstracts of the "conflicting titles" before paying for Military Lots. Charges reasonable. Office in Colander Cottage, opposite the bank, Oakland, Md. 41-2t.

Will You Suffer
With rheumatic pains, sciatica, sleepless nights, dropsical accumulations, or nervous headaches when Messrs. Cober & Boyer will cure you if their directions are followed. Can be consulted at the Central Hotel or at their room in the Pritchard building, Oakland, Md.

His Sister's Sister

"What you got, Hannah? A letter?"

"Yes; it's something for you, Hannah."

"Good land! Who's been writing to me? I hadn't had a letter I can't tell the time when. I'm most afraid to open it, Hannah. Maybe it's got bad news."

"Had news! Who from, I'd like to know? You're always expectin' something good."

"Well, there's a good deal that's gloom in this world. You know that's well as I do."

"Yes, Hannah, 'n' there's a good deal that ain't too. He seldom spoke with so much vigor and decision when differing with his sister."

"You'd better open it 'n' read it to me. I don't feel as if I could, somehow."

Daniel Martin sat down in the old rocker by the west window. It was early August and almost sunset. Beautiful shafts of red light threw themselves over his thin, small figure and his head, with its scanty gray hair. He tore open the envelope with his finger, but the letter would not come out. "I'm afraid I shall tear it all to pieces, Hannah."

"Wal, let me take it; I'll try 'n' see what I can do. I'm dreadful afraid somebody's dead."

"I s'pose somebody is somewhere," said Daniel, with a quick, short-lived twinkle lighting up his pale blue eyes. "Good land! who do you think wants to come 'n' see 'n' Daniel?"

"Cousin Angienette," said Daniel, in a low, timid interrogative.

"Now, how come you to be thinkin' o' her?" asked his sister, with considerable asperity of manner. "You ain't been readin' right through the letter, like some o' them folks up in the city the papers tell about, have you?"

"I came across a little picture yesterday in the green chest up in the garret, that she sent me a good many years ago, just afore she got married. I guess she was kind o' in my mind. She used to be the chippest girl 'n' I ever see in my life, 'n' she had such pretty curly hair."

"I was red," said Hannah.

"Wal, 'n' I want red, kind o' pink."

"We're too old to be chipper now, any of us. I don't see how I can have her, no way, Daniel; we ain't seen her this ten years."

"Wouldn't she kind o' live 'n' up?" asked Daniel, timidly. "We don't see many folks, no more."

"Wal, of you're tired o' havin' your pore old sister round, I s'pose I can write 'n' have a stranger come 'n' take my place."

Hannah's voice trembled, and her eyelids grew red, one tear gathering force enough to trickle slowly down her cheek like a slender rill, which has no great source behind it.

"I guess I wouldn't think anything about it, thank you, but she might make some work o' it. I didn't know but she could help along with the quiltin'; she used to be a master hand at sewin'. I could tackle up 'n' go to the deep for her as well as not, now I'm through with the hayin'."

"You'll have to write the letter, Daniel. I don't seem to feel like it, my stomach's so weak. I s'pose I shall be sorry I had her come. I don't want her meddlin' with my cookin'."

That day week the three cousins were seated in the best room, which led out of the kitchen. It was a mere box of a room, and had a musty odor, it was so seldom opened. Two large, old maples shaded the windows, and grew so near that they seemed like grim sentinels, forbidding the entrance of heaven's light and breath.

"I don't see you look much older 'n' you did ten or fifteen years ago," Angienette said, Daniel, as he crossed one leg over the other, and tried to make himself stationary in the slippery horsehair chair with its hard, unyielding seat.

"Wal, I don't know 's I feel old; I've got good health, 'n' I've got children. There ain't nothin' they don't try to do for me, since their poor father died. But I'm fifty-five next month. That's older 'n' you, Hannah, by three years."

"I ain't never had such health as you've had," said Hannah, as she left the low chair and took a seat in one of the back of which was tall and straight and stiff.

Her figure was lithe and firm and her complexion, though colorless, had the hue of health.

"Why, you never was sick but once, Hannah," said the brother, "in that was more 'n' twenty years ago."

"Well, I ain't been real sick, but I don't seem to feel so strong as I was. A git dreadful tired washin' 'n' iron' the same day."

"I sh'd think you would," said her cousin; "what makes you do it?"

"Good land! I never did. You don't s'pose I'm goin' to have it 'round two days, do you, for jest, Daniel 'n' me 'n' Hiram? I want to set down Tuesdays. I'm piecin' calico to make some quilts. I'd ought to make three this fall, of I can."

"I'll take hold 'n' help, if you want me to, Hannah—ef I shan't be in the way, I like to sew."

"Air your eyes good?"

"Eyes good? Why, yes, of course they be; what's to hinder? I don't never use glasses, nuther; I was always sort o' nearsighted, you know."

Some say them kind of eyes is stronger 'n' others. I don't know. Why, you ain't feelin' like an old woman yet, are you?"

"Trouble makes folks feel old, Angienette. We lost a cow in the spring, 'n' our chickens ain't done well this summer. Five died, or more; we'd ought to hev fifty, ef they'd done well."

"We've got some beauties left," said Daniel. "The man that keeps the hotel down by the lake says he'll take all we can spare, 'n' give 'n' cent a pound more 'n' anybody else will. The money's all Hannah's, though. I don't want none of it. She works hard enough runnin' after 'em."

He did not say that a good share of the running after was done by himself, save on the few occasions when he chanced to be from home.

The second week in September had come, and Cousin Angienette's visit was almost over. She was to leave the next day but one.

"I wish you'd ride up to the lake with me tomorrow mornin'," said Daniel. "I'm goin' to see about a shoot. Sim Perkins has got a terrible nice one, 'n' I want to hev it ef he don't charge too much."

"I hadn't ought ter leave Hannah; she's got the bread to bake 'n' the kitchen door to wash, 'n' I don't know what else."

"You go right long," said Hannah, in what was for her a very cheery tone. "There ain't any more work than what I kin do well enough. You've helped me so much, sense you've been here, that I feel more like what I used to be than I have this ten year. I declare for't, Angienette, I'd got to be so down-hearted I didn't seem to be one thing nor another. I thought I wanted somethin', 'n' I believe in my heart 'twas you I wanted all the time. 'n' Daniel, he ain't been so chipper 'n' I don't know when."

"I s'pose you want to start early," Daniel said to his cousin.

"I was calikatin' ef we could hev breakfast by half-past five or so we might get off about half-past six, while it's cool, we're goin' to hev a hot day, judgin' from the signs. The sun set awful red to-night."

A thin mist hovered over the earth, and the grass was heavy with dew. The air already autumnal, enfolded the mountain tops with ashen veils, softening the tints and blurring the outlines. The old wagon, with its worn buffalo covering hanging over the back of the seat, was drawn by Daniel Martin's twenty-year-old mare. She jogged along with the reins dangling more loosely over her neck than ever, if could be, and this morning, the wisdom of this laxity in discipline was apparently questioned, for the conscientious animal at length stopped short and turned her head to look at the couple behind. Seeing that her

master was in the usual place, she broke into a gentle, satisfied trot. The lake was in view, and the air grew more invigorating. As they neared the water's edge, the sun burst forth and poured down the glassy surface a shower of diamonds.

Tiny waves curled up on the segment of beach, and a soft breeze stirred the little ringlets under Angienette's straw bonnet, which had been trimmed by the village milliner only the day before. "Go 'long, Jenny," said Daniel, "she don't want to see what I say."

"She don't care for what I say," he added, looking across the water to the dark old mountain beyond.

"That's cause you're gentle with her, Daniel. I guess you never abused a dumb animal."

"No, I couldn't do that." Then, after a pause, he thought, "Angie, that somehow I'd ought to 'n' bin married, ef I'd found anybody that would 'n' cared about me. But I s'pose it's too late to be thinkin' o' that now."

"You ain't sixty yet, Daniel."

"No, but I'm close onto it. Go 'long, Jenny."

"You ain't called me Angie before since the day I told you I'd sent you my ambrotype. I never knew whether you got it, Daniel."

"Wal, I couldn't seem to make up my mind to say anything about it. I was afraid 'n' I was afraid 'n' I was afraid."

"Chief I meant to 'scent you for a wedding present. My courage kind o' give out, so ye never hed it. Go 'long, Jenny."

"Couldn't I hev it now?"

"Do you want it, Angie?"

No answer came. Daniel looked down on the tail of his eye at the round cheek with its pink tinge and saw two generous tears pouring down.

"When, Jenny. I don't know's you'd do it, Angie, but—can't ye come back 'n' live with us in the old house after ye've bin home 'n' seen the folks? Hannah, she would be dreadful pleased ef ye would—to be her sister, ye know, Angie."

"I was jest thinkin' o' that, Daniel—I didn't know how she'd take it."

A robin teetered along and with a glad chirrup crept up in the air, like a little bird, with a loud cry in its throat.

"The birds 'n' all be goin' now before long, Cousin Angie."

"We'll see 'em together next year, please God," said Angienette.

"Go 'long, Jenny," said Daniel Martin—long Transcripts.

THE THREE COUSINS WERE IN THE BEST ROOM.

MONKEY KINGS AND LAWS.

The Intellectual Ability of This Animal Greatly Exaggerated.

It is still an article of faith, not only in India but in all lands where monkeys go in packs, that they have a king, laws and language, of course. Saving the first item, and duly limiting the others, the belief is sound, no doubt. But then Batain tells us, on the authority of "pious persons" he met in India, that the king lies in state. Four noblemen always attend him with rods in their hands, and cooks serve him on their knees. Nikitin, the Russian traveler of the fifteenth century, gives more details. The king must wear a crown. The king, when a subject is caught, he contrives to send a message to the sovereign, who forthwith dispatches an army. "And when they come to the town they pull down the houses and beat the people, and their armies are so numerous, that they are not to be reckoned among the chances of the journey. Many a lonely kloof was frequented by a tribe of apes, which dwell among the rocks above, and descended to feed—many do still, no doubt, but not on the beaten tracks. In summer, the apes are driven out and started at sunrise, rested during the heat, and returned in the late afternoon—the feeding times. As often as not the big male apes gathered promptly to defend the pass. We never heard of a serious accident on authority, though perhaps for several years there are not less formidable in appearance than in fact, and when, at a flight of stones, they charge, roaring and screaming, travelers are rarely so stupid as to face them. In 1871 there was a dele in the district of Albania which had been caused by apes. The houses were not less formidable in appearance than in fact, and when, at a flight of stones, they charge, roaring and screaming, travelers are rarely so stupid as to face them. In 1871 there was a dele in the district of Albania which had been caused by apes. RATES OF SUBSCRIPTION:
This paper is published every Thursday morning at the following rates:
One copy one year..... \$1.00
One copy six months..... .75
One copy three months..... .50
One copy one month..... .25
Single copies..... 10c

ADVERTISING RATES.
First insertion for square one hundred lines 25c each additional insertion after first at rate of 10c per square. (For long advertisements, by special arrangement.)
Continued insertion will be made from the above rates.

REMITTANCES:
Remittances made by money order, postal note, registered letter or bank draft will be at our risk, if made otherwise, at the risk of the sender.
Address: THE REPUBLICAN, Oakland, Md.

THURSDAY, OCT. 18, 1894.

REPUBLICAN NOMINATION.

FOR CONGRESS.

GEORGE L. WELLINGTON,
OF ALLEGANY COUNTY.

Republican Mass Meetings.

The principles of patriotism and protection will be ably discussed at the following places in Garrett county on the dates named:

Selbyport, Tuesday, Oct. 30, at 7 p. m.

Sand Spring, Wednesday, Oct. 31, at 2 p. m.

Friendsville, Wednesday, Oct. 31, at 7 p. m.

Accident, Thursday, Nov. 1, at 7 p. m.

Grantsville, Friday, Nov. 2, at 7 p. m.

Eminent orators will address these meetings and discuss the principles of Republicanism.

The great Smith's Military Band (17 pieces) of Oakland will be present and render its choicest selections.

ANDREW SHARTZER,
Chairman.

REPUBLICAN meetings will be held at Gregg's school house on Friday evening, Nov. 2, at 7 o'clock, and at Bittering on Saturday evening, Nov. 3, at 7 o'clock.

It cost "a pile of two millions sterling" (\$10,000,000) to interpret the Gorman Tariff so that goods in bond before its enactment might subsequently be admitted free of duty—"no small sum to pay for a principle." It costs \$6,000,000 a year to pay a bounty to Hawaiian sugar producers, while the bounty contract with American sugar producers is repealed. Democratic "principles" are costly to the American people. Need we have them any longer?

This year 1892 was the most prosperous year in the history of the United States, and the average rate of wages was higher than ever before. This was two years after the passage of the McKinley bill, and after thirty years of Republican protection. And yet our Democratic friends pretend to believe that the business depression, which began with the assault on our tariff defenses, was in reality due to the Republican policy. The claim won't hold water.

The Richmond Times, a paper whose Democracy will not be questioned, tells exactly what is the matter with its party. Read what it says: "The Democratic voters of the state are apathetic and indifferent, and we believe that apathy

prevails all over the United States. This apathy is not accidental. It proceeds from a radical cause. It has grown out of the fact that the Democratic party has come to be a great gathering of all sorts of people with all sorts of diverse and antagonistic views, and without one single aim in view that all of its members are enthusiastically devoted to and anxious to see accomplished. That is the literal fact, however humiliating a confession it may be."

"Tauson could take a worthless sheet of paper, write a poem on it, and make it worth a fortune."

THAT'S GENIUS.

"Vanderbilt can write a few words on a sheet of paper and make it worth millions of dollars."

THAT'S CAPITAL.

"The United States can take an ounce and a quarter of gold and stamp upon it 'Eagle' and make it worth twenty dollars."

THAT'S MONEY.

"A mechanic can take material worth five dollars and make it into watch springs worth \$1,000."

THAT'S SKILL.

"A merchant can take an article worth seventy-five cents and sell it for a dollar."

THAT'S BUSINESS.—Exchange.

THE Mountain Democrat can take a scrap of paper and write upon it that the price of the Garrett county farmers' wool is advancing—

THAT'S LYING.

Among the evils entailed by the Gorman sugar tariff bill is the wiping out of the system of reciprocity under which our trade with the southern republics have begun to flourish. It is now announced from Brazil that after January 1 next, the reciprocity treaty, which admitted flour and provisions from the United States into Brazilian ports free of duty, will be at an end. It has created a big stir among Baltimore merchants. At present there are four regular vessels plying between Baltimore and Brazilian ports. Thornton Rolhus said: "The annulment of the treaty signs the death warrant of our trade with Brazil. I will sell my vessels at 50 cents on the dollar if I can get it."

To the Old Soldier.
The Administration has done what it promised you.

It has saved twenty-some millions of dollars this year in the Pension office. It has saved it but at your expense. It has saved it by rejecting your honest claims. It has saved it by cutting down your rate of pension. It has saved it by the many and questionable ways and practices known only to a Democratic Administration in dealing with the defenders and saviors of the nation's life.

Could you, however, expect anything less from a party that makes the custodian of your rights such a man as Hoke Smith? The greatest insult heaped upon you was the selection of this man to pass upon and adjudicate your claims for pension, but on the 6th of November you will have the opportunity to resent the injury.

The inevitable has happened!

The Democratic press of Baltimore and Washington at last acknowledge the hopelessness of the fight Mr. Williams is making in this District. They place it upon the ground of the apathy of the Democratic voters but to our mind it arises also by reason of the unity and determination of the Republican masses to be properly represented in the next Congress—to send to Washington a man who believes in standing up for the interests and industries of this District. That man is George L. Wellington.

A show of determination will characterize the efforts of Mr. Williams and his friends, but they recognize the fact of his utter and complete discomfiture at the polls. When the people assemble to exercise their suffrages George L. Wellington will be elected.

The people have made up their minds that the old Sixth shall be rightfully represented. They have determined that the next Congressman shall be a Republican and that man George L. Wellington.

Where Mr. Williams Stands.

The clouds have been removed, the uncertainty which surrounded Mr. Williams' position has vanished.

He stands to-day a full-fledged advocate and devotee of English

Free Trade. Those authorized to speak for him in Allegany county have announced to the people that Mr. Williams is in favor of free wool, free lumber, no bounty on sugar, and for free coal if his party desires him to be.

His position is all that the rank-and-file advocate of English Free Trade could desire or hope for.

Mr. Williams to-day is opposed to every interest and every industry of Garrett county. His vote in Congress would be cast for 12 1/2 cent wool. His mission would be to close up every saw mill in Garrett county, to make unprofitable the sugar camps of Grantsville and Bittering districts and thereby impoverish their owners, to close the mines of Georges Creek and the Young Valley—in a word to take away the living of our people.

Does Mr. Williams think that the people of this county can live on thin air? Does he suppose they are fools enough to support him in his effort to take the bread out of their mouths? Garrett county people are intelligent enough to know their interest and knowing them to cast their vote for George L. Wellington who is diametrically opposed to every and all things in this light which Williams favors.

Gov. McKINLEY will address the people of New Orleans on Saturday next, October 20th, and the great desire to hear him in that locality shows how the people of the South are becoming aroused to the advantages and blessings of Protection.

ARE THE farmers of Garrett county content to accept \$1.75 for their lambs now when only a year ago they received \$2.50, and 12 1/2 cents for their wool when 25 cents is its legitimate price?

Are the lumbermen of Garrett county satisfied to have their mills stand idle when the hum of industry in their line pervades the wilds of British America?

Are the sugar producers of Garrett county willing to give up their bounty on the products of their camps while the coolies of the West Indies are busy harvesting their crops of cane and the sugar trust is growing richer under the fostering care of Democratic legislation?

Are the coal miners of Garrett and Allegany counties willing to work for thirty cents per ton while the Dominion Coal Company is supplying the natural and usual market for their product?

If our people are content with these conditions then they should vote for Ferdinand Williams, the apostle of English Free Trade, low prices and lower wages. If, however, they believe in the American system of Protection to home industry, home interests, good prices for their products and high prices for their labor, they should support George L. Wellington, the champion and defender of their firesides, their homes and their prosperity.

Taken at His Word.

Senator Voorhees, in a speech at Jefferson, Indiana, on Monday evening, was foolish enough to make this prediction:

"Wool will sell within two weeks at prices higher than prevailed at any time under the McKinley Act."

Upon reading the above Mr. Theodore Justice, the head of the wool buying firm of Justice, Bateman & Co., of Philadelphia, wrote to Mr. Voorhees and pointed out to him how he and his friends could make a colossal fortune. American wool has been going down ever since the new tariff bill was passed. Indiana merino, the finest produced in the state, has declined 11 per cent, and Ohio XX, which is the standard grade of American wool, has declined 15 per cent. The price on March 1, 1893 was 30 1/2 cents a pound, and in March 1891 it was 34 1/2 cents.

Mr. Justice offers to furnish Mr. Voorhees or any of his friends, Ohio XX in unlimited quantities at 18 1/2 cents, and shows him that upon each million pounds he will clear \$160,000 if his prediction comes true. He also pledges his firm to furnish 80 per cent of the required capital, if Mr. Voorhees will consent to buy. Of course Mr. Voorhees was talking for buncombe, and

if he had a million of dollars in bank, waiting a chance for profitable speculation, he wouldn't buy a pound of wool. He knows that American wool is going down.

There has been a great deal of cackling over the advance in the price of wool in foreign markets. Mr. Justice explains to Mr. Voorhees that the reason of this is the increased consumption of foreign wool by the American mills, to the exclusion of the home-grown wool. The new tariff has not yet gone into effect as to manufactured woolen goods, and the American manufacturers are making the most of the little remnant of protection that has been left them, and are working up cheap foreign wool into American goods. The wool growers caught the blow first, and Mr. Voorhees with all his oratory, will not be able to convince the Indiana wool growers that free wool will advance the price. They study the market reports more diligently than he does.

The Free Wool Fallacy.

With but one dissenting vote, cast by a Democrat, the Ohio Wool Growers' association, in thirteenth annual convention at Columbus, last Tuesday adopted a protest against free wool that is replete with significance. So sharp and keen is it that we are persuaded to republish it entire.

"For over seventy-eight years," it says, "there have been high tariff duties, more or less protective, upon wool. The Gorman law not only denies wool growers the benefit of a tariff for revenue, but places wool on the free list, though not one citizen by petition to Congress, asked it. Until President Cleveland's free wool message of December, 1887, all political parties favored protection for the wool industry."

The price of foreign wool imports is now so low that without protective tariffs American wool growers cannot successfully compete with them. Free wool as a permanent policy would substantially destroy the American wool industry and in a large measure annihilate the capital invested therein. The threat of free wool has reduced the value of our 45,000,000 sheep nearly \$70,000,000, and reduced the price of the wool clip of 1894 more than \$30,000,000 below the normal under adequate protection. The Gorman law attack on agricultural interests is aggravated by the fact that the odious whisky trust and the sugar trust and others are amply provided for and protection professedly if not actually adequate is given to most of our manufacturing industries, and free coal, iron ore and other raw materials. Free wool is an infamous and odious discrimination and conspiracy against all our agricultural industries.

"As a permanent policy it would drive a million of wool growers from sheep husbandry into increased production of hay, wheat, corn, oats, cotton and other products, destroy our sheep, and reduce the demand they would make for food and thus add to our existing overproduction and low prices the ruin of still further overproduction. This would take from all farmers a large measure of their just income and render them unable to patronize merchants, grocers, mechanics, schools and churches. All industrial and other classes would be involved in common disaster. Free wool is a blow to civilization and progress. Immense imports of low priced wools would supplant to a large extent the use of cotton, and thus bring disaster to the planters of the south. In 1893 the imports for consumption of the third class wools were 133,197,581 pounds, at a valuation of 7.75 cents per pound.

"Why is free wool thrust upon the country? Not one of all the senators who voted for the Gorman bill ventured to give any reason in support of free wool. Their silence is a confession of its injustice and that it means ruin. It is a conspiracy with four purposes: (1) To add to existing over production of cereal, cotton and other farm products and still further reduce prices already ruinously low. (2) To alienate wool growers from the protective policy, and thus enlarge the policy of free trade. (3) With

cheap foreign wool and protective duties on manufactures, to limit manufacturing to the eastern cities and New England states. (4) Its political purpose is to win to the Democratic-Gorman party a few New England states, and punish the wool growing states. The pretense of cheaper clothing is false and fraudulent. With the destruction of American flocks and with manufactures limited to a narrow section, combinations and trusts would extort upon the people with a monopoly of wool and woolen goods. The government must have revenue. If not derived from duties the people will pay in some other form. The wool tariff yielded in 1893 \$8,147,219. The Gorman bill surrenders the wool tariff revenue, but imposes five times greater burdens by a tariff tax on sugar of \$40,000,000 annually.

"We endorse the doctrine announced by the national grange that while protection is accorded to any industry, it should also be to wool. Full and adequate protection for the wool industry would soon increase our 45,000,000 sheep to a required 110,000,000, furnishing 650,000,000 pounds of wool annually—all needed, and we would import none. This would save an annual export of gold of \$60,000,000 or more to buy foreign wool from countries which take substantially nothing from us in return but gold. It would keep our finances on a solid basis. It would make such an increased demand for pasture, hay, oats and corn as to increase these products and thus secure fair prices. It would enlarge the resources of more than 30,000,000 of the agricultural classes, and thus by their patronage to other classes give prosperity to all.

"It has been proved that no foreign wool is needed to mix with ours for successful manufacture. What, then, shall small wool growers do? The free wool policy cannot be reversed until after 1896. In the meantime sheep cannot be made to pay for the amount of capital which is invested and labor in producing wool. The true policy is: Fatten the weathers and old ewes; sell them for mutton; keep the breeding ewes and be ready to rapidly increase the flocks after 1896. Let all the people who desire prosperity for Americans rather than for foreigners vote for no candidate for Congress who does not favor protection equally to all American industries, which by its aid can be made to furnish all needed supplies at fair American prices. The free wool infamy will soon be wiped out nevermore to return, and the people, painfully admonished by the ruin of the last two years, will not soon demand again a change to the policy which brought it on."

If protection is good for the interests of a given industry, a given section or a given party, it is good for the interests of all people. In singling out the agricultural interests for special attack, while their own cotton growers and sugar planters come in for careful consideration, the Democratic tariff members displayed the real animus of their bogus tariff reform campaign, and offered to history another proof of their unfitness to govern.

IN REPLY to the Democrat's article of last week only a word is necessary as to wool. We propose to be honest, always have been and always expect to be. Now for the figures: Take for instance a suit of all wool clothing. In that suit are five pounds of wool. The McKinley duty on that five pounds of wool was fifty-five cents. The retail price of the suit is perhaps \$10. With the duty off it brings the price down to \$9.45. A farmer who produces a hundred pounds of wool brings the wool to Oakland and sells it for 15 cents per pound. He thus loses on his wool the difference between 28 cents, the price of wool before the Democrats came into power, and 15 cents, the price now, which is 13 cents per pound. He gets \$15 for his wool, a net loss of \$13 and saves the paltry fifty-five cents on his suit of clothing. So much for wool.

Sugar to-day is selling by the

merchants of Oakland at six cents per pound. If we remember correctly just prior to the enactment of the Gorman bill the same grade of sugar sold at five cents and less per pound.

Two or three merchants in Oakland are paying seventeen cents per pound for wool in small lots and it is asserted that the loss sustained by them is borne by the Democratic committee. One of these merchants was offered ten thousand pounds of wool at sixteen cents per pound but he would not buy which clearly goes to show that the seventeen-cent business is purely a campaign arrangement and by its workings votes are expected to be secured for Mr. Williams, but it won't go.

In this connection it may be well to state that Mr. Hirsch, of Cumberland, who buys nearly all the wool produced in this county, was in Oakland last Tuesday and when asked what he was paying for wool said that fifteen cents was the highest price and that he did not care to handle it at that price. Mr. Hirsch is a Democrat.

Of course we expect that our esteemed contemporary will take exceptions to the above statement but it is the truth nevertheless.

Getting Down to Figures.

In order to satisfy the people who are going to vote for Congressman in the Second district of West Virginia on the 6th day of November, Prof. Wilson will have to be a trifle more explicit. Instead of using figures away up in the hundred millions, and talking grandiloquently about the "unescapable co-relation of export trade," he must discuss these matters as they affect his constituents individually.

Many of them own sheep, and are sellers of wool and mutton. Their interest in the vast interchange of trade of commercial nations does not go much farther than a comparison of the prices they used to receive with those they now get for what they have to sell and the money they have to pay for what they buy. They judge of the value of political parties by the cash balance in hand at the close of the year. It is perfectly right to bring the tenets of platforms and the results of legislation to this test. It is the only test which appeals to the practical man. Glittering generalities about the barriers of trade avail nothing to the man who finds it hard to make both ends meet, or to the sheep raiser who discovers his profits sadly reduced or entirely eliminated by the removal of these barriers.

A West Virginia flockmaster who has 100 sheep and shears 500 pounds of wool gives these figures: This year he sold his wool for 15 1/2 cents a pound, and the best offer for his 100 lambs is 3 cents per pound. Under the McKinley law he sold the same quality of wool for 32 cents per pound, and lambs for 44 cents. Estimating the weight of the lambs at 65 pounds, the lightest weight that shippers will buy, he figures up the difference as \$170 in favor of McKinley prices over Wilson prices.

Satisfactory explanations of the benefit to be had from a change which brings about such results, are what the people of West Virginia are asking from Prof. Wilson.—Pittsburg Chronicle Telegraph.

Real Estate Transfers.
The Mountain Home Co., to Ida V. Bunce, lots 17 and 18 in Loch Lynn Heights: \$150.
Henry Richter to John L. Richter, part of "Accident or Flowing Vale," 50 acres: \$800.
Henry G. Davis and wife to John Gill, of R., parcels of land in and near the town of Deer Park: \$20,000.

John T. Mitchell, attorney, to Martha E. Willum, military lots Nos. 4147, 4148 and 1697, 102 1/2 acres: \$825.

Geo. P. White and wife to Emma White, 1 1/2 acres of ground near Mountain Lake Park: \$35.

Mary C. Perry et al. to Henry G. and Thomas B. Davis, a lot of ground in the town of Deer Park: \$300.

Herman Stoetzer to the Mountain Home Co., lots Nos. 78 and 79 in Lake View: \$1.

C. J. Rathum to J. C. Alderson, lot No. 52 in Loch Lynn Heights: \$105.

When Baby was sick, we gave her Castoria. When she was a Child, she cried for Castoria. When she became a Girl, she clung to Castoria. When she had Children, she gave them Castoria.

Ripans Tablets relieve headache.

FOR YOUNG PEOPLE.

A LITTLE HOUSEMAID.

Wanted—a little housemaid. Just to help mamma to-day. Hair tucked neatly in a braid. Aproned, capped and smiling gay—Here she comes—as prompt and neat As a household fairy sweet!

Chairs in every room and chink Shall be dusted perfectly. Hearth swept clean, before you think Baby's scattered toys will be Quickly put away in place By this fairy household grace.

Then she has her wages paid Promptly every penny too—Trusty, welcome little maid! She gets paid in coin so true—Praises, kisses, loving words, Till she's as happy as the birds—Lulu Curran, in Good Housekeeping.

BILLY'S LESSON.

And His Teacher Is His Neighbor's Water Spaniel.

Tommy Leigh and Billy Connor were neighbors. That is, they lived quite near each other. Tommy was eight and Billy was ten years old. Tommy was warm-hearted and kind, while Billy was not always so. But this excuse must be made for Billy; he had no mother to teach him right from wrong, so his bad little nature often ran away with him. But I will tell you what set him to thinking he would do better.

One morning Tommy rescued a little dog, to whose tail Billy tied an old milk-can "to see him go," as he told the boys and girls standing by to enjoy the cruel sport.

He was very angry at Tommy for spoiling the fun, and a little while after, seeing Tommy's kitten sunning itself on the porch, he caught her up and ran with her under his jacket out of the village toward the mill pond with Rover, Tommy's water spaniel, close at his heels.

The cruel boy had a small bag in his pocket and put the kitten into it. Rover all the time looking on and whining, as if to say: "What are you doing with my pet, you bad boy!" for the kitten was Rover's playmate and he loved her dearly. But Billy did not heed the pleading look, and with a toss, threw the bag out into the pond.

But Billy tried to throw so far that he lost his balance and fell off the bank into the pond. It was not very deep near the shore, and Tommy, who happened to walk by just then, helped him up the steep bank.

In the meanwhile Rover had plunged in after the kitten. The bag did not sink very far, and grasping it in his mouth, Rover swam with it to the other shore. There he laid it down, and with his sharp teeth quickly tore open the bag. He began to lick and fondle the poor little kitten, that wet and cold, moved sadly.

Billy sat down on a stone. Something—maybe it was Rover's reproachful eyes—told him that he had done a cruel act. He tried to watch the dog, but he could not see for the quick tears that would keep coming, though he winked fast and wiped his eyes with his jacket sleeve.

By and by Rover took the way slowly home, his little pet following him, still wet and much ruffled. Then Billy went home, too. Waiting by the corner of the lane, he caught the kitten as she came along and dried her wet fur on his rough jacket. Then he carried her to a sunny corner by the hedge to doze.

Do you know what Rover taught Billy that morning? Mrs. Christine Stevens, in Our Little Ones.

LITTLE WOODEN CHAIN.

How a Handy Boy Can Make One Containing Twenty-Four Links.

A pretty experiment, which boys with a knack for carpentering will find interesting, is the making of a chain out of a single block of wood. This is how the feat is accomplished. This diagram almost explains itself.

Take a piece of very soft wood, one inch square by six inches long. Out of

this cut a piece like that shown in Fig. 2, then mark off the links as shown in Fig. 3. Hold this piece sideways and cut out the darker portions shown in the illustration. Do the same thing on the other side of the piece. A small bit of wood will be left between each of the links. Cut through this and they will loosen. Round out the pieces and sandpaper them down. The illustration shows twenty-three links, but a chain of about twenty-four links can be made easily, and it will serve many useful purposes.

The Small Dog's Paradise.

Small boys who cannot resist the temptation to make predatory excursions on neighboring apple orchards should be transported to the Sandwich Islands, where the apples have become wild, and where forests of many acres are found in various parts of the country. They extend from the level of the sea far up the mountain sides. It is said that miles of these apple forests can occasionally be seen. A traveler is responsible for the statement that the extent of one of them is between five and ten miles in width and about twenty miles long.

Nowadays.

It doesn't matter so much whether he's Irish, Welsh, or Dutch. Provided he's made his side.

—Chicago Tribune.

SIRRAH WAS FAITHFUL.

How a Sheep Dog Took Care of Seven Hundred Lambs.

You often hear a great deal about dogs destroying sheep, and some persons would like to kill all the dogs in the country. That is very foolish, because the dog is really the sheep's best friend, and if, instead of hating dogs, each farmer would get a good one to look after his flock they would be quite safe. He would not let any strange, bad, blood-hungry dog hunt the sheep that were in his charge.

Such a brave and faithful animal was Sirrah. He lived in Scotland a good many years ago, a collie of the best and purest breed, and as handsome as he was intelligent. He had a beautiful white frill and the clearest, most honest and affectionate hazel eyes.

Now, Sirrah held a post of great responsibility. He had to take care of the lambs. Not of a few lambs, a dozen or so, but of seven hundred. Just think, how hard it would be to count seven hundred lambs! But that was what he had to do. He was expected to keep watch of all and not to lose one.

One very dark, stormy night the sheep managed to break out of the fold. No one knew what started them, but they followed each other as sheep will, being very stupid animals, and before midnight the fold was empty and the sheep and lambs were scattered in three separate parties over the wide range of hills. The shepherd, called Sirrah, who was sleeping after working hard all day, and started off with his men. It was pitch dark and they could not see the dog, but he knew his duty and went off to look for the lambs, while the men hunted for the sheep.

They found them after awhile and then sought for Sirrah and his charge, but no trace of them was to be seen. All night they wandered over the hills, till finally they turned towards home in despair, having made up their minds that the lambs were all lost and that they should never find them alive. For there were many steep precipices and places where they might all have fallen off and been killed.

It was now getting light. The shepherd and his men were going slowly and sadly along, when as they passed a deep hollow among the hills they heard a bark. They looked down and saw some lambs and the dog in front looking round for help, but still at his post. Then they did not feel tired any more, but ran down the side of the hill, and Sirrah was glad enough to see them. He came a little way to meet his master and the bark of care and responsibility left his face.

Not one lamb of the whole seven hundred was missing, but how they

THE SHEEP DOG.

had ever been got there, how the dog, all alone, in the black darkness, had ever managed to get them all together and then to bring them safely down the sides of the deep hollow, no one could ever tell.

Sirrah had been all alone from midnight till sunrise. He had one to help him, and yet all the shepherds of the hills could not have done the same in so short a time. — N. Y. World.

A Little American Girl.

Last summer a little girl, ten years old, living in Indiana, was walking across one of the railroad tracks near a trestle across a deep ravine when she discovered that it was an fire. She knew that it was almost time for a world's fair. These people were so grateful to this brave little girl that they, on returning to France, petitioned that the little girl should receive a medal of honor. President Carnot ordered the medal struck off, and it was sent to the little girl. This medal is given in France only to those who have done marked acts of bravery. It is the medal which France gives her soldiers. — Outlook.

Chicken Surgery in Florida.

A marauding hawk made an attack on a Lakeland (Fla.) fowl yard, and succeeded in ripping a chicken's crop entirely from its body. That it dragged on the ground, and also cutting a hole through the crop, so that it would not hold food. A day or two afterward the owner caught it and one of the ladies of the family performed a surgical operation. The crop was sewed up, the chicken was soaked in hot water until the wounded and dry skin was made elastic again, the crop was restored to its place, the wound sewed up, and now that is about the healthiest chicken in the yard.

A Curiosity Among Colors.

It is a curious fact that the color of yellow, whether it be vegetable or animal, is much more permanent than any other hue. The yellow of a flower's petals is the only color known to botanists that is not faded or entirely discharged upon being exposed to the fumes of sulphuric acid. Take the viola tricolor (heart's ease) as an illustration. If exposed but a moment to these fumes the purple tint immediately takes its place, and in the wall-flower the yellow shines as brightly as ever after all other colors have fled.

FARM AND GARDEN.

ABOUT SWEET CLOVER.

Noxious Weed in the North, Useful Forage Plant in the South.

In a recent bulletin Prof. Goff describes sweet clover as a noxious weed. It is extremely common in many northern states, abounding in waste places, along roadsides and to a considerable extent in alfalfa pastures, although much coarser. The leaves are large and succulent. It is extremely fragrant when in bloom and is an excellent honey plant.

In most of the west and central west as well as in the northern states it is regarded as a nuisance, but Prof. Tracy finds that it is valuable for reclaiming waste land, as it grows not only upon rich soil, but thrives on the poorest kind of land. The large roots contain a vast number of tubercles which are largely in enriching the soil. Prof. Goff says: "The decay of all the large roots not only supplies plant food but aids in draining the land by forming numerous narrow passages through which the soil water finds an outlet."

In the south, however, this clover is regarded as a useful forage plant. Although not eaten by cattle at first, they soon learn to relish it. If cut early it is there regarded as valuable as cowpea, red clover or Japan clover hay. Its great value there, however, consists in its power to renovate the soil, doing for the south in this line what red clover does for the north. Prof. Goff, however, states that, admitting it has useful qualities, the sweet clover is a coarse, homely plant, and where permitted to grow its tall flower stalks are certainly offensive to the eye, and the annoyance it causes would warrant its destruction. It should not be allowed to bloom or mature seed. This plant is easily got rid of in cultivated fields, a single year being sufficient to remove it if the work is carefully done. — Prof. L. H. Tamm, Iowa Agricultural College.

PORTABLE HEN HOUSE.

How Poultry Can Be Made to Utilize Waste in Grain Fields.

There is always more or less grain lost in harvesting—shelled off the heads or broken down out of reach of the reaper. When grain is high in price farmers would afford to ignore this waste and let it seed the land with a volunteer crop. The writer has often herded cows on the great Colorado wheat fields, that were seeded in this way. In these times, however, "every little counts," and even the waste of the grain field must be utilized and utilized. But whose labor is so valueless that it will not cost more than the grain is worth? Mr.

PORTABLE HOUSE FOR POULTRY.

and Mrs. Hen are the people to do the work properly. We illustrate the way this thing is done in England. A little house on wheels, large enough for twenty-five hens, is hauled about from one part of the field to another. Wherever it stops, the hens clean up all the scattered wheat for many rods in every direction. They come back to the house to sleep and lay. All the farmer has to do is to move the house and gather the eggs—the hens do the rest. There is progress for you—a step in advance of "hens by the acre." On many an American wheat farm the hens could make the waste worth a good deal of money. — Rural New Yorker.

MANY USES OF TAR.

To the Poultry Raiser It May Be Said to Be Indispensable.

Poultry raisers seem to have failed to learn the value of tar. It is valuable in many ways, says C. W. Norris, the Epitomist. I am led to believe that to tar the fence around the poultry-house, instead of whitewashing, will be much better. It will contribute largely to the durability of the wood, protecting it from storm and time. It is in the poultry-house that the value of tar is the greatest, for it conduces greatly toward healthfulness. When cholera makes its appearance, we would advise, first, a thorough cleaning of the house, next, an application of tar on all the joints, cracks and crevices of the inside of the building, and then plenty of fresh whitewash properly applied. The tar absorbs or drives away the taint of disease, and makes the premises wholesome. The smell is not offensive, in fact many people like it, and it is directly opposite to unhealthy. To vermin, lice, etc., the smell of tar is very repulsive, and but few will remain after you have tarred the house. A neighbor of ours was once troubled with chicken cholera, and by adopting the above, in connection with removing affected fowls, he soon put a stop to its ravages. A small lump of tar in the drinking water supplied to the fowls will be found beneficial. It is also very beneficial to the human system in cases of consumption, bronchitis and severe colds.

Keep the cultivator going and the surface of the ground frequently stirred in all the growing crops. This not only keeps the weeds at bay, but also lets the heat in the soil, and through that agency forces along the growth. That "tilage is manure" may not be quite true, yet it greatly aids the growth of plants.

Always keep salt where the cows can have easy access to it.

Do You Wish the Finest Bread and Cake?

It is conceded that the Royal Baking Powder is the purest and strongest of all the baking powders.

The purest baking powder makes the finest, sweetest, most delicious food.

The strongest baking powder makes the lightest food.

That baking powder which is both purest and strongest makes the most digestible and wholesome food.

Why should not every housekeeper avail herself of the baking powder which will give her the best food with the least trouble?

Dr. Haines, of Rush Medical College, Consulting Chemist of the Chicago Board of Health, says: "Royal is not only the purest, but the strongest baking powder with which I am acquainted."

One trouble with the world is that every man wants to measure his neighbor's cloth with his own yardstick. — Rm's Horn.

There is said to be a tree in New Guinea which when touched knocks a man down. It must be a species of boxwood. — Tid-Bits.

There are a good many people who want to do good, but they are afraid to wait until tomorrow to begin. — Rm's Horn.

There is a big, fat girl clerk in a confectionery store on Kings avenue. "What do you weigh?" "Perhaps not; but giving fishing seems to improve the imagination." — N. Y. Weekly.

"Oh what does Skiffins base his suit for this?" "On a capital case." — Washington Star.

When a retired railroad magnate started in the goods furnishing goods business it seemed soon after to him to announce a greaser on ties. — Youkers Gazette.

BUDS, Society buds, young women just entering the doors of society or womanhood, require the wisest care. To be beautiful and charming they must have perfect health, with all it implies—a clear skin, bright eyes and good spirits. At this period, the young woman is especially sensitive, and many nervous troubles, which continue through life, have their origin at this time. If there be pain, headache, backache, and nervous disturbances, or the general health is not good, the judicious use of medicine should be employed. Dr. Pierce's Favorite Prescription is the best restorative tonic and nerve line at this time. The best bodily condition results from its use. It's a remedy specially indicated for those delicate weaknesses and druggists that afflict women at one period or another. You'll find that the woman who has faithfully used the "Prescription" is the picture of health, she looks well and she feels well.

In catarrhal inflammation, in chronic displacements common to women, where there are symptoms of backache, dizziness or fainting, bearing down sensations, disordered stomach, moodiness, fatigue, etc., the trouble is surely dispelled and the sufferer brought back to health and good spirits.

"WOMAN'S ILLS." Mrs. R. Bates, of Danville, Vermont, Ohio, writes: "A few years ago I took Dr. Pierce's Favorite Prescription, which has been a great benefit to me. I am in excellent health now. I hope that every woman who is troubled with 'woman's ills' will try the 'Prescription' and be benefited as I have been."

The total number of voters in Garrett county is 3,680.

Mr. U. M. Stanton, of Grantsville, was here yesterday.

Mr. Ed. Hall is working for Mr. A. P. Ritzell at Keyser, W. Va.

New style fall and winter cloaks just open at M. L. Scott's Baltimore Store.

A very fine line of fine dress goods just opened at Offutt & Son's.

A nice line of yarns, blankets, comforts and flannels at Townshend & Son's.

Largest, best and cheapest stock of men's clothing at Offutt & Son's.

Col. John E. Wood offers for sale his farm near Oakland. See advertisement.

Fine dress goods, ladies' coats, blankets—everything just opening at Offutt & Son's.

Mrs. M. C. Feather, of Kingwood, is here on a visit to Mr. and Mrs. D. E. Bolden.

Full line of men's, women's and children's woolen underwear at Townshend & Son's.

Blank deeds for sale at this office. The deeds are specially ruled and printed very neatly.

Mr. R. C. Campbell, of Mineral Springs, was in the city a short time Tuesday morning.

A full line of boots and shoes, gum goods and gloves at Townshend & Son's.

Mr. T. Claggett, who spent a few days with his parents in Martinsburg, W. Va., returned to Oakland Monday night.

Rev. Ernest R. McCauley will preach in St. Mark's church in Oakland next Sunday morning and evening.

Mr. and Mrs. F. A. Thayer and children were at Accident over Sunday as the guests of Mrs. Anne Glotfelty.

Mr. and Mrs. Percy Procter, of Cincinnati, Ohio, who spent the summer here, have returned to their home for the winter.

If you are looking for or in need of a new dress, Townshend has it either in all wool, cloth or suitings for 40c per yard and up.

Mrs. Nellie Wilson, accompanied by her daughter, Miss Nora, of Missouri, are here as the guests of ex-Senator and Mrs. R. T. Browning.

Dr. J. G. Robinson, dentist, of Baltimore, has located in Oakland for the season and is prepared to do all kinds of dental work. Office with Dr. M. C. Hinebaugh.

Garthright is offering 30c cash per pound for fresh roll butter or 25 in trade. 15c cash for eggs or 18c in trade. 15c cash for wool or 16 in trade. Highest market price paid for buckwheat flour and potatoes.

Mr. John W. Williams offers a reward of one hundred dollars for information leading to the arrest and conviction of the party who broke into his house at Deer Park. See advertising columns.

A stray cow came to the farm of Mr. W. H. Chaderton near Deer Park about June 1st which he wishes the owner to take away. The animal has long crooked horns and crops out of both ears.

"I would rather trust that medicine than any doctor I know of," says Mrs. Hattie Mason, of Chilton, Carter Co., Mo., in speaking of Chamberlain's Colic, Cholera and Diarrhea Remedy. For sale by Oakland druggists.

A great deal of our space this week is given up to an article written by Historian Jacob Brown, of Cumberland. Mr. Brown has compiled many short histories of Garrett county families, all of them being quite interesting and historical.

Mr. and Mrs. Win. Hagans, Miss Mollie Peckard and Miss Addie Copp, all of Oakland, were here a few hours on Monday evening. They had been picking chestnuts at Corinth and came here to catch No. 4 to Oakland.—Terra Alta Oracle.

Mr. John B. Harmon, of Bittering district, was here Tuesday and said to THE REPUBLICAN that he raised this year on three-quarters of an acre of ground 361 bushels of potatoes, some of them weighing as much as four pounds. He also raised on an average 61½ bushels of buckwheat to the acre.

Garthright will offer 1 car white oats and wheat, mixed half and half of each, at a very low price; also one car Sea Foam and Old Dominion flour at low prices. These brands of flour are strictly No. 1 and very popular. Will trade for all buckwheat flour and nice large potatoes can get.

Hillary Michael, a son of Jesse Michael, of near Firm Rock church, died on Saturday night from the effects of an overdose of laudanum taken to relieve toothache. He was aged about 27 years, and was highly respected. He has but recently been married, and his young wife, who was a Miss Robinson, is prostrated with grief. The funeral took place Tuesday afternoon.

"Many of the citizens of Rainville, Indiana, are never without a bottle of Chamberlain's Cough Remedy in the house," says Jacob Brown, the leading merchant of the place. This Remedy has proven of so much value for colds and croup in children that few mothers who know its worth are willing to be without it. For sale by Oakland druggists.

Every mother should know that croup can be prevented. The first symptom of true croup is hoarseness. This is followed by a peculiar rough cough. If Chamberlain's Cough Remedy is given freely as soon as the child becomes hoarse or even after the cough has developed it will prevent the attack. 25 and 50 cent bottles for sale by Oakland druggists.

Garthright's stock of dress goods is complete and certainly cheaper than was ever offered to the people of this county before. Best factory flannels, 32c. per yard; best factory blankets all wool 83.50 per pair. All buckwheat he can get will be taken in exchange for goods and on old accounts. Bring on the chestnuts, potatoes, butter and eggs.

There is no medicine so often needed in every home and so admirably adapted to the purposes for which it is intended, as Chamberlain's Pain Balm. Hardly a week passes but some member of the family has need of it. A toothache or headache may be cured by it. A touch of rheumatism or neuralgia quieted. The severe pain of a burn or scald promptly relieved and the sore healed in much less time than when medicine has to be sent for. A sprain may be promptly treated before inflammation sets in, which insures a cure in about one-third of the time otherwise required. Cuts and bruises should receive immediate treatment before the parts become swollen, which can only be done when Pain Balm is kept at hand. A sore throat may be cured before it becomes serious. A troublesome corn may be removed by applying it twice a day for a week or two. A lame back may be cured and several days of valuable time saved or a pain in the side or chest relieved without paying a doctor bill. Procure a 50 cent bottle at once and you will never regret it. For sale by Oakland druggists.

Bucklen's Arnica Salve.
THE BEST SALVE IN THE WORLD FOR CUTS, BRUISES, SORES, ULCERS, Salt Rheum, Fever Sores, Tetter, Chapped Hands, Chilblains, Croup, and all skin eruptions, and positively cures Piles, or no pay required. It is guaranteed to give perfect satisfaction or money refunded. Price 25 cents per box. For sale by all druggists.

Valuable Advice.
Avoid lawsuits and loss by consulting H. P. Tasker and examining his abstracts of the "conflicting titles" before paying for Military Lots. Charges reasonable. Office in Colardeau Cottage, opposite the bank, Oakland, Md.

For Sale Cheap.
The Veitch residence on Oak Street, between 3rd and 4th. House contains eleven rooms and is in good condition. Stable and all other necessary outbuildings. Well of good water. There are two lots with this property, each containing a full quarter acre.
FRED. A. THAYER.
Office in Feltz Building opposite postoffice.

For Sale—Fennell Manor.
1500 acres of the most desirable land in Western Maryland, all underlaid with coal; one seam the genuine Pittsburgh gas coal. Unsurpassed as a farm or for stock raising. An elegant mansion with several tenant houses. For particulars address M. J. C. or J. E. Wood, 3421 Maryland Ave., Baltimore, Md.

Will You Suffer
With rheumatic pains, sciatica, sleepless nights, dropsical accumulations, or nervous headaches when Messrs. Colver & Hoyer will cure you if their directions are followed. Can be consulted at the Central Hotel or at their room in the Pritchard building, Oakland, Md.

Notice.
To the farmers of Garrett county. Having accepted the agency for the sale of "Natural Plant Food," one of the very best fertilizers now known, I am prepared to fill all orders promptly. For terms and particulars apply to
MICHAEL W. DUEST,
Grantsville, Md.

Announcement.
I, the undersigned, having purchased the stock and bakery business belonging to R. Frisco, of Oakland, Md., take pleasure in announcing that I shall conduct said business in such a manner as to give full satisfaction to all who may favor me with their patronage. The public is respectfully invited to give me a call.
J. STANFIELD DRUMMOND.

Rogers' Sarsaparilla.
A specific for all 100 doses for 75 cents. Rogers' Little Liver Pills, best on the market; Cough Cure, Liniment, Appetizer and Worm Syrup, sold by A. G. Sturgis, Oakland; Cuyper Bros., Meigs; J. A. DeBerry, Corinth; C. F. Hyde, Hutton; P. T. Garthright, Hyden; E. E. Kees, Mt. Lake Park; Dr. Laughlin, Deer Park; Wm. Frederick, Friendsville; Young Store Co., Jonas, Frazee; Robert Liston, Selbyport; W. W. Wagon, Mineral Springs; J. E. Gage, Accident; Smith & Callis, Hoyer, and by all general dealers.

Dead Letter List.
List of mail matter remaining unclaimed in the postoffice at Oakland, Garrett county, Maryland, for the week ending October 27th, 1894, the parties addressed being unknown to the postmaster.
George B. Rumb, Oliver Moore, E. E. Hinebaugh, Jessie Simmons, R. C. Collins, Strahl Bros., Mrs. Annie F. Smith.

One cent on each article is chargeable for advertising. Parties calling for this matter, will please say it is advertised, otherwise they may not receive it.
E. H. BARTLETT, Postmaster.

Marriage Licenses.
Marriage licenses have been granted by Clerk E. Z. Tower to the following parties since last Wednesday:

Scott Chifflet and Louisa Virginia Hulvey, both of Clear Brook, Va.
Samuel Marion Robinson and Maggie Nuzum, both of West Virginia.

Frederick Louis Jett and Emma C. Helbreth, both of Harrison county, W. Va.

Frank Richel and Eliza Belle Wolfe, both of Garrett county.

Harmon Bittinger and Mary E. Bailey, both of Garrett county.

Elias Durst and Catharine Bittinger, both of Garrett county.

James Melville Spiker and Mary M. Miller, both of Garrett county. One with request not to publish.

Arrest on Charge of Criminal Assault.
Miss Lizzie Ross, residing several miles east of Barton, appeared before Magistrate Birmingham at that place on Saturday and swore out a warrant for the arrest of L. S. Groves, charging him with having criminally assaulted her. The assault was alleged to have been committed on September 22nd, on a lonely road some distance from her home. Miss Ross is a daughter of Mr. Salem Ross, and is 24 years old.

The warrant was placed in the hands of Constable Jos. Andrews, who arrested Groves on Saturday afternoon and took him to Lonaconing where he was locked up.

Groves is a canvasser for fruit trees and is about 30 years of age. He resides near Accident, Md., but has been in the neighborhood of Barton prosecuting his business for several weeks. He is tall and slender, with sandy hair and mustache. He will be removed to jail to-day.
—Cumberland News, Tuesday.

Loch Lynn Heights.
It seems that Loch Lynn Heights is no longer a venture but an assured success—a grand success. The contractor for the erection of the large and beautiful hotel, Enos R. Williams, his son and his architect, W. S. Boody and family, arrived from Cape May, N. J., last Friday with seven of their most trusted carpenters and master workmen. Their car reached here the same night loaded with tools, tackle and material for the hotel, and on Saturday morning all hands went to work. Over twenty men are now engaged in excavating, putting in the basement and preparing the frame work. More good carpenters will be needed and given employment as soon as more material arrives. Mr. Williams prefers employing workmen in this locality to bringing them from a distance. He expects to complete the hotel, kitchen and laundry within ninety days if the weather is the least favorable. When completed it will be the most convenient, attractive and finest summer hotel on the entire line of the B. & O. R. between Baltimore and Chicago.

Major Alderson has sold 35 acres of land and closed a contract with Mr. E. W. Williams, of Clarksburg, W. Va., for the immediate construction of large and permanent tile, brick and sewer pipe works. Such works have been long and greatly needed in this locality. A large and fine strata of fire clay has been discovered underlying Loch Lynn Heights. The siding is now being put into these works.

Messrs. Sweet & Shackelford have nearly completed their model green house just west of the depot, and will begin next week setting out trees, shrubbery, etc., on the hotel grounds and private properties.

Mrs. Craig has moved into her new house on Second avenue, and is happier than if she owned all Loch Lynn.

Mr. Friend has nearly completed his residence on Seneca avenue and has moved into same.

Mr. Geo. P. White has completed his residence on Roanoke avenue and is waiting on the plastering to dry before moving into same.

Stone, lumber, etc., are being hauled for the erection of eight or ten more new cottages. Several other parties are arranging to build this fall and winter.

Contractor Williams and his family are so much delighted with Loch Lynn Heights that they are thinking seriously of purchasing some lots and erecting one or more cottages on same.

The planing mill is full of orders and running steadily. The four boarding houses are full and the land-ladies are correspondingly happy. Agent and Postmaster Sperry has all he can do, and even Blacksmith Bunce steps quicker than in days of yore. Engineer Burley is busy plating additions to Loch Lynn Heights.

At a meeting of the Mountain Home Company at Grafton last week, Secretary D. L. Jamison's resignation was received and Mr. Oscar W. Sanner was elected in his place.

Major Alderson, the bustling general manager of the Mountain Home Company, is busy night and day, grading streets, making sewer, selling lots and answering his large correspondence. He is working under twenty men on his improvements.

A well yielding the largest flow of water ever found on this mountain has been sunk on the hotel grounds. The water is as clear as crystal and as cold as ice, and flows about 7 gallons in 24 hours—more than enough to supply the hotel laundry and hotel.

Major Alderson has commenced building a stone dam for his lake on Trout run, where there is a natural basin for same, and will erect immediately a large improved ice house for his friend Squire Crane, who will remain in the ice business. He has leased it for a term of years and will supply his friends and old customers at Loch Lynn Heights and Mountain Lake Park with clear, clean ice formed from pure spring water at reduced rates. Manufactured ice won't be any where compared with it. The lake will be as near the depot and nearer the auditorium than where he formerly secured ice in the Park.

The erection of the hotel has started a new boom here and more persons are now purchasing lots than any time since the public lot sale last August, and nearly all are arranging to erect buildings. It is estimated that at least 75 new cottages will be erected at Loch Lynn alone between now and the first of next July. From the number of lots reported sold by Supt. of the Park, Rev. L. A. Rindissill, we expect and hope as many more will be erected by that time in the Park. The erection of this hotel and the building of so many cottages will more than double the value of property both here and in the Park by next season. The prosperity of Mt. Lake Park will date from the public lot sale at Loch Lynn Heights on Aug. 9 and 10, 1894, and yet it has only just begun. There is a grand and glorious future for both of these places which are really one except in name. They are bound to grow together and no one can prevent it.

Quiet Observer.

Notice.
Did you hear the crash? Everybody thought it was thunder, but it was only Miller Bros. knocking the bottom out of the prices of horse shoeing. From Oct. 1 to December 1, 1894, you can get your horse shod for 60 cents. The cash must accompany the horse.

A Quarter Century Test.
For a quarter of a century Dr. King's New Discovery has been tested, and the millions who have received benefit from its use testify to its wonderful curative powers in all diseases of the Throat, Chest and Lungs. A remedy that has stood the test so long and that has given so universal satisfaction is an experiment. Each bottle is carefully examined to give relief, or the money will be refunded. It is admitted to be the most reliable for Croup and Colds. Trial bottles free at all Drug Stores. Large size 50c and \$1.00.

A Sick Stranger.
One day last week a young sharper giving his name as George Barry, of Boston, arrived in Oakland and located at Mrs. Russell's boarding house of Water street. He represented himself as being a theological student, that his father was wealthy and that he came here in the hope of regaining his health. After being here a few days he suddenly disappeared and with him disappeared several dollars belonging to Mrs. Russell, a revolver and about \$10 belonging to Mr. H. J. Metheny, another of Mrs. Russell's boarders.

As soon as his disappearance became known an effort was made to find him. On Monday it was rumored that he was in hiding in the Oakland Hotel, and the whole building was gone through by the sheriff and a posse of men, but they failed to find their man. Barry is described as being five feet, seven inches tall, weighing about 160 pounds, of dark complexion, heavy eye brows, gray eyes, high cheek bones and dressed very well.

Hello!
Our attention has been directed to an article in the Terra Alta Oracle condemning the management of the Oakland telephone station.

The young man of the Oracle has taken it upon himself on two or three former occasions to regulate affairs at Oakland which did not concern him. We therefore suggest to our people that he be brought here and given a permanent position at a good salary to regulate and carry on both the public and private affairs of our citizens.

To judge by his vapors there are promising business abilities of vast magnitude stored away in a remote corner of his brain, and by giving him a chance perhaps they may be turned to some use other than running a paper in the "news-paper graveyard" of Preston county.

House Breaking near Deer Park.
On last Sunday night unknown persons effected an entrance to Mr. John W. Williams' summer residence near Deer Park by prying off a shutter and breaking a pane of glass.

The whole house was ransacked by the thieves who went through every drawer, closet and piece of furniture in the building.

The authorities have been unable to determine what was stolen.

Improvements at Mt. Lake Park and Loch Lynn Heights.
On Tuesday THE REPUBLICAN went down to the Park and Loch Lynn Heights and was greatly surprised as well as gratified to note the improvements now going on at those two thriving towns.

At the Park as well as at Loch Lynn Heights, everyone seemed to be busy.

The Mountain Lake Park Association now have at least forty men and a large number of teams at work enlarging the lake. When completed the water will cover thirty-five acres of ground. An ice house having a capacity for two thousand tons of ice is to be erected on the shore of the lake and a switch run to it from the B. & O. tracks. From the lake ice will be harvested and shipped to both eastern and western cities.

Beside the improvement at the lake a large number of houses are being erected, and a fine iron bridge is being built to span the Little Yough where Glade avenue passes over it.

At Loch Lynn Heights a large force of men are at work excavating for the foundation of the new hotel. Another force is making and grading streets and excavating for a lake which is to be fed by Trout Run. From this lake ice will be harvested and stored in an ice house for summer use.

The hotel will be a model structure throughout, having a frontage of two hundred and twenty-five feet and will be furnished with all the latest conveniences and improvements.

Bonnie Boulevard, the main drive in Loch Lynn, is one hundred feet wide and when completed will be almost three miles long and almost as level as a floor.

There are a great many private residences being erected and everything has the appearance of prosperity.

To Break the Bonds.
Mrs. Zelma Lorena Pearre, by her counsel, Thomas J. Peckard, Esq., yesterday filed a bill in the circuit court for Allegany county praying for a divorce *a mensa et thoro* from her husband, Mr. William Pearre.

Mrs. Pearre is the daughter of the late Dr. D. P. Wellfey, of Cumberland, and at the time of her marriage with Pearre was the widow of the late Wm. Robinson, also of Cumberland. The bill recites that the couple were married in New York, Sept. 5, 1894, that soon after the return of the plaintiff and defendant to Cumberland, the said defendant abandoned and deserted the plaintiff, and left the State. The plaintiff further prays the court to award her such estate and property as she had at the time of said marriage, and for all such other relief as the nature of her case and the rules of equity may require.

SARAH RAWLSON'S LOVE.

It Was Faithful to a Jealous and Frenzied Lover.

At dinner-time Sarah came out of the factory and sat upon a stone step in the stone yard to eat her dinner.

It had been her custom to sit in the midst of the other girls, the most of them all, at this time, but now she wanted to get by herself.

She wanted to think, as we generally do when thought is most painful to us, and she was in that condition of mind when we could almost fancy ourselves to have a dual identity.

It was not long, however, before Sarah seemed to find an argument with another Sarah Rawnson in this wise: The first was the old Sarah she had known for nineteen years—her mother's obedient daughter, the good Sunday school scholar, the steady, sensible little Sarah, to whom duty had been everything else.

The other Sarah—a new Sarah—seemed to say this: "I engaged myself to Charles Arthur before I knew my own mind. I never really loved him; he is very much older than I, he has a jealous disposition, and the pity I feel for his hurt does not keep me from knowing that it disfigures him. I have met the man I love—I cannot help loving him. I know I shall be miserable if I do not. I won't stick to my engagement; I will break it. I love Ben Barton, and he loves me."

Which was the real Sarah? The poor girl did not know. She felt as though she must really be going quite out of her mind.

Meanwhile, at the window of his room the engineer sat moodily, his face dark with trouble.

He ought to have been happy, it seemed. When, three years before, he had lost a good position all through what was called "carelessness," he had never hoped to get another so good. He had lamed himself for life, and he had been humbled for a long while by deep remorse.

Something had happened that had absorbed his whole attention, and he had forgotten his engine, and the result was a terrible one.

He had retrieved his character, however. He had a good position again. He was about to be married to the prettiest girl in town, and there were many who thought him a very enviable fellow.

On the contrary, he was very wretched, for he had just made sure that Sarah cared more for Ben Barton than she did for him, and he was furious with jealousy. He had made up his mind to talk to Sarah that noon-time, but the assistant engineer had been taken ill and was at home, and the engine could not be deserted. All he could do was to get near the window and watch, hoping that she would pass.

If she should come that way on purpose, knowing that he was in that room by his duty, and look up at him and smile, then he would know that she cared for him still. Where was she? Talking to Ben Barton, perhaps, at that thought he could have killed the young fellow.

Before his accident he could have dared to run down into the yard and look for her, catch a kiss and be back again; but it would take too long now. His mind went back to the day when he had forgotten his engine in the wrath he felt for a fancied insult.

"What a fool I was!" he muttered. "What a confounded fool! But I've paid for it. I used to be the strongest fellow I knew, if I was not the handsomest. Now can I expect a girl to like me now?"

Then a memory came to him. Once she had told him she loved him all the better for his hurt. She meant it, too; but she had not seen this Ben Barton when she said it.

The big, dark man, with his face all blackened with his toil, in his rough clothes, and with the light of the furnace on his face, might have been taken by a romantic stranger peeping into the engine room for something almost dramatic at that moment.

But his heart was softening very much at that moment. He remembered the soft tones of Sarah's fingers on his brow when he was ill—her soothing voice.

"She can't be a false thing," he said, and he left his window and went to the other side of the room and peered through a break in the boards. Thence he could see the courtyard and stone steps, and there sat Sarah alone, eating her dinner; waiting for him, perhaps. All that was tender in his mind thrilled within him now.

"Sarah," he said, softly smiling upon her. He whistled, but the sound did not reach her. "Little Sally," he repeated, "I am a jealous beast. I've frightened you. Why shouldn't you have a dance now and then, child? Why shouldn't you know you are pretty? I could beat myself!"

"Lots of steam on," said a workman, passing by the engine-room. "But I suppose the fellow knows what he is about."

He scarcely thought the fellow did at this moment, for he had just seen Ben Barton run down the steps and come behind Sarah very softly and touch her on the cheek with a straw he had in his hand. She started and turned and blushed.

"Was she waiting for him?" asked the engineer, his face darkening again. "Was she waiting for him?"

Sarah had laughed, but her face grew grave again—grave, but very sweet; the conflict between conscience and inclination was over. She had

made a decision. She looked at Ben as he sat down beside her, and thought how handsome he was. But she remembered that same moment that—Charles Arthur's heart and softened it just now. She had put her arms about his neck, and told him she loved him better for his hurt, and she had meant it from her soul.

It came to her that this new emotion was, perhaps, a fleeting passion; but the long, old-time home tenderness was all Arthur's, and she listened to what Ben Barton said very quietly.

"I've been looking for you, Sarah," he said. "I have something I want to tell you. I can't rest until you know it. I like you so much I want you to like me. I want you to be my wife, my dear. Will you?"

Sarah's heart gave one great leap. Then, to her joy, she felt that it was true to its love, after all. The words came to her:

"Oh, I do like you, Mr. Barton, very much, but only as a friend. I am engaged to be married, and, of course, I could not like anyone else in any other way."

The blood rushed into the young man's face.

"I can't say you have acted much like an engaged girl," he said.

"Well, perhaps I've been wrong," said Sarah, mildly, feeling the reproach a just one. "But I thought every day I saw you, and I was sure we were to be married very soon now. We've been engaged ever since I was sixteen. He is very fond of me."

"That's no reason you should marry him if you like me best," said Ben; "and, really, I can't see, since it is Charles Arthur, why you shouldn't; he is about the last person I should fancy a girl could like."

"You see," said Sarah, "people can't tell about that." And she had scarcely ever felt so lovingly to her betrothed husband before.

Little he knew it, as he watched her through the crevice in the boards, his face growing crimson with wrath; all forgotten, but the sight he saw. He could not hear what Sarah said, and the attitude of the young man was very lover-like.

The engine was throbbing like a mad thing, like his own heart. A shrewd little boy, with all a little boy's observing power, stopped at the door, feeling that something was wrong.

"There'll be a bust up," he said. Then he called "Mister! Mister!" and at last went in and pulled him by the coat.

But the engineer was an engineer no longer—only a jealous lover. Furious to be spied on, he turned and gave the boy a kick.

Meanwhile Ben had risen.

"Well, I'm not one to stand in another fellow's way," he said. "Good-bye, Sarah; I shan't see you again very soon, I suppose, and I've liked you so much. Will you kiss me once—just once, to say it is over, you know?"

"I think there can be no harm in that," said Sarah.

Charles Arthur's eyes were at the crevice again, in time to see that kiss. "He's got her!" he yelled.

And then, what was it—the noise, the beating pulse, that shook the building? He turned—a memory of that past scene of horror and destruction rushing over him.

"Again! again! again!" he shrieked, and flew to his engine.

It was too late!

What had happened? Sarah did not know. Reddened, shaken, terrified, she stood among fallen beams and burning boards, and found herself unhurt.

Ben held her tight. Neither was injured, but at their feet, as it seemed, through the broken wall, lay a dead man, torn, mutilated, terrible to see, with that look of horror frozen on his face, but she knew him.

The engineer was the only man killed by the explosion, though others escaped only as it seemed by a miracle. At the expense the boy who called him gave his engine.

"I saw something was going to bust through a crack. I peeped then—she was watching another fellow kiss Sarah. I suppose that made him so angry he didn't care what bust."

It was the week after Charles Arthur's funeral that Ben Barton met Sarah Rawnson near her father's house and offered his hand.

Sarah did not take it; she turned away.

PRECIOUS CUSTOMS RECORDS.

Three Volumes Filled With Letters of Hamilton, Gallatin and Others.

Safely stowed away in the archives of the collector of the port, in the Philadelphia custom house, are three quaintly bound volumes that shed an interesting light on some of the difficulties met and overcome by the founders of the republic. They constitute the record of the beginning of the customs service of the government, and are composed chiefly of manuscript circulars and correspondence, covering the period from October 15, 1789, to 1857. They are of great value in estimating the remarkable administrative capacity of three of the early secretaries of the treasury—Alexander Hamilton, Oliver Wolcott, jr., and Albert Gallatin.

Some of the letters are entirely in the secretaries' handwriting, showing comparative leisure or limited conveniences of the officials of that period. All, whether letters or circulars, bear the autographic signatures of the writers, and these include many names famous in the annals of the republic. Even President James Madison found time to personally sign circulars addressed to the collectors of all the ports; while Timothy Pickens, secretary of state, took occasion to open a long letter to George Latimer, Philadelphia's second collector, relating to the issue of a passport to a Frenchman of this city who desired to go to St. Domingo, but who was suspected of having designs upon the governor of Gen. Toussaint L'Ouverture. At that time, it appears, the collectors of some of the ports in the United States were empowered to issue passports.

Most of the letters are addressed to Sharp Delancey, who was collector of the port, while Timothy Pickens, secretary of state, took occasion to open a long letter to George Latimer, Philadelphia's second collector, relating to the issue of a passport to a Frenchman of this city who desired to go to St. Domingo, but who was suspected of having designs upon the governor of Gen. Toussaint L'Ouverture. At that time, it appears, the collectors of some of the ports in the United States were empowered to issue passports.

Most of the letters are addressed to Sharp Delancey, who was collector of the port, while Timothy Pickens, secretary of state, took occasion to open a long letter to George Latimer, Philadelphia's second collector, relating to the issue of a passport to a Frenchman of this city who desired to go to St. Domingo, but who was suspected of having designs upon the governor of Gen. Toussaint L'Ouverture. At that time, it appears, the collectors of some of the ports in the United States were empowered to issue passports.

Most of the letters are addressed to Sharp Delancey, who was collector of the port, while Timothy Pickens, secretary of state, took occasion to open a long letter to George Latimer, Philadelphia's second collector, relating to the issue of a passport to a Frenchman of this city who desired to go to St. Domingo, but who was suspected of having designs upon the governor of Gen. Toussaint L'Ouverture. At that time, it appears, the collectors of some of the ports in the United States were empowered to issue passports.

FIRESIDE FRAGMENTS.

—Delicious Ice Cream.—Make a quart of one quart of milk and the yolk of two eggs. Add quarter of a box of good gelatine, sweeten to taste and season with vanilla. Let it cool, then take one quart of rich cream, make it very sweet and froth it with a cream churn. Then take off the froth and beat it in the custard. Put all together and freeze.—Good Housekeeping.

—Cranberry Sauce.—One quart of cranberries in one pint of water; boil six or eight minutes and add one pound of sugar. Boil till done. Keep the saucepan covered and do not stir while cooking. This makes a rather solid, rich sauce. Many prefer it less thick and sweet; it is easily made so by adding a little more water before cooling. If strained it forms cranberry marmalade.—Housekeeping.

—Italian Cream.—Take three pints of milk or cream, sweeten it with white sugar, flavor it with lemon or vanilla and add one package of gelatine. Stir constantly until it boils; add the well-beaten yolks of eight eggs and stir well. Strain it into molds that have been dipped into cold water, and let it stand until the ice freezes six hours before serving. It is better, especially in summer, to make it the day before using.—Boston Budget.

—Compote of Apples.—Pare and core tart apples, and place them on the bottom of an agate pudding mold. Fill the hollow of each apple with sugar, grate a little nutmeg over the sugar and bake. Pour one cupful of boiling water over two tablespoonfuls of butter and four of sugar; add the apples and bake until the apples commence to bake; then remove the butter and sugar and repeat the basting. Sift sugar over the apples and bake until done. Serve hot.—Ohio Farmer.

—Belmonte Pudding.—Put two tablespoonfuls of tapioca to soak in enough warm water to cover, set in a warm place. Take one pint of sweet milk and set on the soaked tapioca. (It is better to soak over night.) Then beat the yolk of an egg and one-half cup of sugar together and stir into the milk. Add a cup of fruit of any kind, dried peaches, apples (cooked) or canned fruit. Bake until done. Let it cool, then make a frosting of the white of the egg and three-fourths cup of sugar and spread on the pudding. Set it in the oven to brown.—Farm, Field and Fireside.

—Beef Bouillon.—Take lean beef from lower round and shank of veal in equal proportions. Put a hanging tenderloin of butter into your kettle, put in meat, cut into small pieces; stir over fire until meat begins to brown. Then add one pint of cold water and cook until there is a thick glaze on bottom of kettle, which should be about an hour. Add cold water in proportion to a pint for every pound of meat. Let it come to a boil, skin and set back where it will simmer for six hours. Strain through a fine cloth, season with salt and red pepper and set away to cool. When thoroughly cold skim off the fat. When ready to use bring to boiling point, and if necessary skim again. It should be served hot in cups, without spoons, and with salted wafers, as a first course or sort of introduction to the supper. If preferred, serve chicken bouillon, which is prepared in the same way. But if bouillon is not served, serve instead chocolate with sweet graham wafers.—Ohio Farmer.

—Beef Bouillon.—Take lean beef from lower round and shank of veal in equal proportions. Put a hanging tenderloin of butter into your kettle, put in meat, cut into small pieces; stir over fire until meat begins to brown. The Republican.

BENJ. H. SINCELL, Editor and Proprietor.

RATES OF SUBSCRIPTION:

This paper is published every Thursday morning at the following rates:

One copy one year	1.50
One copy six months	.75
One copy three months	.40
One copy one month	.15
Single copies	.05

ADVERTISING RATES.

First insertion for square of ten nonpareils lines; each additional insertion after first 10 cents per square of ten nonpareils lines. Positioning no insertion will be made from the above rates.

REMITTANCES:

Remittances made by money order, postal note, registered letter or bank draft will be at our risk, if made otherwise, at the risk of the sender.

THE REPUBLICAN,
Oakland, Md.

THURSDAY, OCT. 25, 1894.

REPUBLICAN NOMINATION.

FOR CONGRESS:

GEORGE L. WELLINGTON,
OF ALLEGANY COUNTY.

Republican Mass Meetings.

The principles of patriotism and protection will be ably discussed at the following places in Garrett county on the dates named:

Selbysport, Tuesday, Oct. 30, at 7 p. m.

Sand Spring, Wednesday, Oct. 31, at 2 p. m.

Friendsville, Wednesday, Oct. 31, at 7 p. m.

Accident, Thursday, Nov. 1, at 7 p. m.

Grantsville, Friday, Nov. 2, at 7 p. m.

Eminent orators will address these meetings and discuss the principles of Republicanism.

The great Smith's Military Band (17 pieces) of Oakland will be present and render its choicest selections.

ANDREW SHARTZER,
Chairman.

REPUBLICAN meetings will be held at Gregg's school house on Friday evening, Nov. 2, at 7 o'clock and at Bittinger on Saturday evening, Nov. 3, at 7 o'clock.

MOURNING goods are growing cheaper in price. This is the only ray of sunlight that the Democrats have.

COL. BEN. LEFEVER, of Ohio, is in a doleful mood. He said to a friend in Washington, yesterday, that he believed if the Democrats of his State worked hard and make no mistake they might keep the Republican majority down to one hundred thousand.

THIS is no time for airing of grievances. Almost everybody has a political complaint.—Mountain Democrat.

Yes, from reports and personal observation quite a number of Garrett county Democrats have a political complaint but will be cured on the 6th of November.

"THE noblest work of God—Honest Billy Wilson. Every man who loves honesty should vote for him."—Kingwood Argus.

We suggest for the good of the community that before Brother Brown's case becomes hopeless he be either sent to Weston, the home of the insane, or to a Keeley Institute.

MR. WILLIAMS declares that Protection has reduced the wages of labor to \$1 and \$1.25 a day. Does not Mr. Williams remember

that under the tariff of 1846 ordinary labor did not bring more than fifty and seventy-five cents a day? Does Mr. Williams pretend to say that his policy of making things cheap will not also make labor cheaper?

The School Bonds.

Ever since the agitation of the question of issuing bonds for school purposes our columns have been open and are still open to the discussion of the question.

The coming week is the last opportunity our people will have to give public expression through this journal to their feelings in the matter, and we hope they will embrace the opportunity.

FERDINAND WILLIAMS might speak five times a day from now until November 6th and he would not change a single vote. The men who have had their wages reduced, or who have lost their employment altogether through the Democratic fight against American interests, have made up their minds how to vote, and their determination cannot be shaken by demagogic sophistry or campaign canards. The Democratic party has already played one great bunco game upon the people of this country. Mr. Williams, who is one of the advocates of a free trade tariff, should remember that schemes of this kind are never worked twice on the same people. The empty dinner pail is a more powerful argument than all the speeches Mr. Williams ever made in his life. A vote for Williams is a vote for more tariff smashing, disaster and distress, and the people know it.

The Difference.

Mr. Williams, the representative of the English system of Free Trade in this country as advocated by the Democratic party, stands for—

- 1st, Free wool.
- 2nd, Free lumber.
- 3rd, No bounty on sugar.
- 4th, Free coal.

Mr. Wellington, the representative of the American system of Protection as advocated by the Republican party, stands for—

- 1st, A duty on wool.
- 2nd, A duty on lumber.
- 3rd, A bounty on sugar.
- 4th, A duty of 75 cents per ton on coal.

Farmers, lumbermen and miners of Garrett county, who is the exponent of your interests?

The difference is so marked, so plain and apparent, that "he who runs may read."

Geo. L. Wellington is the man whose vote will be cast in the interest of the American people and he will rightly represent the people of this District in the next Congress.

THE Democrat asserted last week that wool had advanced ten per cent. since the Wilson bill became effective. This assertion was made without facts or figures upon which to base it.

The farmers of Garrett county know that this statement is not true and while we admit the Democrat must have some sort of foundation upon which to rest its tottering structure of English free trade, yet we do deny its right to even attempt to impose upon the good people of Garrett county by such a naked lie.

We effectually disposed of the other branch of its bald assertion last week that a local dealer was paying two to three cents more for wool than before the passage of the Wilson bill, by our article which showed that the aforesaid local dealer had been offered *bona fide* ten thousand pounds of wool at sixteen cents per pound, which he declined to take, so that the conclusion forces itself irresistibly that the Democrat lies about the wool question as it does about many other things in this campaign and that its local dealers' story was put before the people too early in the fight.

McKinley in West Virginia.

Gov. McKinley, on his trip from New Orleans into West Virginia made addresses to crowds at the railway stations at Chattanooga, Tenn., Lexington, Mt. Sterling, Ashland, Catlettsburg and minor

points in Kentucky. At Huntington, W. Va., he addressed 10,000 people in the afternoon. The governor frankly admitted there were mistakes in the tariff law of 1890, but insisted they were all on the side of America. The Wilson law is found to contain more than 600 errors, but not one of them was in the interest of America. "They did not legislate for America even by accident," exclaimed McKinley.

At Charleston the governor was given a splendid reception, and an overflow meeting was necessary, which was addressed by the Hon. S. B. Elkins. In his opera house speech Gov. McKinley said: "It is better for Democrats who believe in the protection of American homes to be regarded as traitors to their party, rather than as traitors to the best and most sacred interests of the country. It has been charged that the Republican tariff bill was full of mistakes, but they were in the interest of the masses, while of the 600 mistakes the Democrats had themselves discovered in their new bill not one was in favor of the people. The governor said when he spoke in West Virginia two years ago all was prosperity and good times, and when he asked if the same condition prevailed to-day, there was a great shout of 'No.'"

"ELOCUTION ON WHEELS" passed through Oakland yesterday morning about nine o'clock. The aggregation consisted of an engine, three cars, a brass band and Messrs. William L. Wilson, John K. Cowan, Burke Cockran and a number of retainers. We suppose that "Elocution on Wheels" meant the three gentlemen named.

Quite a number of people assembled at the depot, but the mellifluous strains of Smith's Military Band could not even bring the crowd up to anything like enthusiasm when the train pulled in. At least half the number present were Republicans who showed their loyalty by wearing a Wellington button.

MR. WILSON confined his remarks almost exclusively to the wool question and his argument boiled down resolved itself into this proposition, namely: That Australian wool should be allowed to come into the American markets free of duty and those people would take in exchange therefor agricultural implements and other kinds of machinery, thereby giving employment to thousands of American workmen in producing the same. This would do well to tell some people, but it won't go with intelligent Garrett county citizens, for they know if Mr. Wilson does not that it does not require agricultural implements and other kinds of machinery to raise wool, which is about the only business the people of Australia are engaged in.

MR. JOHN K. COWAN next appeared on the rear of the car. He confined his remarks to the sugar industry and dwelt upon the question of a sugar bounty for our maple sugar producers. He called every person drawing money from the United States Treasury either a robber or a pauper and wound up by saying that the sugar bounty would never be restored.

MR. BURKE COCKRAN spoke for a few minutes and his remarks ran in about the same channel as the speakers who preceded him. Taken all in all "Elocution on Wheels" was a misnomer.

The Wool Question in Politics.

One of the ablest discussions of the question of the wool tariff we have ever read was the address of Judge William Lawrence, president of the National Wool Growers' Association, before the National Farmers Congress at Parkersburg, on the 5th instant.

The title of Judge Lawrence's paper was "The Duty of the National Government to Sheep Husbandry." No man in this country is better informed on the question than he, and no man is better equipped than he to discuss it. He is regarded as an authority by men who entertain all views on the question of the wool tariff.

In his paper, which is quite lengthy, Judge Lawrence says that free wool reverses a policy which

has prevailed through all administrations since the Calhoun tariff act of 1816. Whatever differences, he says, existed as to the proper extent or character of tariff duties on most commodities, there was certainly up to 1887 such a general sentiment that sheep husbandry was so important, so essential to prosperity for agricultural, and indeed all industries and to national independence, that all political parties favored adequate protection for the wool industry, because they deemed it just, necessary and wise.

It remained for the Democratic party in the time of Grover Cleveland and William L. Wilson, at a time when there had been no demand for free wool, to inaugurate a policy which designed to strike a death blow at an industry which was as broad as the continent and engaged in by a million American farmers.

One point in Judge Lawrence's address we desire to call attention to. It is often asserted that foreign wools are needed to mix with our domestic fleeces for successful manufacture. The judge quotes from Charles Fletcher, one of the most eminent of American manufacturers, as follows:

"This talk of mixing Australian wool with domestic wool to make goods required for this market is all nonsense, as Australian wools are only used here when they are cheaper than domestic wools."

"All these statements come from people who wish to get wools free from duty and keep the 40 per cent. tariff on woolen goods. There is no need of my stating to you that I do not believe in this principle, as it is well known that I believe in equal protection on wool as well as on woolen goods, as wool is the foundation stone for a protection on woolen goods, and I see no reason in the policy of taking the foundation stones out of our mills and expecting the mills to stand up. It is quite as reasonable for us to expect, as to take duty off wool and expect to be protected on woolen goods."

If it were true, says Judge Lawrence, as it is not, that foreign wools were needed to mix, that would only be a reason for specifying the wools in the tariff law, and for admitting them either free, or with revenue duties. But no wool or manufacturing expert, or statesman has ever specified the wools or proposed to make special provision for them in any law.

The talk about mixing is only a pretext to secure free wool for a political purpose. Free wool, urges the judge, is the bait set in the trap to catch the south and some of the New England manufacturing districts.

"Free wool, by diminishing our flocks, will drive farmers from sheep husbandry into the increased production of corn, wheat, hay, bacon, beef and other farm products. The demand for pasture, hay, corn and oats, will be reduced by the destruction of our flocks. The cotton-growing states, New York city and the manufacturing districts of the New England states will thus secure cheaper food products."

"As a political party move, the free wool advocates hope to make still more solid the 'Solid South' and secure to the free trade causes some of the New England manufacturing states."

"The scheme is sectional, unpatriotic, unjust, and vile beyond the capacity of words to express."

These are points that have been dwelt upon before, but cannot be too strongly urged. They throw light upon the motive of the movement for free wool which was suddenly started by Mr. Cleveland and carried out by the Democratic party.

The Sixth District.

The voters of Garrett county—
Want to get the sugar bounty—
They are firing maple sugar secret
And want to see Mr. Williams beat.

The miners of Allegany coal—
Want Wellington on the Congressional roll
Free trade robs them of bread and meat
And they want to see Mr. Williams beat.

Washington county's factories are closing
And the workmen all are closing
The life machines are walking the street
So they want to see Mr. Williams beat.

All around old Frederick Town—
The same feeling has rapidly grown—
The victory there will be complete
As they also want to see Mr. Williams beat.

The Democracy of old Montgomery
Are tiring of all this Tom foolery,
They are very sick of fifty-cent wheat
And are willing to see Mr. Williams beat.

FINANCIAL REVIEW.

Henry Clews' Weekly Resume of the Stock Market.

New York, Oct. 30.—The past week has shown an increase of interest in the stock market, but no material change in the volume of business. The attention of operators has been occupied principally with the near approach of the elections; the monthly statements of railroad earnings; the large decrease in the earnings of the St. Paul road; the possibility of a renewal of exports of gold suggested by shipments of \$1,000,000 to Germany; and the unfavorable developments in connection with the management of Northern Pacific, which have had an especially unfavorable effect. The first effect of the falling off in railroad earnings was a partial decline in prices; that, however, brought out free buying by the "bears" to cover their "short" contracts, which caused a recovery from the fall, that tendency being also encouraged by some moderate buying on "long" account. The falling off in the month's gross earnings—which averaged 64 per cent—was hardly a matter of surprise, as the comparison is made with a period of last year when the immense travel to the World's Fair was at its height. Indeed, making due allowance for that feature in last year's September business, the showing is to be regarded as a fairly satisfactory one. The fact, too, that many companies are reporting an increased traffic for the first and second weeks of this month is accepted as a good indication. The Missouri, Kansas & Texas shows an increase for the first week of October of \$44,700; Norfolk & Western, \$26,900; Missouri Pacific, \$51,187; St. Louis & Southwestern, \$24,800; Peoria, Decatur & Evansville, \$15,900; International & Great Northern, \$33,600; and Louisville & Nashville, \$67,510. These are conceded to be very encouraging symptoms. From this time forward we shall begin to compare with a period of last year when the business of the roads was little affected by the fair travel, and the gains already shown indicate that comparisons will in future be more favorable than they have been.

The symptoms of growing confidence in the market are unmistakable, and sagacious operators are looking for an early improvement in prices; though more disposed to wait for a fuller maturity of condition than to precipitate a rise prematurely. For the last few weeks Wall street has watched the course of general business with a critical eye. Whilst expecting a revival of trade immediately following the end of the tariff suspense as a matter of course, they waited to see how far the revival would run and whether it would not be followed by some reaction. There was some reaction following the universal and liberal replenishment of the previously exhausted stocks of merchandise; and then came a second waiting to see how far that reaction would extend and whether the second stage of the season's buying would be as satisfactory as the first. That test was a crucial one, but it has been attended by no disappointment. In many branches of trade there is already an encouraging resumption of buying; which is construed as meaning that the retailers are finding a satisfactory demand for goods and that the consumptive ability of the country is again verging upon a normal measure. The effect of these indications has been to develop a hopeful feeling through the various departments of trade, which finds its effect in larger orders at first hands and in preparations for an increased output among the industries and in larger orders for imports.

The recent public utterances of President Roberts, of the Pennsylvania railroad—whose abilities and conservatism of judgment are universally recognized—are an important acknowledgment of the value of these symptoms; and his estimates will have the more effect upon public confidence because they echo a feeling that is generally entertained among men connected with the larger movements of capital. It is not easy to limit the benefits that may arise from public confidence assuming a more positive shape. To both the borrowers of capital and the lenders of it there are now clear and strong inducements to resume operations. The former class have suffered greatly from the long interruption of business and have been compelled to make important postponements of contemplated enterprises. They have been conservative enough to defer their undertakings until the prospect was more certain, and having reached a stage of recovery which bespeaks more confidence among investors they are likely to substitute action for waiting. The lenders are tired of keeping their means so long idle and of lending at less than half the usual rates of interest; and when general symptoms are indicating a large recovery

of confidence and soundness, they are not likely to reject meritorious applications for capital.

A feeling approaching uneasiness has been caused in some quarters by the high rates of foreign exchange and the shipment of \$1,000,000 gold to Germany. And yet there is no visible reason for expecting any really important movement of that kind. One shipment of \$500,000 appears to have been made in settlement of a transient railroad just matured, and there are reasons why Germany should have preferred gold in its liquidation to anything else. At this season of the year, the interior demand for currency always makes money scarce at Berlin, added to which Russia has recently drawn freely on her deposits at that centre. At New York, the symptoms are not such as to suggest any continuous adverse state of the foreign exchanges. While the rates are high, there seems to be a good deal of elasticity in the supply of bills. There is likely, however, to be a more active demand for gold in Europe than has been experienced for many months past. Egypt will call for some £2,000,000, in payment for her cotton crop; Brazil has a call upon a considerable sum in payment for her large exports of coffee; the British Provinces and Scotland are expected to forthwith draw largely upon the bank of England; and Austria-Hungary is ready to seize every convenient opportunity to complete her new currency scheme. It is quite possible therefore that, before the end of the year, we may need to increase our exports of merchandise if we are to escape exports of gold.

HENRY CLEWS.

Mountain Lake Park Jottings.

Four new houses in course of erection.

The Weaver & Bardell cottage is being enlarged and otherwise improved.

Arnold Bros. have plastered Jake Eckard's cottage.

Mrs. L. A. Rudisill is visiting in Cincinnati.

W. R. Johnson's cottage is being plastered.

Howard Echels and family have returned home from their visit to Pennsylvania.

Offutt & Son received the contract for 41,000 feet of lumber to be used on the ice house.

C. W. Conner and John Bailie, of Wheeling, and L. T. Yoder, of Pittsburgh, were visitors at the Park last week.

The old ice house is no more. A new ice house is to be erected on the east shore of the lake. It will be 50x80x20 feet, and have a capacity for storing 2,000 tons of ice.

A large force of hands are at work on the lake with plows and shovels. Instead of the lake covering 20 acres of ground as originally intended, it will enclose 35 acres.

A large amount of ditching has been done through the glades.

The stone abutments for the iron bridge across the Little Yough are almost finished. It is a substantial piece of masonry.

Engineers have made surveys for and investigated the possibility of water supply for the Park and report the feasibility of the plan.

The carpenters who are building Mrs. Nesbitt's house are boarding at the Assembly House.

Chas. Dawson is painting the Weaver & Bardell cottage and is doing a good job.

Several cottages have been rented for the winter.

Our merchants are doing a good business. They deserve the patronage they are receiving.

A number of Oaklanders are at work at the Park.

Mrs. McIlwaine and daughters have gone to Atlantic City for the winter.

Mrs. P. T. Garthright is visiting friends in Pennsylvania.

"Batch" Peathers, clerk of P. T. Garthright, has purchased Clews' cottage. Now that the "nest" has been secured, a ——— ought to follow.

Indian Summer.

Indian summer in all its hazy glory has been prevailing during the past few days. This season is an inconstant one: sometimes it pays us a fleeting visit of a day or two, sometimes a week or two, and sometimes not at all. Why it should be called Indian summer no man knoweth for certain, though there are various myths on the subject, the most plausible being that it received its name in the colonial days, when settlers observed that the season was peculiar to the region west of the Alleghenies then occupied by the Indians. In the East, as already indicated, it is irregular and uncertain in its visitations.

ONE HUNDRED DOLLARS REWARD

Will be paid for information leading to arrest and conviction of persons who broke into my house on the night of Oct. 21st, 1894.
JNO. W. WILLIAMS.
Deer Park, Md.

THE GLOTFELTY FAMILY.

Interesting Sketch of a Family From Which a Large Number of Garrett's Citizens are Descendants.

The following interesting historical and biographical sketch of a family of Somerset county (Pa.) settlers was published in the *Maryland Commercial* last week and we reproduce it. There are a large number of descendants of the family in Garrett county who are among its leading and best citizens.

"In recent years I found myself employed, somewhat pleasantly occasionally in writing sketches of some of the ancient families of Alleghany and Garrett counties. I have reason to believe they formed acceptable reading, not only to the persons immediately concerned, but others as well. At any rate they were liberally drawn upon by the historian of Western Maryland, in his treatment of the two counties mentioned. My facilities, (if the expression be allowable) in such literature are about as available in Somerset county, as in the other two, especially, old Elk Lick. Among the old time families of my early acquaintance in Elk Lick, the Gloftelty race readily presents itself. My acquaintance with it began in my earliest youth, and was always of a pleasant and satisfactory character.

"The most remote ancestor was Solomon, a good old Hebrew name. Born in Germany in 1738, emigrated to America, landed at Baltimore in 1765, stopped at Hagers-town, Md., till the next year. When by way of Braddock's road he traveled westward, turning to the right a few miles, he discovered a beautiful tract of land. He settled upon it in 1766, and called it "Green Park," with the Indians, wolves, panthers and bears as hostile neighbors. All of Somerset county was then a portion of Cumberland county; it had not yet attained the name of Brothers Valley by which in after years it was known, till the county was organized in 1795. Green Park was a beautiful plot of land, situated on a plateau upon a spur of Meadow mountain, about one mile south of Salisbury. Its attractiveness in so many of its features shows well the judgment of the old pioneer as to the future value and usefulness of land yet in savagery. It was his home to the time of his death in 1818, in his 81st year. The German Bible now nearly 200 years old, brought with him from the Fatherland is still in existence, and in the family. The pride of one of the children of Jerre Gloftelty. It is in tolerable good preservation, considering its age and long usage. The birth entries made by the old patriarch in his own hand, in German, are wonderfully quaint and unique, and are worthy of publication to show by object illustration how record was kept half dozen generations ago. Here are reliable extracts and translations.

"June 12, 1767, a daughter was born in the sign of the Waterman. "April 12, 1765, a daughter was born to me and my wife, Eve Margaret, the sign of the Scorpion. "October 25, 1770, a son was born to us, his Christian name was John Adam, in the sign of the Bowman. "April 14, 1773, the sign of the Waterman, a daughter was born to us, her Christian name was Anna Mary.

"April 2, 1775, a daughter was born to us in the sign of the Bull, her Christian name was Elizabeth. "August 24, 1777, a son was born to us, his Christian name was Casper, in the sign of the Bull.

"November 4, 1779, a son was born to us, his Christian name was Henry, sign of the Virgin.

"January 17, 1781, my son Jacob was born to us in the sign of the Scorpion.

"October 15, 1789, my Catharine was born in the sign of the Virgin.

"It will thus be seen the Abraham of all the American Gloftelty's had nine children; four sons and five daughters. John Adam went to Ohio at an early day, and but little is known of his progeny, at least to the writer, but no doubt there is more or less of it. Casper (Gasper) stepped over into Maryland when young, and bought from Michael Fresh a small portion of "Grassy Cabins," two miles south of Grantsville, where it is said he became the proprietor of a small distillery for a few years. From here he went to Turkeyfoot where he raised a small family, but not much known to the writer.

"The old ancestor was a blacksmith by trade, and established a smithy on his farm soon as civilization had use for it. All the early Gloftelty's and many of the later ones were blacksmiths. The craft has already descended, the fifth or sixth generation in the person of Lloyd Boyer (son of Oliver Boyer) a bright and prosperous young man, who has for some years conducted the old Gloftelty shop in Salisbury. Only recently I took a deliberate look upon it. It is nearly the same it was more than half a century ago, when I, a little boy, would take Ned, Pomp, Dragon

and Jim there to be shod. It is bedimmed and begrimed with age, and the only landmark to remind the aged how Salisbury was in "the long unloving past." Spare it for the sake of the few. The Gloftelty's carried on the shop on the farm till it was moved to Salisbury about the year 1830. The present generation will be surprised, I hope a little instructed, to learn how and where coal for the shop was procured and conveyed in those primitive times. It was procured on what in after years was known as the Brown farm, now the home of Mr. Joseph Maust, where the writer of this article was born and reared. The coal was mined from a thin seam and carried to the shop in strong, tow-linen sacks on horse back, and sometimes on the sturdy shoulders of the old pioneers. In the same manner coal was taken and carried to smitheries along the old Braddock road. But some years later better coal was discovered near Salisbury. The mines on the "Brown farm" were no doubt first opened by Philip Hare, the date unknown and was suffered to go into disuse at least 85 years ago. "The two 'home boys,' Henry and Jacob, remained with their father, or rather upon the farm, till his death, and long after, carrying on the shop in a little elongated building (it is faintly remembered,) and also the farm. The two brothers were very brotherly, and lived for years almost in common.

"Henry Gloftelty married a Hare, of an old Pennsylvania family, but by no means as numerous as the Gloftelty. After a time he moved to a farm a mile west of Salisbury. Here he lived and raised a large family, of both sexes. Some of them taking to the family trade; notably Joseph, who after being married to Sarah Compton, moved to Grantsville, where he was engaged in blacksmithing and farming to his death in 1864. He was a very worthy man and much esteemed. He raised a large family, His son Edwin was a promising physician and died in Accident several years ago. The oldest daughter, Lydia, was the wife of Sheriff Perry Shultz, who died in St. Louis in 1858. She is now on a home visit which she has not seen for many years. William Aster, son of Henry, married Esther Livengood, and moved to what is now Garrett county, and located at the Cherry Tree meadows upon a large farm. They raised a large and respectable family. The husband died not long since. The widow is still living. Wm. Gloftelty will always be favorably remembered for his good citizenship and many excellent traits of character. The sons are well known citizens of Garrett county and the daughters eligibly married and situated.

There was a son Henry who lived on the home farm. He was remarkable for his quiet and amiable disposition, was married, but had no children, died only a few years ago at the foot of "Big Hill." There were two other brothers, Peter and Daniel, who have been dead for some years, leaving children, but not well known to the writer. Henry Gloftelty also left daughters, but they are not sufficiently known or remembered to give an intelligent account of them. One, however, was the wife of the late Robert Patton.

"Jacob Gloftelty—It is now in order to treat of him and his family, which happened to be more fully known to me than any of his brothers. He was born on the old homestead in 1784, learned the family trade, and pursued it actively till declining years required him to relinquish it. He moved the shop from Green Park to Salisbury, about 1830, and turned it over to his son Samuel a number of years thereafter. He was industrious, honest and thrifty in his business; of a cheerful and lively disposition—very well liked. In his more active years he would occasionally join the large sleighing parties that used to drive out to the turnpike in a large convey of sleighs. Plenty of fun and amusement. The fiddle with such experts as Adam Shultz and Jesse Kurtz was not forgotten, nor was a little "old Jerre Miller" and "Peter Livengood" overlooked. Those terms translated meant rye whiskey made by these two well known distillers. The sleighing parties mentioned, though lively, were always orderly and well behaved.

"Jacob Gloftelty had eight children in the following chronological order: Samuel, born in 1808; Harriet, 1809; Adaline, 1811; Jerre, 1812; David, 1814; Michael, 1816; Elizabeth, 1818 and John in 1819, all dead except David. Samuel was a blacksmith by both inheritance and training. It is said he "made music on the anvil" for sixty years, and dropped the hammer only when old age compelled him. His wife was a daughter of William Wagner. They had only a small family of children. Lloyd Boyer, a grand son, is now the proprietor of the shop. It has been said here is a rare existence of

business longevity. Samuel Gloftelty died in 1893, much respected, leaving a handsome estate. The Reformed church lost in him a firm friend. Harriet was the wife of Samuel Griffith, of an old Somerset county family. They went west many years ago, leaving a family not much remembered or known. Adaline became the wife of Phineas Compton, who died on the Bonebrake estate in Maryland 1858, and his wife in 1883. They had three children, Samuel, the oldest, learned the tinner trade, but in later years embarked in the milling business from which he recently retired, and is now living very much at his ease as one of Elk Lick's most respected citizens. Lucretia was the wife of Isaiah Boucher, one of Garrett county's prominent men; she died on the last day of 1888, and lies in the old Salisbury cemetery on the hill. Only in July last the willing hand that gives life to these lines tenderly laid a few spray flowers upon her mound which is marked by a beautiful monument from her loving family. Lydia, the youngest, was the wife of Dr. Henry Stewart, who died several years ago in Illinois, she survives. Jerry like the rest, was a smith, but went into other business in early life, too many sons for one shop. His wife was the daughter of that very good old man Peter Wellfey (once the teacher of the writer.) The two raised a large family in Greenville township. One of the sons is the custodian of the old Bible referred to.

"David got the family trade in the same manner as the other brothers, but he went to farming on the old homestead in early life, and continued till late years when age admonished him he had done enough of this busy world's toils. He is now in comfortable and honorable retirement in Salisbury, the only survivor of eight children of Mr. and Mrs. Jacob Gloftelty. Saw him last summer in the depth of sorrows, flowing from the fresh loss of his wife. He justly enjoys the respect of all who know him. Michael, after marrying the daughter of Abraham Maust, went to Iowa about the time her steeplechase began, and died in the year 1878. The widow is living. One of their sons, Nelson, was the husband of Amanda Compton. He died within the last year. Elizabeth was first the wife of Jerry Keim, who died in the year 1878. She afterwards married Israel Wellfey. John, the Joseph of the family had a training similar to the other sons—followed the trade in a shop of his own for some years; then went into the mercantile business; has been dead since 1884. His wife was the daughter of Michael Dively. They raised a large family. Urbanus, a promising son, was killed in the Union army in the terrible battle in front of Richmond in 1862—a brave boy, a good son, Jacob Gloftelty died in 1867 and his wife in 1888.

"The Gloftelty race as a rule is noted for industry, honesty and amiability, and its long and ample record is a fair one in all respects. It is to be regretted that no data sufficiently reliable could be procured of the five daughters of Solomon Gloftelty, perhaps later on it may.

I am under obligations to Mr. Samuel Compton, one of the worthy descendants, for valuable family records, also to ex-Senator B. Wellfey, for like favors.

"JACOB BROWN."

Time for Killing Game in Garrett County.

The hunting season being here the following will be of interest to the sportsmen of Garrett county: The Maryland State law allows the shooting of wild ducks from November 1 to March 31, and prohibits shooting at any other time except from the shore.

The law prohibits the shooting of water fowl while bedded in flocks on their roosting or feeding grounds, the use of a booby, blind or artificial point more than 100 yards from the shore and the use of big guns or swivel guns from any boat.

The general State law of Maryland allows partridge-shooting from November 1 to December 24. This law applies where there is no local law. The local laws take precedence over the State law. The season for shooting partridges in Garrett county is as follows:

October 15 to December 1, October 1 to December 1, (conflicting dates).

The general State law allows woodcock-shooting between June 15 and December 24. The local law exception is as follows:

October 1 to December 1.

The general State law allows rabbit-shooting between November 1 and December 24. The local exception is as follows:

November 1 to December 24.

The general law allows pheasant-shooting between August 15 and December 24. The local exception is as follows:

October 1 to December 1.

Wild turkeys can be shot from September 15 to January 1.

The deer-hunting months are October, November and December.

Act of Assembly 1894, chapter 219, repealed the law of 1888, chapter 321, "for the better protection of deer in Garrett county." Under this act of 1888 hunting deer with dogs was prohibited on Winding Ridge, Meadow mountain, Negro mountain or any place east of the Youghiogheny river in Garrett county. Any one was authorized to kill dogs found chasing deer in the localities named.

Some of the dates are mixed as follows:

The act of 1894, chapter 640, makes it "unlawful for any person to kill, destroy, snare or in any way trap in Garrett county any pheasant woodcock or partridge between December 1 and October 1 in each year; or to snare or in any way trap any pheasant at any season of the year whatsoever; or to kill or destroy or snare or trap any partridge between December 1 and October 15 in each year."

Postoffice Orders.

The Postmaster General has issued an order discontinuing the practice at all postoffices of placing postage due stamps on advertised mail matter before collecting the required fee.

The second assistant postmaster general has issued circulars calling the attention of all postmasters to the importance of promptly notifying the department of changes of schedules on any railroad, whereby mails reaching their offices by star routes are delayed. Frequent complaints have been made to the department of the negligence of postmasters at railroad points in this respect. Postmasters have also been notified to make prompt disposition of mail sacks used in transporting public documents from Washington, and their attention has been called to the necessity for a closer scrutiny of the name of the state in the address on mail for offices of similar names in different states.

It May do as Much for You.

Mr. Fred Miller, of Irving, Ill., writes that he had a severe kidney trouble for many years, with severe pains in his back and also that his bladder was affected. He tried many so called kidney cures but without any good result. About a year ago he began the use of Electric Bitters and found relief at once. Electric Bitters is especially adapted to cure all kidney and liver troubles and often gives almost instant relief. One trial will prove our statement. Price only 50c. for large bottle. At all Drug Stores.

Your Appearance MAY BE MARRED,

Your Health MAY BE AFFECTED,

Your Comfort MAY BE DISTURBED

by humiliating, annoying and disfiguring eruptions or humors of the skin, known in their various forms as

ECZEMA, SALT RHEUM, TETTER, PIMPLES, BLACKHEADS, RING WORM AND ITCHING PILES.

Dr. Theel's German Army and Navy Cure

IS THE CERTAIN AND PERMANENT REMEDY

FOR THESE AND ALL SKIN DISEASES.

Hundreds of cases CURED attest its wonderful efficacy. SHOULD BE IN EVERY HOUSEHOLD.

Sold by all druggists, or sent by mail on receipt of price, 50 cents.

FOSTER MEDICINE COMPANY, BALTIMORE, MD.

For CATARRH, HAY FEVER, COLIC IN THE HEAD and all inflammatory conditions of the Nasal Passages, use FOSTER'S GERMAN ARMY AND NAVY CATARRH CURE. It is a positive remedy.

DR. THEEL 1317 Arch St. Phila. Pa. BLOOD POISON and special treatment for all skin diseases, including Eczema, Salt Rheum, Tetter, Pimples, Ring Worm, Itching Piles, and all other eruptions of the skin. The doctor is a specialist in the treatment of all skin diseases, and his treatment is guaranteed to cure all cases. He is a member of the Medical Association of Philadelphia, and his treatment is recognized by the Medical Association of the United States.

CASTORIA

for Infants and Children.

"Castoria is so well adapted to children that I recommend it as superior to any prescription known to me." H. A. Auerma, M. D., 111 So. Oxford St., Brooklyn, N. Y.

"Castoria cures Colic, Constipation, Sour Stomach, Diarrhoea, Indigestion, Kills Worms, gives sleep, and promotes digestion. Without injurious medication."

"The use of 'Castoria' is so universal and its merits so well known that it seems a work of supererogation to endorse it. Few are the intelligent families who do not keep Castoria within easy reach."

For several years I have recommended your 'Castoria,' and shall always continue to do so as it has invariably produced beneficial results."

CARLOS MARTIN, D. D., New York City.

THE CENTAUR COMPANY, 17 MURRAY STREET, NEW YORK CITY.

BALTIMORE BARGAIN HOUSE

HAS NEWS FOR YOU.

We are cutting our prices on account of the low tariff. The Old Stand, C. C. Michael's building on Railroad Street.

Men's all wool suits heavy weight, others ask \$8.00, our price \$3.75. Men's fine dress suits, others ask \$15.00, our price \$8.00. Men's good working pants others ask \$1.25, our price 62 cents. Men's fine dress pants, handsome patterns, others' price \$5.00, our price \$3.60.

LADIES' CLOAKS.

All of them the latest styles and lowest prices, and some as low as \$2.50.

Our prices lead when we give you dress gingham, the prices the world over 10 cents, our price 5 cents.

Good 4-4 width brown muslin others price 7 cents, our price 5¢. Best 4-4 brown and bleached muslin, others price 9 cts., our price 4 cts.

All wool red and white flannels, others price 25 cts., our price 17 cts. All colors cotton flannels we sell at low prices.

DRESS GOODS DEPARTMENT

is stocked with the Latest Novelties at prices way down.

Remember we have not only the above goods, but

Hats, Caps, Boots, Shoes, Ladies' and Gents' Underwear, Etc., Etc.

BALTIMORE BARGAIN HOUSE. J. SHAPIRO & BRO., Oakland, Md.

SINGELL BROTHERS.

Once more we appear before the public with the view of convincing you that we sell goods cheaper than any other house in Western Maryland, and as a further evidence thereof we quote a few articles and prices below:

Minnesota Silver Patent Flour per barrel.....	\$ 5 00
20 pounds Granulated Sugar.....	1 00
12 cans Tomatoes.....	1 00
12 cans Corn.....	1 00
21 pounds Soup Beans.....	1 00
Arbuckles Coffee per pound.....	21
Lion " " " ".....	21
12 cakes Soap.....	25

DRY GOODS.

Any kind of Factory Flannel, 25c. per yard; Canton Flannel from 6c. up; Heavy Muslin 5c.; any kind of Gingham, 7c. An eight-rib Gloria Cloth Umbrella for 69c; all Linen Towels, fringed ends, 27c. per pair; all Wool Tricot Cloth, double width, 25 cents per yard.

A full line of Shoes, Trunks, Blankets, Comforts, Skirts, Boots, Underclothing in any color or quality. Yarns, Hats and everything suitable for winter wearing apparel has just been opened and is ready for inspection.

We invite you to give us a call.

SINGELL BROS.

THE SAME OLD THING.

"It was just a little while ago we heard a robin sing. The very first that came, you know, to tell us of the spring. It was only just the other day we watched the budding rose. But now the fields are green and gray and cold the wind that blows. Yes, winter's coming on again in just the same old way. And water pipes will freeze and burst and plumbers will be busy. And farmers will give us smoke while heat goes up the flue. And otherwise conduct themselves the way they always do. The snow from here and everywhere again will fall upon our walks and pile itself in mountains. And men who habitually close the door of office and of car. In summer time will shortly strive to leave them all shut. The very same old couples in the parlors pretty soon. In just the very same old way will bill and coo and preen. And the who hawls for gas and coal, will make the air turn blue. In just the very same old way that fathers and sons do. Once more upon the icy street we'll slip and slide and fall. And use the very same remedies such incidents result. Will he and say we liked it. In the very same old way. Nixon Waterman in Chicago Journal.

AN UNDISCOVERED CRIME.

HE huge safe—so vast and massive that it might have been mistaken for a prison—stood open to the approach of its inmate. The door, which was a marble stairway with brass railings that shone resplendent with daily burnishing. The stairway led from a spacious chamber, formerly a study, into a room, the temple in which the shrine was housed. The eye that wandered from floor to wall and ceiling met everywhere such startling and substantial evidence of money spent without stint or measure in ornamentation, that for the presence of the safe, the room seemed a vast and empty space.

As the clerk disappeared, John Carver slowly descended the marble stair and seated himself at his desk, where the demon of despair soon regained possession of him. One more hour before the counting should begin. One more hour closed upon his shame—his sin—then exposure, humiliation, loss of position, ruin, prison for himself, poverty and degradation for his beloved wife and children. Already the hum and stir of business were audible in the office adjoining the strong room. Preparations were being made to receive the directors as became their duty. The occasion, like Christmas, presented itself but once a year.

John Carver, rousing himself from bitter meditation, glanced at his watch. Ten minutes to ten. Mr. Stanhope was always the first—he was too prompt—he always bothered everybody by arriving on the scene of action before the appointed hour. Simultaneous with the turn of John Carver's thoughts to the too prompt director was the click of the iron door that admitted him to the sanctuary.

"Mr. Carver, good morning." "Good morning, Mr. Stanhope." "Never break my rule, do I? Always on time or rather before it. Good rule that. Never missed a train or a boat in my life. Missed a stage-coach once. My wife's fault that time. Wedding party, you know. Irregularities excusable," and the laconic Mr. Stanhope subsided into the luxurious armchair which an assiduous office-boy had rolled for his reception.

Another click of the iron door. Enter Mr. Hampden, of portly proportions and dignified mien. Intellectually he conveyed the impression of a man who has received a frightful blow on the head from a club, and is slowly recovering from the effects of it. Mr. Hampden waddled and grunted towards his seat, vouchsafing a brief "Good morning" to those present.

Next came Mr. Harrington, a dapper, lively, good-natured little man of seventy, whose sparkling eyes beamed a hearty endorsement to every pleasant word that left his clean-shaven lips. Even poor John Carver felt a certain alleviation of his pain, though faint as the effect of a flood tide upon the strong current of a great river, as old Peter Harrington clasped his hand in vigorous pressure.

Two more arrivals. The committee was now complete, and ready for action. To the aid of each director in his arduous duty was detailed a clerk, who sat opposite across the table. John Carver stood at the entrance to the safe and superintended the work of carrying out in regular order the packages of stock and bonds which the huge drawers and tin boxes were in turn disgorging. Great armfuls of the precious securities went down the marble stairway in the embrace of trusted employees and were distributed upon the massive tables between the directors and their assistants. As the particular bundle which the custodian had known, not wisely but too well, passed on its way to the counting tables, John Carver's heart throbbed with such violence that involuntarily his hand sought the support of the brass railing. The sweat broke in great drops from his forehead, but there was none to note his excitement. His eyes, riveted upon the object, followed its descent and progress to the table where it was placed with several other packages before Mr. Stanhope.

door. But a few hours now separated him from the detection which he knew to be inevitable, and which for many weary, miserable weeks had held his spirit in the darkness of its shadow. Honest, upright, faithful to his trust, John Carver had marched through forty years of rigid adherence to principle and duty, and now, so deep and sudden that the force of it had well-nigh broken his honest heart.

We have here to do with the effect, not with the cause of the sin. The motive had been doubtless a strong one for John Carver was a strong man, morally and physically. Strong—but the hollow eyes, the sunken cheeks, the trembling hand, told of the ravages that ceaseless stinging remorse had already wrought, the nights of restless tossing, the days of fruitless yearning, to go back to that dread hour and undo what had been done. As yet the harm of it was in his heart alone. When he had taken from among his ninety-nine companions that bond of one thousand dollars, his firm intention to restore it to the package before counting-day was no stronger than his belief in his ability to effect such restoration. But circumstances, those unstable factors in earthly events, had otherwise ordained. The money-pressure, which for many months had tossed on cyclonic billows the whole community, had augmented rather than decreased, and when John Carver's hand reached the package he found himself face to face with a black wall of impossibility, in which the blackest and most ponderous stone of all was the impending counting-day.

"Mr. Carver!" The wretched man started as if to face an accuser. So absorbed had he been in bitter introspection that he was unconscious of the entrance of his head clerk, who now respectfully addressed him.

"The committee will meet at ten o'clock. Have you decided about the assistants?"

John Carver had pulled himself together. But for his pallor and the sad hunted look about the eyes, both of which were easily attributable to temporary illness or overwork, he was in appearance quite himself again. In deep, steady tones he replied: "You may ask Mr. Jones to let us have Mr. Sannels and Mr. Sloan. They were both with us on the last occasion, were they not? And then you might go to Mr. Desmond's department and ask if he can spare Mr. French for a few hours."

"Very good, sir."

As the clerk disappeared, John Carver slowly descended the marble stair and seated himself at his desk, where the demon of despair soon regained possession of him. One more hour before the counting should begin. One more hour closed upon his shame—his sin—then exposure, humiliation, loss of position, ruin, prison for himself, poverty and degradation for his beloved wife and children.

Already the hum and stir of business were audible in the office adjoining the strong room. Preparations were being made to receive the directors as became their duty. The occasion, like Christmas, presented itself but once a year.

John Carver, rousing himself from bitter meditation, glanced at his watch. Ten minutes to ten. Mr. Stanhope was always the first—he was too prompt—he always bothered everybody by arriving on the scene of action before the appointed hour. Simultaneous with the turn of John Carver's thoughts to the too prompt director was the click of the iron door that admitted him to the sanctuary.

"Mr. Carver, good morning." "Good morning, Mr. Stanhope." "Never break my rule, do I? Always on time or rather before it. Good rule that. Never missed a train or a boat in my life. Missed a stage-coach once. My wife's fault that time. Wedding party, you know. Irregularities excusable," and the laconic Mr. Stanhope subsided into the luxurious armchair which an assiduous office-boy had rolled for his reception.

Another click of the iron door. Enter Mr. Hampden, of portly proportions and dignified mien. Intellectually he conveyed the impression of a man who has received a frightful blow on the head from a club, and is slowly recovering from the effects of it. Mr. Hampden waddled and grunted towards his seat, vouchsafing a brief "Good morning" to those present.

Next came Mr. Harrington, a dapper, lively, good-natured little man of seventy, whose sparkling eyes beamed a hearty endorsement to every pleasant word that left his clean-shaven lips. Even poor John Carver felt a certain alleviation of his pain, though faint as the effect of a flood tide upon the strong current of a great river, as old Peter Harrington clasped his hand in vigorous pressure.

Two more arrivals. The committee was now complete, and ready for action. To the aid of each director in his arduous duty was detailed a clerk, who sat opposite across the table. John Carver stood at the entrance to the safe and superintended the work of carrying out in regular order the packages of stock and bonds which the huge drawers and tin boxes were in turn disgorging. Great armfuls of the precious securities went down the marble stairway in the embrace of trusted employees and were distributed upon the massive tables between the directors and their assistants. As the particular bundle which the custodian had known, not wisely but too well, passed on its way to the counting tables, John Carver's heart throbbed with such violence that involuntarily his hand sought the support of the brass railing. The sweat broke in great drops from his forehead, but there was none to note his excitement. His eyes, riveted upon the object, followed its descent and progress to the table where it was placed with several other packages before Mr. Stanhope.

The directors differed greatly in their methods of counting. Some of them performed the duty as carefully and conscientiously as the most accurate tested themselves with merely watching the clerks who sat opposite them as they went through the labor for the execution of which the directors pocketed at the close of the session each a bright ten-dollar gold piece. Mr. Hampden was notably different to all that transpired. Stanhope, on the contrary, seemed to feel conscientious scruples as to shifting the whole burden upon other shoulders, and counted zealously.

Mr. French, the clerk who had been detailed to assist Mr. Stanhope, was a novice at the business. Bright, ambitious, conscientious, and extremely sensitive, this young man desired to excel in everything he undertook and felt keenly every shortcoming, real or imaginary. His first experience in security counting was painful to himself and perhaps somewhat annoying to Stanhope, for Mr. Stanhope, although himself no expert, invariably outstripped him in declaring the tally.

Each package of bonds was ticketed with a statement of number, kind and denomination. In many cases Mr. Stanhope divided the packages, retaining one part for his own counting and handing the other to the clerk.

John Carver's eyes, still fastened upon the package from which his fate depended, saw it pass intact from the director's hands to those of Mr. French.

The latter rose from his chair, and holding over the package, dipped his fingers in the wet sponge beside him and slowly began to count.

Though no sound escaped the clerk's lips, John Carver's overwrought nerves kept him in fancy pace with the young man's arithmetical progress, through that bundle of false securities.

"One hundred!" said Mr. Stanhope quietly as he finished his package, and

"ONE HUNDRED!" HE CRIED.

glanced with a comical expression of expectancy at Stanhope, who was struggling with his count.

The young man colored to the roots of his hair and plunged madly forward.

"One hundred!" he cried, a moment later. He had counted only ninety-nine bonds, but, being so sure of himself, he counted the package talked exactly with the ticket, and ashamed to delay the work by his self-acknowledged slowness or stupidity, he caught at a straw, unconscious that in so doing he had saved a drowning man.

At the sound of "one hundred" from Mr. French, the long-patience of John Carver burst furiously through all obstructions and flung him staggering against the railing, which he gripped convulsively with both hands in the tension of a vise. A dark mist surged before his eyes—a noise as of thunder—then death had come to relieve him of all earthly pain. Then slowly the mists rolled away, the noises dwindled to the normal sounds of subdued conversation, the rustling of papers, the footfalls on velvet carpet and marble floor. Some one spoke to him—a commonplace remark. He answered in his ordinary voice. But oh! to be alone—to think in solitude, to realize the awful chasm across which he had been lifted by an unhoped-for, unlooked-for accident.

To every agony there is an end, in death or in life. The session was over. The directors pressed the pretty gold pieces that represented the pecuniary acknowledgment of the value of their services on this occasion.

One and all shook hands with John Carver as they passed. Mr. Carver, in a remarking pleasant way, it was indeed a pleasure to examine the integrity of matters over which Mr. Carver had charge.

The directors gone, the custodian seated himself at his desk under the pretense of writing. Thus he avoided the moment when his staff of clerks should also have left the premises. When the echoes of the last footstep in the outer hall had died away, John Carver closed and locked the door. At last the moment had come. At last he was alone, free to breathe, free to revel in the glorious sensation of escape from deadly peril.

Yielding to a natural impulse, his honest felon flung himself upon his knees, and with hot tears of gratitude poured forth the long-patience torrents of his love, and built within his grateful heart a fortress of resolves so solid and lofty that no enemy might shatter or scale its walls to dispute possession with the joy and hope that reigned within.—N. Y. Post.

—Hard Heads and Soft.—The duke in sweltering heat was commenting adversely upon several well-known men in Washington who wore slouch hats. "Why," he said to the man next to him, "do they wear those soft hats?" "For the sake of contrast," was the reply. "Just as you wear a hard one."—Detroit Free Press.

—He that aspires to be the head of a party will find it more difficult to please his friends than to perplex his foes.—Colton.

SCIENCE AND INDUSTRY.

—During the past five years the production of tin in the Dutch East Indies and the Straits Settlements has increased greatly. The shipments to Europe and America to the end of August, 1894, were 41,118 tons, as against 27,537 tons in 1890. The syndicate which is trying to corner the market will have toobtain control of this source of supply to succeed, as well as of the visible supply, which was over 20,000 tons in August and only 14,000 tons a year ago.

—It has been found after an examination of 180 domestic cats, as well as the eyes of the Felidae in the Zoological gardens of London, that the natural shape of the pupil in Felis is circular. Although under various degrees of light one might get every shape from the circle through all degrees of oval to a perfectly vertical line, yet instillations of atropia or cocaine solutions caused every pupil to become a true circle.

—It has long been known that the earth's axis varies in an irregular way as regards its relation to fixed objects in space; but Prof. Forster announces, as the result of careful observations by the International Geodetic agents, that the earth's axis is a bit loose, as regards the globe itself. The effect is that the North Pole wobbles slightly. The variation in position is not over fifty feet, however, so there is no danger that any explorers who have gone to the Arctic regions without Prof. Forster's warning will get hurt by going too near.

—The French Academy of Medicine has taken up the question of the healthfulness of bicycling, and at a recent meeting decided to investigate the subject thoroughly. Besides a number of sudden deaths from heart disease ascribed to the practice, cases were reported of tuberculosis being awakened by cycling, and of vertebral disease. The academy resolved unanimously that till the results of the inquiry are known "the use of the bicycle (safety) should be permitted only after a careful medical examination of the individual." Paris papers irreverently translate this "a lous a visit, if you please."

—Railway statistics for the year 1893 in England have recently been issued. Three hundred miles of track the total mileage for the United Kingdom 20,646, which represents an authorized capital of nearly 1,100 million pounds. There were carried 30 million first-class passengers, 60 million second-class, and 782 million third-class, a total of 872 million in all. Two hundred and eight million tons of minerals and 857 million tons of general merchandise were transported a distance of 142 million miles. The returns of the capital invested are steadily diminishing, being now 3.6 per cent., a result due in part to the demands of the public for increased accommodation, and of the workers for higher wages.

—In a paper on the sense of smell, read to the Anthropologists who met recently at Innsbruck, Dr. Herrmann, of Vienna, presented some interesting facts. Non-carnivorous animals have the faculty most highly developed; man and flesh-eating animals have lost it in a large degree. Dwelling in crowded cities and domestication are injurious to the sense, house dogs and pet dogs rapidly losing it. Dress materials vary greatly in their capacity for retaining odors; silk allows almost all odors to pass through without leaving a smell behind; linen holds them fast; wool, though it lets many smells pass through, retains the odors of decay, like that of a corpse. While civilization has done much to assist defective sight and hearing, it has done nothing for smelling.

TRAPPING MUSKRATS.

A Thriving Industry in Some Parts of New Jersey.

There are a number of men in Cape May county who can earn a livelihood on a peculiar business. These men are known throughout South Jersey as "ratters." They don't catch the common house rodents, but all through the long winter months they are busily engaged in trapping and spearing muskrats.

Last winter over five thousand muskrats were caught by "ratters" in and around Dennisville, Pennsylvania. The little town right in the heart of the cedar swamps, a few miles from Delaware Bay. Rat catching is one of the principal industries of the village, and the men who earn their living at it are a nondescript, happy, easy-going lot of fellows.

In the marshy meadow land adjacent to the town large numbers of muskrats make their homes. In winter their skins are highly prized for their fur. The methods of catching the rats are numerous, but the most common is by the use of the spear, and to make a success at ridding one must throw with true aim. Spearing rats can only be carried on when the wind is blowing a gale. It is then that the "ratter," with his live-pronged spear over his shoulder and a bag under his arm, starts out for the meadows.

The muskrat builds a house of considerable size, of sedge grass, near a stream or pond. Getting to the length of the houses, the spearsman quietly approaches, and when alongside of the grass domes, inside of which the rats lie huddled together like litters of young puppies, he raises his spear, and bringing it through the roof of grass, impales from four to six muskrats on the point.

Hickman is the acknowledged champion "ratter" of South Jersey, and when rating is good he has been known to kill as many as three thousand rats in a winter. He has had the good fortune to kill several Albinos in his years of ridding, and he always receives a big price for them. Muskrat skins are worth from fifteen to twenty dollars per hundred, but during the war the furs were worth twenty-five and thirty dollars per hundred. Some of the ratters make five hundred and six hundred dollars in a winter's work.—Philadelphia Times.

HINDOO MYTHOLOGY.

Some of the Manifestations of the God Brahma.

In Hindoo mythology, Brahma, that is, Parabrahma (the Great Brahma), is regarded as the Supreme Being, the Soul of the World, an eternal essence, of no sex, in which are inherent all things. The name is derived from the root birth, "to expand," denoting the universally expanding essence of an infinite, imperishable existence. Just as the sun radiates light and heat, both of which essences are manifestations of his fire-off fire, so also Brahma has a thousand manifestations.

The thousand gods and demi-gods of the Hindoo Pantheon are all manifestations of Brahma. The superior deities are supposed to be immortal, but as compared with Brahma are perishable for it is conceivable that different interpretations of the subordinate duties would alter their characteristics so much as to completely change their functions and nature, an occurrence very largely indulged in in Hindoo mythology.

Brahma exists in two states, therefore, the one unseen and imperishable, and the other manifested and perishable. The imperishable is the Supreme Being; the perishable is the universe, or Brahma, the first incarnation of the deity, whose name is distinguished by the having the final vowel, long. Brahma is also addressed by the sacred word Aum. That particular manifestation of the multiform Brahma which we call the world—composed of earth, sky and heaven—is called Vishnu, who represents the unbuilding, or creative principle.

When the world of matter changes its form and is dissolved into simple being, the distinctive power of Brahma is represented by Siva, the destroyer. These three deities, Brahma, Vishnu and Siva, form the Hindoo trinity, all manifestations of the supreme Brahma.

In the Manabharata, Brahma is said to have issued from a lotus that sprang from the navel of Vishnu. This idea, however, is convertible to the idea, Brahma being the universe, is greater than Vishnu, the world; consequently, according to the process of nature, he gave life to Vishnu, who is his alter ego, or manifestation for the specific work of creating the world.

On the other hand, according to Vishnu as the special manifestation of Parabrahma, the creator of all things, he beheld the god wrapped in a mysterious slumber, in which he imagined the production of worlds, and forthwith a lotus springs from his navel. In the center of this lotus, Brahma appears, that is, created things, and, says the Puranas, "Vishnu, beholding the production of his body, was delighted."

Vishnu is seen floating or brooding upon the waters, supported by the serpent Sesha. Beside him sits his attendant queen, Lakshmi, the goddess of love. The panel is framed with pillars on either side, supporting an arch sculptured with the forms of the various minor deities. Each corner of the composition contains decorative representation of four different incarnations of Vishnu, as worshipped by the Hindoos in various parts of India.

The Brahmins have a legend that the Buddha is one of the many Avatars or manifestations of Vishnu, but the teachings of the true Buddha are so violently opposed to the teachings of Brahmanism that it must be conceded that this reformer was a mortal, and, say the Puranas, Kapilavastu, adjoining Nepal. His name was Sakya Gautama, and is known as Buddha Gautama, to distinguish him from the Brahmanical Buddha. He taught that neither the doctrines nor the austerities of the Brahmins were of any avail in delivering men from old age, disease and death.

Pain and pleasure are simply the result of Karma (works), no notice being taken of the existence or non-existence of God. He taught the Hindoo doctrine of transmigration of souls. He ascribed existence to be miserable, and that the highest conceivable good is to obtain entire exemption from existence.

He taught the evil of caste distinctions, and all who embraced his tenets became members of a great brotherhood. His moral code is one of the most perfect in the world. He became the founder of a religion which, after a lapse of two thousand years, is still professed by four hundred and fifty-five million of human beings.

Sir Edwin Arnold's poem, "The Light of Asia," is a glorification of Buddha, one of the divine souls of the world. "Reverence to the jewel on the lotus," "Honor to the incomparable Buddha," cry his myriads of followers.

In Hindoo art are expressed infinite weird forces and languages, the perpetual creation, destruction and re-creation of the world. Fashioned in an age when the imagination of man was much more highly developed than at present, it sought to render in imperishable forms the energy and immobility of supreme power, clothing the forces of the universe with forms the most splendid the world has ever beheld.—Decorative and Furnishers.

A Nutritious Soup.

Everybody recognizes the nutritious qualities of soup and it need not necessarily be taken hot, though heat is generally regarded as an indispensable quality of palatable soup. A clear, rich beef soup, free from fat and well seasoned, makes a delicious bouillon with cracked ice. If the soup follows cooling it will be necessary to melt it upon the stove without further heating than is necessary, when it should be poured at once upon the ice in the cups.—Philadelphia Press.

Fools.—"Poverty is a misfortune, not a crime." Figs—"I don't know about that; at any rate poverty has been the cause of the poetry writing." Figs—"You mean the writing of poetry has been the cause of much poverty."—Boston Transcript.

Fall Medicine

Is fully as important and as beneficial as Spring Medicine, for at this season there is great danger to health in the varying temperature, cold stomachs, malarial germs, and the prevalence of fevers and other serious diseases. All these may be avoided if the blood is kept pure, the digestion good, and the body healthy vigorous by taking Hood's Sarsaparilla.

Hood's Sarsaparilla Cures

"My little boy four years old had a terrible scrofula on his neck. A friend of mine said Hood's Sarsaparilla cured his little boy, so I procured a bottle of the medicine, and the result has been that the child has left his neck. It was a great relief, that he could not have stood it much longer without relief." Mrs. I. A. Hood, 324 Thonik St., Lowell, Mass.

Hood's Pills are prompt and efficient. 25c.

STAMP COLLECTING.

Large Means Required for a Complete Collection.

The immense variety of stamps with which the market is flooded makes it impossible for any one to have an absolutely complete collection—except those who have as much time as money to spend on their hobby. Most sensible philatelists confine themselves to one special branch, and it is only enthusiastic beginners who try to get beyond this boundary. For instance, one man collects only stamps, another wraps and stamped envelopes, a third postal cards; one confines himself to a particular country, while several close their collections with a certain year. Those who confine their energies thus to a special branch take into consideration every scarcely perceptible difference in the quality of paper, water-marks, or line of stamps—whether either are obliterated, or pierced—and shades of color; they also collect proof-sheets—that is, stamps that are designed as models for new issues. The slightest difference even in the quality of the paper justifies a specialist in this description of collecting, while an ordinary philatelist would look on his collection as complete with say thirty-seven different stamps of the kingdom of Saxony, the enthusiast would hardly be content with three hundred and seventy. Of course an ordinary stamp album would not be large enough to hold these treasures, which, pasted on large sheets of card-board, assume the formidable dimensions of maps, and have to be stored in large boxes.

The average collector, however, is content with a large, well-indexed album, generally supplemented by a miniature library of books on philately and its various branches.—S. Pentland, in Home and Country.

He Could Say It.

"The great trouble with you, John, is," said a lady to her husband, who was suffering from the effect of the night before, "you cannot say 'No.' Learn to say 'No.' John, and you will have fewer headaches. Can you let me have a little money this morning?" "No," said John with apparent ease.—Picture Magazine.

Would Have Given Up Sooner.

Scientists—I wonder how the whale kept Jonah in his stomach for three days.

Jollicus—It didn't find out he was a Jonah until then.—N. Y. World.

"Now I know why no milk we get here is so weak," said the agricultural editor of the farmer with whom he was dealing. "I just this morn'g saw you give those cows water to drink."—Philadelphia Record.

"Why can't there be a fight without the shedding of blood?" asks an opponent of war. "If he will ask any prominent pugilist he will find out exactly how the thing can be done."—N. Y. Tribune.

ASSIST NATURE

A little now and then in removing offending matter from the stomach and bowels, and you thereby avoid a multitude of diseases and ailments, and will have less frequent recourse to your doctor's service.

Of all known agents for this purpose, Dr. Pierce's Pleasant Pellets are the best. They are always in favor. Their secondary effect is to keep the bowels open and regular, not to further constipate, as is the case with other pills. Hence, their great popularity with sufferers from indigestion, constipation, sour stomach, loss of appetite, coated tongue, indigestion, as dyspepsia, windy belchings, "heartburn," pain and distress after eating, and kindred derangements of the liver, stomach and bowels. In proof of their superior excellence, it can be truthfully said, that they are always adopted as a household remedy after the first trial. Put up in sealed glass vials, therefore always fresh and reliable. One little "Pellet" is a laxative two are mildly cathartic. As a "dinner pill," to promote digestion, or to relieve distress from over-eating, take one after dinner. They are tiny, sugar-coated granules; any child will readily take them.

Accept no substitute that may be recommended to be "just as good." It may be better for the dealer, because of paying him a better profit, but he is not the one who needs help.

The Pellets cure biliousness, sick and bilious headache, dizziness, costiveness, or constipation, sour stomach, loss of appetite, coated tongue, indigestion, as dyspepsia, windy belchings, "heartburn," pain and distress after eating, and kindred derangements of the liver, stomach and bowels. In proof of their superior excellence, it can be truthfully said, that they are always adopted as a household remedy after the first trial. TEMPERANCE NOTES.

AN INHERITED CURSE.

The Enemy That Was Crushed in a New-Made Home.

"Good morning, my dear Mrs. Cummings! Oh, my! doesn't she blush beautifully, Nell, and doesn't she look sweet in the new gown, and aren't we the happiest little persons in the world?" And then the pretty, blushing bride was rapturously embraced and kissed by the two blithesome girls who had invaded her little room.

With pardonable pride she led the way through the charming hall, past the dainty parlor, out into the cosy little sitting-room, where a great white cat rose lazily from the soft rug and came to greet them.

"You might just as well ask us to take off our wraps, and reconcile yourself to the inevitable, Madam. Madge, for we've come to stay all morning and take dinner with you," rattled on the lively speaker, as she tossed her hat and coat on the lounge. "We've let you alone for a whole week, and we think that is doing nobly, so now we've come to hear about the trip, see the lovely house and all the presents which we couldn't see that night because we couldn't keep our eyes off the bride, could we, Nell?"

So over the new home they were led, into all the pretty, dainty rooms, filled with the loving gifts, their girlish tongues being like their eyes from one object of admiration to another, until they sank exhausted upon the big fur rug in the cheery sitting-room, offending Don Pedro by their encroachment on his rights.

Mrs. Madge buried her face in his soft white fur as he tried to tell her of his insults, then extended a hand to each of the laughing, breathless maidens. "Come, girls, I haven't finished yet! You have not seen my pride, my delight, my big, sunny kitchen!"

They rose with alacrity. "Of course we want to see the pride of the realm; but I warn you, Madge, I shall be perfectly dumb. I haven't an adjective left." And out they trooped to the kitchen, where they were received with a broad smile by the old colored woman who was hovering over the new china stove.

"Girls, this is Aunt Rachel, mamma's old cook, the best in the land, as you'll find out by and by! Since she has come I haven't a desire in the world."

"Let's hear that chile go on, now," said the pleased old woman. "Yoh! was a spatin' dis old niggit! Glong wid yoh all, er, yoh'll spile dis puden, en den Master Ed he'll say, 'Oh Aunt Rachel kaysn' cook nohow!'"

Away they went, with merry little bursts of laughter, up stairs to look at the new gowns and hats, and then Aunt Rachel found them half an hour later, as she cautiously peeped in.

"Honey, does yoh want de brandy in de sauce for de pudden?"

"Why, yes, Aunt Rachel, don't you always put it in?" Madam Madge asked anxiously.

"Oh, Miss'uster, but yer Aunt Nan she neber loved meker, en I thought I'd better ax yeh."

"Fix it just as yoh like, Aunt Rachel," was the careless reply. "I know it will be good." The she turned back to her guests.

"Oh, girls"—and a little blush rose in her cheeks—"I didn't tell you, did I, that Bob Chalmers sent us—"

"Bob Chalmers? came the simultaneous cry, "Oh, Madge?"

"Well, he did—and I wish you could have seen Ed's face—the dearest, sweetest little wine set. Oh, it's lovely, and I'm wild to use it! And in his note, which was such a queer one, he said he hoped you'd enjoy the little cup from which I was sure to drink. I suppose he meant 'happiness,' and—oh, there's Ed!—I must go—he's back!" and they heard her feet flying down the stairs.

The two girls looked at each other, then one whispered:

"Bob! isn't it queer that Bob Chalmers should send them anything? You know he wasn't invited to the wedding, and you remember how angry he was when Madge first met Mr. Cummings?"

"The other shivered a little. "I guess I do! Light! I wouldn't touch his old present. I'd be afraid there was poison in it! Come, Madge is calling."

The lively little dinner progressed finely, while the young couple seemed to flourish under all the cruel jokes heaped upon them, and then Aunt Rachel, herself, with a proud smile, brought in her triumph, the snowy pudding. In they dipped their pretty spoons with merry chatter, and they did not notice that just as the young host raised his first mouthful to his lips, he turned deadly pale, and put it hastily back, and his hand trembled slightly as he took his cup of coffee from the tray waiting maid, but the loving eyes of the wife very soon detected the untasted dish, though she wisely refrained from all mention of it. In the afternoon a vague unrest, an uneasiness haunted her, and she could hardly wait until supper was over, and they were alone in the little sitting-room, and she could ask of the husband whose eyes were so gazed to-night.

"What is it, Ed?"

He did not reply right away, and the crackle of the fire and the purring of Don Pedro arose broke the silence, then he drew her up to him, caressingly, and the firelight flickered lovingly over the two. At last he spoke, and his voice sounded strange to Madge, who listened intently. "Madge, little wife, you took your big husband on trust, and, please God, you shall never regret it! But there is something I feel to-night that I must tell you, which ought to have been told before. Don't tremble so, little girl! I've done nothing wrong, dear, but I feel now that I made a great mistake in keeping my secret from you."

"Heard never to have been obliged to heart, never to have been obliged to tell you, but to-day I have found out that it better be told, else my little wife can not help me in my time of need. Madge," and his voice trembled in spite of himself, "my father died a drunkard, I don't mean a gutter drunkard, but a re-

spectable, wealthy, esteemed drunkard!"

You could feel the scorn in his young voice, then it grew unutterably sad. "My brother, Walter, the pride of us all, lies out in Colorado, a victim to the same curse. I have never touched a drop of the burning stuff, but, Madge, my wife, that I must say it—"

Madge, the desire of it, the love of it is in my veins, and to-day, when the smell of that sauce crept into my senses, I knew if I but tasted it I was lost. I have felt that before, but I have avoided it in every way, and he, yes, he, with all that life holds for me now, than to fall as they did. No one here knows of the sorrow that has been mine, of the burden I am bearing—save one; he knew my brother, and he knew it was an inheritance."

Bob Chambers, Madge, and I would understand when he sent the little gift. Why, Madge?"

He looked a little hurt as she slipped from him, and left him without a word, but in a moment she was back again, and in her hand he caught the glitter and heard the jingle of the glass. He looked at her with amazement; he had never seen her cheeks glow so, nor her eyes with such a sparkle in them; the next instant he sprang to her side in alarm! Was she crazy? Down on the broad, tiled hearth went the tinkling glasses, shattered into a thousand pieces, she rushed to her wondering husband, and there was a smile on her quivering lips.

"No perish all the enemies of our dear home!" then she stretched out her hands to him, and the tears rolled over her cheeks. "Oh, Ed, can you ever forgive me for putting that awful stuff before you? But I didn't know, I didn't, and oh, I'm so glad you told me! My poor, poor boy!"

He held her close to him. "Then you don't despise me, Madge?"

"Despise you?" came the wondering echo. "Despise you? Why? For resisting so nobly the terrible temptations that must be always around you; for fighting so steadfastly that awful inheritance; for being victor over all! No, a thousand times, no! I'm proud of my husband, my brave husband!"

Never, Ed, never again shall a drop of it be brought into our house, and you and I together will win!—Gisela A. Dittick, in Union Signal.

DRINKERS' CHILDREN.

Appalling Consequences of Habitual Intemperance.

The hereditary consequences of drinking are sometimes appalling. A specialist in children's diseases, who has for twelve years been carefully noting the difference between twelve families of drinkers and twelve families of temperate ones, reports that he found the twelve drinking families produced thirty-five children, and the temperate sixty-one.

Of the drinkers twenty-five children died in the first week of life, as against six on the other side. Among the children of the drinkers were five who were idiots, five so stunted in growth as to be really dwarfs.

When older became epileptics; one, a boy, had grave chorea, ending in idiocy; five more were deformed and deformed, and two of the epileptics became by inheritance drinkers.

Ten only of the fifty-seven were normal in body and mind. On the part of the temperates, two only showed inherited nervous affections; five died in the first week of weakness, while four in later years of childhood had curable nervous diseases, and fifty were in every way sound in body and mind.

There could scarcely be any dramatic demonstration in favor of abstinence from intoxicants on the part of those who assume the responsibility of parenthood.—National Temperance Advocate.

TEMPERANCE TIDINGS.

NEW SOUTH WALES' drink bill for 1893 was \$72,100 less than that of 1892, which was \$4,911,500.

Acute insanity is twice as common now in France, the land of light wines, as it was fifteen years.

Twenty-five temperance bills have been introduced in the British parliament during its sessions since 1892.

In his annual statement of the liquor statistics for England in 1893, Dr. Dawson Bates reported a gratifying decrease in the sum expended for liquor, amounting to \$2,911,433.

According to the statistical abstract of the United States, the total cost of the liquors of all kinds consumed in this country is over sixteen dollars per capita, about eighty dollars a year for every family, twice as much as the total amount of the federal revenue.

"We meet some sad cases," said a saleswoman in "Paddy's Market" (Glasgow) to a pressman. "I have known a woman to sell the family blankets for drink, and even her baby's clothes. It seems hard to outsiders, but if we don't take them another will."

A Chinese writer gives the following reasons why there is now so much poverty, crime and misery in that great city: "There lives but one baker to every seventy families, one grocer to every eighty-nine families, and one liquor saloon to every thirty-five families."

Dr. B. W. Richardson states that in nine thousand cases treated at the London Temperance hospital the death rate was only 0.3 per cent., a rate which is on a par with, if not lower, than that of any other hospital. He also said that in sixteen cases in which alcohol had been administered at the hospital he did not believe it had done a bit of good, and that he never prescribes it himself.

The brewing of lager beer in this country was begun about fifty years ago in the outskirts of Philadelphia. Before that time every product was entirely ale and porter. Now, however, nearly all the output, which last year amounted to 33,822,000 barrels, is of lager. Each barrel contains 248 pints or 496 glasses; therefore, according to the latest internal-revenue returns, there were made and sold last year an average of a glass of beer for every working day to every man, woman and child in the United States.

EXECUTIONS IN CHINA.

Crast and Revolting Forms of the Death Punishment.

Few people regard the "great eventuality" with less dread than the Chinese. Their nerves survive shocks which would prove fatal to a more finely organized people, and they pursue the methods of self-immolation for selfish ends, inaccessible to the western mind. Such a custom, for example, as substituting one's self to be executed in consideration of a certain sum of money, that the family may be left enriched and independent, is beyond our ken, and the tolerance of it is impossible of understanding.

It is a queer anomaly that these Asiatics inflict, through their laws, frightful punishments of torture and death, and on the slightest provocation, human blood is poured out like water.

Kind-hearted and good-natured, and the thoroughly brutal, hardened ruffian who beats his wife and starves his children is probably rarer in Shanghai than in Shoreditch.

Under the heading of "death" in the penal code come the several modes inflicted. A sliding scale of capital punishments is used to mark their sense of the varying heinousness of numerous crimes.

For perjury, matricide and wholesale murder, the usual sentence is that of "Ling Chih," or "ignominious and slow death." In ordinary cases execution by beheading is the common mode.

Still another is strangulation. With the exception of those cases of "high-way robbery" and "burglary with murder," or "rebellion and treason," in which, the guilty having been caught red-handed, the death penalty must be paid within forty days, the criminals sentenced to death in Peking and other cities are executed in the autumn.

The date is fixed by the imperial edict and is usually about ten days before the winter solstice. It is then that the emperor proceeds to the Temple of Heaven to render an account at the great altar of his past year's stewardship of the power intrusted to him as the one "agent on earth" of the "most high Heaven."

In the general record of the imperial acts is included a statement of the names and crimes of those who have suffered death by his will during the year, this record being burned on the shrine, and its contents thus wafted up to the cognizance of Heaven.

Preceding this ceremonial, of course, the wretched culprits have been tried before the board of punishments (or criminal court), where quivering, prostrate they have heard the fatal "Ching Shih" (found guilty) droned out by the clerk.

There is no jury to try the unfortunate delinquents; there is no oath proferring the testimony of witnesses; there is no pleading by shrewd lawyers, but an autocratic condemnation, subject to no appeal. In spite of this, mercy is sometimes shown. A criminal condemned to death is saved from punishment if it be proved that aged parents depend upon him for support.

All prisoners look eagerly forward to these trials. They feel only joyous relief before the conclusions of them or the calm certainty of death. They are about to escape the indescribable horrors of a Chinese prison. The filth and dirt of the rooms, the brutality of the jailers, the miserable diet, the entire absence of the commonest sanitary arrangements, and their beds more like straw jackets, with the vermin that infest every nook, make any change welcome to the miserable culprit.

Among the tortures incidental to a compulsory confession is the sitting cage. This is a strong box of heavy timbers made just the height of the shoulders of the culprit and just large enough to hold him in a sitting or doubled-up position. An opening at the top is made to encircle the neck.

The head being held without, the cramped position he is kept for hours until the pain is so great relief must come in unconsciousness or a confession, it may be, to obtain physical ease.

The "swinging pole" from which hangs the prisoner suspended at one end by his quene, his arms bent backward, as also his legs, at the other by his feet, gives performance agony and leaves the subject too lame, if not broken of bone and tant of sinew, to resist any demand for full confession.

The "Triple Canine," seemingly so simple, is severe enough in its heavy drag on the bones of the spine, as bleeding needles and lacerated shoulders of the body, which to the Chinese mind is the height of disgrace in death, since the body in recomposing itself in the spirit world may get a head or members not belonging to it.

Decapitation comes next. In this, as in all other execution routine, the native military figures conspicuously.

On the morning of an execution may be seen approaching the ground a band of soldiers, surrounding a number, perhaps twenty, miserable looking men chained hand to foot with length enough of cable only to permit walking. Immediately on their arrival thousands of morbid spectators gather around. The soldiery maintains the cordon more closely now, for the chains and shackles are removed and the prisoners have more freedom. They sit, stand, or lie on the earth conversing with those who come near.

They are now awaiting the decision of his majesty, who that morning has passed upon the list of sentences.

The scene of death in Peking is called "The Vegetable Market Place." Here are three tents—one for the prisoners, one for the officers deputed to attend, and a third called the sword tent for use of the executioner and his instruments.

A touch of mercy not in keeping with the other barbaric methods has caused the erection of the "condemned tent," where naught of the execution preparations can be heard by the criminals awaiting.—N. Y. Sun.

THE OLD GARRET.

No Place Like It for a Good Old-Fashioned Romance.

There was one delight, said a man who was reared in a small town, that I suppose many children born in great cities never know, and that is the delight of playing in the garret. Many city children, to be sure, have relatives in the country, or in smaller cities or towns, when they have visited, who live in houses with garrets, and these know something of the delights of the garret, but there must be many children who have never even heard the name.

For myself, I remember well a garret to which I used to climb in rainy weather up a steep and narrow flight of stairs. It was warm and rather stuffy in the garret, but the rain made music on the shingled roof and the garret itself was full of treasures. There was room, to begin with—three or four about in—though you needed to look out a little for the timbers in the sloping roof. There was a swing from the two beams, and we used to swing and swing in that and never got tired of it.

There was a chimney up through this garret—a great, big, friendly chimney—and we used to play tug around that chimney until we couldn't run any more. There was a great lot of old magazines, and these were an unfailing source of delight. There were old books in queer type and with strange-looking pictures; there were queer old hair-covered trunks, with round tops, studded with brass-headed nails. In these trunks and around in the garret were curious, old-fashioned men's clothes and the most extraordinary gowns and capes and hats of women; not fancy costumes, but the real things, such as they actually were many years ago, and looking strange than any thing you could find at a costume's.

We used to dress up sometimes in these, old, old things and parade around in the garret and have great times generally, and so forgot ourselves in the delights of the garret that the very world itself looked strange when we came down stairs and back to it.

What is there in the big city that takes the place of the garret?—N. Y. Sun.

DISEASES FROM ELECTRICITY.

Painful Affections of the Skin Produced by the Light.

In the train of modern scientific and industrial achievement has come a number of new physical ailments—the price that civilization appears to be called upon to pay for its advancement. Electricity is credited with two or three of these recently diagnosed disorders, and physicians are now paying more attention than they have heretofore to the effect of the electric current and electric phenomena on the human body. Just now, in France, some of the doctors are endeavoring to find a remedy for what has borne the clumsy and misleading name of "electric sunstroke."

Modern affection, frequently, the workers employed in factories where metals are fused or welded by the process. The light produced during the period of connection is, of course, intense, and even at a distance of thirty feet the rays produce a painful, hot, prickling sensation, like a burn, and on such unaccustomed portions of the body as the throat, face, and more especially the forehead. The skin of the parts affected is said to become either copper-colored or assumes a bronze hue; the eyes, in spite of black glasses, are so intensely dazzled as to be useless for some minutes, after which the eyelids are swollen and the face is covered with a yellowish-red rash, the junctions are inflamed and there is a gritty feeling as of sand under the eyelids; there is frequently considerable pain, also sleeplessness, and in some cases fever.

The physicians have discussed the effect of the blinding flash with much learning, but have as yet produced no better remedy than that which would naturally suggest itself to any layman—perfect rest in a subdued light. So long as the voltaic arc is employed in metal working it is not likely that any means will be discovered to prevent occasional temporary injury to the eyes of the workmen.—Western Electrician.

To Wash the Wash Tub.

Wash a silk blouse pressed as follows. Make a good lather with white soap and hot water in a small tub or pan and add a small wineglassful of vinegar, pouring the same amount into another pan containing about two quarts of cold water. Place the blouse in the water, holding it by the neckband and rub it downward, taking care not to drag it in any way and never to rub soap upon it. As soon as it appears to be clean place it in the cold water, stir it about to remove all trace of soap and squeeze carefully, but do not wring; roll in a dry cloth for a few minutes, or pass through an India rubber wringer, and iron on both sides, keeping the grain of the silk quite even. If the blouse needs stiffening it can be passed through a solution of gum arabic (made by adding a quarter of an ounce of gum arabic to one quart of boiling water) and then ironed, but the use of the gum spoils the texture of the silk.—Chicago Tribune.

Acquiring Knowledge.

Miss Toune says she is so glad she went to a farm this summer; otherwise she might never have known that leg-horn fowls were so named from the horns growing from their ankles.—Judge.

MISCELLANEOUS.

—With every mummy was deposited a papyrus containing an itinerary of the other world, prayers suitable for the use of the deceased in his new mode of existence, and magical formulae designed to prevent the corruption of the body.

—When Voltaire wrote his "Candide," in which occurs the bit of satire about the eight tramps meeting at an inn, most of them without money enough to pay for their dinner, there were, at that time, no less than eight dethroned monarchs wandering about Europe, some of them in great poverty.

—"Just as I Am" first appeared in the "Invalids' Hymn-Book," in 1836. It was the work of Charlotte Elliott, who became an invalid in 1831 and remained such until her death in 1871. To this remarkable collection of hymns she contributed over 100 lyrics of striking beauty.

—The metal caps on the tops of the bottles in the bars of metropolitan hotels are generally made of silver plate, which allows them to obtain the fine polish given to attract customers. They cost from 70 to 85 cents each. The metal inscription placed upon the neck of the bottle is made of the same material and costs \$1.25.

—A guest at the table a century ago was expected to do off the same dish at least twelve, and by doing so three or four times was supposed to compliment his hostess. When he had enough he crossed his knife and fork on his plate, and was no longer pressed to eat.

—The painting of the catacombs of Thebes is so well done that after a lapse of 4,000 years the colors are as bright as when freshly laid on. This fact is in large degree due to the dryness of the atmosphere. In some parts of upper Egypt rain has never been known to fall.

—Chloroform was the result of ages of experiment in an effort to do away with the pain of surgical operations. Opium and many other drugs had been tried with more or less success. In executions by crucifixion, vinegar and gall or myrrh were given to the victim to stupefy him.

—The first antiquarian to take an interest in the Roman catacombs was Father Bizio, who spent more than thirty years in exploring their recesses, making excavations, clearing galleries and preparing sketches of the objects he found. He died in 1629, while finishing his work on the subject, and the volume appeared two years later.

—A chemist has discovered a process for refining impure such as cognac, whiskey, kumel, charrue, caruon, etc., and converting them into tablets similar to those made of chocolate. You can thus eat your liquids or dissolve them at pleasure. Flasks will henceforth contain nothing but water. You can thus eat your thirst on horseback, in a carriage, in the train, in a balloon, without any fear of spilling the fluid.

—The potato masher made of wood answers the purpose very well, but is apt to get soggy, the moisture penetrating the wood, and in consequence of this rendering it unpleasant to use. From time to time porcelain and other materials have been substituted. Porcelain seems to be the best, but the difficulty has been to get a solid and permanent connection with a wooden handle.

This problem has, however, been solved within the past year or so, and a very good article has thus been obtained.

DUE TO MARRIED PEOPLE.

A Social Rule to Be Observed by Young People.

A little observation will convince any young person that it is important to be able to command the fullest respect and confidence among the home controllers of his or her acquaintance; for, in our country especially, social success begins and ends in the home, and there is no room for the happiness looked forward to by youths and maidens save that which leads through the flowery gateway of a suitable marriage.

It is to married people that young persons must look for introduction, instruction and advancement, and from them they must receive almost everything preliminary to a full draft of rational and healthful amusements, pastimes, recreations, as well as all of those broader yet more formal opportunities to see life at its best in the season of greatest receptivity and capacity for enjoyment.

This is the basis upon which rests the social obligation binding the young to treat married people with a certain formal respect and to concede to them leadership and at least conventional precedence and superiority. The moral obligation holding young people to strictest reverence and respect for their elders need not be considered here. The rule of social life is that, for all practical purposes, married people are not to be classified by age. What is due to one is due to all.

A woman of twenty, married and the mistress of a home, is a queen, and her husband, though more youth, is a king, so far as absolute power in that home is concerned. Marriage has invested the twain with a dignity which demands the respects of all the world and has given them an influence in society which can be of immense benefit to their young unmarried friends.

The respect due to married people from young persons, considering it with the most practical view to social economy, and leaving ethical elements out of sight, is a debt of honor; in paying it youth shows both prudence and fine business tact. It is only those obligations which when discharged turn themselves into life-long annuities of profit.—Angeline Bryce Martin, in Chautauquan.

Costs for Stout Women.

For full figures and stout women who cannot wear belted waists that define their size, the graceful princess coat is still highly popular with skirt to match of serge, sucking cloth, or the more drossy fayetta of crepon. These coats have continuous breadths fitted to the waists, then widening out into a bell-back. The fronts for these matronly forms fall straight, and open with a long pointed shawl collar, to which a collarette is sometimes added.—N. Y. World.

PUNGENT PARAGRAPHS.

—To write well is to think well, to feel well, and to render well; it is to possess at once intellect, soul and taste.—Balfour.

—"My Lord," said an overworked parson to his bishop, "I have not had a holiday for five years." "I am very sorry for your congregation," replied his lordship with a smile.—Tit-Bits.

—"A Problem.—Jones—"A man's success is according to the square of his honesty." Brown—"Do you mean that the less square the honesty, the greater the success?"—Detroit Free Press.

—"Lieut. X—"I say, old chap, you haven't heard that I yesterday won 150,000 marks in the lottery?" Lieut. Z.—"You don't say so? Lucky dog, why, you needn't get married!"—Fleegende Blatter.

—"How will Senator Sorghum come out of the next election?" asked the interviewer. "He won't have a chance to come out of it at all," replied the voter. "He won't be in it."—Washington Star.

—"The Shopper—"I'd like to buy that lovely lamp shade, but I can't afford to pay \$10 for it." The Salesman—"Well, madam, I'll make the price \$9.99." The Shopper—"Oh, how good of you; I'll take it."—Chicago Record.

—"Professor (lecturing on the gorilla):—"Gentlemen, you must give me your undivided attention. It is impossible for you to form a true idea of this hideous animal unless you keep your eyes fixed on me."—Boston Commercial Bulletin.

—"Mr. Justino—"What on earth are you trying to do?" Mrs. Justino—"I was reading about cooking by electricity, so I hung the chops on the electric bell and I've been pushing the button for half an hour, but it doesn't seem to work."—Brooklyn Eagle.

—"Exactly as I supposed." She (at the ice-cream freezer):—"There's one thing about ice, it doesn't make any difference where it comes from, it's thoroughly reliable." He—"I don't know about that." She—"Well, you ought to. Isn't it always what it is cracked up to be?"—Detroit Free Press.

—"Van Dyke—"Do you know that most of our currency is very inefficient?" For instance, any artist could tell the government that the design of the new one hundred-dollar bill is a very poor one." Van Dumb—"Yes. But no artist ever saw a one hundred-dollar bill."—Kate Field's Washington.

—"That is a wonderful work of nature," said the man who was visiting Niagara Falls for the first time. "Pretty big," replied the hotel keeper. "I don't see how anybody could contemplate it without feeling terribly insignificant." "Well, I suppose a good many people do feel that way. But, you see, most of the people who stop at this house are brides and grooms."—Washington Star.

AN OOD VESSEL.

The Oils of the Indians of Southern Arizona.

There are two tribes of Indians in this part of Arizona—the Mohaves and Hualapais (Wala-ai). The Mohave Indians resemble the Apaches in appearance, being tall and straight—in fact, they are a branch of that tribe. Both the men and squaws wear their hair in long false curls made of a kind of mud or clay.

The squaw's dress consists of a skirt of calico coming just below the knee, a short calico waist, a long shawl, which is worn both in summer and winter, moccasins, and a necklace of blue and white beads, ten-cent pieces, or shells.

The Hualapais are different in every respect from the Mohaves. They wear long unkempt hair, which has never known a comb (unless it is on the head of one of the belles of the tribe). Whenever a squaw's hair is cut short, she is in mourning for a pupoose, and when it is clipped close to the head, her back has died.

The squaws are very untidy-looking, wearing about a dozen gaudy, colorful skirts of different materials, a kind of blouse waist of different material, an old red calico or flannel shawl, and a necklace of beads of every size, shape and color imaginable. They very often go barefooted, but sometimes they can boast of a pair of old shoes, and occasionally you will see them wearing moccasins. Their houses are generally made of old railroad ties, boxes and sacks, making a very untidy appearance. Some of them have old stoves, but rarely cook on them, using them chiefly for heat.

The Mohaves are very industrious, thrifty and much more intelligent than the Hualapais. They raise corn, melons and pumpkins on the shores of the Colorado river, and exchange them with the Hualapais for beef and flour which the government supplies. Their melons and pumpkins are not very desirable for food, because they so often get the seeds mixed. They also make baskets, bows and arrows, all kinds of pottery, and ollas (jars).

Their pottery is very unique, and finds a ready sale among the passengers on the trains. Their ollas is an article which is seen on every porch of the white people's dwellings. It is a large earthen bowl, made of clay and lined with pitch, which holds water, and is kept cool when hung where the wind can strike it. Most people prefer it to ice water, as it is nearly as cold and much more healthy.—Florence E. Cowan, in Harper's Young People.

Red Pepper as a Stimulant.

Just now green peppers are sweet and tender and very cheap. Remove the seeds and use them in soups, gravies, croquettes, omelets, sauces and stews.

This is the time of year to get the complexion and digestion ready for winter, and the vegetable is prime for both. Powdered red pepper, sold under the name of capicum, is also a promoter of good digestion; it is used to season soup, sauces and meat. This condiment has the stimulating influence of alcohol, with none of its after effects. The Romans, Hungarians and Austrians esteem paprika, a mild red pepper, for culinary benefits. A dish for beauty that is also a delicate and appetizing food is any boneless fish, such as cod, halibut, striped bass, lobster or herring, boiled and served with a brown gravy, moistened with quarters of sweet peppers.—St. Louis Republic.

OUR WASHINGTON LETTER.
(From our Regular Correspondent.)
WASHINGTON, Oct. 22, 1894.

"Hush!" That is what is heard every time anyone approaches a group of Democrats of sufficient prominence to be taken into the confidence of their party campaign managers. They do not wish to be overheard admitting defeat, although they freely do so among themselves, and are already looking around for a seaport upon whom they can pack all the blame. Mr. Cleveland, and Senator Faulkner, Chairman of the Democratic campaign committee, are among the most prominent of these very undesirable positions, although Senators Hill and Gorman are also frequently mentioned in the same connection; likewise Representative Wilson, of W. Va.

At Republican Congressional headquarters all the news indicates that the Republican majority in the next House will be between twenty and thirty, and if the Democrats cannot do something to arrest the wholesale desertion of men who have heretofore acted with that party the Republican majority may go as high as fifty. Various causes are responsible for these desertions, principal among which may be mentioned the assertions of such Democratic leaders as Mr. Cleveland and Mr. Wilson, that tariff tinkering must go on the attempt to make the nationality of Mr. Morton's domestic servants an issue in the New York campaign, and the attempt to stir up religious prejudice for campaign use.

There is one Senator who apparently takes no great interest in the campaign in his State. That is Roach, of North Dakota. He only left Washington Saturday night, having been here since Congress adjourned. The reason for his apathy may perhaps be found in the fact that from his point of view very little is at stake in his State. Mr. Roach, like the rest of his party, recognizes the "cinch" that Representative Johnson has on his seat, and the Legislature to be elected this year will not elect a Senator. Still, his apathy is an indication of his belief that Republican success is assured.

Mr. W. B. Thompson, treasurer of the Republican Congressional Campaign Committee, has just returned from Michigan, where he made himself thoroughly familiar with the political situation. He says Michigan will certainly elect a solid Republican delegation to the next House. In 1892 Michigan elected five Democratic members of the House, but signs have not been lacking that many of those who helped to do it have become very much ashamed of their votes.

Hon. John S. Wise, formerly of Virginia, now of New York, can be as caustic in his remarks as ever his father, one of Virginia's celebrated Governors, was in his most savage humors. Witness what he said of the present Cabinet: "Cleveland took his Secretary of State out of the Republican party and has not yet been able to make him say 'I am a Democrat.' He found an old confederate weeping above the grave of Jefferson Davis and made him Secretary of the Navy. Over his old type-writer he waived his magic wand and transformed him into a Secretary of War, while he went into the interior of his own consciousness to evolve a Secretary who suggested neither the ice cream of the frozen north nor the mint julep of the sunny south—the sort of a creation they pickle in alcohol—a strange, nameless, lanky-poky. Elected as the opponent of the trusts, he selected a trust lawyer as attorney general, and made Secretary of the Treasury a Democratic statesman who never owned an un-mortgaged dollar in his life."

There have been rumors that a big scandal would be unearthed in connection with the stealing of postage stamps from the Bureau of Engraving and Printing, ever since the arrest of two of the thieving employees of that Bureau, and those rumors have been strengthened since the assistant Chief of the Bureau stated under oath, at the preliminary hearing, that the only stamps stolen were those which had been printed by the New York concern that had the contract previous to the first of last July. That statement has been generally accepted as proof that the method of handling stamps at the Bureau is radically defective, as thousands of stamps with the distinctive mark of the Bureau on them were produced in court and proved to have been purchased from the thieves or their confederates, and the Assistant Superintendent of the Bureau testified that as having been printed by the Bureau, although he had previously sworn that the books of the Bureau showed that no stamps printed by the Bureau had been stolen. Either his testimony was wrong or the books are wrong. Evidently there is something rotten somewhere in that Bureau, in connection with the handling and distribution of postage stamps, else the

Bureau would have ascertained that the stealing was going on before being notified by outside parties. It is not clear why the same excellent system of checks by which paper money has been handled by the Bureau for many years without trouble or loss was not extended to cover stamps when the Bureau began to print them.

Selbysport.
The farmers smile at the good, open weather we are having and all he thinks of is shucking corn and cutting kraut.

Messrs. Chas. F. Frazee and Jno. C. Hancock, of Pittsburg, were on our streets last week looking up a hotel site.

Ulysses Frazee, of Frazee's Ridge, was on our streets the 19th buying shingles for his Markleysburg property.

Jacob Boyer, Esq., of Mineral Springs, paid his friends of our town a visit on the 19th. Come again.

Misses Julia Miller, Estella Wass, Hattie Lowdermilk and Florence Frazee, and Messrs. M. W. Lytle, Harry Turner, J. D. Stuck, Jonas Frazee, Jr., and Frank Speer spent last Friday evening cutting kraut at the farm residence of Mrs. Jonas Frazee.

W. M. Lowdermilk smiles on our Selbysport hunters. Mr. L. brought in on the 17th two wild turkeys that weighed 34 pounds.

Mr. George Galloway is superintending over four miles of drainage on the farm of Jonas Frazee.

Mr. Morrison of our town, is spending a few days with his parents at Bidwell, Pa.

Wm. Hinebaugh, secretary of our School Board, paid his many friends of Selbysport a visit on the evening of the 17th.

Mrs. Chas. H. Stuck is visiting her parents at Meyersdale, Pa.

David Fallow, of Johnstown, Pa., has moved to one of E. J. Stuck's houses in West Selbysport.

Wm. Browning, Esq., of near Oakland, paid us a visit the 17th.

Rev. Hiram Harzell, of Addison, Pa., was on our streets the 19th buying up the precious root, ginseng.

John W. Crist and Frank Peck, employees at the pump station on the Watson farm, were guests at the Frazee house the 19th.

John W. Frazee, the carpenter of East Selbysport, has accepted a position on the T. W. Castled hotel at Oakland, and packed his tools and left on the 20th.

Who said the Democrat lied about wool? If the Democrats think wool is advancing we refer them to Hiram Harzell, of Addison, Pa., the largest wool dealer in our section. He is anxious to close out his wool that he has held for two years and paid McKinley prices for, which were 23 to 25 cents per pound. He tells us he would be very willing to take 16 or 16 1/2 cents. Mr. H. used to be a Democrat, and now he is a Republican, as he says the Democratic laws do not suit him. He is as well posted on prices as any man in Garrett county.

Ed. J. Frantz and family were visiting Ison Ringer, of Sand Spring, Sunday, the 20th.

A. J. Frazee has returned home from McLeary, where he has been thrashing with his separator.

Jasper Pike is one of the happiest young voters in No. 2. On Nov. 6th he will cast his first vote, and it will be for Protection, and that in Mrs. Geo. L. Wellington. He says he had no trouble through the assistance of Jonas Frazee to sell his widowed mother's lambs for \$2.50 per head last fall. Mr. F. went to the extra expense and increased his flock and raised lambs this season 10 per cent. better than they were last year, and now under the Wilson hammer he can only get \$1.80 for them. Some of Mr. F.'s Democratic friends tried to hold him in the folds because his father was a Democrat. Jasper says no, he wants Protection, and still will yell, "Three cheers for Wellington!"

Brother farmer, you well remember the prices one of our leading merchants paid you for your live poultry in 1892. Ask this merchant if he has not cut the prices of '92 33 1/3 per cent. Vote for Wellington and Protection.

Mr. Chas. Cumming, of Friendsville, while on his way home from Selbysport about 9 p. m., of the 19th, was struck by a north bound speaker on the big trestle between these two towns and dumped into the Yough river. He fell some 20 feet and received some ugly scalp wounds. Dr. Krist bandaged up his wounds and thinks there is no serious danger.

Mr. George Galloway just laughs at the 20 pound cabbage head you named in your valuable paper some days ago. While Uncle George was making sour kraut on Diamond Dan's farm he pulled a neat sized head that tipped the scales at 23 pounds.

Messrs. Samuel Stauffer, Warren Frey, John Stauffer and Robt. Campbell, of Manor, Pa., and Messrs. Felix Morrow and James

Dias, of Irwin, Pa., were guests at the Diamond Hotel last week. These gents visit our town once a year hunting and fishing. Last season Samuel was best in hunting up farm game and to come out first prize this year, he hired all the men to hunt for him and go ahead and meet him, drop their game and Sam. would do lots of shooting and pledge his word he killed all the game. Felix is no spring rooster. He hired Mr. Dave and in two hours they had thirty-one squirrels and most all shot with a rifle. Below is the score made by these gentlemen: Squirrels: Sam. Stauffer, one; John Stauffer, 31; Warren Frey, 31; James Dias, 31; Robert Campbell, 37; Daddie Morris, 49. Come back next fall boys; we will welcome you as before.

Harry Turner, who has been employed on Jonas Frazee's farm, handed in his resignation on the 23d. Same was accepted at once.

Dear Mr. Williams, some of our boys would like to vote for you on November 6th, and still we fear when you get with your cheap labor brothers in Congress you will forget us. We want protection and that means vote for Geo. L. Wellington.

Dear Park.
Fine weather this week.

Hon. A. F. George was in town Tuesday.

Rev. W. E. George, our efficient postmaster, has been on the sick list this week, but is able to be out again.

This would be a good place for a lawyer, judging from the way 'Squire Hove is being kept busy.

Public speaking last Saturday night by Messrs. G. S. Hamill, Squire Hinebaugh and S. T. Jones, of Oakland. Dismissing the school bonds was the object of the meeting and a large crowd was to hear them which shows that they have an interest in it.

Chas. Savage has closed out his butchering business here and has gone to Keyser, where he will engage in the same business.

Mr. Silas Beachy shipped three car loads of cattle from here last Friday.

Our school opened last Monday with Mr. Victor McCauley as principal and Miss Bessie Hove as assistant.

Miss Ella Langhin has been called to Buckhannon, West Va., where a brother is sick with pneumonia.

As the election is approaching the voters should be studying the questions at issue and come out on the 6th of next month and vote for Wellington and Protection.

HURRICANE.
Elder.
Mrs. D. O. Dewitt, of Hoves, is staying with her parents during the sickness of the family.

Mr. S. J. Sterling and family of Kingwood, W. Va., who were visiting friends here, returned home on the 9th inst.

Mrs. S. F. Cuppett and Mrs. Wm. Frazee were visiting relatives near Cranberry on the 13th and 14th.

Five of the family of Mr. Isaiah Friend have the typhoid fever.

Our school opened today, with twenty-three pupils present, and we think we will have a very successful term, as our teacher knows his duty and will do it.

There will be preaching here Sunday at 11 a. m.

Messrs. Chas. Frazee and G. W. Sterling were visiting friends near Frostburg Saturday and Sunday.

Mr. Wm. Sterling left this place today for Pine Run, where he will teach during the winter. We wish him a pleasant time and abundant success.

Democrats are growing scarcer every day and we think that by the 6th of November there will be none left to tell of the coming good times.

Mr. Geo. Shartzer is still engaged in buying and shipping chestnuts.

White Rose.
Glade Valley.
Nice weather now.

Farmers are husking corn and getting ready for fall plowing.

Mr. J. S. Gnegy opened his school Monday with 17 scholars on the roll.

We are glad to see Mrs. Jennie M. Thompson and daughter, Katie, in our midst. Mrs. Thompson is teaching the Red House school this winter. She is a first class teacher and we predict a successful school under her careful instruction.

Master Guy Nicholson is visiting his grandfather, Mr. J. H. Roth.

Now the election is drawing near and the question is, "shall I vote for the bond bill or not." We are all going to vote for Wellington and we honestly believe that the bill should be passed, for without some measure of this kind, we may expect very short terms of schools. Even if it does make our taxes a few cents higher we should vote for it. Hurrah for Wellington and protection and the bond bill.

J. BIRD.

VOLUME 18.

OAKLAND, MD., THURSDAY, NOVEMBER 1, 1894

NUMBER 34.

NEWS OF A WEEK.

Happenings in and About Town told in Short Paragraphs.

Hon. A. F. George was an Oakland visitor Tuesday.

Dr. J. W. Laughlin, of Deer Park, was here Saturday.

Mr. William Frazee, of Elder, was here last Saturday.

His Honor Judge Edward Stake was in the city on Tuesday.

Mr. S. R. Savage, of Sang Run, was an Oakland visitor Monday.

Mr. and Mrs. Lucian Sliger, of Altamont, were here Tuesday shopping.

The first rainfall we have had in over two weeks occurred on Tuesday night.

New style fall and winter cloaks just open at M. L. Scott's Baltimore Store.

Mr. and Mrs. George W. Moose have returned from a visit to Belington, W. Va.

Mr. and Mrs. William Colmer, of near Swanton, were in Oakland last Friday.

Mr. E. J. Fringer has moved into his handsome new residence on Third street extended.

Miss Kate Spedden, who is teaching at Hutton, spent Sunday in Oakland with relatives.

Mr. and Mrs. Henry J. Mayers gave a dinner party to a large number of their friends Friday evening.

A very fine line of fine dress goods just opened at Offutt & Son's.

A nice line of yarns, blankets, comforts and flannels at Townshend & Son's.

Largest, best and cheapest stock of men's clothing at Offutt & Son's.

Fine dress goods, ladies' coats, blankets—everything just opening at Offutt & Son's.

Full line of men's, women's and children's woolen underwear at Townshend & Son's.

Blank deeds for sale at this office. The deeds are specially ruled and printed very neatly.

Mr. R. C. Campbell, of Mineral Springs, was in the city a short time Tuesday morning.

A full line of boots and shoes, gun goods and gloves at Townshend & Son's.

The frame work of Mrs. Lowenstein's new residence on Oak street is up. D. E. Bolden is the contractor.

Mrs. Henry P. Weber, who has been on a visit to relatives at Lonaconing, returned to her home near Oakland Monday.

The Rev. Floyd will deliver a sermon to the members of the Jr. O. U. A. M. at Swanton on Sunday, Nov. 4, at 3 o'clock p. m.

Miss Sarah Norris offers her services as seamstress to residents of Oakland and vicinity. Reasonable rates. Address, Mt. Lake Park.

A number of our Democratic brethren went up to Terra Alta Monday evening to hear that great apostle of English Free Trade, William London Wilson, speak.

If you are looking for or are in need of a new dress, Townshend has it either in all wool, cloth or suitings for 40c per yard and up.

Fire broke out in Mr. Henry Weber's hay field near town Sunday and burned several stacks of hay before its progress could be stayed.

Dr. J. G. Robinson, dentist, of Baltimore, has located in Oakland for the season and is prepared to do all kinds of dental work. Office with Dr. M. C. Hinebaugh.

Public sale will be made on next Wednesday of live stock, farming implements, lumber, etc., at Fernleigh Manor, Col. Woods' summer home, a few miles west of Oakland.

The new Commercial Hotel being built on Second street by Mr. Truman Casteele is well under way, the floors are all laid and the roof on. The building will contain twenty-seven rooms and will be heated by steam.

Mr. and Mrs. Isaac Leighton have been in Oakland several days as the guests of relatives.

Mrs. James R. Bishop, accompanied by her grandson, Stewart Hamill, are on a visit to relatives and friends at Kingwood.

Miss Edith Browning, who spent the summer months here with her grandparents, Judge and Mrs. Patrick Hamill, returned to her home in Roanoke, Va., last Friday.

Rev. E. R. McCanley preached to a large congregation in St. Mark's church Sunday morning. He will preach in the same edifice next Sunday morning and evening.

Misses Bess and Nell Browning gave a hallow 'een party in honor of their guest, Miss Wilson, of Missouri, last night, at which quite a large crowd was present and an enjoyable evening spent.

Having sold my meat store to Mr. James Andrews, I desire to close up my books as soon as possible. All persons knowing themselves indebted to me are hereby notified that they must settle either by cash or note immediately.

34-3t ANDREW SHANTZER.

For a pain in the side or chest there is nothing so good as a piece of flannel dampened with Chamberlain's Pain Balm and bound on over the seat of pain. It affords prompt and permanent relief and if used in time will often prevent a cold from resulting in pneumonia.

This same treatment is a sure cure for lame back. For sale by Oakland druggists.

Mr. Edmund Albright and daughter, Miss Georgia, of Cranesville, accompanied by Mr. Howard Smouse, drove to Oakland last Sunday and on Monday morning Miss Albright departed for Florida, where she intends to enter college. Miss Albright is well-known here and is a very bright and intelligent young lady.

Henry Wilson, the postmaster at Welshton, Florida, says he cured a case of diarrhoea of long standing in six hours, with one small bottle of Chamberlain's Colic, Cholera and Diarrhoea Remedy. What a pleasant surprise that must have been to the sufferer. Such cures are not unusual with this remedy. In many instances only one or two doses are required to give permanent relief. It can always be depended upon. When reduced with water it is pleasant to take. For sale by Oakland druggists.

Croup is a terror to young mothers. To post them concerning the first symptoms, and treatment is the object of this item. The first indication of croup is hoarseness. In a child who is subject to croup it may be taken as a sure sign of the approach of an attack. Following this hoarseness is a peculiar, rough cough. If Chamberlain's Cough Remedy is given as soon as the child becomes hoarse or even after the rough cough has appeared it will prevent the attack. It has never been known to fail. 25 and 50 cent bottles for sale by Oakland druggists.

W. A. McGuire, a well known citizen of McKay, Ohio, is of the opinion that there is nothing as good for children troubled with colds or croup as Chamberlain's Cough Remedy. He has used it in his family for several years with the best results and always keeps a bottle of it in the house. After having the grippe he was himself troubled with a severe cough. He used other remedies without benefit and then concluded to try the children's medicine and to his delight it soon effected a permanent cure. 25 and 50 cent bottles for sale by Oakland druggists.

For Sale—Fernleigh Manor.

1500 acres of the most desirable land in Western Maryland, all underlaid with coal; one seam the genuine Pittsburgh gas coal. Unsurpassed as a farm or for stock raising. An elegant mansion with several tenant houses. For particulars address M. J. C. or J. E. Wood, 2421 Maryland Ave., Baltimore, Md.

33-4t

Will You Suffer

With rheumatic pains, sciatica, sleepless nights, dropsical accumulations, or nervous headaches when Messrs. Cober & Boyer will cure you if their directions are followed. Can be consulted at the Central Hotel or at their room in the Pritchard building, Oakland, Md.

November Forecast, 1894.

A wave of storm disturbance will be in transit on the closing days of October, which may embrace the opening of the month, attended by light rains, sleet and snow storms, then followed by light freezing. Weather conditions will react about the 4th, generally growing warm. East and south winds will circulate which will culminate in a wave of disturbance on or touching the 6th, when a light foretaste of approaching winter will become manifest by a light rainfall, snow, sleet and wind storms. These meteorological disturbances will be much more severe west and north than in the central parts. Weather conditions for the month denote sudden changes of temperature, from hot to cold, and then converse changes. The rainfall for the month will likely be restricted to localities of quite limited extent. Storms of high and dangerous winds will be more apt to develop in the early part of the month than in the after part. The snows within the month will partake in extent and quantity the characteristics of the rains which denote more flurries. Some of the disturbances in the early part of the month are likely to be attended by electricity. The 11th to the 13th or 14th, a period of storm disturbances in which the disagreeable phases of November storms attended by much gloom will prevail. Following the passage of the disturbed wave will be a rush of cold northwest winds more penetrating and chilly than of actual decline of temperature. From about the 17th to the 20th storms of a local character will be on their passage across the country followed by light freezing. From about the 22nd to the 25th, storms will materialize in which more rain is likely to fall and be more general they during the early part of the month. The last period of storm disturbance will be about the 27th to the 29th, when the streams of water will likely be refreshed reaching normal conditions. We are not likely to see much snow before the 14th of December. Then about the 26th.

October 20th. P. R. SMITH.

Dead Letter List.

List of mail matter remaining unclaimed in the postoffice at Oakland, Garrett county, Maryland, for the week ending Nov. 3rd, 1894, the parties addressed being unknown to the postmaster.

S. Peter, Willie Hamlin-2, Harvey Harst, Patrick Higgins, Matthew Martin, J. Miller, Peter Miller, J. Paul, Mrs. Annie Land.

One cent on each article is chargeable for advertising. Parties calling for this matter, will please say it is advertised, otherwise they may not receive it.

E. H. BARTLETT, Postmaster.

Marriage Licenses.

Edward A. Davis, of Mount Pleasant, Pa., and Mattie Falkenstein, of Valley Point, W. Va.

Charles Morgan Snyder, of Mount Morris, Pa., and Pearl Copelan, of Monongalia county, W. Va.

Edward Augusta Williams and Phoebe M. Harmon, both of Bayard, W. Va.

Joseph William Hoge and Harriet Elizabeth Jordan, both of Garrett county.

One marked "don't publish."

Valuable Advice.

Avoid lawsuits and loss by consulting H. P. Tasker and examining his abstracts of the "conflicting titles" before paying for Military Lots. Charges reasonable. Office in Colardean Cottage, opposite the bank, Oakland, Md.

It is guaranteed to give perfect satisfaction or money refunded. Price 25 cents per box. For sale by all druggists.

34-1yr

Rogers' Sarsaparilla.

A specific for all 100 diseases for 75 cents. Rogers' Little Liver Pills, best on the market; Cough Cure, Liniment, Appetite and Worm Syrup, sold by A. G. Sturges, Oakland; Cuyper Bros., Meigs, Henry; J. A. DeBerry, Corinthy; C. F. White, Hutton; P. T. Garthright, Hayden & Eckles, Mt. Lake Park; Dr. Laughlin, Deer Park; Wm. Frederick, Friendsville; Young Store Co., Jonas Frazee, Robert Liston, Selbyport; W. Wass, Mineral Springs; J. E. Gnagey, Accident; Smith & Callis, Hoyer, and by all general dealers.

Notice.

To the farmers of Garrett county. Having accepted the agency for the sale of "Natural Plant Food," one of the very best fertilizers now known, I am prepared to fill all orders promptly. For terms and particulars apply to

MICHAEL W. DURST, 7-26t. Grantsville, Md.

Davis' Mills. Our Wellington Republican Club is still alive and numbers twenty-seven members. We will have a grand rally Saturday, November 3d, at 8 o'clock p. m. We expect Mr. S. T. Jones and other gentlemen of Oakland, to give us some cheering words on that evening. All come out and hear them.

George L. Wellington is our man and we will all come out on the 6th of November for him.

Our wool, and coal, and sugar, and lumber, and our dear old comrades of 1861 are all nearer to us than Mr. Williams, and he will find it so on the battle field on the 6th of November.

The diphtheria is still in our midst. Three of Chauncey Kimball's family have it at this writing. John Reames lost his little girl, three years old, and his wife and baby have the disease. Four of Freeman Lewis's family have the diphtheria also.

The new county road through C. DeBerry's Cranberry Glade farm is almost completed, which will add very much to our convenience.

Wm. W. Bray had some fence burned Saturday.

Burning time will be the order of the day soon.

Jos. Kisner is running Mr. G. W. Delawder's saw mill on full time. Joseph Hoyer and Miss Mattie Jordan were married by the Rev. A. Hart at McHenry. XXX.

On the Campaign.

On Tuesday morning Mr. James Whitehouse, of Baltimore, accompanied by Messrs. J. C. Peddicord, E. H. Sincell and Smith's Military Band, started for Selbyport, where a rousing Republican meeting was held that night.

They will make the tour of places as advertised in these columns last week propounding the American doctrine of Protection and return to Oakland Saturday morning.

Estray Notice.

There came to my place near Deer Park, about July 1, a dark red yearling bull, without marks of any kind. The owner will please come forward, pay all costs and damages and take same away.

34-3t W. M. TRICKETT.

Dentistry.

Dr. I. L. Ritter will be at Deer Park Nov. 12, for one day only; Oakland, Nov. 13, and remain a few days prepared to do all kinds of dental work. Teeth extracted without pain. Office: Commercial Hotel. 34-2t

When Baby was sick, we gave her Castoria. When she was a Child, she cried for Castoria. When she became a Girl, she clung to Castoria. When she had Children, she gave them Castoria.

Glade Valley.

Corn nearly all husked and is a pretty good crop.

Mr. Wm. Ritter is making preparations for erecting a new dwelling house.

Mr. J. S. Gnagey's school is progressing nicely.

Mr. and Mrs. A. S. Mosser were the guests of Mr. D. O. Roth Sunday.

Mosser Brothers have just added a new planing mill to their saw mill.

The Democratic mass meeting at Ganer's school house last Saturday was a grand failure. There were about eight or ten Democrats gathered together, but the speakers failed to make their appearance, consequently they sat on an old white oak log for about half an hour. Then they all went home.

The Democrats of Garrett county are getting their eyes opened and their leaders will find that they can't pull the wool over their eyes as easy as they could two years ago.

J. BIRD.

Chamberlain's Eye and Skin Ointment.

A certain cure for Chronic Sore Eyes, Tetter, Salt Rheum, Scald Head, Old Chronic Sores, Fever Sores, Eczema, Itch, Prairie Scratches, Sore Nipples and Piles. It is cooling and soothing. Hundreds of cases have been cured by it after all other treatment had failed. 25 cents per box.

IF YOUR BACK ACHES, Or you are all worn out, really good for nothing, it is general debility. Try BROWN'S IRON BITTERS. It will cure you, cleanse your liver, and give you a good appetite.

Ripans Tabules relieve headache.

Notice.

Did you hear the crash? Everybody thought it was thunder, but it was only Miller Bros. knocking the bottom out of the prices of horse shoeing. From Oct. 1 to December 1, 1894, you can get your horse shod for 60 cents. The cash must accompany the horse. 30-6t

A Quarter Century Test. For a quarter of a century Dr. King's New Discovery has been tested, and the millions who have received benefit from its use testify to its wonderful curative powers in all diseases of the Throat, Chest and Lungs. A remedy that has stood the test so long and that has given so universal satisfaction is no experiment. Each bottle is positively guaranteed to give relief, or the money will be refunded. It is admitted to be the most reliable for Coughs and Colds. Trial bottles free at all Drug Stores. Large size 50c and \$1.00.

Right's Tabules relieve headache.

PAP'S LIFE.
FLORENCE T. MOY.
WHAT in the name of all that is weird and mysterious is that?
Night had closed in dark and cold. The wind came whistling and sighing over the mountains and through the pines in a way that, to one experienced, indicated a storm. John Maynard, in his light buggy, on a lonely road in North Carolina, hungry, tired, and with a weary horse, had concluded not to attempt to drive on to Shelbyville until morning; and, under the supposition that he would find a dwelling of some kind, had turned his horse up a steep, stony narrow lane, on either side of which lay a low snake fence. Having reached the first "winding," the horse paused at the head of a breathing spell, and John, peering about him into the darkness in a vain effort to discover some signs of a habitation, became aware of a small light in a patch of woods on his left. It was not the light from a window of a house, for it was small, and moved along slowly in a dancing, uncertain way for a short distance, then remained stationary.

"A will-o'-the-wisp in the dismal swamp, perhaps," John muttered. "Anyway, I intend to find out." He got out of the buggy, jumped over the fence and made his way as rapidly as possible in the direction of that curious spot of flame.

He felt, as he stumbled along in the darkness, that he was doing a foolish thing in thus gratifying his curiosity, and he was conscious of a slight shiver when, at last, he reached the light, for it came from a small lantern which stood at the head of a solitary grave inclosed by a low picket fence of rough stakes. It was marked by a plain slab of wood, on which was painted, in big, black, crooked letters: "SARAH,"

AGE 38.
John Maynard stood looking at it a few moments, wondering by whom the lantern had been put there, and for what reason. As he turned away he saw a small box at the foot of the grave. He picked it up and pulled off the slide-cover, disclosing to view a pair of iron-rimmed spectacles, and a ball of gray yarn with four rusty steel knitting-needles thrust through it.

"Well, this certainly beats anything I ever saw before!" ejaculated John, as he put the box down again and walked back to his horse and buggy in the lane.

He drove on for about half a mile, and was beginning to wonder if he would be obliged to spend the night in the woods, when the barking of a dog told him that he must be near a dwelling of some sort; and a few minutes later he perceived a two-room cabin standing in the middle of a small clearing. Before it burned a small fire of pine brush, and as he stopped his horse at the bars, which did duty for a gate, a lank yellow-and-black hound came bounding down from the cabin, barking loudly.

"Halloo!" shouted John, at the top of his voice; and "Halloo, yerse!" responded a thin, sawn woman in a coarse homespun dress, as she appeared at the door of the cabin, a short-stemmed clay pipe in her mouth.

"My good lady, I'm looking for a place to stay overnight. Can you accommodate me?" asked John, in his most ingratiating tone of voice. "I can't very well sleep out in the woods, you know."

"Wall, now, stranger," responded the woman, in a drawling voice and without removing the pipe from her mouth, "the ole man en the gals hev gone up in the head of the cove ter singin', en they jist hain't anyone hyah but me; but if ye'll 'light, I'll do the best I kin fer ye. Ye'll better look after yer own stock, 'sist ye tell him down ter the barn, en ye'll find plenty o' roughness en some mibbins o' corn en when ye git through jist come in the big house hyah, en I'll go outen the little house en cook ye some supper."

"Have you got a lantern?" asked John.

"No, I hain't. Pap he's got one, but he don't let nobody lay a finger on it. I'll put a light outen the fence, though, en ye kin see by hit, I reckon."

Reaching up to a little shelf near the door she took down a knife and a piece of fat pork, from which she cut a generous slice. Laying it in a tin plate she carried it out to the fence and set it in a post. Then, taking a half-burned stick from the fire in the yard, she lit the pork, and left it to burn smokily in the wind. By this light John took his way to the barn, found the "roughness" and corn, and made his weary horse comfortable for the night.

Returning to the house, he sat down on a splint-bottomed chair just within the doorway, and his hostess came to the door of the little shanty in the rear to summon him to supper.

"Now, come out en git a bits," she said.

He followed her into the "little house," which was used solely as kitchen and dining-room, the cooking being done at an open hearth, before which was a frying-pan, an old iron teakettle and two brown stone crocks. In the middle of the room was a pine table, its appointments being of the commonest and cheapest description. The crockery was thick and heavy, and badly chipped; the knives had crooked bone handles, the forks were two-tined, and a tin tomato can served as a coffee pot.

"Now, jist reach en take; ye're sitin' handy," said his hostess. John was so hungry that he was able to make a hearty meal upon the coarse fare provided for him, and, having declared himself highly pleased with everything, was told to go into the "big house" again, while the old woman washed the dishes and "bushed about a bit."

As he crossed the narrow space between the two houses, an old man with long white hair came slowly across the yard from the smoldering fire, and, entering before him, took a seat by the hearth.

"That's another cheer over thar by the bed, stranger," he said, nodding to John.

He was a sorry-looking old man in his patched, faded, homemade clothes, and with his wrinkled, sawn face, faded blue eyes, and long white hair; and he was evidently not given to loquacity, for after his remark about the fire in a dreary way, his withered hands clasped tight together.

The woman—who could not have been over fifty years of age, though she looked much older—came in presently and sat down in a stiff wooden chair on the opposite side of the hearth from John.

"Why don't you take the rocker?" John asked, glancing toward a big rocking-chair, with a soiled patchwork cushion, which stood near the one window.

"She can't," spoke up the old man, quickly, a sudden flash in his faded eyes. "That's man's."

John looked inquiringly at his hostess.

"Ye mustn't pay no heed ter him; he ain't jist right in his mind," she said, frankly. "Mam, she died hyah a spell back—goin' on four months, I reckon en pap, he ain't ben jist right since. He tuk on fearful when she was laid out. He 'couldn't' hear ter sense it that she wouldn't come back no more. He's mighty tryin' sometimes. He won't let nobody set in thar cheer, en he goes reg'lar every night ter set a light on mam's grave. Mam she was a great hand ter have a light soon's it was dark, en pap he ain't forgot it."

John nodded.

"I saw the light there," he said. "I wondered what it meant."

"There can't nobody git him outen them notions," went on the woman. "So we us jist let him be. It don't hurt nobody."

"Yes, it's better to let him have his own way," John said.

Soon after this the small household retired, John being told to go "up ladder," where he'd find a shake-down which he would have to share with pap.

Was it a dream that some time during the night, he heard the rain dashing against the roof and some one moving about the left? Did he dream that he heard a thin, weak voice say: "I'm a hurryin'; don't be skeered, mam. Pap'll be thar. Pap ain't goin' ter let nobody 'tend ye."

He knew the next morning, when he awoke at daylight and discovered that his bedfellow was not beside him, that it couldn't have been a dream, and as soon as possible he made his way down the ladder to find out if pap were below.

The woman was hanging the kettle over the fire she had just built, but pap was not to be seen.

"Sakes alive! Ye don't mean ter say pap went out in the night!" she cried, when she heard John's story. "Ef that don't beat all! He's gone down ter mam's grave, I reckon. Mam she was that skeered of a storm, she was like ter go crazy."

"We'd better go after him, I think, and the sooner the better," said John.

"I reckon we had. Pap's mighty tryin' in. He ought not to do me this way."

Beside the lonely grave in the wood they found him, holding over it a battered, dilapidated umbrella, drenched to the skin, and muttering words of comfort and protection to the ears of the dead wife he could not realize was dead, for evermore, to his weak, quivering old voice.

"They had some difficulty in inducing him to return home."

"Mam'll be skeered of the storm," he said, over and over. It was his only argument.

But they got him home at last, and his daughter put him to bed, with a bottle of hot water at his feet, and half a dozen quilts over him.

"I reckon he's in for a spell of sickness," she said to John when he went out to let down the bars for him as he was about to drive away. "I reckon when my old man en the gals gets back I'll send for one o' them town doctors. This hyar doctor in the mounting is mighty good on neuralgia and toothache, but I reckon he wouldn't know jist how ter tackle pap."

But even the "town doctor's" efforts proved unavailing. Two weeks later, when John stopped at Shelbyville on his return trip, he made a point of finding the medical man who had been called to attend poor old pap, and learned that the old man had died after an illness of only four days, and that his grave had been made beside that of the wife he had loved with such pathetic fidelity.—Demorest's Magazine.

CARPENTER BEES.

Their Queer Nests Made by These Interesting Insects.

Of the instincts of insects we find examples to parallel those of the larger animals; by one important test, the construction of buildings and habitations, the sagacity of these tribes outstrips that of all others, and vies in its way with the most singular efforts of the preservation of their species. Many, whose term of life does not add up to the brilliant career of the butterfly, nevertheless, are peculiarly exposed to danger—exhibit a foresight truly marvelous, and an indomitable perseverance in anticipating wants which they cannot supply at the time of need. In like manner, other insects, in their architectural skill, while they busy themselves with the rearing of their young, are peculiarly exposed to danger—exhibit a foresight truly marvelous, and an indomitable perseverance in anticipating wants which they cannot supply at the time of need.

The art of boring symmetrical tunnels in wood culminates with the carpenter bee, who, from their carpenter-like capabilities. Numbers of the members of this class are enormous, and very beautiful. Xylocopa violacea—the generic name signifies a wood-borer—larger than the largest humble bee, exhibits choice contrast of colors in its brilliant plumage. Its wings are of a rich violet. Several African species claim more than a passing glance from those to whom beauty affords delight; black body with bronze green iridescent wings; body black and orange, with iridescent wings; body pale yellow, green, and black. These are the most beautiful of the class. Several species claim more than a passing glance from those to whom beauty affords delight; black body with bronze green iridescent wings; body black and orange, with iridescent wings; body pale yellow, green, and black. These are the most beautiful of the class.

The bee usually begins boring obliquely across the grain of the wood, about two days being taken to make a tunnel of considerable length; but this may not be so easily done as the remainder, which runs parallel with the sides of the wood for from twelve to eighteen inches. Sometimes an excavation of two suffice, which generally take opposite directions from the opening; sometimes the latter, extending one above the other, using the same opening. Sharp jaws, moved by powerful muscles, are its only tools; and as it descends into the heart of the solid wood, the tunnel is swept clean and regular with stiff bristles of hair on the legs, and all rasping, sawing, and chipping is done by the mandibles.

Each is supplied with an egg and a compound of pollen and honey; the door is closed; but before deserting, the bee finally the hole forms a lateral opening from the outside to the bottom of the cells and chokes it with sawdust paste, and through this the young escape when the time for their emergence arrives.—Chambers' Journal.

THE SEA'S INVASION.

Old Ocean Tearing Away the English Coast.

The flat marshes of Pevensy have gained half a mile since the days of Edward II., when the sea almost washed the walls of the castle that now stands high and dry inland. The same thing has happened on the Romney flats, where the ancient castle of Lympne has receded a mile or more. Such spots as these look as though the next spring tide would add their grassy meadows to the lost ground of sea bottom. But on the rocky parts of the Antrim coast, we have the sea slowly working its way inland, despite the rock fortifications and strong bombardment that looks so resistless. Under the waves lie tracts of bogland that once upon a time must have stood well in shore, and Dunluce bears witness to the ravages that have taken place within a few centuries—a few fields of the clock as geologists count time.

Another marked example of the insecurity of rock defenses where the sea is the invader occurs at Eilean, on the Yorkshire coast. Only twenty years ago there was a pathway running around the ancient Church of St. Hilda, which is built on the solid rock—now this is so broken away on the seaward side that it is impassable. Another twenty years may see the church undermined.—Argosy.

Rapid Development in Alaska.

Some late reports show that Alaska has been rapidly growing in commercial importance. Very few know the size of this part of the United States or appreciate its value. It is as large as England, Ireland, France and Spain together. It is a spacious territory, filled with mineral wealth and likely to become of the first importance to this country. Even now its fisheries stand in the front rank and its production of gold increases year by year, and in time it may develop into a new California or Australia. Immigration is increasing and the statistics of exports and imports show a steadily growing volume. Business has grown so rapidly that there is a demand for a revision of the statutes and the enactment of a code to govern the concerns of the territory.—Cincinnati Tribune.

"O sacred head, now wounded," is a translation of a translation. The original hymn was the Salve Caput, by St. Bernard.

Into the German, "O Haupt voll Blut und Wunden," by Paul Gerhardt. This was translated into English by J. W. Alexander.

PUNGENT PARAGRAPHS.

—Norwalk, Conn., is said to have an Indian origin, but there is an English village of this name.

—Talking about charity beginning at home is one of the ways by which we can let people know that we have none.—Rand's Horn.

"What are the last teeth that come?" asked a teacher of her class in physiology. "False teeth, mum," replied a boy who had just waked upon the back seat.

—Trivet—"You know Charley Dumb, didn't you?" Dicer—"Yes, he went west and was trashed." "Is that really so?" Well, Dumbit always was high-strung.—Harlem Life.

—Hebrew cemeteries were always situated without the walls of the towns, the presence of the dead being supposed to cause pollution. This peculiarity is noticeable also among the ancient Greeks.

—Fair Graduate—"Which is the proper expression, 'girls are' or 'girls is'?" Chorus of Schoolmates—"Girls are, of course." Fair Graduate—"Of course! Pshaw! Girls are my hat on straight!"

—Mamma—"Robbie, why didn't you speak to Mrs. Bangle when you met her just now?" Robbie—"You said I must always think twice before I speak, and I couldn't think of anything to think."

—"You didn't come anywhere near getting the pennant?" said the haughty Baltimorean. "No," replied the humble Washingtonian. "We'll have to get along with the cold-wave flag, as usual."—Washington Star.

—Trotter—"I say, old man, I met a very pleasant relative of yours in the mountains this year. He was very kind, too, and lent me ten dollars when I was particularly hard up." Foster (sadly)—"I'm afraid you're mistaken. I haven't got any such relative."—Harper's Bazar.

—A Devout Worshiper.—Dr. Thirly—"Pardon me, madam, but I must tell you plainly that I wish you would pay more attention to the church services." Mrs. De Fash—"Why, Dr. Thirly, I really don't see how I could. I wear a new dress to church every Sunday."—N. Y. Herald.

"I think I will take a holiday the next three weeks," remarked the secretary to the chairman thereof. "But you returned from one only two weeks ago." "True; that was my holiday as secretary; I wish to go now as treasurer."—Tit-Bits.

—When first we were at Abington (writes W. R. Le Fanu in his reminiscences of Irish life, a peasant girl came two or three times to the rectory with a hare and other game for sale. My father, wishing to ascertain whether she came by them honestly, asked her where she got them. "Sure, your reverence," said she, "my father is poulterer to Lord Clare.")

—Reverend, walking one day on the boulevard with the musician Braga, was greeted by Meyerbeer, who anxiously inquired after the health of his dear Rossini. "Bad, very bad," answered the latter; "headache, a side-ache, and a leg I can scarcely move."

—After a few moments' conversation, Meyerbeer passed on, and Braga asked the great composer how it was he had suddenly become so well. Smilingly Rossini reassured his friend. "Oh, I couldn't be better; I only wanted to please Meyerbeer. He would be so glad to see me smash up."

ADVICE TO A BANK.

One of the Clerks Given a Tip About the Proper Location.

A very seedy man strolled into an Austin bank the other day, and, after a long and tedious wait, he was called into a window where he saw a clerk counting a package of bills, needed pleasantly and said:

"Still a-handin' of it out?"

"Yes," replied the clerk, "still crowdin' it on to people."

"Ain't you a little too handy here right on the main street?" asked the stranger.

"How so?"

"Strangers passin' along and seein' your sign so conspicuous like, are liable to step in and try to borrow money, ain't they?"

"Rather liable."

"I thought so. Must take up a good deal of time waitin' on 'em."

"Yes, it's some bother, but a bank must be accommodatin'."

"Folks drop in and borrow what money they want, I suppose, and then go away and forget all about it. Awful careless some folks are about borrowin' money."

"Yes, they are."

"Shouldn't keep your bank so close to the sidewalk. Men goin' by see you countin' money and that makes them think they lack a little to see 'em through, so they just step in and borrow of you, don't you see? And you hate to refuse—don't want to hurt their feelin's and so they get away with you. Some mighty mean folks in this world. Now, I wouldn't do it."

"You don't look as though you would."

"No, sir, I never borrowed a cent of no bank that I didn't pay."

"I'll bet you didn't," said the clerk with emphasis.

"Now, if I was runnin' a bank I wouldn't have it on the main street; I'd keep it back in some alleys where there wasn't so many strangers passin'. What, only ten cents?"

"Yes, only ten cents to-day. You see there has been so many strangers in ahead of you this morning that our funds are running low. Tacta. Don't trouble yourself to send it back in a registered letter. When the bank wants it the bank will notify you. Good-by."

And the seedy man departed.—Texas Siftings.

No Occasion for Pantheism.

"Is this your umbrella, sir?" inquired the stranger in the brown suit, hurrying after the stranger in the drab suit who had just got off the train.

"My dear sir," answered the other, "there need be no formalities in this case. We both saw it in the vacant seat at the same time. You got it first, so it is a gold-banded affair and I congratulate you. Good day!"—Chicago Tribune.

AFTER MARRIAGE.

His—My dear, I am a little short of money. Could you let me have twenty thousand dollars of your million for a few days?

She—I have no million dollars.

His—Before we were married you said you were worth a million.

She—Why, you often told me I was worth my weight in gold, and I thought one hundred and forty-two pounds in gold was worth about a million; that's all.

A Slight Omission.

"Pensill, our designer, made a bad break in that last design of a adding bed he got out for us," said the furniture manufacturer.

"What was the matter with it?"

"Well, he got this writing desk and book case and piano and wardrobe and refrigerator parts in all right, but when we got the blamed thing together, we found he had left the bed part out."—Truth.

From a Professional Standpoint.

Young Mother (whose baby has been weighed by the butcher)—And how much does the little fellow weigh, Mr. Butcher?

Butcher (dubiously)—Well, from my prints of view, mum, he runs too much to meat.—Tit-Bits.

Prepared for the Worst.

"Now," said the physician who is noted for his heavy charges, "I must take your temperature."

"All right," responded the patient in a tone of utter resignation. "You've got about everything else I own. There's no reason why you shouldn't take that, too."—Washington Star.

A Change.

When I was young my wife she called me "darling," "ducky," "sweet." But nowadays my pet name is: "Why don't you wear your feet?"—Boston Transcript.

A LITTLE MISUNDERSTANDING.

On the outside of the zebra's cage in the zoological garden Prof. Zwebecher sees a sign with the inscription "Caution—Fresh Paint." This leads the professor to remark to his better half: "Well, well, I would have taken an oath that the stripes on the animal are genuine."—Fliegende Blaetter.

A Paradox.

Though we boast of modern progress as aloft we growlly soar. Above untold canals whose habites we deplore, Yet in our daily papers any day you chance to look You may find this advertisement: "Wanted—A girl to cook."

—The Golden Rule, in Judge.

On the Road to Fame.

Artist—I sold four pictures yesterday.

Friend—What are you going to do with the money?

"I think I'll buy a frame for another picture I'm working on."—Town Topics.

He Saw the Point.

"Now I see the point," said the hapless dog to the barbed wire fence that he ran against.

"Yes, I thought you would," said the fence, "I tried to impress it upon you."—N. Y. World.

Good Cause.

The maiden smiled, as well she might, For there bled her sat A youth who owned in his own right A sixteen-story flat.

SOMETHING FOR NOTHING.

A suit of clothes for a dude.—Truth.

Too Sharp for Him. Bella (teasingly)—Say something funny, Algy.

Algermon (promptly)—Certainly. Will you marry me?

Bella—No, but marriage is no joke, you know!—N. Y. Advertiser.

COMING THRO' THE RYE."

Miss Toller—Oh! do look at the beautiful view from here, Mr. Shorty.—Judge.

Great Luck.

Wiggleton (meditatively)—It is marvelous the luck some men have.

Hobbs—Any particular instance?

Wiggleton—I just happened to think of Naugally.

Hobbs—Why, he died last night.

Wiggleton—Yes, just twenty-four hours before his life insurance expired.—Boston Home Journal.

Contrary to Custom.

Chennick—A very mysterious case of the accidental shooting of a boy by another boy with a pistol occurred yesterday.

Dudley—I heard about it. But what is there mysterious connected with it?

Chennick—Why, the boy that had the pistol knew that it was loaded.—N. Y. World.

Establishing a Theory.

"Do you think," said the intellectual young woman, "that there is any truth in the theory that big croaters are better natured than small ones?"

"Yes," answered the young man, "I do. Look at the difference between the Jersey mosquito and the Jersey cow."—Life.

A Hint.

Mrs. Catchings (weeping)—Didn't you hear about it? Mary has run off with that young Gillington. It's awful, awful!

Mrs. Gaudiers (a social rival)—Well, I should say so. Have his parents offered a reward for him yet?—Puck.

HOW IT LOOKED TO HIM.

Wife—My first husband was a great fellow to get other people into serapes. Husband—He must have had me in mind when he died.—Truth.

At a Resort.

First Little Girl—I heard that your papa is a songster. Is that so?

Second Little Girl (who stutters)—Why, ye-yes.

First Little Girl—Oh, you needn't be afraid to speak up. I won't tell.—Good News.

The Masses of Progress.

Stranger—I hear that the long feud between the Willinghames and the Clayridges has at last been amicably settled forever.

Native—Yes, sah! What was the use in keeping it up when both families, sah, bought complete outfits of bullet-proof clothing?—Puck.

A Sensible View.

"How did you feel about the income tax?"

"I am in favor of having a law passed giving every man an income large enough to be taxed."—Life.

THURSDAY, NOV. 1, 1894.

REPUBLICAN NOMINATION.

FOR CONGRESS:

GEORGE L. WELLINGTON,
OF ALLEGANY COUNTY.

Republican Meetings.

Prominent Republican speakers will address the people of District No. 8 at Sunnyside, Saturday night Nov. 3, at 7:30 o'clock; Gaer's, Monday, Nov. 5, at 7:30 o'clock p.m., on the issues of the day.

Wool refuses to go up to help the free trade prevaricators. Wool is a stubborn thing.

A vote for Mr. Wellington is a vote for American Protection and not English Free Trade.

For unlimited lying ability regarding the advance in the price of wool, we commend the *Mountain Democrat*.

If EVERY Republican in the Sixth Congressional District does his duty the Republican majority will have all the ear-marks of a landslide.

If THE people want England to control our markets, and drive them from an honest livelihood they should vote for Mr. Williams. He is in favor of England and not America.

Yes, Mr. *Democrat*, the Democratic administration has saved nearly \$50,000,000, but how?

By reducing the pensions of the old soldiers and otherwise robbing and withholding from the people what is justly due them.

In 1890 William McKinley was burned in effigy in the English manufacturing city of Sheffield; but in 1894 William L. Wilson was winned and dined in London because he is the author of a Free Trade tariff bill. These are significant facts.

A NUMBER of our citizens have embraced the opportunity of giving their opinion on the school bond question, through the columns of THE REPUBLICAN. All of the gentlemen favoring the issuance of bonds are well-to-do citizens and heavy tax-payers.

Will some well-informed Democrat advise us whether Mr. Ferdinand Williams represents the "party perdy" Gorman brand of tariff reform, or the industry wrecking populistic and anarchistic Cleveland-Wilson brand? Please don't evade the question by putting him on the Chicago platform. We want specific information.—Montgomery Press.

Hox, J. B. FORAKER, ex-Governor of Ohio, is billed to speak at Kingwood, W. Va., to-morrow.

This town is the county-seat of Preston county, the banner Republican county of William London Wilson's district.

Mr. Wilson would make a better member of the English House of Lords than of the American Congress, for the reason that he has the interests of the English people, and not the American workmen at heart.

THE *Democrat* wants to know if THE REPUBLICAN won't contribute part of its annual levy to the maple sugar producers of Garrett county in order to help them out of the hole they were put into by the Wilson bill. This REPUBLICAN always was generous and it is willing to contribute.

THE REPUBLICAN, in the interest of the tax-payers of Garrett county, submitted a proposition to print the ballots for \$300, and if we mistake not the exorbitant bill which was put in last spring for doing that work was cut down by the County Commissioners \$312. We believe this saving was effected by our offer to do the work at the figure we have named. In this way we have contributed and we propose to continue our contributions by saving the people money whenever we find the opposition press overcharging them.

THE REPUBLICAN stands not only for a bounty on maple sugar, but for a tariff on wool, a tariff on lumber, a tariff on coal, protection to the farmer, the mechanic, the laborer, upon his products, and for America.

We are interested in a bounty on maple sugar in Garrett county. We want to see the farmers of Garrett county prosperous and if the reception of two cents per pound upon their sugar product will add to their prosperity, and which they know it does, we want to raise our voice against the robbery which the nefarious Wilson bill has practiced upon them.

We have thus stated our position upon this question and all others which effect our people in contradistinction to the Free Trade policy advocated by the puerile *Democrat*. Of course we know that the people of this county do not pay any attention to its silly yappings, because they know better and we must bear with it because we suppose it is one of the natural evils which are found in all well-ordered communities.

THE issues are made up. The contest will soon be brought to a close. By the time this reaches the people they will have decided where to cast their suffrages. They will have determined whether the policy of this country shall be the American system of Protection or the English-Democratic system of Free Trade. It is useless to spend time in argument. The people know which system is for their interests. Any man who does not protect his own interests at the ballot box where he has the opportunity does not deserve the blessings of free government. We know what the verdict of the people of Garrett county will be. They will declare by their ballots that Protection is their choice and that that system advocated, upheld and championed by George L. Wellington is their desire. Garrett county will give the largest Republican majority in her history.

We have fought this campaign through in a clean, straightforward manner. We have endeavored to enlighten the people upon the issues involved. We have refrained from any allusions to the opposition candidate which would be painful to the most ardent of his supporters. We have endeavored to lead the thoughts of our people into those channels where they would see and feel what was for their best interests. We have nothing to regret, and now as victory is assured we can lay down the weapons of strife and go to work in the interests of our people in the development of building the prosperity of our

county, State and Nation which the results of the impending struggle will bring to them. Republicans of Garrett county, work until the polls close on the night of the election. You have everything to gain by the effort you put forth. Defeat would mean a continuance of hard times, non-employment of labor, low wages and scant living. Victory means the opposite. Victory is not only for you and her fruits are not to be tasted alone by you but by your Democratic neighbor as well.

In these last days of the campaign devote your energies to enlightening them upon these vital questions which affect us all. Work, and victory is ours. Work, and George L. Wellington is triumphantly elected.

The Fall in Wool Prices.

Messrs. D. Loewen & Co., of St. Louis, write to the *Globe-Democrat* of that city to say that they see in a Democratic newspaper "that some man in West Virginia sold some wool at 21 cents, for which he was offered 15 cents six months ago; and also, that other parties are very active in gathering up wools and holding them for a further rise of 6 cents to 8 cents a pound."

The comment of Messrs. Loewen & Co. on this statement is that "whoever wrote it either knew nothing of what he was talking about or he deliberately falsified for political purposes." These dealers offer to sell anybody 1,000,000 pounds of wool at 2 cents a pound less than it was worth six months ago, and the buyer may take any kind of wool he wants.

Wool has dropped everywhere except in the political departments of Democratic newspapers and in Democratic campaign literature generally. It has dropped in the market reports of the Democratic newspapers, but this makes no impression on their political departments. It makes an impression on the farmer, who by this time has discovered that there is a free trade conspiracy to trick him into supporting the party of free trade.

The farmer cannot be fooled on this question. If he has wool to sell all he has to do is to offer it in the market, and he knows very soon what the market price is. If he has already sold his wool he can easily learn what his neighbors are getting for theirs. No newspaper, Democratic or Republican, can fix the price of wool. That is done between the buyer and the seller, and neither party to the transaction can be deceived by any newspaper. This is what makes so absurd the Democratic effort to deceive.

It may be that wool will bring a better price before the end of this year or before the end of next year or at some other time. The price depends on a variety of conditions. The fact of interest to-day is that since the passage of the Wilson-Gorman tariff bill wool has fallen in price until it has reached the lowest point of which there is any record. Democratic tariff legislation has done it.

A Doanoranz.

The *Democrat* still sticks to the theory that wool is advancing in price and asks us to quote the price of wool under the "reign of the McKinley bill," which we are happy to do.

Under the Wilson-Gorman-Bruce bill the selling price of wool has been and remains lower than it ever was before. We have no doubt the *Democrat* has great confidence in the Philadelphia *Record*.

The Philadelphia *Inquirer* has taken the trouble to consult the *Record's* files for its wool quotations covering the period from January, 1894, to October 19, 1894. This record from the Democratic *Record* is interesting and may be the means of injecting something into the brain of the *Democrat* that will cause it to turn from its course and publish the truth for once anyway. Quotations from Philadelphia *Record*, January, 1894:

Ohio, fine delaine.....24 1/2
Michigan, fine delaine.....24 1/2
XX Ohio.....24 1/2
XX and ab.....24 1/2
New York, Michigan.....24 1/2

The above quotations were printed when the McKinley law was effective.

Now, dear *Democrat*, look at the

following quotations published during the month of August when the country was threatened with free wool under the working of the mongrel bill. Quotations from Philadelphia *Record*, August, 1894:

Ohio, fine delaine.....24 1/2
Michigan, fine delaine.....24 1/2
XX Ohio.....24 1/2
XX and ab.....24 1/2
New York, Michigan.....24 1/2

The following quotations were a few days ago and only six days before the last issue of the *Democrat*. Quotations from Philadelphia *Record*, October 19, 1894:

Ohio, fine delaine.....24 1/2
Michigan, fine delaine.....24 1/2
XX Ohio.....24 1/2
XX and ab.....24 1/2
New York, Michigan.....24 1/2

It appears from the above that Ohio XX and above—the standard wool of this region—was quoted in Philadelphia January, 1894, at 23 cents a pound. It appears further that in August last the same wool was quoted in the same market at 19 to 20 cents per pound.

Finally it appears that on October 19th, the quotations had fallen to 18 cents, 5 cents a pound less than the same Democratic *Record* quoted for the same wool in the same market less than one year ago. The fact is a sale of this wool was made in Philadelphia last week at 16 1/2 cents a pound.

It is idle for the *Democrat* to try to make it appear that wool has advanced in this country since the passage of the free wool bill. Notwithstanding the fact that free wool was discounted by the trade, wool is lower to-day than when the bill passed, and in making this assertion we are borne out by everyone who has had any wool to sell since the passage of the Gorman bill.

The *Democrat* cannot change the markets, however it may juggle the quotations.

Moral: Vote for George L. Wellington.

The Story of Tariff Reform.

The Democratic Congressional Committee is said to have printed 1,000,000 copies of cartoons which draw the deadly parallel on the old and new Tariffs. We also draw a deadly parallel:

WHAT THEY SAY.	THE FACTS AS FOUND.
"Labor rises in the morning under the Democratic Tariff with a reduction of taxes on his flannel shirt of 70 1/2 per cent; his trousers 75 1/2 per cent, and his coat 74 1/2 per cent. He washes his face and hands in a bucket reduced 28 1/2 per cent, and dries them with a cotton towel reduced 35 per cent. He puts some coal reduced 46 1/2 per cent. In a stove reduced 35 1/2 per cent; eats a breakfast from a plate reduced 45 1/2 per cent, and with a knife and fork reduced 53 per cent, and seasons his food with free salt. Then he smokes his clay pipe reduced 80 per cent., and reads the news under Tariff reform lumber, binding twine, grain bags, cotton ties, cotton bagging, copper, salt, wool and agricultural implements are free. He then draws on his overcoat reduced 75 per cent, and puts on his hat reduced 71 1/2 to 75 per cent.	Labor rises in the morning with a shirt on his back, with "Cleveland badge" trousers to cover his legs, and the coat on the Englishman on the other side. The bottom has rusted out of his tin pan during the months of enforced idleness. He drinks his water from a gourd and dries his face and hands in the cool currents of the street corner. He shivers around an untaxed hearth, and sends his children to glean fuel along the streets or gets free coal from his neighbor's pile. He eats his frugal breakfast from a Welsh tin plate, with his fork, fork and his broken pocket knife. Yes, he smokes a clay pipe and hears in solemn soliloquies that "lumber is free" and the mills are idle—that cotton is less than five cents a pound, yet he can't buy a nickel. That "people's pipe is free" and he can't earn an honest cent. That "wood is free" and he has a "wooded" tree and that England now controls the wool market of the world. As for his tin plate, he asks his farmer friend what that means, and the answer comes that it is the costage with which the Cleveland Administration has loaded American labor to the states. He draws on the tattered remnant of an overcoat left from Republican days, and goes out to kick himself and "curse his day."
His wife—God pity her!—wears a woollen dress well kept from "better days," and sighs in vain for enough to buy a fresh new calico at four cents a yard. With "hats reduced 70 per cent," she is bare-headed; with "stockings reduced 74 per cent," she patches a hole in her children's bare limbs; with "shoes reduced 20 per cent," she has a whole family bare-footed.	His wife wears a woollen dress reduced 75 per cent., a hat reduced 70 per cent., woollen stockings reduced 71 1/2 per cent., and shoes reduced 20 per cent."

A Campaign Song.

The following song was composed by a young Republican voter of Garrett county, who handed it to us for publication. The tune is the same as that of "After the Ball."

I live in Garrett in district number three,
I've composed a song if you will print it free,
I will tell hard laboring men in my little song
If they want protection vote for Wellington.
Well do you remember these past two years,
Times were never harder—many have shot
to us.

Now is the time to improve them, now is the time, begin,
Vote for Geo. L. Wellington, put down Ferdinand.

CHORUS.

After the election is over, after the ballots are cast,
After the votes are counted victory will come at last.

Hurrah for George L. Wellington for he's been brave and true
And after he's elected he just knows what to do.

Well we remember in eighteen ninety-two
When they had the power let's see what they did do.

There they spent those two past years and their time have killed
And the only plan they had was the river bill.

There, there you see now there it's plain again
Everything that's wrong there they put it on our men.

But we can't believe this, that's no fault of ours,
Because we know our men now haven't got the power.

As for Mr. Williams, him I cannot aid
He is on the wrong side—they always want Free Trade.

And you miners I'll tell you if you listen to
What would you do if they send our coal to free.

You would have to lay down shovel and your pick
Then you would find out that you were served a trick.

That's why I warn you and the reason why
This root pig, big pig, root hog or die.

I will tell you men now what do you think of that
Who stopped our bounty? It was a Democrat.

I will tell you now and that's what I will
Because they've scared the Treasury and could not pay their bills.

Now my little song I will close again
And I think, George L. you will be the man.

Now's the time, now's the time, now's the time
Vote for George L. Wellington put down Ferdinand.

After Election, the A. X.

Washington Special to Phila. Press.

Judge Lochren, Commissioner of Pensions, made a most emphatic denial of the charges that the work of the Pension Bureau was being manipulated for political purposes. Secretary McKee, of the Republican Congressional Campaign Committee, when his attention was called to Judge Lochren's denial, made the following statement without reservation:

"It cannot be denied that there were 50,000 notices prepared in Secretary Hoke Smith's department to be sent to old soldiers drawing pensions, asking them to show cause why their pensions should not be dropped or reduced. Of this number 35,000 were to have had their pensions dropped and 15,000 were to have had their pensions reduced. These notices were ready to be sent to the old soldiers, but have been withheld until after the election. As soon as the votes are counted on November 6, the pensions of veterans will begin to drop, notwithstanding Judge Lochren's denial that there is any effort to placate the old soldier's vote."

It is understood that when the Democratic Campaign Committee heard of the notices the managers were dumfounded and demanded of Secretary Smith that they be withheld. Smith consented, as he realized what damage would be done.

Communicated.

To the Editor of The Republican.

Before another issue of THE REPUBLICAN the great battle of 1894 shall have been fought and the question of momentous importance—the question which means so much to the American people, will be decided for two more years.

There has been one thing which we cannot mistake; we have had an "object lesson" and have had a practical experience of what Democracy means. Shall we heed the lesson or let partisan spirit and party prejudice control us or shall we rise above party and vote for country and the principle of Protection to home industry?

We have in this Congressional District two candidates—the one, Mr. Williams, representing the principle of a party which has always been opposed to the best interests of the American workmen; the other, Mr. Wellington, carrying the banner of that party which has always stood for all that was best for the upbuilding and prosperity of our common country.

In former campaigns our friends the enemy have told us that they were not in favor of Free Trade, but in this campaign the Democracy has a candidate whose battle cry is "down with Protection." We have already seen and felt the effects of that policy which during Cleveland's present administration has cost us more than the civil war.

Farmers of Garrett county, you have been more fortunate than some of the people of our land, but Democracy has brought down the price of your wool ten cents a pound and when politicians tell you that the price of wool is advancing they lie and they know it. The lambs that sold readily two years ago for \$4 a head are to-day a drug

on the market at \$1.75 to \$1.85 per head. Has your clothing become any cheaper or better?

Your potatoes, which under the McKinley law, were protected by a duty of 25 cents per bushel, are now admitted free and although the Democratic Agricultural Department report a crop far below the average yet they are sold at 50 cents per bushel; and so it is with every product of the farm. Will you vote for a continuation of the policy of Free Trade?

Lumbermen of Garrett, many of you voted for a change two years ago; voted for that prosperity the Democrats promised, but which did not come. The Canadian lumberman is jubilant. But what has become of our market? Your employer cannot sell his lumber and in many cases the mills have stopped or are running on short time. How much more are you getting for your labor since the Democratic blizzard struck the business of the country, and where are the good times that were promised? Will you vote again for that party that took your markets away from you and gave them to the Canadian lumbermen? Will you again be misled by the promises of the Democratic orators who have failed to redeem one single pledge they made to the people two years ago?

Miners of Garrett, as you look out into the future and think of Democratic success and free coal it is not very bright nor encouraging, is it? Yet many of you voted for McKee who voted for free coal. You sent petitions down to the Democratic Congress asking that the duty on coal might be retained. Were your prayers heeded? No! True, the tariff was only reduced to 40 cents per ton, but the threat of free coal is freely made and no doubt will be carried out if we are so unfortunate to endorse the action of the last session of Congress at the polls. You now have a chance to make your petitions heard and felt. Will you do it? Then vote for Wellington.

Old soldiers, you who fought the battles in the dark days of '61, how is it with you? Many of you were deceived two years ago by the Democratic cry that they were just as friendly to you as the Republicans. But how do you stand to-day? A great many of you have had a bitter experience of the great love of the Democracy for you. Do you endorse the policy of Hoke Smith? Do you favor that unjust policy which has brought so much trouble, so much want to you and your brave comrades? Will you, can you endorse that infamous policy by your vote on the 6th of November? As a son of one of the "boys" I do not believe you will. I do not think that you can any longer vote for that party which declares in favor of liberal pensions and then reduces the appropriations for pensions more than twenty-nine millions of dollars in one year. Can you vote in favor of the party that made you so many and such fair promises and then dismissed over four times as many of your comrades from the Interior Department as were appointed? Can you endorse by your vote the speech made by Democratic Congressman Meredith of Virginia, in Fredericksburg in which he said: "There are now on the pension rolls and receiving pay 25,000 women, most of whom are without character." Show by your vote that although your comrades have gone to join the silent majority yet you will still defend their widows.

Men of Garrett, let us think seriously of the duty we owe to God and our country and on the 6th of November vote in favor of peace, progress and prosperity, and when the smoke of battle shall have rolled away and it is found that the Republican party has been returned to power we will all feel the better for having done our part.

HOOPER.

Conversation We Heard.

"What will you do for the school lands?" "I will vote against them." "Why?" "Because I don't believe in going in debt." "But sometimes it is a good thing to make a little debt, especially where you have value received." "They spent too much at Oakland." "Well, Oakland should have a good house. They have four hundred children to send to school and that district pays about one-fourth of the taxes of the county. Oakland is a growing town. The people work and build up and we tax them like Boston for their improvements." "Let Oakland wait." "Yes, but they have waited and since the county has been formed she has furnished the means to build about fifteen school houses in the districts." "Well, I don't care; I shall vote against the bonds." "You have children to send to school?" "Yes." "How much are you assessed?" "One hundred dollars." "Then you will have to pay two cents and one-half if the bond bill passes and have about 3 months more school this year."

OUR WASHINGTON LETTER

(From Our Regular Correspondent.)
WASHINGTON, Oct. 29, 1894.

Obstinacy and animosity are apparently stronger traits in the character of Mr. Cleveland than loyalty to the party to which he owes so much. Up to this time he has declined to indicate by word or deed that he wishes to see his personal enemy and party associate, Senator Hill, elected Governor of New York. On the contrary, his acts, if not his words, indicate that he wishes to see a few Democrats who profess to believe that he will at some time during the present week, the last of the campaign, take occasion to say something which can be construed into a wish for the success of Hill, but, in view of what is known, it is difficult to see upon what such a belief can be based. Mr. Cleveland neglected to register although he had ample opportunity to have done so, as well as the legal right, which plainly indicates that he does not wish to vote for Hill. He sold himself from seeing Senator Faulkner, chairman of the Democratic campaign committee, when he called at the White House to discuss the New York campaign, on the theory that the Cabinet was at the time in session. Had he and the administration really wished the success of their party in New York there would have been nothing improper or unprecedented in inviting Senator Faulkner to discuss the matter with the Cabinet as well as the President. Senator Faulkner apparently takes this view of the matter, as he has not repeated his visit.

But still more significant than the above is the announcement that Secretary Carlisle will not go to New York to make a speech for Hill. There is little doubt that Mr. Cleveland ordered Secretary Carlisle not to help Hill, as it is well known that Mr. Carlisle was before Mr. Cleveland's return to Washington inclined to accept the invitation to make several speeches in New York, and he intimated, if he did not say in so many words, that he would make several speeches in New York if it were agreeable to Mr. Cleveland. It is therefore plain that it is not agreeable.

All this is naturally pleasing to the managers of the Republican campaign. They have never believed that the help of Mr. Cleveland could elect Hill, but they are confident that his refusal to do so will aid Mr. Morton's majority and to the number of Republicans elected to the House. The indications now are that more than two-thirds of New York's delegation in the next House will be Republicans. Mr. Cleveland's position will also help the Republicans in other States. It may be, as has long ago been charged by the Democrats, that Mr. Cleveland has become so disgusted with the legislation of Democratic Congress that he wishes the Republicans to control the House; but whether he wishes it or not Republican success is to-day regarded in Washington to be as much of a certainty as any political event can possibly be before the votes are cast and counted.

There is much abuse being heaped upon Mr. Cleveland by Democrats for the position he has taken, and it is not all privately expressed, either. Representative Meredith, of Va., who is a candidate for re-election, made a speech before the Virginia Democratic Association, an organization largely composed of office-holders, which was uproariously applauded, particularly when he used the following language: "It is Grover Cleveland's bounden duty to endorse Hill. The fact that he is President increases rather than lessens his responsibility. If he is the Democrat he ought to be he can find no excuse for faltering or hanging back from the support of the straight ticket in his own State, upon which he has been so many times elected to office. Those who believe that these remarks constitute a reason may make the most of it. The prediction is heard on all sides, that even if Mr. Cleveland should now make public an eleventh-hour endorsement of Hill the breach between the White House and the Democrats in Congress will be more marked at the coming session than ever.

All of the excellent work done by the late Secretary Rusk and his colleagues of the Harrison administration to make the shipment of dressed beef and live stock to Germany profitable to Americans has been undone, thanks to Democratic blundering. The German Ambassador has given the State Department formal notice of the issuance of a decree by his Government prohibiting the importation of dressed beef and cattle from the United States. The Ambassador gives as the reason of the action of his Government that Texas fever has been carried to Germany by American cattle, but it is no secret among officials and members of the diplomatic corps that the action of Ger-

many is the first step towards retaliation upon the United States, on account of the differential duty of one-eighth of one cent a pound imposed upon German refined sugar by the sugar schedule of the tariff law. This Democratic favor to the sugar trust, for such the differential duty on refined sugar is admitted by all to be, is likely to prove doubly costly to the people of the United States, as there is reason for the belief that Germany will shortly adopt additional retaliatory measures. The only way to stop the troubles caused by Democratic legislation is to elect Republicans to Congress.

Mountain Lake Park.
F. M. Cline has moved into one of Mrs. Fallon's cottages and Ed. Hamilton into the other. Friend Dennett was a visitor at the Park last week. Levi Hewit has moved into the hotel cottage for the winter. Mr. Dennett expects in the early spring to enlarge his hotel building.

Six new buildings under contract with more to follow. W. R. Johnson has the contract to erect the double cottage for Miss Fleming and Mrs. Raymond, of Fairmont, W. Va. Supt. Radisill, with Masters Wesley and Arthur, spent the Sabbath at Altoona.

The Assembly House has a number of boarders. Mrs. Sawyer is planning to greatly improve this popular hotel. Engineer McCabe, of Pittsburgh, has been a guest at Fallon cottage, as has also Mr. L. T. Yoder, of Pittsburgh.

Things at the Park are as brisk as one could wish. The Mountain Lake Park Association is spending thousands of dollars in improvements. The corporation is also making some attractive improvements. The contract for the iron bridge across the Little Young has been given to the Canton Bridge Co., of Ohio. It is a pretty design. It will have a width of 20 feet. Good solid rock abutments, laid in cement, will support the bridge. The improvement will cost about \$550.

A number of crushed rock side walks have been put down—an improvement over plank walks. Several new avenues have been opened up. One of the most picturesque views of the lake and surrounding country, to be found on this mountain top, is to be seen from the corner of Q street and Wheeling avenue.

The engineers have settled the practicability of water works for the Park. The reservoir has been located on O street between Pittsburgh and Washington avenues. The test shows that 300,000 gallons of water are flowing into the lake every day and that Crystal Spring has a capacity of 20,000 gallons. Abundance of water has been found for all purposes. This guarantees sewerage, etc., so essential to a growing resort like Mountain Lake Park.

The Association is erecting the first of several ice houses on the east shore of the lake. The foundation will be finished this week. The building, 50x80x20 feet, will require nearly 50,000 feet of lumber. 45,000 shingles will be used in covering the building. It will be divided into two parts, each holding 1000 tons of ice.

The soil being taken from the lake is used in forming two islands. The new dam will be 20 feet wide on the top, making an excellent drive way, which will be extended along the ridge to Crystal Springs.

The work is being pushed forward to completion as rapidly as the men can do it. Supt. Radisill is employing all the men he can get. The Association is having the glade by the lake plowed and ditched, and next spring a crop will be put in and as soon as the ground will permit it will be seeded down in lawn grasses. This is the plan formed by the association in the years past being carried forward to completion. Its success has attracted capitalists and speculators to the country. New summer resorts are springing up all around us, proving true the old adage: "Nothing insures success like success." The character of the men at the head of the Park guarantees the future success of the place. While the new resorts are growing and becoming established on a successful basis, the Park will grow the more rapidly and its property, like gold, have a standard market value. The wise restrictions, the liberal charter granted by the legislature, the international, undenominational camp meeting, the National W. C. T. U., with Francis Willard in charge, the W. F. M. S. convention, the Mountain Chautauqua, with a national reputation, the national local preachers' association of the U. S., all help to make Mountain Lake Park the ideal Christian Health and Summer resort. New buildings are springing up

all over the Park. Cottages are being enlarged and improved; the capacity of boarding houses increased. Already a number of our best houses rented for the season of 1895. The indications are that the demand will be far beyond the supply. May the time soon come when that portion of the Alleghenies in our county shall be filled with summer visitors, and our county be one great garden, supplying vegetables and fruits to feed the thousands, and when hundreds of these summer visitors shall be numbered among the subscribers of the REPUBLICAN.

Swanton.
The Democratic meeting here on Saturday night was addressed by Robt. H. Gordon, Esq., of Cumberland, and Mr. C. M. Miller, of Swanton. The meeting was fairly attended on account of the members of the Jr. O. U. A. M. waiting to attend the session of their order. There was a great lack of enthusiasm and interest in Democratic Free Trade principles. Mr. Wm. Miller, of Accident, was in attendance at the Democratic meeting Saturday night. A young son of Mr. Joseph Glass was accidentally cut in the arm by his brother, who was chopping wood, inflicting a very serious wound.

L. H. Friend, Esq., has had the hall above his store plastered. Mr. C. T. West has given the contract to plaster his hall to Mr. Jos. Lashour.

Rev. Mr. Loyd, pastor of the M. E. church, will preach in Swanton next Sunday at three o'clock p. m. Thos. Bartlett, of Bloomington, was a Swanton visitor Monday.

The Republican meeting on Monday was the largest and most enthusiastic meeting of Republicans ever held in the district. Thos. R. McKelvie, Esq., presided; John Howell, secretary; Elijah McKelvie, vice president; Eljah McKelvie, secretary. The meeting was addressed by our next Congressman, Hon. G. L. Wellington, and Hon. A. F. George. The speakers were frequently interrupted by applause. Mr. Wellington made a good impression and No. 1 District will do her part on the 6th of November. The meeting was well attended by the ladies, who seemed much interested.

A gentleman from this place who attended the Stanton sale near Grantsville said that there were sheep sold at that sale as low as 80 cents per head, the price of the pelts two years ago.

It had been reported here that Mr. Dan Beckman was paying 25c. a pound for wool. A prominent Republican of this District wrote to a friend of his in Elk Garden to go and see Beckman and see what he would pay for from 2,000 to 3,000 pounds of good unwashed wool. The answer came back: "Beckman does not want wool at any price."

Another Democratic lie nailed. The Democrat should tell the people of our county where they can get the advanced price for their wool. It can't do it for the price has not advanced.

NOTICE TO TEACHERS.
OFFICE OF THE GARRETT COUNTY SCHOOL COMMISSIONERS. OAKLAND, MD., Oct. 31, 1894.

All teachers in the public schools of Garrett county entitled to vote at the coming election will be allowed for the day, all others will be expected to teach on said day. By order of the Board.

W. H. HARRISON, Sec'y.

In Poor Health
means so much more than you imagine—serious and fatal diseases result from trifling ailments neglected. Don't play with Nature's greatest gift—health.

Brown's Iron Bitters

CHAS. J. BONAPARTE, 216 St. Paul St., Baltimore, Md.

ELECTION NOTICE.
Notice is hereby given to the Judges of Election and to the voters of Garrett county that the annual election of the Board of Commissioners of Garrett county, to be held at the usual places of holding elections, on

TUESDAY, NOVEMBER 6, 1894,
for the purpose of electing—
A Congressman from the 6th Congressional District of Maryland.

And the qualified voters of said county will also be called upon to determine by ballot whether the sum of \$20,000,000 shall be loaned to the county by the County Commissioners of said county for the purpose of building school houses therein.

The polls of said Election will be open in each and every district in said county, at the usual places of holding the polls, at 9 o'clock a. m., and will be closed at 6 o'clock p. m., when the ballots shall be publicly counted.

All persons will take notice, that by Chap. 190, Acts of 1883, no spirituous or fermented liquors, sale or beer, or any intoxicating drinks, can be sold or given away on election day. CHARLES WEHMAN, Sheriff.

MILLINERY!
I desire to inform the people of Oakland and vicinity that I am now prepared to furnish them with every reasonable price. Millinery Goods, Flowers, Ribbons, Shawl and Fancy Goods, Notions, Etc.

Store on Oak Street at east end of Davis bridge. Give me a call, examine my goods and be convinced that my stock is complete in every particular. 113m MARIE CUNNINGHAM.

PROFESSIONAL CARDS.

FRED A. THAYER, ATTORNEY AT LAW.
OAKLAND, MD.
I have resumed the practice of law, office in the fully building opposite the Post Office where I will be pleased to see all my former clients and others who choose to consult with me. Will be located in all important cases by Benjamin A. Richmond of the Cumberland bar.

JOHN T. MITCHELL, ATTORNEY AT LAW.
Special attention given to real estate, CONVEYANCING AND INVESTIGATION OF TITLES. CLAIMS COLLECTED. LOANS NEGOTIATED. 425 SPRINGVIEW. Office in Boyer Building, Oakland, Md. 4-17

EDWARD H. SINNELL, ATTORNEY AT LAW.
OAKLAND, MARYLAND.
Will practice in the Courts of Garrett and Allegany counties, the Court of Appeals of Maryland, and the adjoining counties of West Virginia. 48-106

CLIMOR S. HAMIL, ATTORNEY AT LAW.
OFFICE ON ALDER STREET.
Particular attention given to conveyancing, investigation of land titles and collection of claims. Louis resident. 4-17

DR. W. OLIVER BLANK, DR. W. S. BERKLEY.
Drs. McLane & Berkeley, PHYSICIANS AND SURGEONS, FROSTBURG, MD.

Special attention to Diseases of Eye, Ear, Nose and Throat. 425 SPRINGVIEW. See date of visit to Oakland in local columns. 4-29

H. W. MCCOMAS, M. D., PHYSICIAN AND SURGEON.
OAKLAND, MD.

Office in Mages building, Residence on Main Street, opposite Commercial Hotel. Office hours, 8 to 10 a. m., 2 to 4 p. m., 8 to 9 p. m., from 10 a. m. to 12 m. on Oct. 30, 1894, to 2:30 p. m.

C. HINCHAGH, M. D., PHYSICIAN AND SURGEON.
OAKLAND, MD.

Office in Old Postoffice building, Alder Street. Residence at Central Hotel.

DR. D. O. MCKALEY, Resident Dentist, Salisbury, Pa.
Will visit regularly through Garrett county, Md., and offer his services to those wishing dental treatment. Charges moderate. Office address, Elk Lick, Pa. 4-22-94

E. J. FRANTZ, LICENSED AUCTIONEER.
Residence and P. O. Address, SELBYSPORT, MD.

THE REPUBLICAN.

VOLUME 18.

OAKLAND, MD., THURSDAY, NOVEMBER 8, 1894

NUMBER 35.

SOLID OLD GARRETT.

She Gives Wellington a Majority of 581.

ALLEGANY GOES ONE BETTER

And Gives Him the Unprecedented Majority of 1531.

WASHINGTON AND FREDERICK IN LINE

A Big Slump in "Old Montgomery, Sah."

WELLINGTON ELECTED BY ABOUT 3000

That the result of the election in Garrett county and the Sixth Congressional District of Maryland was a surprise to both Democrats and Republicans goes without saying. The defeat of Mr. Williams in this district has been overwhelming and in Maryland we have certainly elected three Congressmen and probably the total will be five.

Official Election Returns.

The following table shows the vote as cast in Garrett county on Tuesday:

Districts.	Rep.	Dem.	Pro.	Total
1. Scanton	110	100	10	220
2. Solbyport	110	100	10	220
3. Grantsville	110	100	10	220
4. Bloomington	110	100	10	220
5. Accident	110	100	10	220
6. Sage Hill	110	100	10	220
7. Oakland	110	100	10	220
8. Lyonsville	110	100	10	220
9. Johnson	110	100	10	220
10. Deer Park	110	100	10	220
11. Elbow	110	100	10	220
12. Billings	110	100	10	220
Totals	1320	1200	120	2640

Krause pop. 170
Sloan's majority, 581.
Majority against issue of Bonds, 959.
Wellington's majority in the District, 2,029.

OUR NEXT CONGRESSMAN.

How the News was received at Cumberland.
Yesterday morning dawned fair and bright, and the bracing air acted as an elixir to those who had taken a "wee drop too much" the night before. Long before the polling places were opened an eager crowd of workmen, with their pails stood around, reading the legalized circulars on the walls. They were of course too early to vote, but satisfied themselves how to vote when the polls were opened at the advertised hour there was a great crush. In the first hour or two the judges, clerks and ballot clerks were rather despondent as they thought a small vote would be polled. After four

hours' work they were more than pleased, as they then predicted that a full registration vote would turn out. In not one voting district in this city were they disappointed, as in every district a most magnificent vote was polled.

Everything passed off quietly, and in perfect legal form and although the day which was so auspiciously ushered in turned out to be cold, raw and moist, with here and there little spits of snow, on the whole it was a very clever Republican day. There was no clashing between the two great parties, and the followers of the other factions remained very quiet.

Mr. Wellington was the same calm, confident and intelligent candidate when the polls closed that he

was on the Academy of Music stage last Friday night. He had the same magnetic smile—the same sincere manner, and the same frank greetings for all who met him.

As the shades of night drew on, the streets were crowded with people anxious to hear the returns. The news had made preparations for a big crowd but did not anticipate its density until the returns began to pour in. The street in front of the building was black with people, and at one time the jam was so great that the police were obliged to clear the street for the passage of vehicles.

The Stereopticon used by Mr. Herry Lane, on which the returns from all parts of the country were bulletined, attracted a great crowd, and his beautiful pictures between returns were loudly applauded. It was remarked by scores of people the presence of so many young ladies in the crowd.

There were fully one hundred of them grouped on the opposite side of the street, and as soon as it was known that Wellington was elected beyond the peradventure of a doubt they drew small horns out of their coat pockets and blew them as lustily as any of the long winded men on the streets. Many of the young

girls have known Mr. Wellington from their early childhood, and have always had the highest regard for him. These young ladies came up Baltimore street in a body, and while not all of them knew Mr. Wellington personally, all of them are Republicans, and are admirers of the principles he represents.

When it was definitely known that Mr. Wellington was elected, pandemonium reigned supreme. It seemed that the pent up feelings of six months were given vent, in one great, grand and noisy sigh of relief. The crowd of people which surged around the News office was so closely packed that several old gentlemen had to be rescued and almost dragged into the office. Mr. Wellington was on hand and his arm was nearly shaken off by his friends and admirers.

At about 11 o'clock Mr. Wellington was escorted to his home on north Centre street by the Cumberland Concert Band, the Queen City Cornet and Bagle Corps, and fully 1,500 persons. When the procession reached the residence Mr. Sloan in a few well chosen remarks introduced the victorious nominee. Mr. Wellington did not make a speech but thanked the people for their kindness, and said that as he had just gone through an arduous campaign he knew his friends would not demand a speech, as he was nearly prostrated with fatigue. He was then given three rousing cheers. Mr. Sloan then made a few remarks which were loudly cheered, and the procession then moved down town and disbanded. —Cumberland News.

A REPUBLICAN CYCLONE STRIKES THE COUNTRY.

The People Rise in Their Might and Smite Free Trade a Deadly Blow.

GRANDEST VICTORY FOR PROTECTION IN YEARS.

Unprecedented Republican Majorities Throughout the Country.

MARYLAND REPUBLICAN ON THE POPULAR VOTE.

Hon. Levi P. Morton Elected Governor of New York and Tammany Downed.

WILSON DEFEATED BY OVER 2500 IN WEST VIRGINIA.

Ohio Goes Republican by 135,000; Pennsylvania by 235,000. Republicans Elect the Governor of Tennessee—A Protection Majority in the House and the Senate Will be that Way Also—The Great Victory for Home Industries. The People Administer an Emphatic Rebuke to the Tariff Tinkers and Call a Halt on the Ruinous Policy of the Free Trade Democracy. Hill Meets With His Waterloo.

MARYLAND. BALTIMORE, Nov. 7.—Republicans have won the greatest victory in Maryland's history. They carry the State on total vote, elect three Congressmen, Wellington, Coffin and Baker, and elect Dobler judge and twelve members of the city council. The election of Cowen by one thousand and Rusk by five hundred will be contested by Republicans on charges of fraud. This course was decided by Republican State central committee.

It is certain that three Republican Congressmen have been elected—Baker in the second district, Collin in the fifth and Wellington in the sixth. The Democrats carry the third and fourth districts with Rusk and Cowen, but by very largely reduced pluralities. The first district is still in doubt. The Republicans gained ten city councilmen and will control the first branch.

THE SLUMP IN NEW YORK. NEW YORK, Nov. 7.—The Republicans have carried New York state by estimated pluralities ranging from 130,000 to 150,000. These figures represent the probable plurality of Levi P. Morton, Republican, for governor, over David B. Hill, Democrat, based upon the vote of New York city and Brooklyn complete, and returns from more than one-half of the election districts above the Harlem river. The total vote for the two leading candidates is considerably in excess of that polled for Flower and Fassett for governor in 1891, in addition to which the votes cast this year for Everett P. Wheeler, Independent Democrat, which will exceed 20,000. The tremendous Republican sweep in the city and state, it is estimated, has elected 23 Republican congressmen, a gain of eight over the present representation in congress.

Tammany is defeated. The nominal majority of 60,000 usually polled by that organization in New York city has been obliterated and an opposition non-partisan majority of 40,000 to 45,000 has been

500, as many of the correspondents were very conservative in their estimates. THE RESULT IN INDIANA. INDIANAPOLIS, Nov. 7.—Indications point to an overwhelming Republican triumph in the State. The Republican state committee claims for Owens from 30,000 to 50,000 majority over his opponent, Myers, for secretary of state, thirteen congressmen and both branches of the legislature. Democrats concede 20,000 Republican majority.

THE FIGHT IN MONTANA. HELENA, Mont., Nov. 7.—Returns are very slow. It is believed Hartman (rep.) is elected to congress.

KANSAS GOES REPUBLICAN. WICHITA, Kas., Nov. 7.—Long (Rep.), congressman, elected by 1,000 plurality over Jerry Simpson.

THE VIRGINIA ELECTION. RICHMOND, Va., Nov. 7.—Democratic Chairman J. Taylor Ellison gives out the following: "The returns seem to indicate that we have carried the First and Eighth districts. The news from the

Ninth and Tenth districts is not definite enough to warrant an opinion as to the result of the election in these districts, though we have strong hopes of carrying them both."

NEW JERSEY LEGISLATURE REPUBLICAN.

TRENTON, Nov. 7.—Allan L. McDermott, chairman of the Democratic state committee, in a special says that the Democrats have elected the 11 assemblymen from Hudson by about 2,000 plurality. He says the rest of the State will not be worth hearing from and concedes the legislature to the Republicans.

REPUBLICANS CARRY CALIFORNIA. SAN FRANCISCO, Nov. 7.—The general impression is that Este,

cede the election of Governor Rich (rep.) but will quote no figures as yet. They claim to have elected Mayo (dem.) for lieutenant governor.

ALLIN ELECTED WITHOUT DOUBT.

FARGO, N. D., Nov. 7.—Returns are coming in unusually slow, but so far show Allin (rep.) for governor, running ahead of the ticket. The Republicans gain in Fargo, Grand Forks, Bismarck and all other large towns, while in some country precincts the Populists gain slightly. Allin's election by 5,000 plurality is claimed by the Republican central committee. The Democrats concede it by 1,000.

THE RESULT IN ALABAMA.

MONTGOMERY, Ala., Nov. 7.—The returns from the election in this state indicate the election of all the Democratic nominees, with the possible exception of Denson, in the Seventh, which at present, seems to be in doubt.

GREENHALGE ELECTED.

SPRINGFIELD, Mass., Nov. 7.—The indications are that Massachusetts has given Greenhalge a majority of 45,000, a gain of 10,000 over last year. The probabilities are that 11 out of the 13 congressmen will be elected and that the lower house will easily have a Republican majority. Massachusetts is likely to have a solid Republican delegation in Congress.

EVANS ELECTED IN SOUTH CAROLINA.

COLUMBIA, S. C., Nov. 7.—There is no doubt that Evans (Dem.) is elected governor by a large majority. Democrats will be elected to congress in all districts unless it is in the First, where Elliot, ex-member and Democrat, is running against Murray, present negro congressman from that district.

THE RESULT IN NORTH CAROLINA.

RALEIGH, N. C., Nov. 7.—Pearson (Fusionist) claims to be elected in the Ninth district. The Fifth district indicates that Settle is probably elected. Other districts

are probably Democratic, but news is very meager. The legislature is Democratic by a greatly reduced majority, and the Democratic state judicial ticket is elected by reduced majorities.

THE FIGHT IN IDAHO.

BOISE, Ida., Nov. 7.—Both the Democrats and Republicans claim the governorship. The Democrats concede the rest of the state ticket, but the Populists have claim to the congressman. It is the opinion of the most conservative men that the state has gone Republican on the state ticket, congressman and legislature.

A REPUBLICAN SUCCEEDS BRECKINRIDGE.

LEXINGTON, Ky., Nov. 7.—The returns in the Ashland district up to midnight show that Judge Geo. Denny, jr., is elected over W. C. Owens, Democrat, by from 100 to 300 majority. Owens don't think Denny is the winner. The official count will have to be made before any bets can be paid as the count is close.

REPUBLICANS CARRY DELAWARE.

WILMINGTON, Del., Nov. 7.—Returns indicate that the Republicans have carried the state by 800 majority.

DEMOCRATS GIVE UP MICHIGAN. DETROIT, Nov. 7.—The returns from the state seem to justify the prediction of Republican leaders of upwards of 30,000 plurality for their state ticket. Officers of the Republican state central committee have just stated that their advice thus far received indicate the election of 11 out of 12 congressmen. The Democratic committeemen con-

FARM AND GARDEN.

TROLLEYS AND ROADS.

Why Car Tracks Should Be Kept Off Improved Highways.

For several years past there has been a zealous agitation in favor of the improvement of country roads. As pointed out from time to time in this paper, this agitation, this movement, is now resulting in a practical betterment of the highways in many localities, and a general discussion of ways and means to such ends in almost every enlightened neighborhood in the country.

But the road-improvers and the makers of road laws need to be on their guard, for it has been demonstrated time and again in the neighborhood of large cities that so soon as country roads in populous neighborhoods or between prosperous villages have been graded and paved, the builders of trolley railroads pounce upon them and divert them almost completely from their original purpose for which they were intended. The extension of trolley lines into the country should be encouraged in all proper ways, but the public authorities, the lawmakers and the people should insist that these trolleys should be located in proper places. Such proper places are not upon paved roadbeds, nor yet on the spaces between the pavements and the ditches.

The pavement of a macadamized roadway is meant to drive on; it is injured very seriously by having a horse car track on it, for driving purposes it is ruined by having a trolley track upon it—ruined as completely as though an ordinary railroad track were placed over the pavement. Nor should the spaces between the pavement and the ditches be used for railway tracks for these spaces are admirable driving roads more than half the time, and the rest of the time are needed for drainage purposes in taking the rainfall from the pavement to the ditches. A railway track of any kind would interrupt this drainage, which is of the greatest possible importance as the macadam pavement is, after all, as much in the nature of a roof as anything else. The inventor of this system of road-building maintained that if a road-bed were made dry by drainage, and kept dry by an impervious covering, it would carry any load that could be placed upon it. And the experience of four generations has proved that Macadam was right in his theory. But if we break this roof for a railway track, or if we interrupt the surface flow of water by a railway track on the side, then the whole purpose of the road construction has been defeated.

It is desirable, however, that trolley lines should be located near to the roads, for then they are easily accessible. The natural place for them is on the roadside beyond the ditches. This location involves the expense of grading for the railway roadbed, and hence the builders of trolleys endeavor to secure permission to put their lines on the roadbed, where everything has been prepared in advance. This is as wrong as it can be, for such locations not only ruin the roadway, but make it dangerous to life. There should be no permission should be given to place a railroad on the roadway without referring the question to the popular vote of the township, and requiring that the railroad should then pay a rental of not less than ten per cent. per annum on the first cost of the roadway. Such a provision of the law would compel trolley roads to seek and find other locations for their lines, and would leave the common roads for two uninterrupted uses for which they were intended.

When the railroad came into existence, two generations ago, the effort to secure good common roads in America was abandoned, because it was feared that with the development of the railroad the common road would not be needed. But experience has shown that the greater the travel on the railroads the greater the travel on the common roads, and hence that the latter are really a greater necessity than ever. And we will learn the same lesson from the extension of the trolley system for travel begets travel. How unwise it will be, therefore, just as we are on the eve of securing for ourselves and our children a good system of country highways, to give them over to these private corporations for a use quite foreign to that for which we improved them!—Harper's Weekly.

TOO MUCH ADVICE.

Views of a Washington State Farmer on the Road Question.

I read a good many papers, almost all of which agitate the subject of road making in a general, theoretical sort of way. They advise the government to build them, advocate state taxation, the sale of government land, a whiskey tax, and other innumerable ways; but always dodge the only practicable solution of the difficulty to my mind, i. e., the farmer and those contiguous to the roads to be benefited. Just as long as we keep looking for something or somebody, nobody knows what or who, to provide us all with good roads to travel on, we are pretty sure to walk in the mud. When we are once thoroughly disabused of that idea, and we realize that good roads, if they come at all, come the same way as good houses, barns, fences and other improvements, come by individual effort and expense, we will soon be able to enjoy them. Judge Biggle says: "Don't haul a lot of small stones in the road to make the traveler miserable." Other judges say: "Don't haul in loose dirt to make a bed of mud the next time it rains." If there is any other available commodity suitable for making roads, we farmers would like to hear of it, as those of us at any rate who live in this quarter of the globe don't feel like treading on air these times. —Woodland (Wash.) Letter in Rural New Yorker.

With fruit maturity one stage and ripeness or mellowness another.

FOUR-LINED LEAF BUG.

This Insect Is Doing Much Damage to Small Fruit Crops.

This insect, which is shown, many times enlarged, in the accompanying illustration, has been very destructive to the foliage of currant and gooseberry bushes in various localities. It usually confines its attacks to the leaves of the new growth, so that the fruiting portions of the bushes are only slightly injured during that season. But the sheek given to the new growth must materially affect the future bearing capacity of the whole bush. The pest

FOUR-LINED LEAF BUG (PENTATOMELLA LINEARIS)—ENLARGED.

feeds on a large number of plants, among them clover, peas, parsnips, mint, sage, geraniums, Japanese maples, peonies, hydrangeas, syringas, weigela, chrysanthemums, dahlias, and a large number of other cultivated plants, and weeds besides. Bulletin 65, of the Cornell university experiment station, from which this information and the illustrations are taken, gives the following summary of the life history of the pest: "The nymphs appear in the latter part of May upon shrubby plants, where they continue to feed upon the tender leaves for two or three weeks, undergoing five moults. The adults appear early in June and often spread to different surrounding succulent plants. Egg laying begins in the latter part of June; the eggs being laid in slits cut in the stems of shrubs near the tips of the new growth. The adults disappear in July and the insect hibernates

CURRENT STEM WITH EGGS OF FOUR-LINED LEAF BUG; C, EGG ENLARGED.

In the egg. Only one brood occurs each year in our state. The illustration shows a section of currant stem with the eggs of the insect. This leaf bug is not easily killed, strong kerosene emulsion being about the only thing that now promises success in fighting the pest. The emulsion must be thoroughly applied, and must contain at least nine per cent. of kerosene to be effective against the nymphs, and considerably stronger to affect the adults. —American Gardener.

ORCHARD AND GARDEN.

Do not strip the leaves from trees. In selecting trees, choose good roots rather than tops.

Arrange the leaves of currants have dropped, then cut the plants. In the fall, after the leaves drop, is a good time to prune the grape. Thorough cultivation of all young trees at least for some time after planting is essential to their vigorous growth.

As soon as all the garden crops are harvested a thorough plowing should be given, and, if needed, a good dressing of manure.

Pear Bartlett pears just when the stem leaves the tree without too much exertion, wrap each one separately in paper and pack in bran.

One of the best fertilizers to use around fruit trees is made of two parts wood ashes, one part lime and one part coarse salt. Only a small quantity is needed around each tree. —St. Louis Republic.

Disease in Cherry Trees.

In America the most common class of cherries is particularly liable to be attacked by a disease which we commonly know as the "plum knot." This is now understood to be caused by a minute fungus. The London Gardener's Chronicle notices that a fungus disease, which, by its description, is very much like that above referred to, is attacking the cherry in the old world. Branches die completely and suddenly above the point attacked, giving the appearance just as it is with us, of having been stricken by frost or lightning. After a careful examination they have discovered that it is caused by a minute fungus, just as in the case of our trees; but they consider the fungus which causes their trouble very different from that known to operate here. They call it Monilia fructigena. —Meehan's Monthly.

To Head Off Fraud Cheesemongers.

Prof. Henry, of the Wisconsin state agricultural experiment station, suggests the enactment of a law that all fraud cheese shall be about 10 inches in diameter to distinguish it from the genuine, which is 14 inches across. The change would break up the Chicago practice of marking poor cheese up to first grade. Prof. Henry says: "What we need is something about the cheese which cannot be separated from it. Bandages can be torn off, stenels obliterated, etc., but the size of the cheese—its diameter—cannot be changed with success, I believe."

THE DOG'S BARK.

Effect of Advancing Culture Upon the Canine Voice.

The most curious limitation which we find in dogs is as to the measure of expression to which they have attained. Among the savage forefathers of the modern dog, the characteristic of all their utterance was, to a great extent, involuntary, and once begun, the outcry was continued in a mechanical manner.

The effect of advancing culture on the dog, however, has been gradually to decrease this ancient indifference to the mode of expression by howling and yelping, and to replace it by the much more speech-like bark. There is some doubt whether dogs possessed by savages have the power of uttering the sharp, specialized note which is so characteristic of the civilized forms of their species.

It is clear, however, that if they have the power of this expressive utterance, they use it but rarely. On the other hand, our high-bred dogs have, to a great extent, lost the power to express themselves in the ancient way. Many of our breeds appear to have become incapable of uttering. There is no doubt but the change in the mode of expression greatly increases the capacity of our dogs to set forth their states of mind.

If we watch a high-bred dog—one with a wide range of sensibilities, which we may find in breeds which have long been closely associated with man, as the pointer, the foxhound, the greyhound, and the Scotch terrier, each of which is clearly related to a certain state of mind, that of welcome, of fear, of rage, of doubt and of pure fun, are almost always perfectly distinct to the educated ear, and this although the observer may not be acquainted with the creature, if he knows him well he may be able to distinguish various moods, and even an element of sorrow. This last note verges toward a howl. —Scrubber.

A Cunning Little Scheme.

Miss Riedgill (doubtfully)—I am afraid you will never consent unless you place him under obligations to you.

Mr. Simpkins—Hunt! Let me see. I might pretend to save you from drowning or something.

"That wouldn't be of any use. He would simply hand you a reward and forget all about it."

"But there must be some way to win his favor."

"I have it! You wait until he gets into a tight place, and then you rush in and save him from bankruptcy." —N. Y. Weekly.

It's funny, but a speaking countenance is most expressive when the mouth is shut. —Yonkers Gazette.

He—"Oh, I'm not so big a fool as you think." She—"Of course not; that were impossible." —Boston Transcript.

TRAVEL All ONE WAY.—There is a doctor at our end and a cemetery at the other end of one of the street car lines. —Topeka State Journal.

LAWYER (anxiously)—"Are you sure you are telling the truth?" Withdrawing the paper, he said: "I'm not sure, but I'm sure I'm not lying." —N. Y. Weekly.

"Mr. Walker is from Chicago, isn't he?" "Major," he said, "I told every time he opens his mouth he puts his foot in it." —Inter Ocean.

CLERK—"Here's some of the fresh cracked wheat. Would you like a package of it?" Mrs. Newcomb—"Young man, when I want cracked wheat I'll let you know." —Inter Ocean.

"Did you make a hit with that red tennis blazer of yours down on the farm?" "Did I? It struck the bull's eye the first time I wore it." —Indianapolis Journal.

"When she filled you did you declare to her that you could never marry another?" "Yes," he said, "I did, and she said: 'I'll let you know.'" —Puck.

He—"I hear Miss Oldgirl is going to marry Tommy Small." She—"Is that so? I wonder if he knows it?" Smith, Gray & Co.'s Monthly.

An exchange announced on the death of a lady, "that she lived fifty years with her husband, and died in the confidence of a better life." —Texas Sittings.

"Who pulled that bell cord?" asked the street conductor. "I did," answered a passenger. "What did you ring both ends for?" "Because I wanted both ends to stop." —Philadelphia Record.

KNOWLEDGE

Brings comfort and improvement and tends to personal enjoyment when rightly used. The many who live better than others and enjoy life more, with less expenditure, by more promptly adapting the world's best products to the needs of physical being, will also find that the pure liquid laxative principles embraced in the remedy, Syrup of Figs, is

Its excellence is due to its presenting in the form most acceptable and pleasant to the taste, the refreshing and truly beneficial properties of a perfect laxative, effectually cleansing the system, dispelling colds, headaches and fevers and permanently curing constipation. It has given satisfaction to millions and met with the approval of the medical profession, because it acts on the Kidneys, Liver and Bowels without weakening them and it is perfectly free from every objectionable substance.

Syrup of Figs is for sale by all druggists in 5c and 10c bottles, but it is manufactured by the California Fig Syrup Co. only, whose name is printed on every package, also the name, Syrup of Figs, and being well informed, you will not accept any substitute if offered.

The best baking powder made is, as shown by analysis, the Royal.

Com'r of Health, New-York City.

THE LAST OF MANY MILLIONS.

Only a Few Left of the Giant Turtles in the Galapagos.

Dr. Baer, who probably knows more about turtles than any other man living, has just returned to Washington from the Galapagos Islands. He brings news of the almost entire extinction of the gigantic tortoises, for which that little archipelago long ago became celebrated. There are none of them left on any of the isles, except Albemarle and Duncan. About a dozen remain on Albemarle, high up in the mountains.

Science regards these islands as the first ideas which led to the investigations culminating in his work on the "Origin of Species." He visited only a portion of the archipelago, but his explorations resulted in the discovery of an extraordinary fauna, many kinds of animals being found that were almost unknown elsewhere in the world. Prof. Baer has added largely by his recent expedition to the number of peculiar species. He obtained specimens of twenty-one entirely new species of birds, also several new species of lizards, a new sort of bat, and a monkey-like rodent hitherto unfamiliar to science.

The most extraordinary of the animals peculiar to the archipelago were the huge black land tortoises. From them is derived the name Galapagos, given by the Spaniards in the sixteenth century. Some of these turtles attained a weight of nearly one thousand pounds. Unfortunately for them, it was soon discovered that they were particularly good to eat, and whaling and other vessels acquired a habit of stopping at the islands for supplies of fresh meat in this shape. These creatures served admirably for the purpose, inasmuch as they would live on shipboard for many months and could be killed when wanted for the table. In this way six thousand turtles were taken from Charles Island alone in one year. It has been reckoned that no fewer than ten millions of the animals have been sent away by ships from the archipelago since its discovery.

On the whole, it is rather surprising that any of them are left. Dr. Baer explored Duncan Island thoroughly and found twenty tortoises. Of these he took eight, sparing the rest. Four of these he sent to Chicago, where they are now alive at Lincoln park; the others died.

The archipelago consists of fifteen small islands. The line of the equator runs directly through it. It lies due west from the coast of Ecuador six hundred and fifty miles, the reason why the animals are so interesting is that they are very ancient, being survivors of the tertiary period. They are vegetable feeders, browsing on the young roots of cacti and grasses. In former times they visited the sea ports, but the few survivors have abandoned the custom. Being very fond of fresh water, they have had the habit of making long pilgrimages to the springs high up on the mountains. To get to them they would travel day and night at the rate of three or four miles an hour. Thus, in the course of centuries, regular roads were made by them to and from the watering places, and it was by following these well-traveled paths from the coast that the Spaniards came across the springs. —Providence Journal.

PILLSBURY'S ALWAYS THE BEST.

Attacks on the Celebrated Brands of Flour of the Pillsbury-Washburn Company Fall Flat.

The National Pure Food Exposition, now being held at Battery B, is a financial and artistic success. There is an interesting rivalry between the exhibitors that furnishes both profit and amusement to the visitors. The only thing to be regretted is that the representative of a brand of flour appears to think it necessary to make absurd and unreliable statements about the well-known Pillsbury brand of flour in order to call attention to the merits of the product which he represents. His statements, probably unauthorized and made without the knowledge of his employers, are not only absurd, but are offensive to the thousands of visitors who know that Pillsbury's Best is without a rival in the flour markets of the world. For twenty-four years it has maintained its supremacy, being the first patent process flour to be placed upon this market. It has established itself in the affections of nearly every household in the land. There is not a baker or bread-maker that does not know that Pillsbury's Best is the best. Other flours are often used because retailers find it more profitable, for the time being, to sell flours which cost them less and consequently give them a larger profit. The Pillsbury Mills are the largest in the world and the Pillsbury flour is universally conceded to be the brand par excellence. Consumers say that manufacturers of other patent flours have never yet succeeded in equalling the high standard without variation for a series of years, which appears to be a secret known only to the makers of Pillsbury's Best.

There is a market for flours of all grades and makes, and it is to be regretted that the representative of any firm should have the mistaken idea that sales can be made by misrepresenting a flour of international reputation. This representative also attacks the celebrated brand of Washburn's Best, also made by the Pillsbury-Washburn Flour Mills company, as an imitation of one of the brands of flour made by the Washburn-Crosby company. This is very amusing, and simply shows dense ignorance when the fact is known that the brand of Washburn's Best has been on the markets of this country twenty years, while the present brand of Washburn-Crosby's superlative is only three years old.

The real duty is neglected when we stop over one day to perform another.—Rain's Hour.

Hall's Catarrh Cure Is taken Internally. Price 75c.

St. Jacobs Oil is made to cure RHEUMATISM.

THURSDAY, NOV. 8, 1894.

Republican Ratification Meeting.

The Republicans of Garrett county will assemble in Oakland Monday evening next to welcome the Champion of Protection.

George L. Wellington.

All friends of Protection are invited to help swell the crowd.

Citizens of Oakland are requested to illuminate their residences and places of business.

A grand torchlight procession will be followed by a monster ratification meeting at Offutt's Hall.

Let every District be represented.

AND the next day it snowed.

WE HAVE majorities to burn.

THIS will interest Mr. Cleveland.

The flag of Protection still waves.

The Solid South has been "busted."

BRITISH gold in West Virginia did the work.

The earth is ours and the fullness thereof.

The farmers of Garrett county do not want free wool.

ALAS, for the gallant David B. He fell fighting bravely.

Nothing is left but "party per, fidy and party dishonor."

The people want Protection and they are bound to have it.

It is a pity about the way they were going to "do up" Wellington.

NEITHER Democrats or Republicans are shedding tears for Tammany.

TO THE Democrat: Don't monkey with the farmers' pocket-books.

"Choose ye."—Democrat.

We have chosen. See election returns.

THE Democrats held no election in this country Tuesday by a big majority.

THAT Protection is the policy of the masses even the Democrats should not doubt.

"NEVER mind," says the Democratic press, "we'll thrash the daylight out of them next time."

"The noblest work of God—Honest Billy Wilson."—Kingwood Argus.

Isn't it a pity he was defeated.

THE DEMOCRATIC rooster has been crowing for Williams for weeks past. Monday night cheap wool got into his craw and on Tuesday he died from over exertion. Peace to his ashes.

The next House of Representatives will have two hundred and twenty Republican members.

Now that it is all over we confess it was unexpected. But we didn't think it would come quite so heavy.

WE EXTEND to our Democratic friends the same kind of solace they tendered us two years ago, and that was nil.

WE WONDER if the smart young man of the Oracle will get his government position since Mr. Wilson's defeat.

"HERE is patriotism for you with a great big 'P.' Next!"—Democrat.

Election returns.

A WHITE winged angel fresh from above could not have been elected on the Democratic ticket yesterday. —Wheeling Register.

ALLEGANY county did nobly for her champion, which leads us to ask what has become of the Linc Kilt Club and the Evening Times.

"THE Wellington button so generally worn by Republicans hereabouts is certainly an object of curiosity." —Mountain Democrat.

It is curious, isn't it?

OLD Garrett, the grandest and truest county in the land to the principles of Protection and Republicanism, spoke with a low voice Tuesday and the echo is still ringing and reverberating along her hills and dales. Hurrah for Garrett!

THE REPUBLICAN extends to Mr. Geo. L. Wellington its congratulations. It, like Mr. Wellington, made a clean fight, has nothing to apologize for, nothing to explain, nothing to call for words of regret. To-day Mr. Wellington stands at the head of the Republican party in the State of Maryland.

NOW THAT the election is over let us settle down to business once more and make things hum. Let us all join hand in hand and push our town and county to the fore. We have the material, the wealth, the enterprise, the brains and people in our midst to make Garrett county the grandest and best county in the State.

EDITOR SINCELL, of the Oakland Republican, was a caller at the Republican headquarters in this city on Saturday. He thinks that a large vote will be polled in Garrett this fall. The question of issuing bonds to the amount of \$25,000 for school purposes will be voted on, and as a lively interest in the matter is felt a full vote will be polled. The Republicans are active, aggressive and well organized, and expect to bring out every voter. They are solid for Wellington and protection, and the best informed are sanguine of giving that gentlemanly fifty-four hundred majority. Cumberland News.

It is inexplicable how such a report as that Wellington would get a majority of four hundred in this county got abroad. The Republican committee is not even wild enough to make such a claim publicly. There is no earthly reason to expect more than the usual Republican majority, ranging all the way between 200 and 300.—Mountain Democrat.

Does it seem inexplicable now, dear Brother Democrat?

It is Wellington.

All honor is due the Republicans and the Democratic friends of Protection for electing Mr. Wellington.

We concede the fact that his majority would not have been so large had it not been for the votes of the right thinking and noble minded Democrats of this Congressional District.

The battle was a hot one, but the victory was a glorious one.

It was simply the uprising of an indignant people to protest against the inauguration of a policy that was intended to work great harm to our several interests and break down the barrier of a great protective system which has made our country what it is—the grandest and most glorious under the canopy of the heavens.

The people of this Congressional District now have in the person of Mr. Wellington a man who will devote his endeavors to represent an exultant constituency to the best of his ability.

REPUBLICANS CARRY CONNECTICUT.

HARTFORD, Nov. 7. — Returns show that 153 Republicans and 36 Democrats have been elected to the house of representatives. The senate stands 22 Republicans and two Democrats. The Republican majority for the entire state ticket is believed to be about 10,000.

REPUBLICANS CARRY IOWA.

DES MOINES, Ia., Nov. 7. — Republicans claim the state by 75,000. The Republican committee claims 10 Republican congressmen elected by increasing majorities, and second Hayes' defeat probable. Returns slow in coming in.

A Well Governed Town.

The government of the town of Flushing, N. Y., is one that calls for admiration, and some of its methods might be copied in our own community with advantage. Flushing is governed by a board of trustees, a department of education a health board and other branches necessary to make up a complete corporate body. When an improvement is suggested, its necessity and advantages are made clear to the people, and the result is that it is considered in a non-partisan way, and after it has received the careful study that should control the expenditure of public funds it becomes a fact.

It can readily be seen that this calm and deliberate method of transacting public business has resulted in freeing official life in that town of the bickerings too often present in town politics. The meetings of the different departments are marked by calm deliberation and are seldom marred by heated argument. Of course discussions occur, but they are carried on with an evenness of disposition that robs them of any semblance of ill feeling. One important result of this is the marked interest taken by the prominent residents in the welfare of the place. It induces men who have reached the top round of the ladder of commercial and

financial progress to accept public office and devote both time and attention to the duties imposed by their trust.

The schools of Flushing are deserving of generous mention. Both public and private institutions are conducted with liberality, the result being that a high standard of excellence is reached. Great interest is taken in the schools by the residents, and every form of encouragement is offered to promote the cause of education.

The Road to Fortune.

Now comes the day of reckoning. The balance sheet confronts you. As you eye it over to see which investment paid best, the sum spent in advertising seems large. Does advertising pay? How often you have puzzled over this problem! Sometimes you think it does, and then again you are not so certain. The undisputed fact that every large business in the country has been helped to success by newspaper advertising does not solve the question of its benefit to you. That no business in our day can or does achieve prominence without the aid of newspaper publicity is perhaps the chief incentive that induced you to use it as a trade bringer. You, too, want your name to become a household word.

There is but one road to fortune and it is paved with type. There are a thousand wrong ways of advertising and but one right way—for you. What you want to make sure of is whether you are on the right track and whether your business is getting all the aid and impetus it should from the money spent, and if not to know why it is not.

It therefore becomes apparent that the work of the writer must have certain specific qualities to be of service to the merchant. His advertisements should catch the eye by being strikingly set up.

of a sensation when he ruled that any person who went out of the State for ten days, providing he did not make affidavit before the clerk of the circuit court that he proposed returning and making Maryland his abode, lost his right to vote.

State's Attorney Charles A. Little pointed out that many persons in the county were disqualified then, for there are few persons during the year who do not go out of the State on visits, business, pleasure, etc. The court, however, held that the law was plain enough, and if any one had so desired before registration closed he could have had several hundred persons scratched from the lists; in fact, all persons who had been out of the State for ten days, without making requisite affidavit.

"Do you mean to say," said Mr. Little, for example, "that Messrs. Edward W. Mealey, William Kealhofer who were in Europe on a tour last summer, and Judge Richard H. Alvey, who holds court in Washington city, but resides here, lost their right to vote by being out of the State ten days or more?"

"They did," replied Judge Stake, "and if any one had seen fit to strike them from the list he could have done so."

Sunday School Institute.

The Sunday School Institute held at Germany on the 26th, 27th and 28th insts, was a real success.

There were good audiences from the first, but on Sunday there were more than could be comfortably seated in the Reform church. On Friday and Saturday the meetings were held in the M. E. church near by.

Sabbath morning the people gathered from Loneconing, Frostburg, Myersdale, Grantsville and the surrounding country, who were all delighted with the excellent sermon preached by Rev. D. H. Leader.

The children's mass meeting was largely attended and made very interesting and profitable.

The farewell addresses Sabbath night were very touching and sent

us all home determined to work more earnestly than ever in the Sabbath School cause.

The program arranged by Mr. C. J. Otto was an excellent one and brought out some excellent local talent in speaking as well as in the excellent music rendered by the combination of the two choirs. Rev. D. H. Leader, Rev. Hassler, Rev. J. H. Enlow, Mr. Wm. Hinebaugh, Dr. A. F. Speicher and J. A. Enlow were among the active workers.

Mr. C. J. Otto, president, managed the Institute very successfully, and would often clinch the arguments in a few pointed words.

J. A. ENLOW, Sec'y.

Elbow.

Farm work is all done except some corn to shuck.

Mr. G. O. Broadwater and son, J. N., shucked from their farm 300 barrels of corn.

Joseph Warnick is rebuilding his house which burned the past summer.

Peter McIntire had a corn shucking last week, at which 150 barrels were shucked from five acres of ground.

Mr. E. Merrill, we believe, intends to put a steam mill at the mouth of Elk Lick run, where he will manufacture shingles, lumber and lath. Give him a call; he will do the fair thing.

A. J. Broadwater and Mrs. J. H. Gregg returned home from the Johns Hopkins Hospital, Baltimore, some few days ago greatly improved in health. We are glad to see them back with us again.

Mr. J. H. Gregg purchased a fine flock of sheep at E. Stanton's sale last week. He purchased them on six months credit. He says that makes wool 9 cents per pound.

Rev. J. H. Enlow held his sacramental service at the Savage church on last Sabbath. There was a big

t turnout and we hope that there was a great deal of good accomplished. MOONLIGHT.

For Sale Cheap.

The Veitch residence on Oak Street, between 3rd and 4th. House contains eleven rooms and is in good condition. Stable and all other necessary outbuildings. Well of good water. There are two lots with this property, each containing a full quarter acre.

FRED. A. THAYER.

Office in Feltz Building opposite postoffice.

Chamberlain's Eye and Skin Ointment.

A certain cure for Chronic Sore Eyes, Tetter, Salt Rheum, Scald Head, Old Chronic Sores, Fever Sores, Eczema, Itch, Prairie Scratches, Sore Nipples and Piles. It is cooling and soothing. Hundreds of cases have been cured by it after all other treatment had failed. 25 cents per box.

Estate of Henry A. Rasche, deceased.

THIS IS TO GIVE NOTICE, That the subscriber of said estate, both obtained from the Probate Court of Garrett county, in Maryland, Letters of Administration on the personal estate of

HENRY A. RASCHE, late of Garrett County, Maryland, deceased. All persons having claims against the deceased are hereby warned to exhibit the same with the vouchers therefor, to the subscriber, on or before the 10th day of April next, at 11 o'clock in the forenoon, at the office of said subscriber, in the city of Baltimore, Maryland. All persons showing themselves indebted to said estate are requested to make immediate payment. Given under my hand this 9th day of October, 1894.

ARTHUR TOWNSEND, Adm'r.

31-3 Baltimore, Md.

Dr. A. S. Todd's Anti-Bilious Pills

are good for sick headache, constipation, piles, bilious colic, liver and gall, dyspepsia, flatulency, female complaints, indigestion, diarrhoea, sour stomach, loss of appetite, nervousness, general debility. They will positively cure all the disorders of the liver, kidneys, stomach and bowels. 25 cents a box.

Laughlin's Infant Cordial

helps babies over the critical teething period, soothes and softens the gums, controls the nervous and gives rest to both child and mother. It will also cure summer complaint, dysentery, diarrhoea and wind colic. It is absolutely safe. It contains no strong drugs and gives immediate relief. 25 cents a bottle and your money back, if it fails.

Laughlin's Worm Syrup

destroys worms, which are not only bad in themselves, but which induce and aggravate other diseases. Laughlin's Syrup is a purely vegetable, perfectly effective and tastes good. 25 cents a bottle.

Most all druggists have these three medicines. If you cannot get them, send for them and we'll see that you get them. Circulars free.

JOHN G. McLEAN & SON, Wheeling, W. Va.

DR. THEEL

1317 Arch St. Phila. Pa.

BLOOD POISON and Special Diet

is cured in 10 to 30 days. Itches, Eruptions, Skin Diseases, Venereal Affections, and Eruptions of the Face and Throat. No matter how long it has been in the system, it will be cured.

Having sold my meat store to Mr. James Andrews, I desire to close up my books as soon as possible. All persons knowing themselves indebted to me, are hereby notified that they must settle either by cash or note immediately. 34-3t ANDREW SHARTER.

Dr. J. G. Robinson, Dentist, of Baltimore, has decided to locate permanently here in the town of Oakland, where he will be fully equipped to perform in all branches of his profession. Office with Dr. M. C. Hinchbaugh. 35-1y.

For a pain in the side or chest there is nothing so good as a piece of flannel dampened with Chamberlain's Pain Balm and bound on over the seat of pain. It affords prompt and permanent relief and if used in time will often prevent a cold from resulting in pneumonia. This same treatment is a sure cure for lame back. For sale by Oakland druggists.

The Alden Vinegar Co. makes nothing but absolutely pure fruit vinegar sourced by the natural process of age. If you want the best vinegar always call for the Alden and take no other. You can find it for sale by R. S. Johnson or Hamill & Little in Oakland; John O'Donnell at Mountain Lake Park; Spiker & Nethkin and D. F. Graham at Deer Park; J. H. Wilson & Bro. at Wilson.

Estray Notice.
A white horse, tender in front feet, about 15 years old, from my farm at Hutton, Garrett Co., Md. A suitable reward for information or his return.
35-2t*, J. A. CONNELL.

New style fall and winter cloaks just open at M. L. Scott's Baltimore Store.

Henry Wilson, the postmaster at Welshton, Florida, says he cured a case of diarrhoea of long standing in six hours, with one small bottle of Chamberlain's Colic, Cholera and Diarrhoea Remedy. What a pleasant surprise that must have been to the sufferer. Such cures are not unusual with this remedy. In many instances only one or two doses are required to give permanent relief. It can always be depended upon. When reduced with water it is pleasant to take. For sale by Oakland druggists.

Croup is a terror to young mothers. To post them concerning the first symptoms, and treatment is the object of this item. The first indication of croup is hoarseness. In a child who is subject to croup it may be taken as a sure sign of the approach of an attack. Following this hoarseness is a peculiar, rough cough. If Chamberlain's Cough Remedy is given as soon as the child becomes hoarse or even after the rough cough has appeared it will prevent the attack. It has never been known to fail. 25 and 50 cent bottles for sale by Oakland druggists.

W. A. McGuire, a well known citizen of McKay, Ohio, is of the opinion that there is nothing as good for children troubled with colds or croup as Chamberlain's Cough Remedy. He has used it in his family for several years with the best results and always keeps a bottle of it in the house. After having la grippe he was himself troubled with a severe cough. He used other remedies without benefit and then concluded to try the children's medicine and to his delight it soon effected a permanent cure. 25 and 50 cent bottles for sale by Oakland druggists.

Estray Notice.
There came to my place near Deer Park, about July 1, a dark red yearling bull, without marks of any kind. The owner will please come forward, pay all costs and damages and take same away.
34-2t W. M. THICKETT.

Dentistry.
Dr. J. L. Ritter will be at Deer Park Nov. 12, for one day only; Oakland, Nov. 13, and remain a few days prepared to do all kinds of dental work. Teeth extracted without pain. Office: Commercial Hotel. 34-2t

Will You Suffer
With rheumatic pains, sciatica, sleepless nights, dropsical accumulations, or nervous headaches when Messrs. Cober & Boyer will cure you if their directions are followed. Can be consulted at the Central Hotel or at their room in the Pritchard building, Oakland, Md.

Valuable Advice.
Avoid lawsuits and loss by consulting H. P. Tasker and examining his abstracts of the "conflicting titles" before paying for Military Lots. Charges reasonable. Office in Colardeau Cottage, opposite the bank, Oakland, Md. 41-1f.

Notice.
To the farmers of Garrett county. Having accepted the agency for the sale of "Natural Plant Food," one of the very best fertilizers now known, I am prepared to fill all orders promptly. For terms and particulars apply to
MICHAEL W. DUNST,

Friese, of Oakland, Md., take pleasure in announcing that I shall conduct said business in such a manner as to give full satisfaction to all who may favor me with their patronage. The public is respectfully invited to give me a call.
33-3 J. STANFIELD DRUMMOND.

A Quarter Century Test.
For a quarter of a century Dr. King's New Discovery has been tested, and the millions who have received benefit from its use testify to its wonderful curative powers in all diseases of the Throat, Chest and Lungs. A remedy that has stood the test, so long and that has given so universal satisfaction is no experiment. Each bottle is positively guaranteed to give relief, or the money will be refunded. It is admitted to be the most reliable for Coughs and Colds. Trial bottle free at all Drug Stores. Large size 50c and \$1.00 6

Died.
It is with feelings of regret that we chronicle the death of Mrs. Wegman, wife of Sheriff Charles Wegman, which sad event occurred at the sheriff's residence in Oakland on Monday night about ten o'clock. The deceased lady had been suffering for several weeks with an attack of typhoid pneumonia from the effects of which disease she died. Mrs. Wegman was a daughter of Mr. and Mrs. Jesse Michael, of Firm Rock in this county, and was married on January 10th, 1894. The funeral occurred yesterday afternoon from the home of her parents at Firm Rock.

Bucklen's Arnica Salve.
THE BEST SALVE in the world for Cuts, Bruises, Sores, Ulcers, Salt Rheum, Fever Sores, Tetter, Chapped Hands, Chilblains, Corns, and all Skin Eruptions, and positively cures Piles, or no pay required. It is guaranteed to give perfect satisfaction or money refunded. Price 25 cents per box. For sale by all druggists. 3-1yr

It May do as Much for You.
Mr. Fred Miller, of Irving, Ill., writes that he had a severe kidney trouble for many years, with severe pains in his back and also that his bladder was affected. He tried many so called kidney cures but without any good result. About a year ago he began the use of Electric Bitters and found relief at once. Electric Bitters is especially adapted to cure of all kidney and liver troubles and often gives almost instant relief. One trial will prove our statement. Price only 50c. for large bottle. At all Drug Stores. 6

ONE HUNDRED DOLLARS REWARD
Will permanently pay for information leading to arrest and conviction of the person who broke into my house on the night of Dec. 21st, 1893.
JNO. W. WELLS, Deer Park, Md.

POTEN
Foster's German Army and Navy Blood Bitters
For ALL SKIN DISEASES
Prompt AND Unfailing.

Will permanently heal Eczema, Salt Rheum, Tetter, Poison Oak, Ring Worm, Pimples, Dandruff, Itch, Itching Piles and every kind of eruption. It softens the skin and effectually removes all blemishes. Eminent superior in restoring and beautifying the complexion. It has been tested in innumerable cases with unvarying success.

Sold by all druggists, or sent by mail on receipt of price, 50 cents.

FOSTER MEDICINE COMPANY, BALTIMORE, MD.
FOSTER'S GERMAN ARMY AND NAVY BLOOD BITTERS will cleanse the system and drive out all impurities. It is both a purifier and an invigorator. Pleasant to the taste. Effect immediate. In large bottles, \$1.00, at all druggists.

Three acres of land, being a part of the old Kennedy farm, lying in the eastern suburbs of Oakland on either side of the road leading to Mt. Lake Park. Will be sold in lots of 1/4 acre each, or as a whole. For full particulars call on or address MRS. LIZZIE ELIZABETH, Elkins, W. Va. 22-6m

TEMPERANCE NOTES.

The Teardrop IN THE GLASS.

SUFFERING mortal, a victim of rum, lay tossing on feverish bed. No surfeit of happiness entered his home. His little ones pleaded for bread. The mother endeavored her teardrops to hide. And the father, eyes up to heaven in prayer, For relief from the cross which he bore.

For water the feverish sufferer cried. To cool the mad fires in his breast. The mother endeavored her teardrops to hide. And the father, eyes up to heaven in prayer, For relief from the cross which he bore.

The clear, sparkling water fresh drawn from the well. To his drink-palated hand she did pass. And as she strove hard her emotions to quell, A teardrop fell into the glass.

He started as if by a scorpion stung. And gazed on her sorrowful face. Not seeing with anguish but yesterday young. And crying in his agony: "Daring, for years Now lost in the terrible past. I see it all now. I've been drinking your tears; God helping me, this is the last."

The little ones, pale on a carpeted floor. The mother is youthful again. Prosperity reigns in the home as of yore. Entail is love's broken chain. He kisses the eyes of his gladdened wife. And tells her he never will bless. And cherishes in memory all of his life. That teardrop that fell in the glass.

—Capt. Jack Crawford ("The Port Scout"), in the London Sun.

CRAZED BY RUM.

The Sad Fate of a Soldier Who Loved Liquor.

The ten months following the close of our civil war will long be remembered upon the Rio Grande as a carnival of crime that rivaled the chaos of the medieval robber-knight period. The revolt against the Mexican emperor, had filled southern Texas with political refugees, and northern Mexico with roving bands of outlaws and hardly less lawless troops, "contraguerrillas," enlisted by the agents of the Maximilian government among the adventurers of the debatable border, and reinforced by the wreck of Kirby Smith's brigade.

Matamoros was sacked again and again, and at a distance of a mile from the courthouse at Brownsville, Tex., every man's security of property and life depended upon his resources of self-help. Murder became so frequent that the local newspapers could hardly afford to waste any space on such minor offenses as theft and rowdiness; but the most memorable event of that pandemonium era was probably the episode of Robert Rodgers, a soldier of Gen. Weitzel's army corps, then stationed at Fort Hancock, Texas, when forty miles from the mouth of the Rio Grande. Rodgers was a young private of an Irish infantry regiment, and as good-natured a lad as ever shared his last dime with an impecunious comrade and preserved his honor in the hands of a woman of a winter campaign. He was, all in all, perhaps the most popular man of his company, and that he was a favorite with at least some of his officers seems implied by the fact that his comrades repeatedly selected him as the spokesman of their petition committee when he stood in the face of his promotion, testified his sergeant, "was his aversion to the strict observance of severe instructions regarding the management of military prisoners. He would let them chat and lag, and allowed them to rest under every possible pretext, though he himself never shirked his share of hard work." "During the last campaign," states the same witness, "his cheerful performance of double duty often shamed grumbler into silence."

"He had no enemy in the world," said one of his comrades, "and as long as he kept sober never gave his tentmates cause for complaint, though his fondness for pets made our company grounds the headquarters of yelping curs. He would get up in the middle of the night to feed them for fear that somebody would stop under the stars with a dose of lead. If his tentmates fell out, he laughed them into good humor; there was no risk of a row when Robert Rogers was around."

But drink turned that easy-going man into a demon, and in the spring of 1866 he was being for a murder, aggravated by every conceivable circumstance of atrocious brutality. One evening, about the end of April, I think, or early in May, 1866, Rodgers got drunk during a pay-day revel in Brownsville, Tex., and returned to camp in a most unbecomingly aggressive state of intoxication. Two of his comrades at once took him in charge, and tried their best to keep him quiet, or at least out of serious trouble, but his whoops after "taps" the covert fan signal of the evening drum brought up a company representative and an order in the person of a company sergeant. The customs of a volunteer camp allowed a certain latitude in the interpretation of military regulations, and after an angry controversy the monitor agreed to give the disturber of the peace ten minutes to "cool down," but warned his friends that after the expiration of that respite he would be obliged to take him to the guard-house, unless they could either keep him quiet, or since his leave of absence had not yet quite expired, take him out of camp and let him make the midnight echoes on the safe side of the lines. The latter alternative finally seemed the best plan, and three of Rodgers' tentmates undertook to escort him back to Brownsville, but after staggering along for a couple of hun-

dred yards he broke away from his guides and plunged into another tent, cursing and yelling in a way that speedily brought the inmates to their feet, and then felling one of them with a vicious kick. In the melee Rodgers got hold of a musket, and a general row seemed eminent, when one of Rodgers' friends happened to see the surgeon of his regiment, a kind-hearted young physician, to whose skill Rodgers owed his recovery from a serious wound. The doctor, after listening to a hurried resume of the trouble, agreed to undertake the role of a peace-maker and entered the tent just in time to save the intruder from being brained with a camp stool. The moment the doctor's foot was on the mat, he was quickly flung back into the arms of the doctor, who clasped him around the shoulders and tried to push him out of the tent.

"You are the best boy from Ohio, Bob," he said, but this will never do. You have to go home and keep quiet, that's all about it. Say! don't you try to strike me, Bob; don't you know who I am?"

"Yes, I do," shrieked the maniac, "and curse you and your pills if I ain't going to teach you to mind your own business," and suddenly whipping out a knife he attacked his benefactor with the rage of a Berserk, cut his throat, ripped out his bowels and horribly slashed his face left

ENTERED THE TENT JUST IN TIME. And right before he could be dragged away and disarmed by the united efforts of the guardhouse squads, whom the shrieks of the scuffle had brought up at a double quick.

Two days after the tragedy Robert Rodgers attempted an escape from the guardhouse cell and was taken for safe keeping to the better of the city jail. The voice of the public was a unit against him, but a strong faction of his former comrades seems to have planned his rescue, and their more or less direct assistance enabled him to reach the cellar of the jail through a movable plank of the lower floor and a back alley through the rusty grating of a cellar-window. Once on the other side of the river he would have been safe, but the ferries were guarded, and in his suburban hiding-place his passion for drink got the better of his discretion. He got drunk, forced his way into the street, and was promptly re-arrested and dragged back to jail.

His friends concocted a secret council, and two or three of his most enterprising partisans managed to get themselves committed to jail in order to secure what was known as the "key" to the jail. They then found that no ingenuity could retrieve the forfeited chance. The re-captured desperado was chained to the floor of the safest cell between two sentries. He was marched to the gallows, under a strong escort, an hour after the day of his escape, and there paid the penalty of his crime with his life.—Felix L. Oswald, M. D., in The Voice.

BITS AND BREVITIES.

GREAT BRITAIN'S drink bill is attracting world-wide attention.

The distillers of the province of Ontario last year used 48,581,000 pounds of corn and 9,882,000 pounds of rye.

OF THE 1,200 ministers in the Free Church of Scotland, 734 are pledged abstainers, a gain of 23 during the year.

For every man, woman and child there was nearly one-half barrel of fermented liquor consumed in the United States last year.

Forty-seven temperance organizations in Cleveland, O., including the Christian Endeavor and Epworth league societies, have formed a Cleveland Temperance alliance.

WHEN the queen of Madagascar shut up the saloons in her kingdom, and the ex-saloonkeepers asked for compensation, she replied: "Compensate those you have wronged, and I will pay the balance."

It asserted by continental statisticians that "in the consumption of alcohol France, as a country, has gone up by bounds. It is now fourth among the nations of Europe, following close on the second and third Belgium being the first and Great Britain the second."

TOTAL abstinence in the British army in India is on the advance, the number of abstainers having nearly doubled in four years. The present commander-in-chief, Sir George White, is much interested in the subject, and has discovered that nearly all the crime and half the sickness in the army are traceable to drink, and that intemperance is the main cause of failure in health and endurance on the part of the British soldier.

Vermont's expenditures for intoxicating liquors in 1893 was, according to J. D. Merson in the League Journal, thirty-two per cent. less than that of the previous year, representing a reduction from five million to three million pounds. Encouraging as this is, it is partly due, however, to the unusual business depression prevailing in the colony. And the question naturally arises, how can a people expend the enormous sum of £3,750,000 for so useless and injurious an article when war is suffering prevail?

FOR YOUNG PEOPLE.

A TRUE FAIRY TALE.

Do you know of the house Where ginger-snaps grow? Where tests for us children March out in a row? Where wishing is having, Where—don't it grand! Just up in the garret Is real fairy-land? Where youngsters can caper And romp and halloo, For they always do right, Whatever they do. You don't know the house? Then oh do try me, I'm sorry for you. Why, it's grandma's, you see. —Youth's Companion.

THE TOILET OF BIRDS.

Some Like Nice Clean Water, Others Prefer Dust for Bathing.

The feathered tribes have many peculiar ways and fancies about the details of their toilets. Some birds use water only, some water and dust, while others prefer dust and no water. Birds are not only exceedingly clean in their choice of bath, but also very particular about the quality of their "toilet-dust."

Wild ducks, though feeding by salt water, prefer to bathe in fresh-water pools, and will fly long distances inland to running brooks and ponds, where they preen and dress their feathers in the early hours of the morning. Sparrows bathe often, both in water and in dust. They are not as particular about the quality of the water as about the quality of the dust. They prefer clean water, but I have seen them take a dip in shallow pools that were quite muddy.

The city sparrow must take a water-bath where he can get it—in the streets or on the tops of houses—but he is most careful in his choice of his dust-bath. Road dust, the driest and finest possible, suits him best. I have noticed the city sparrow taking his dust-bath in the street, and invariably he chooses a place where the dust is like powder. Partridges prefer dry loam. They like to scratch out the soil from under the grass and fill their feathers with cool earth. Most birds are fond of ashes. Some early morning take a walk across a field that has been turned over, and see the number of winged creatures that rise suddenly from the ash-heaps. A darting form, a small cloud of ashes, and the bathers disappear. —N. Y. Home.

THE DOG OF MONTAGRI.

How the Noble Animal Avenged the Death of His Master.

This brave dog lived in France, way back in the middle ages. Unfortunately we do not know his name, so he is always called the dog of Montagri. He was very fond of his master, who was named Andre de Montagri. The dog followed his master everywhere, and people never saw one without the other.

One day when Montagri was walking in a lonely wood near Paris, called the forest of Bond, he was attacked and murdered by a man named Maistre. The murderer buried the body under a great tree. He thought no one had seen him and that he was quite safe, but he was mistaken. The faithful dog appeared and took up his station by his master's grave, and he remained day and night, guarding his body.

He never left the spot, except to go after something to eat. He usually went in to Paris to the house of his master's most intimate friend, where he was well known, and after he had eaten what he needed he returned immediately to the grave and resumed his watch. Montagri's friend began to think the conduct of the dog very singular, and one day he followed him. The dog led him through the forest till they came to the grave under the tree. There he began to scratch away the earth and leaves. The man helped him, and you may imagine how shocked he was when they laid bare the body of his missing friend. The dog now seemed to feel that he had given the responsibility of caring for his master's body over to the friend. He attached himself to him and went to Paris and lived in his house.

It was not long before Maistre's actions led people to suspect him of being the murderer. Whenever the dog met him he growled, his hair bristled up, and it was with great difficulty that he was kept from tearing the man to pieces. They finally sentenced Maistre to fight a duel with the dog, after the custom of that time.

The fight was to be in a large amphitheater at St. Notre Dame, in Paris, and an immense crowd was there. The dog began to tear each other to pieces. Maistre was not allowed any weapons except a stick and a shield, while the dog had a tab into which he could retire when he was weary.

The dog was let loose and rushed at the man. At last his chance to avenge

THE FAITHFUL DOG.

his master's death had come, and he was determined to make the most of it. The man's guilty conscience did not prevent him from fighting desperately, and he defended himself well. Again and again the brave dog rushed at him only to be beaten back by the club, and the shield always came between him and the man's throat, which he tried hard to reach. The struggle was long and hard, but the dog conquered. The man, worn out with fatigue, finally confessed his guilt before all the people. —N. Y. World.

A HERO AT EIGHTEEN.

England's Famous Boy Captain Tells How He Saved a Ship.

The pages of the sea have given us no finer tale for many a day than that of the boy captain and the Clyde sailing ship Trafalgar. It is a story that might have been written by Robert Louis Stevenson or Clark Russell, or by both together.

It hardly need be said that the boy captain, as we have got to call him, is Mr. William Shotton, the son of a sailor, Capt. Stephen Shotton, and a member of a Sunderland family. Among the lanes of Gloucestershire, where Capt. Stephen Shotton now has his home, I had a chat with the boy captain one fine afternoon recently. He is a modest, charming lad of eighteen, as natural as sailor should be, yet capable at a pinch, I should think, of holding his own in the most difficult circumstances.

"Since I came back to the old country I have been having a holiday," he told me, "but I shall be off to sea again

THE BOY CAPTAIN.

by and by." He might have added that he now carries his dispatches as a sailor, and the fates look as if they mean to make him a full-blown skipper before he gets a beard.

"You might tell me, so I may ask one or two questions on them, the main facts of your skippership of the Trafalgar."

"Briefly they are these: We were sailing from Batavia for Melbourne in ballast. Capt. Edward died of Java fever while we were lying in Batavia. We left two men in hospital and had deserted, so we sailed with a crew, all told, of twenty-three hands. Mr. Roberts, who had been first mate, was now in command; we had got a new first mate, Mr. Norwood; a seaman from the fore'side had been made second mate, and I was ranked third mate."

"And so you put out on October 29 last, I think, for Melbourne?"

"Yes, taking the fever with us, I'm sorry to say. I had been ill of myself, and suffered a two-hours attack almost every day until we reached Melbourne. But I was spared, although while the attacks were on I really don't think I should have carried on. Well, then, Mr. Roberts and the carpenter, then Mr. Norwood and then the cook. A desolating business it was, and sadly demoralized the crew, especially as they were left with my self—an apprentice just out of his time, a few days only on board who could navigate."

"But didn't the prospect appear a tremendous-looking one to you?"

"Really, I can't say that I ever thought of that; perhaps because I had been so long at sea, and I was used to it. I had already been navigating the ship. You see, the third mate, with whom I took watch and watch about from the time we lost the other officers, could not navigate; but, frankly, I hadn't any fear about being able to take the Trafalgar to Melbourne, and I told the men so. They wanted to make for the nearest port in Australia, but I set my face against that, because it would have involved great expense to the owners. Besides, as I argued with them, if I could navigate the ship to the nearest port in Australia, I could navigate her to Melbourne."

"I believe they didn't work with you just as heartily as they might have done."

"As I have said, the deaths on board and the position we were left in made the men see that they had no choice. I had with me that few of my difficulties. I had, in certain, to cause difficulties. Anybody who knows what sailors are will easily understand their diffidence and the troubles they made as a result of it. If I had been in the fore'side and I had taken the bearings day after day on the quarter deck, and had I known that he was the only frail guide on the trackless sea—why, I think I might myself have been a trifle miffed. All the men could have done would have been to take a given direction—the direction of the Australian continent—and bear up for it. Either that or have trusted to being picked up by a passing ship. In the first case, they must run her aground on the first land they touched. It might have been a barren coast, hundreds of miles from civilization. Whatever happened to them, she must have been lost. As to being picked up by another ship—well, the comment on that is that it was not seen one on the whole voyage."

"Naturally, only those on board the Trafalgar could really recognize all that was meant in your skippership?"

"We had a good bit of rough weather when we got into Australian latitudes; had sails blown away and so on; but got to Melbourne all right in time for Christmas—on December 17. Immediately they got foot on shore the men forgot all their troubles and couldn't say too kind things to me, as, indeed, it has been also with other people since. The whole affair was, no doubt, strange—and may never occur again—anyhow, in my experience. Perhaps it was not without its risks, but if I had set to doubting about the result we might not have got through as we did, you know."—London Letter.

Caught Nothing but a Spanking. A Georgia boy, thought to be lost, was found on the banks of a river, where he had been steadily fishing for three days.

MISCELLANEOUS.

—A couplet of verse, a period of prose, may cling to the rock of ages as a shell that survives the deluge.—Rivier.

—Copper was a melancholy child and often would sit for many hours almost motionless, gazing at the landscape before him.

—Some custom shoemakers discard the graduated tape and do their measuring with a piece of stout paper folded once or twice. A nick is made as each measurement is taken, and the record is transferred to a page of the shoemaker's book bearing the customer's name. The paper is more to be depended upon, because it is less elastic than the tape.

—In the office of the Pall Mall Magazine the phonograph has been put to a novel use. An article is read in front of the receiving funnel, and the waxen cylinder is sent to the printer, who sets it in a duplicate machine and puts the tubes in his ears. He then regulates the speed to suit himself, and sets by ear instead of by eye.—N. Y. Mail and Express.

—White-shelled eggs always sell better than others, and hence the special value of the white Leghorn fowls. Their eggs are of almost marble whiteness, and, though small, their fresh look makes them marketable. Guinea eggs, however, which are brown and speckled, also have a special sale, because some persons esteem them peculiarly delicate. Ducks' eggs are in much demand for the Chinese restaurants, where they are worked up into tempting dishes.

The first independence flag displayed in South Carolina was at the taking of Fort Jackson on James Island, September 13, 1775. Col. Moultrie, who had been requested by the council of safety to procure a flag, had a large blue one made with a white crescent in the center. The crescent was used in uniform with the dress of the troops, who, besides wearing blue, had their caps adorned with crescents inscribed "Liberty or Death." It was the crescent flag that Sergeant Jasper so gallantly rescued at the battle of Fort Moultrie, June 28, 1776.

A somewhat famous Frenchman who has devoted himself to the promotion of free trade between this country and his own, estimated nearly twenty years ago that the population of the United States would reach 100,000,000 at twenty-four years after 1890, or on July 24, 1914. He has recently, however, revised his estimate, and he now gives himself a wider range. He believes that the 100,000,000 will be reached between the years 1915 and 1920. All calculations on this subject for the last fifty years have been absurdly out, and the Frenchman's estimate may have to be revised again should immigration remain at its present low ebb for five years longer.

—Watches first came into fashion in the year 1477, at Nuremberg, and on that account and because of their peculiar shape they were known as "Nuremberg eggs." They were not all egg-shaped, however, some being made in imitation of pears, gourds, acorns, birds' skulls, etc. Morgan, the English encyclopaedia collector, has an old time watch in the shape of a cow's horn, which at twenty-four years after 1890, or on July 24, 1914, he estimated would have been in the shape of a horn. The Earl of Stanhope has one shaped like an egg, cut in jauch and set with diamonds. About the year 1620 watches began to assume the shape now generally worn; in the seventeenth century, however, it became the fashion to make them in the form of a sword.

The office-seekers began to be a burden to the powers as early as 1787, for John Jay reported to congress in that year on the application of Sir Edward Newenham, that his son might be appointed consul at Marcellus, that "honorary resolutions, a few offices, say five or six, and much land" were the only funds on which congress could draw rewards for its friends. Not long after that a resolution was passed reducing the salaries of government clerks, and providing that no clerk should receive more than \$400 a year, and no messenger more than \$100. The pompous clerks of congress, who draw \$2,500 a year, would soon to accept the salaries that were good enough for their predecessors a hundred years ago.

DIET AND OLD AGE.

High Diggers Who Could Look Back Over More Than a Century.

"Bread and water," says a certain physician, "are an admirable diet for those who would rival Methuselah, and fasting itself is an excellent promoter of their views." Perhaps so, but to the majority, we suspect, a spiritual or intellectual existence indefinitely prolonged only by such sensual privation would not seem worth enduring.

There is more comfort in knowing that one John Weeks could at 111 (having recently married as a tenth wife a girl of 16) enjoy a meal of pork, bread and wine, a pint of the best and three pounds avoirdupois of the first. Not to multiply cases, Mr. Davis, the vicar of Staunton-on-Wye, may also be mentioned, who, at 105, "ate of hot rolls, well buttered, and drank plenty of tea and coffee for breakfast; at dinner consumed a variety of dishes" and supped on wine and roast meats.

After this, Tom Parr's simple regimen of coarse meslin bread (made of several kinds of flour), green cheese, preferably with an onion, milk, molasses, and an occasional cup of ale, or perry, or sounds very moderate. Our friends, the quacks, would have us believe he added his oil to this diet, and that it was due only to his neglect of the precious homely medicine distilled from herbs that he died in London of high feeding and the best wines. But these authorities must not be credited.—Macmillan's Magazine.

A Conversation Stimulator.

Emkerton—How does Redstock come to get so many invitations for evening parties?

Pilgrimage—Well, you know, a man who can stimulate the flow of conversation is always a welcome guest.

Emkerton—But Redstock is no talker.

Pilgrimage—He doesn't talk, himself—he sings.—Puck.

PUNGENT PARAGRAPHS.

—Anxious Inquirer to crusty old gentleman—"When do you suppose this rain is going to stop?" C. O. G.—"When it gets to the ground, of course."—South Boston News.

—"This is the third time you have come home tipsy this week." Hubby—"Blow it, he so pessimistic, my dear. You should think of the four nights I come home sober."—Boston Home Journal.

—"Do you know how to make good bread?" She—"Oh, yes, but I don't mean to. When I marry I mean to get a husband who is rich enough to buy me cake."—Somerville Journal.

—Cholly—"I wouldn't where—ah—Algy procures his beautiful ascent, douter know? Dolly—"Why, didn't the dear boy tell you?" He has all his teeth disrooted from—aw—London.—Jewish Messenger.

Elderberry—"Doblois tells me he still has serious doubts about the miracles." Dr. Thirdly—"Why should he have?" Elderberry—"He can't get over the fact that the witnesses to them were mostly fishermen."—N. Y. World.

—Tommy—"Paw, what makes them have the weather office away up on the top of a high building?" Mr. Fizz—"That is so that it will be too much exertion for a fat man to climb the stairs and kill the weather man."—Indianapolis Journal.

—Humane, at least.—Jack—"You may say what you please, but Miss De Vere has a kind and sympathetic heart." Jill—"What makes you think so?" Jack—"Cholly Fitzhugh asked her last night if his monnie was becoming and she said yes."—Judge.

—Big Day's Work.—Mamma—"Well, Willie, what did you learn at Sunday-school today?" Willie—"That I must sell five tickets for our picnic next week, give twenty-five cents to buy teacher a present, and—that Noah built the ark, and the Yagies."—A Pull with Her Husband.—Dickley—"I wonder what induced the female giant at the dime museum to marry the India rubber man?" Doldrey—"I suppose she wanted somebody who could twist around her fingers."—Boston Traveller.

A judge in crossing the Irish channel one stormy night knocked against a well-known witty lawyer, who was suffering terribly from seasickness. "Can I do anything for you?" said the judge. "Yes," gasped the sailor, "a doll I would rather have than be stuffed with straw. Straw is very ticklish when you can't get anything else on your inside. I know a good deal more about saw mills, but my paper is all gone."—Chicago Tribune.

ON THE ROAD.

Relative Merits of Horses, Shanks' Mare and Wheels.

The man who sings the song of the open road on horseback is not really "free" of the wandering borings. He has but a limited franchise, is but half a citizen. Unless he is a careless or a hard-hearted man, he is forever wondering whether his horse is not too tired to go any further, whether the near foreleg is not puffing, whether the stable at Long Waddysburg is not dirty and unwholesome, whether the hostler did not forget the corn or the water.

The cyclist, on the other hand, is never worried by thinking whether his horse had not done enough, or too much, already. If he is himself ready to go on, there is nothing to prevent him. As long as the road is not dirty and the machine is good, that is enough. Bad roads are no worry to him if they have only this small strip of good in them, and that they usually have. It is true that the cyclist cannot leap a hedge, but those who are chiefly busy on singing the song of the open road do not want to jump hedges. What they want is to slide by the farms and the hedgerows, past the village green, its pond and white railings, past the old manor house and its elms, the church and its clipped yew trees.

How superior is the position of the touring cyclist to that of a man on a walking tour! Each carries a knapsack—the same, but oh, how different! The walker totters on the straps continually working on his shoulders, longing, like Christian, to cast down his burden. The cyclist's kit is strapped to the machine, and gives him neither thought nor trouble. The addition to the weight may make the same expenditure of energy produce nine instead of nine and a half miles an hour, but that is all.—Spectator.

The Empress and the Swallows.

Swallows invariably arrive in Austria March 25, and leave September 4 for a milder climate. During a recent sojourn of the Austrian empress at her daughter's (the Archduchess Marie Valerie) castle of Liechtenberg, near Wels, in upper Austria, her majesty took a great interest in some swallows which had actually built their nest in a large chandelier of the grand parlor in the castle. "This nest was so peculiarly built around the main branch of the chandelier that even the chain for raising and lowering the chandelier could be used without any way affecting the comfort of the swallows. On her majesty's seeing the manner in which these swallows had built their nest she was greatly delighted, as it is supposed to bring good luck. She gave strict orders that the birds should not be disturbed, notwithstanding the fact that their presence was raising a valuable carpet and doing much damage generally."—Vienna Letter.

No Doubt About It.

Hearing a faint creak in the darkened hallway below, the elder sister, supposing the young man had gone, leaned over the balustrade and called out: "Well, Bessie, have you locked him?" There was a deep, sepulchral silence for some moments. It was broken by the hesitating, constrained voice of the young man: "She has."—Chicago Tribune.

SINCELL BROTHERS

SECOND STREET, OAKLAND, MD.

Look at the Prices Quoted Below and then Purchase at our Store.

BUY OF US and SAVE MONEY.

OUR WASHINGTON LETTER.

(From Our Regular Correspondent.)
WASHINGTON, Nov. 5, 1894.

Whether it was conscience that made Secretary Carlisle act, or the order of Mr. Cleveland, is immaterial. He has acted, and Mr. Morton's under-conscience, who was unjustly arrested by an over zealous Democratic official and condemned to deportation by another, on the flimsy pretext that he had been brought to the United States in violation of the alien contract labor law, is a free man. This action was only taken after the use of an amount of red tape, which under the circumstances was little short of disgraceful to all who had anything to do with the matter. Before Mr. Carlisle noted the case was formally referred to the Attorney General for a legal opinion and was dismissed at a Cabinet meeting, and yet his decision, that the man was a domestic servant, would have been arrived at by a school boy in one minute after the question was put to him. The fact of the matter is, that the administration has been made ashamed of the whole business by the general condemnation of such peevish methods of trying to make capital against Mr. Morton which this arrest has received from reputable newspapers, regardless of politics.

All of the Republican messengers and watchmen in the departments at Washington and in the custom houses throughout the country having been supplanted by Democrats Mr. Cleveland has issued an order, extending the classified civil service to include those positions, and the country is duly notified that another great advance in civil service reform has been made, and incidentally, that several hundred Democrats who otherwise would have expected to have stepped down and out of the public service soon after the inauguration of the next Republican President—March 4, 1896—now complacently look forward to drawing a government salary for the rest of their lives.

The good things promised with the new tariff law are slow in making their appearance, but some of the bad things it has brought are very much in evidence. For instance, according to the official figures, the public debt of the United States increased more than thirteen million of dollars during the month of October—to be exact, \$13,680,854. The Treasury surplus which the country was assured would soon be accumulated under the new tariff may come in time, but no indications of it are in sight yet, unless one wears peculiarly constructed spectacles.

"I notice," said an Indianapolis man who is in Washington on private business, "that Gen. Harrison

has been letting the public get a little glimpse of a part of his mental makeup that only those fortunate enough to be on terms of personal intimacy with him have known he possessed. I refer to his ability as a humorist of the refined, Oliver Wendell Holmes sort, which bubbled up in several parts of his recent New York speech, which, by the way, has never been excelled in a single speech as a concise statement of the difference between the Republican and Democratic parties. His using the grasshopper, because nobody knows in what direction it will next jump, and which doesn't itself know, to illustrate the position of the Democratic party on the great questions of the day, was one of the aptest hits of the campaign, and I predict that the term 'grass-hopper' will stick to the Democrats during the next Presidential campaign, and longer, if that party survives another national election."

"Like master, like man." Mr. Cleveland's coldness towards the candidates of his party made itself felt very perceptibly in the ranks of the small fry office holders, and it will be strange, indeed, if some of the defeated candidates do not take advantage of the coming session of Congress to let Mr. Cleveland and the country know what they think of such party treason. A month ago it was expected by the Democratic managers that not less than 5,000 Democratic office holders would go to their homes in the several states to vote, and the estimate would have been a very conservative one had Mr. Cleveland not set the example of refusing to register and vote. With that example before them two-thirds of the Democratic office holders concluded to save the price of a trip to their homes. It is said, but that I do not vouch for, that a quiet tip was given to New York Democrats in office, that they would stand better with their superiors if they did not go home to vote. At any rate few of them went, and those who did go were mostly personal friends of Democratic candidates for Congress.

Stray Notice.

Estrayed from my place sometime last spring, a red heifer with a white spot on her forehead and two white spots on left hip. Anyone knowing her whereabouts will please notify
JOHN HOLTSHEDEN.
35-3t Deer Park.

Notice.

Did you hear the crash? Everybody thought it was thunder, but it was only Miller Bros. knocking the bottom out of the prices of horse shoeing. From Oct. 1 to Dec. 31, 1894, you can get your horse shod for 60 cents. The cash must accompany the horse.
30-6t

THANKSGIVING PROCLAMATION.

President Cleveland Names Nov. 29 the Day to Return Thanks.

WASHINGTON, Nov. 1.—The Thanksgiving proclamation issued by the president reads as follows: "The American people should gratefully remember thanksgiving and praise to the Supreme Ruler of the Universe, who has watched over them with kindness and fostering care during the year that has passed; they should also with humility and faith supplicate the Father of all Mercies for continued blessings according to their needs; and they should by deeds of charity seek the favor of the Giver of every good and perfect gift."

"Therefore, I, Grover Cleveland, president of the United States, do hereby appoint and set apart Thursday, the 29th day of November instant, as a day of thanksgiving and prayer to be kept and observed by all the people of the land. On that day let our ordinary work and business be suspended, and let us meet in our accustomed places of worship and give thanks to Almighty God for our preservation as a nation, for our immunity from disease and pestilence, for the harvests that have rewarded our home husbandry, for a renewal of national prosperity and for every advance in virtue and intelligence that has marked our growth as a people."

"And with our Thanksgiving let us pray that these blessings may be multiplied unto us that our national conscience may be quickened to a better recognition of the power and goodness of God, and that in our national life we may clearer see and closer follow the path of righteousness. And in our places of worship and praise as well as in the happy reunions of kindred and friends on that day let us invoke divine approval by generously remembering the poor and needy. Surely He who has given us comfort and plenty will look upon our ministrations of charity as the work of hearts truly grateful and as proofs of the sincerity of our Thanksgiving."

Loch Lynn Heights.

No place along the entire line of the B. & O. R. R. has sprung into notice and development so substantially and rapidly as Loch Lynn Heights. The name itself was not even thought of three months ago by its founder, not a lot had been sold or a house erected for years on the opposite side of the railroad at Mt. Lake Park in what is now known as Loch Lynn Heights. Three new buildings have been erected within the past few weeks eight or ten more are being erected, including a fine three story hotel to cost \$36,000.00, fronting 212 feet and containing over 100 bed rooms, hot and cold water, electric lights,

electric bells, bath rooms, and indeed every modern appliance and convenience. The stone foundation is nearly completed and the contractor, Mr. Enos R. Williams, of Cape May City, N. J., will begin raising the frame work some time this week. When completed it will be a credit to both Loch Lynn Heights and Mountain Lake Park and will supply a long needed want.

Messrs. Sweet & Shackleford, the florists and nurserymen, who have located here, have nearly completed their large and attractive green house just west of the planing mill and will begin in a few days setting out trees and shrubbery and ornamenting the hotel and private grounds.

Mr. E. W. Williams, of Clarksburg, W. Va., arrived here on last Saturday evening with his family and two car loads of furniture, brick and building material, and will begin immediately to erect permanent brick, tile and sewer pipe works on land purchased from Major Alderson on the Little Yough river near the main line of the B. & O. R. R. west of the green house. The siding is now being put in to these works.

Negotiations are now pending with Pittsburgh parties for the construction of a fine roller process flouring mill, which will also grind buckwheat. It is estimated that it will take 5000 barrels annually to supply the demand of this place.

Mr. L. Callis has purchased lots and commenced the erection of a wagon, carriage and blacksmith shop. Three large three story brick mercantile buildings will be erected this spring with a town hall in the second and a lodge room in the third story. There is a good prospect of establishing a college or a high graded institution of learning on one of the hills here next year. Two or more nice churches and other attractive and much needed buildings will be erected next spring. Moral and respectable business men and mechanics are coming to Loch Lynn Heights every day and purchasing lots on which to build or securing employment in their different lines of business. One or two active, intelligent young men, not afraid of work, who can keep books, run a store or do any respectable work required by them can secure a position here now at reasonable salary by applying to J. C. Alderson, general manager of Loch Lynn Heights. Eight to ten more good carpenters can also find employment here on the hotel and other buildings.

MORE ANON.

SHEEP

Shropshires, M. B. Turkeys, 1/2 old fowls also new and three good 2nd hand ENGINES.
T. R. CARSKADON.
Keyser, W. Va.
25-1yr.

Mountain Lake Park.

Think of ninety men at work for the Mountain Lake Park Association. "But the dirt is flying," keeping fourteen carts busy. Eight wagons are hauling rock and two teams are plowing the bed of the lake, to destroy vegetation.

The big ice house is under headway. Masons are putting in the foundation; lumbermen putting in the lumber, and by the date of the issue of THE REPUBLICAN the carpenters will be framing the timbers. It will show well from the railroad. Many are the visitors at the lake.

They come from all parts of the country. It is going to be a lake, no plaything or "make believe" of half an acre, but a body of water covering thirty-three to thirty-five acres. A substantial dam is being constructed on scientific principles. What boating! What fishing! What an ice plant.

The island "looms up in great shape." It can be "seen from afar." It will be a nice ride from the wharf—the new location of the boat house—to the island. The view from the car window of passing trains will advertise the park handsomely.

Not only is it a scene of activity at the lake, but all over the park "gangs" of men at work building new houses, remodeling old houses. Masons, carpenters and painters are all happy, because they are at work. W. R. Johnson went to Martinsburg the latter part of last week to illustrate a lecture for Dr. Davidson.

R. R. Agent Sperry is confined to his home on account of sickness. The Assembly House has nineteen guests.

Parson Arbutnot was circulating in our midst, shaking hands and speaking kind words, visiting homes and making glad the inmates because of "pastoral visits."

The donkey which has gladdened the hearts of Masters Wesley and Arthur Radisill strayed off last Friday noon. It was found on Henry Slater's farm Monday.

Dentistry.

Dr. D. O. McKinley will be in Oakland Nov. 16th and 17th prepared to do dental work. Inquire at D. M. Dixon's, Esq. at McHenry Nov. 19th; Hayes, 20th; at Krug Nov. 21st, and remain until 11:30 a. m., on the 22nd; at Friendsville Nov. 22, 1 p. m., and remain until Nov. 24th, 10:30 a. m. Teeth extracted without pain.
35-2t

Ladies' Wraps.

We have this week opened another new lot of beautiful cloaks. Our \$2.00 ladies fine shoe is a surprise to every one who examines it.

OAKLAND, MD., THURSDAY, NOVEMBER 15, 1894

NUMBER 36.

NEWS OF A WEEK.

Happenings in and About Town told in Short Paragraphs.

Call at Sincell Bros', and see their new stock of clothing, etc.

Mr. F. E. Merrill is confined to his bed with an attack of sickness.

Men's and boys' overcoats and caps at Townshend & Son's. 36-37.

A new line of gloves and mittens at Townshend & Son's. 36-37.

Malette pays highest cash price for game and produce of all kinds.

Mr. J. M. Falkenstein's new residence is almost ready for occupancy.

Malette is giving silverware away. Call and see him and get particulars.

Men's, women's and children's leggins at Townshend & Son's. 36-37.

Mr. Jacob R. Kimmell, residing near Davis' Mills, is ill with typhoid fever.

Just received at Townshend's, a nice line of hoods, fascinators and woolen hose. 36-37.

New style fall and winter cloaks just open at M. L. Scott's Baltimore Store.

The B. & O. is putting in new and enlarged sidings at the freight yard in Oakland.

Malette has everything good to eat at a reasonable price. Try Euclid flour.

William H. Rhoads has applied for the benefit of the insolvent laws. James C. Peddicord trustee.

Blank deeds for sale at this office. The deeds are specially ruled and printed very neatly.

The plasterers are putting the finishing touches on their work at the new school building.

Mr. Mason's mill is still running night and day, and yet he can't get all the work through.

There will be no issue of the *Democrat* next week on account of its moving into new quarters.

The new Commercial Hotel is being pushed toward completion as fast as the weather will permit.

The young people of Oakland are preparing to give their usual Thanksgiving ball at the Glades.

Mr. William F. King is painting the dwelling and store building of Col. A. G. Sturgess on Alder street.

Mr. Louis Gortner has gone into business in his new building on the corner of Second and Oak streets.

Take your produce to Malette. He gives you cash or goods at rock-bottom prices. Don't forget the place.

Send your check books to this office to be numbered. We have a special machine for just this class of work.

We have just received a large and new line of jewelry and silverware. Come in and see us and we will do you no harm. MALETTE.

Mr. Arthur Townshend, administrator, yesterday sold some of the personal estate of the late Henry A. Rasche at public auction.

Mr. M. V. Richards has resigned as Land and Immigrant Agent of the B. & O. to accept a like position with a Southern railroad.

The household goods belonging to the estate of Miss Della Edwards were sold at public auction Tuesday by Mr. E. Z. Tower, executor.

Mr. James M. Latzinger, proprietor of the *Democrat*, is making preparations to move his office into the new Gortner building on Second street.

President of the county commissioners Ira E. Friend, Esq., was unable to attend the meeting of the Board this week on account of an attack of rheumatism.

Daniel Banks, colored, formerly of Oakland, was sentenced on last Saturday in the Circuit Court for Allegany county to serve two years in the penitentiary for larceny.

As one of the results of the election, or something else, Mr. Naylor's planing mill in Oakland started up on Wednesday morning of last week. This mill has been standing idle for more than two years.

Mr. M. Boyle has had erected on his lot a large stable and carriage house for the accommodation of his vehicles and "thoroughbred" racer.

Mr. and Mrs. King Delawder will celebrate the tenth anniversary of their wedding on Monday evening, at which time they will entertain a number of their friends.

A special and important meeting of the Oakland Fire Department is called for to-morrow evening at the engine house. It is hoped that all charter members will be present.

The passenger trains on the B. & O. R. R. will change time next Sunday. No very important changes will be made in the new schedule, however.

A. D. Naylor will have a fine line of cutter sleighs on hand the first of December. Those wanting anything in that line will do well to give him a call. 36-37.

A large number of Italians, who have not been paid for three months on the Roaring Creek railroad, have struck for their pay. They are said to be in destitute circumstances and trouble is feared.

Mr. A. T. Fraley, secretary, on behalf of the Terra Alta Republican Club, extends to the Republicans of Oakland an invitation to be present at the Republican ratification meeting to be held at Terra Alta to-night.

Dick Browning killed a very nice fawn near the Pine Swamp one day the latter part of last week. Several other parties have also been successful in the chase of deer this season, a number having been slain already.

Davis has a female preacher in the person of Rev. Clara Laughlin-well, who has been assigned by the Pittsburgh Conference to the pastorate of the Free Methodist church. She entered on the discharge of her duties October 21st.

Horse runaways are unknown in Russia. No one drives in that country without having a little cord with a running noose around the necks of their teams. When an animal bolts this cord is pulled, and the horse stops as soon as it feels the pressure on its windpipe.

Wanted at Garthright's store, 10 tons buckwheat. Will pay a little cash. Dry-picked poultry, undrawn, fat or no trade, head and feet on. Lots potatoes, if large, wanted. Butter and eggs. Goods are cheap and have plenty of them. Bring poultry and eggs before Thanksgiving. 36-41

A sharp advertiser, who offered for a small sum to supply women with cheap substitutes for hat pins, has been arrested in Boston for misusing the mails. He sent two rubber bands to each inquirer with the advice, "Sew one end to the hat and fasten the other behind one of your ears."

Having sold my meat store to Mr. James Andrews, I desire to close up my books as soon as possible. All persons knowing themselves indebted to me, are hereby notified that they must settle either by cash or note immediately. 34-37 ANDREW SHARTZER.

Since the election is over and the battle for Protection won, we hope our friends throughout the county will send in the news of their several localities. This department of our paper has been neglected for several weeks past, and we hope our correspondents will again resume their weekly news letters.

At the chrysanthemum show in Baltimore last week Messrs. Henry Weber & Sons, of Oakland, were awarded nine prizes for their exhibit, consisting of chrysanthemums, carnations and roses. Of the prizes awarded the Messrs. Weber seven of them were first and two second prizes. Mr. Weber, sr., is now in New York City attending the chrysanthemum show there.

Henry Wilson, the postmaster at Welshton, Florida, says he cured a case of diarrhoea of long standing in six hours, with one small bottle of Chamberlain's Colic, Cholera and Diarrhoea Remedy. What a pleasant surprise that must have been to the sufferer. Such cures are not unusual with this remedy. In many instances only one or two doses are required to give permanent relief. It can always be depended upon. When reduced with water it is pleasant to take. For sale by Oakland druggists.

HERE AND ELSEWHERE.

(Subscribers or readers having friends visiting them or acquaintances visiting other places will please make note of the fact and send to THE REPUBLICAN for publication.—Editor.)

Miss Ella Cornelius is here on a visit to Mr. and Mrs. F. G. Hyde.

Mrs. J. Sewell Spedden and little daughter, of McKeesport, Pa., arrived in Oakland Saturday night. Mr. Spedden preceded them here. They will go to housekeeping in Maryland Cottage.

Mr. John Davis is home from Buckhannon on a visit to his parents, Rev. and Mrs. J. M. Davis.

Mr. John Felty spent Sunday and Monday with friends at Buckhannon, W. Va.

Mr. Joseph Loehheim, of Philadelphia, was in the city Tuesday on business. He had been to Wheeling at the Republican jollification and was on his way home.

Mr. W. P. Hansel, of near Lonaconing, was an Oakland visitor Tuesday.

Messrs. John J. and Daniel J. Brenneman, of District No. 5, were here Tuesday for a short time.

Mr. John B. Harmon, of Bittinger, was in the city Tuesday on business.

Mr. John Shartzler is in New York on business.

Mr. Brison Welch, of McHenry, was here Monday evening.

Mr. James W. White, Register of Wills, made a business trip to Washington and Baltimore last Friday night. He returned to Oakland Monday night of this week.

Mrs. G. A. Bolden, of Terra Alta, was here on a visit to relatives Tuesday.

Mr. E. P. Anderson spent Sunday in Newburg, W. Va., with his parents.

Mr. F. Droese, Esq., of Dale yesterday on business.

Mr. Louis Nydegger, of Gorman, was here yesterday.

Mr. Ed. C. Manown is in Baltimore suffering with an attack of typhoid fever.

Mr. S. T. Davis arrived in Oakland with his wife, formerly Miss Letitia Gay Collett, of Hulings, W. Va., at which place they were married on the 11th inst.

Mr. A. C. Whetsell went to Baltimore Monday to purchase Christmas goods for his store.

Mr. Cook, of Cook Bros., Cumberland, was a business caller at this office Friday.

Mr. Hanson B. Friend, of Deer Park, was here on Friday.

Mr. and Mrs. Henry E. Felty, who spent several weeks with relatives in Martinsburg, W. Va., and vicinity, returned to Oakland one day last week.

Maj. E. G. Rathbone, who has been in Hamilton, O., for several weeks, has returned to Oakland. Mrs. Rathbone has been quite sick for a week or ten days past.

Dr. W. H. Ravenscraft, formerly of Frostburg, has returned to Oakland and will engage in the practice of his profession here. Dr. Ravenscraft left Oakland several years ago and went to Pennsylvania.

Mrs. King Delawder and Miss Mollie R. Peddicord, after a visit of ten days in Westernport, returned to Oakland Friday evening.

Mr. A. P. Dahl, of Wisconsin, a prominent real estate man, is here with the view of locating in Oakland.

Mrs. Hackett and two children, of Washington, D. C., have taken board at the Glades Hotel for the winter.

Prof. S. C. Smith made a business trip to Piedmont yesterday.

Mr. Samuel Loehel, of near Grantsville, was here yesterday on a business trip.

Mr. George E. Bishoff, of Hioyes, Messrs. Joseph Meese and Jonas Glatfelter, of McHenry, were in Oakland yesterday.

Mrs. Percy Proctor, of Cincinnati, was here yesterday.

Miss Bessie Nelson went to Cincinnati, O., last night where she will take a thorough course in vocal and instrumental music.

Dr. J. G. Robinson, Dentist, of Baltimore, has decided to locate permanently here in the town of Oakland, where he will be fully equipped to perform in all branches of his profession. Office with Dr. M. C. Hinebaugh. 35-15.

For a pain in the side or chest there is nothing so good as a piece of flannel dampened with Chamberlain's Pain Balm and bound on over the seat of pain. It affords prompt and permanent relief and if used in time will often prevent a cold from resulting in pneumonia. This same treatment is a sure cure for lame back. For sale by Oakland druggists.

A decree was filed last Friday in the circuit court divorcing Samuel T. Davis absolutely from Jessie G. Davis on statutory grounds. The parties were married in Somerset, Pa., but have lived in Oakland four years. A house of ill fame was raided in Oakland last July, and Mrs. Davis was found in the house by the sheriff. This led to the divorce proceedings. Thomas J. Peddicord represented Mr. Davis, the plaintiff in the case.

Croup is a terror to young mothers. To post them concerning the first symptoms, and treatment is the object of this item. The first indication of croup is hoarseness. In a child who is subject to croup it may be taken as a sure sign of the approach of an attack. Following this hoarseness is a peculiar, rough cough. If Chamberlain's Cough Remedy is given as soon as the child becomes hoarse or even after the rough cough has appeared it will prevent the attack. It has never been known to fail. 25 and 50 cent bottles for sale by Oakland druggists.

W. A. McGuire, a well known citizen of McKay, Ohio, is of the opinion that there is nothing as good or cheap as Chamberlain's Cough Remedy. He has used it in his family for several years with the best results and always keeps a bottle of it in the house. After having la grippe he was himself troubled with a severe cough. He used other remedies without benefit and then concluded to try the children's medicine and to his delight it soon effected a permanent cure. 25 and 50 cent bottles for sale by Oakland druggists.

Mr. Daniel Beeghley, of the Cove, was in Oakland on Saturday and made this office a call. Mr. Beeghley was on his way to Wythe county, Va., where he will visit relatives of his deceased wife and also call on his friends of long years ago. Mr. Beeghley is a man sixty-eight years old and will ride horseback to his destination, a distance of nearly or quite five hundred miles. He resides on the old Hotel Farm on the Bradlock Road and tells us that he has in his possession a number of old Colonial coins which were minted in 1740 and which he found on the farm where he resides.

Take Notice.
All persons knowing themselves indebted to H. J. Mayers will please call and settle at once at the office of Peddicord & Peddicord. Failure to respond will add costs of prosecution to their accounts. 36-21.

For Rent.
Two rooms in my building formerly occupied by the *Mountain Democrat*. These are desirable rooms for offices, etc. Reasonable rate of rent. Apply to J. O. Michael or the owner C. C. Michael, Mt. Lake Park. 36-21

Dead Letter List.

List of mail matter remaining unclaimed in the postoffice at Oakland, Garrett county, Maryland, for the week ending Nov. 17th, 1894, the parties addressed being unknown to the postmaster.

One cent on each article is chargeable for advertising. Parties calling for this matter, will please say it is advertised, otherwise they may not receive it.

E. H. BARTLETT, Postmaster.

Laush.

(Contributed by a very young reader.—Editor.)

Mrs. Bundall came into the kitchen the other day and said: "Bridget, I wish you'd stop whistling, it is so annoying." Bridget, "Why, mum, I am singing a march."

Love, "Won't you give me some candy?" Lover, "Why you are too sweet now."

A Drakeman Killed.

Yesterday morning about three o'clock another victim was added to the large list of railroad fatalities.

George Hines, of Keyser, middle brakeman of an east bound freight train, was knocked from the top of a car at Smithman's bridge in Oakland, and instantly killed. Ten or twelve cars passed over his body and mangled it most horribly.

His remains were gathered up by railroad men and shipped to his home in Keyser on the same train by which he was killed. He was unmarried.

The Sanitary Condition of the Jail.

On Tuesday the Board of County Commissioners of this county was in session and had under consideration the sanitary condition of the jail.

Dr. Henry W. McComas, the health officer, was present and made an examination of the jail. The unused closets are under the jail floor and it is asserted by persons who have been in the jail for a number of years, if ever. The closet now in use emits odors that are very offensive to persons outside of the jail building, and the odor on the inside is said to be simply horrible.

The health officer suggested several plans looking to the removal of the disease-breeding germs, but none seemed feasible, and it was suggested that the State Board of Health be called to visit the jail and formulate some plan by which the building may be put in a thoroughly safe sanitary condition and all danger of disease to the inmates of the jail and the sheriff's house removed.

The State Board may be here sometime this week to make the examination.

Dentistry.

Dr. D. O. McKinley will be in Oakland Nov. 16th and 17th prepared to do dental work. Inquire at D. M. Dixon's, Esq. at McHenry Nov. 19th; Hioyes, 20th; at Krug Nov. 21st, and remain until 11:30 a. m., on the 22nd; at Friendsville Nov. 22, 1 p. m. and remain until Nov. 24th, 10:30 a. m. Teeth extracted without pain. 35-24

Valuable Advice.

Avoid lawsuits and loss by consulting H. P. Tasker and examining his abstracts of the "conflicting titles" before paying for Military Lots. Charges reasonable. Office in Colardeau Cottage, opposite the bank, Oakland, Md. 41-4f.

Will You Suffer

With rheumatic pains, sciatica, sleepless nights, dropsical accumulations, or nervous headaches when Messrs. Cober & Boyer will cure you if their directions are followed. Can be consulted at the Central Hotel or at their room in the Pritchard building, Oakland, Md.

Estray Notice.

There came to my place near Deer Park, about July 1, a dark red yearling bull, without marks of any kind. The owner will please come forward, pay all costs and damages and take same away. W. M. THICKITT. 34-3t

Ladies' Wraps.

We have this week opened another new lot of beautiful cloaks. Our \$2.00 ladies fine shoe is a surprise to every one who examines it. M. L. SCOTT, Baltimore Store. 35-2t

Hurray for the Opening of my New Store, Cor. Oak and Second Sts.

Having just returned from the eastern cities with a full line of General Merchandise, goods that will be sold for cash or trade only, will sell at 25 per cent. cheaper, which will be an advantage for fathers, mothers, brothers and sisters, uncles and aunts. Come one and all and give me a call and get the prices to suit your taste. I trust all my former customers and many new ones will grasp this opportunity and help me in my new venture. Yours respectfully, LEWIS GORTNER.

The Jollification at Oakland.

On Monday evening the Republicans of Oakland and vicinity held a ratification meeting in O'Fallon's Hall, which was addressed by Mr. David W. Sloan, of Cumberland, Mr. Julius Scher, of Eglon, W. Va., and Mr. E. H. Sincell. The hall was filled to overflowing, among the crowd being a large number of ladies.

It was the desire of the committee to have a torchlight procession prior to the speaking, but the bad condition of the streets and the cold weather cut this part of the program out. Then, too, it was expected that Mr. Wellington would be present, but business matters called him to Baltimore.

The speakers of the evening were listened to with attention and were often interrupted with storms of applause.

Smith's Military Band, of Oakland, which is gaining a wide reputation as one of the best musical organizations in Western Maryland, was present and rendered some of its best selections.

Death of Mr. Charles Jennings.
The following notice is taken from the last issue of the *Canton (Pa.) Sentinel*:

"Charles Jennings, died of typhoid fever at the home of his parents in this place Tuesday evening. For some months he had been working for the Enterprise Tanning Company, at Hutton, Md., and was not being able to gain strength. He came home on a visit, hoping the change might be of benefit. But within a few days he was compelled to take to his bed, and typhoid fever in its violent form developed, resulting in death in about a week. Mr. Jennings was a man well known and highly esteemed in this community, and his death in the vigor of young manhood is a sad blow to his relatives and friends. He leaves a wife and one child. The funeral was held at the residence of his father, E. A. Jennings, yesterday afternoon."

Mr. Jennings was a brother-in-law of Mr. U. G. Palmer, secretary and treasurer of the Enterprise Tanning Co.

It May do as Much for You.

Mr. Fred Miller, of Irving, Ill., writes that he had a severe kidney trouble for many years, with severe pains in his back and also that his bladder was affected. He tried many so-called kidney cures but without any good result. About a year ago he began to use Electric Bitters and found relief at once. Electric Bitters is especially adapted to cure all kidney and liver troubles and often gives almost instant relief. One trial will prove our statement. Price only 50c. for large bottle. At all Drug Stores.

Rogers' Sarsaparilla.

A specific for all 100 doses for 75 cents. Rogers' Little Liver Pills, best on the market; Cough Cure, Liniment, Appetite and Worm Syrup, sold by A. G. Sturgess, Oakland; Cuyper Bros., McHenry; J. A. DeBerry, Corinth; C. F. White, Hutton; P. T. Garthright, Hayden & Eekles, Mt. Lake Park; Dr. Laughlin, Deer Park; Wm. Frederick, Friendsville; Young Store Co., Jonas Frazee, Robert Liston, Selbyport; W. Wass, Mineral Springs; J. E. Gnagay, Accident; Smith & Callis, Hioyes, and by all general dealers.

A Quarter Century Test.

For a quarter of a century Dr. King's New Discovery has been tested, and the millions who have received benefit from its use testify to its wonderful curative powers in all diseases of the Throat, Chest and Lungs. A remedy that has stood the test so long and that has given so universal satisfaction is no experiment. Each bottle is positively guaranteed to give relief, or the money will be refunded. It is admitted to be the most reliable for Coughs and Colds. Trial bottles free at all Drug Stores. Large size 50c and \$1.00 6

When Baby was sick, we gave her Castoria.

When she was a Child, she cried for Castoria.

When she became Miss, she clung to Castoria.

When she had Children, she gave them Castoria.

Ryland, Friendsville.

Piles.

Piles is so common that
every other person you meet is
troubled with it more or less. It
seems to be a little thing and usu-
ally gets little attention. It may not
be serious at first, but it makes a
man sick—makes him nervous,
cross, irritable—unfit for business.
It robs him of sleep, takes his ap-
petite—cuts down his flesh—and
yet he is careless about it.

will cure Piles. It will cure other
things, too, but it is particularly
good for Piles. It stops the itch
and the ache at once. It may take
several days to wholly rid the in-
flammation and reduce the swelling,
but it will do it—sure. Has done
it in innumerable cases. Never fails.

Good for Eczema, Ring Worm,
Tetter, Itch, Salt Rheum, Dandruff,
Pimples, and all Skin Diseases.

50 Cents—Drug Stores.

FINANCIAL REVIEW.

Henry Clews' Weekly Letter on the
Business Outlook.

New York, Nov. 10.—The chief
matters of interest in Wall street,
during the past week, has been the
result of the elections. The first
effect was a sharp spurt of activity
and an advance of about one point
in prices, which, however, was fol-
lowed by a reaction to about the
closing prices of Monday, owing to
realizations by a class of worried
holders who have been waiting for
an opportunity to get out. This,
however, is not to be regarded as
expressing the real and ultimate
result of the surprising change in
political sentiment. The party
revolution so far exceeded anything
that had been expected that every-
body was taken by surprise and
none were prepared to discount, on
the instant, the great practical
importance of the change. To give
effect to an event of such magnitude
some organization and co-operation
is needed, and the more influential
operators have therefore deferred
action until combination can be
organized.

The election prepares the way for
a new set of conditions calculated
to clarify the political situation and
to bespeak public confidence.

(1) In the first place it affords
evidence of the vast increase of the
independent element in politics;
which implies that the more intelli-
gent and conservative classes are
taking a deeper interest in govern-
ment and are resolved to have po-
litical questions treated more on
their merits and less from a parti-
san standpoint.

(2) The verdict equally expresses
public intolerance of such corrupt
double-dealing as disgraced the
Senate in the late settlement of the
tariff question; and it similarly
shows the indignation in the nation
at large at the revelations of unpar-
alleled fraud in the public depart-
ments of this city, brought out by
the Lexow committee. These are
signs of a wholesome resolution
among the people at large that
politics shall be purged of the now
prevailing corruption—a symptom
which is immeasurably valuable as
conveying an assurance of a higher
standard of morality in our future
political administration.

(3) The vote also expresses the
beginning of a decline in the popu-
lar sympathy with the yagaries and
unsettling projects of populism;
which has a direct bearing upon an
important class of investments and
bespeaks a sounder basis of finan-
cial honor in sections that have
been exposed to serious distrust.
To the same extent, it suggests a
hope of the early elimination of
this perverting and corrupting ele-
ment from congressional legislation.

(4) The result also simplifies the
future of legislation. In place of
inter uncertainty as to the disposi-
tion of Congress on fundamental
matters of legislation, it brings the
country back to the control of a
party whose general policy has been
indicated by a long tenure of power;
and though there may be differ-
ences of opinion on parts of the policy,
the withering influence of uncer-
tainty as to the future of certain
vital working arrangements is very
largely removed. This is a large
contribution towards the remedy of
the now widely unsettled state of
confidence.

(5) The election also means the
removal of the tariff question be-
yond the reach of further agitation;
for while it may be taken for
granted that Congress can do noth-
ing more in respect to the sugar
duties and to certain raw materials,
it seems equally certain that the
party returning to power will allow
the new tariff to remain undisturbed
until at least it has had a sufficient
trial of experience.

(6) We take it also, that the
change of government means a
serious effort to reform our currency
system. The overwhelming major-
ity will make the next Congress
and administration less dependent
upon conciliating the clamor for
free coinage of silver and for fiat
money; and as Republican leanings
toward those heresies have doubt-
less been due much more to mo-
tives of factional accommodation
than to any real disregard for sound
money, the hope for conservative
legislation on the currency question
is thus very greatly strengthened.
It is probable that this view will be
taken abroad, with the result of a
material strengthening of the for-
eign confidence in our investments
which has been so rudely shaken
by the uncertain attitude of Con-
gress upon this, the chief signifi-
cance of the political revolution lies
here—that, while the advent of
Democracy to power suggested a
long series of radical changes in
matters affecting the nature of the
laws and the regulation of our trade
finances, yet the truth is that,
whatever may have been urged in
favor of such a policy, the people
do not take kindly to the prospect
of so much change and uncertainty
as the "reforming" involves; they
are more concerned with the
present than the future; they want

the shortest cut to a renewal of
prosperity; they prefer putting up
with some things of which they may
not theoretically approve to so
much reconstructing as the party
now in power proposes; and they,
therefore, say to the late discarded
party: "Take the reins again; we
have given you a few lessons; if you
will take them to heart, we are pre-
pared to trust to your future con-
trol rather than throw everything
into confusion by too much experi-
menting." This, we take it, is
about the meaning of the business
man's vote. The motive will com-
mend itself to the sound common
sense of the country; and, when
supported by such an immense ma-
jority of the people, it becomes a
very powerful contribution to future
stability and confidence.

As we read current sentiment this
is about the interpretation Wall
street puts upon the great event of
Tuesday. The effects, from this
time forward, on investments and
on general confidence can hardly
fail to be very important; and we
look for a strengthening of values
that will later develop into a more
active and rising market for stocks.

HENRY CLEWS

Savage River.

Snow has again made its appear-
ance.

Our school is progressing nicely
under the management of Mr. H.
F. Kahl. He deserves great praise.
Mrs. Maggie Custer and daugh-
ter have returned home from West
Virginia, where they had been visit-
ing friends and relatives. Whooping
cough is still raging in
our vicinity.

Mr. Warnick's house is about
ready for plastering.

Mr. T. J. Miller was at Lonacon-
ing on business last week.

Mr. A. Moore is working for B.
F. Snyder.

Mr. Wm. Clark has taken the
contract of hauling props.

Mr. Thomas Miller has purchased
a fine horse from P. P. McAndrews.

Warnick Bros. have taken the
contract of sawing lumber and
shingles for the Lonaconing com-
pany.

Miss Ada McIntyre contemplates
visiting friends at Barton in the
near future.

Some of our young folks attended
the quarterly meeting at New Ger-
many Sunday last.

Mr. G. L. Broadwater is lying
very low. Dr. Warnick pronounces
him incurable.

Selbysport.

Coon husking is nearly over and
it should be finished before Nov.
27th.

Our Democratic brethren will
hold their election on Nov. 27th.
They were not on hand to vote
Nov. 6th.

W. W. Echard, Esq., of Mellen-
ry, paid us a visit on the 8th.

Diamond Dan's new Wellington
hat is red, white and blue. In '92
it was in black.

Many Democrats here want to
know if the Republicans are through
voting in West Virginia yet.

Lewis Wellington Whitehouse
Prazee made his appearance on our
street the 13th.

Since the election our lumber and
tie dealers get out very early. Tim-
ber men are on our street daily
wanting to purchase timber.

Nov. 27th is your last day to
vote brother Democrat. All turn
out and have a good election.

Some of our girls here want to
know if Mr. G. L. Wellington is
married. They have their eye on
him.

Real Estate Transfers.

Following is a list of the real
estate transactions as recorded in
the Clerk's office since our last
report:

Orval A. Welsh and wife to Dora
E. Strenell, 25,750 square feet of
ground in the town of Friendsville;
\$200.

Sarah Yoder to Sarah C. Pysell,
lots Nos. 2, 12, 13 and 13 in Mc-
Henry; \$100.

Mt. Lake Park Association to
Miss E. B. Swan, lot 198 in Mt.
Lake Park; \$1, etc.

Emil F. Droege and wife to Geo.
Truesdell, part of a tract of land
called "Deer Park;" \$785.87.

John T. Geary and wife to Geo.
D. Frantz, 6,300 square feet of
ground in Friendsville; \$40.

Mt. Home Co. to Caroline C.
Hughes, lots Nos. 3 and 4 in Block
16 of Loch Lynn Heights; \$120.

Gilmer S. Hamill and John B.
Harmon to John Shaw, military
lots Nos. 2334, 2335, 2339 and 2400,
200 acres; \$9200.

Mt. Home Company to the Loch
Lynn Heights Hotel Company,
hotel reserve in Loch Lynn Heights;
\$1, etc.

George W. Wilson and wife to D.
Webster Wilson, part of "West
Point," 161 1/2 acres; \$1617.50.

Mt. Home Company to Rev. W.
E. Powell, lots 1 and 2 in Block 7
of Loch Lynn Heights; \$180.

J. C. Alderson and wife to Rev.
W. E. Powell, lots 1 and 2 in Block
39 of Alderson's Addition to Loch
Lynn Heights; \$147.

Mt. Home Company to the

American Baptist Home Mission
Society, church reserve TT in
Loch Lynn Heights; \$1.

James D. Murray et al. to Dan'l
J. Breuneman, two parcels of
ground in Garrett county; 105.

Obituary.

The cup of sorrow in this fallen
world is speedily transferred from
lip to lip.

After a lingering illness of nearly
five weeks, Mrs. Deila C. Wegman,
of Oakland, the loving and obedi-
ent wife of Chas. Wegman, and a
cherished daughter of Jesse and
Eliza Michael, of Firm Rock, was
called from the portals of time into
eternity on the 5th of November at
10:30 p. m., aged 24 years, three
months, three weeks and five days.

The cause of her death was
pneumonia. She was first stricken
down with typhoid fever and after
four weeks suffering the fever was
finally subdued, and just when the
friends and relatives were building
hopes of her recovery, and too when
she herself seemed to rejoice that
she was recovering, she was again
stricken with pneumonia, which
brought tears to her own eyes and
grievous to those around her. And
in her already weak physical condi-
tion she was unable to stand the
suffering, and her spirit took its
flight. It was as if God had said to
her, "Come ye blessed of my Father,
inherit the things prepared for you
from the foundation of the
world."

She was a consistent member of
the M. E. church at Firm Rock
for ten years, and from almost the
last words spoken by her in which
she said, "I am going home, I do
not fear death," the relatives and
friends may rest assured that she
simply sank into the arms of Jesus
to be born to the everlasting rest—
transplanted into a fairer clime,
where there is no more death, no
more suffering, no more tears.

"There everlasting spring abides,
And never withering flowers."

Her remains were brought to Firm
Rock, at the home of her parents,
on the morning of the 6th, and on
the evening of the 7th her funeral
was preached at Firm Rock church,
Rev. Hubbard, pastor of M. E.
church south of Piedmont, officiat-
ing. He gave an impressive and
interesting talk from the 4th chap.
and 13th verse of Thessalonians.
The words were these: "But I would
not have you to be ignorant brethren,
concerning them which are
asleep; that ye sorrow not even as
others which have no hope," after
which the remains were taken to
the family burying ground and laid
in their final resting place.

The large concourse of people
who gathered to listen and to pay
the last tribute of respect to our
deceased friend, proves that she
had many warm friends, and that
the husband, father and mother,
brother and sisters whose cup of
sorrow had run full, have the sym-
pathy of the entire community. To
the bereaved husband, who has
enjoyed domestic felicity for so
short a time, ten months, we would
say, trust in the Lord and all will
be well, and He who watches the
sparrows as they fall to the ground
has said, "I will never leave thee
nor forsake thee."

"Let me go for I am weary
Of the chain which binds me here,
Let my spirit bend its pinions
To brighter, holier sphere,
Earth, its true, his friends to bless me
With their love and faithful love,
But the hands of angels beckon
Me to brighter worlds above."

"Let me go for earth has sorrows,
Sins, and pain, and bitter tears;
All its paths are dark and dreary;
All its hopes are fraught with fears;
Short-lived are its cherished loves,
Soon its cherished hopes decay;
Let me go I fain would leave it,
For the realms of endless day."

"Let me go, my heart has heaved
O'er my Savior's wondrous grace;
Let me go where I shall ever
See and know His face to face;
Let me go, the tears of Heaven
Rise before me, waving bright,
And the distant crystal waters
Flash upon my falling sight."

"Let me go for songs soraphic,
Now seem calling from the sky;
'Tis the welcome of the angels,
Which even have now hovering nigh,
Let me go they wait to bear me
To the mansions of the blest,
Where my spirit, worn and weary,
Finds at last its long sought rest."

Marriage Licenses.

Following is a list of the mar-
riage licenses as issued by Clerk
Tower since our last report:

Sylvester Markley and Ida May
Sines, both of Garrett county.

Sammuel Rodeheaver, of Somer-
field, Pa., and Maggie Sisler, of
Garrett county.

Wade Hampton Simmons, of
Wilson, and Priscilla Motes, of
Garrett county.

George Joseph Hensen, of Oak-
land, and Lizzie Dietrick, of Gar-
rett county.

William Milton Fisher and Clara
Speicher, both of the Cove, this
county.

Two with request not to publish.

Married.

MARKLEY-SINES.—On Nov. 7th,
1894, at the residence of the officiat-
ing minister in Oakland, Rev.
Dr. Isen, Sylvester Markley and
Ida May Sines, both of this county.

CASTORIA
for Infants and Children.
"Castoria is so well adapted to children that
I recommend it as a superior family prescription
known to me." H. A. Acheson, M.D.,
111 So. Oxford St., Brooklyn, N. Y.
"The use of 'Castoria' is so universal and
its merits so well known that it seems a work
of supererogation to endorse it. Few are the
intelligent families who do not keep Castoria
within easy reach." CARLOS MARTIN, D.D.,
New York City.
"For several years I have recommended
your 'Castoria,' and shall always continue to
do so as it has invariably produced beneficial
results." EDWIN W. PARKER, M.D.,
123rd Street and 7th Ave., New York City.
THE CASTORIA COMPANY, 77 MURRAY STREET, NEW YORK CITY.

BALTIMORE BARGAIN HOUSE

HAS NEWS FOR YOU.

We are cutting our prices on account of the low tariff.
The Old Stand, C. C. Michael's building on
Railroad Street.

Men's all wool suits heavy weight, others ask \$8.00, our price
\$3.75.
Men's fine dress suits, others ask \$15.00, our price \$8.00.
Men's good working pants others ask \$1.25, our price 62 cents.
Men's fine dress pants, handsome patterns, others' price \$5.00, our
price \$3.00.

LADIES' CLOAKS.

All of them the latest styles and lowest prices, and some as low as
\$2.50.
Our prices lead when we give you dress gingham, the prices the
world over 10 cents, our price 5 cents.
Good 4-4 width brown muslin others price 7 cents, our price 54.
Best 4-4 brown and bleached muslin, others price 9 ets., our price 4 ets.
All wool red and white flannels, others price 25 ets., our price 17
cents. All colors cotton flannels we sell at low prices.

DRESS GOODS DEPARTMENT

is stocked with the Latest Novelties at prices way down.

Remember we have not only the above goods, but

Hats, Caps, Boots, Shoes, Ladies' and
Gents' Underwear, Etc., Etc.

BALTIMORE BARGAIN HOUSE.
J. SHAPIRO & BRO.,
Oakland, Md.

Free! Free! Free!

Silverware! Silverware!

Say, do you know that we are positively giving away
some of the finest silverware ever brought to Oakland?

Don't fail to Call and get our Plan

Come early and take your choice of Butter Dishes,
Pickle Castors, Sugar Bowls, Cream Pitchers, Spoon Hold-
ers, Syrup Pitchers, Cabinet Knives, Cabinet Forks, Etc.

We wish everyone to know that we have just received
one of the newest and largest lines of jewelry in the country.

We Also Have the Best of Everything Good to Eat
and at prices to suit the hard times.

N. B.—Don't forget that we will have the finest and
cheapest line of Christmas Goods in town. Give us a
call.

Very truly,
W. H. MALETTE,
Fancy Grocer and Jeweler.

The Republican.

BENJ. H. SINCELL, Publisher.

OAKLAND, GARRETT CO., MD.

THE CHOSEN BOY. AND THE RESCUE.

RUFUS HALL.

WHEN the gun-
boat Plover had
anchored off the
west coast of
Australia, and
the few settlers who lived ashore op-
posite to her learned that her captain
was in want of a cabin-boy, there were
many applications for the berth. But
the first lieutenant, Mr. Darrel, who
was to choose the new hand, could
find no lad to suit him. While he was
still waiting to be satisfied, David Dar-
rel, his son, a fine, spirited youth of
sixteen, was one morning paddling a
small canoe among the rocks, reefs and
sandy islets that skirted the shore, as
he had been in the habit of doing, now
and then, since the vessel came to an
anchor, when he noticed four boys on
a little island ahead breaking to pieces
with a hatchet and the butts of axes,
which they had taken from their own
boat, a skiff evidently belonging to
another boy, who was vainly strug-
gling with them to save his property.

Dave's canoe was a light, swift one,
which the lieutenant had bought for
him at Sumatra, to enable him when he
had the time to amuse himself by
cruising about the shores of such
places as the bark might visit during
the voyage.

Urging the vessel swiftly forward,
and calling upon the boys to desist
from their destructive work he soon
reached the island.

The lads there who had been break-
ing the skiff had not heeded him; the
little boat now lay shattered at their
feet, and they were about to attack
and beat the owner of the destroyed
skiff when Dave arrived.

The person who was not more than
fourteen years old, was a Kanaka, or
native of the Sandwich Islands, slim
and straight, with long, black hair
and wild, bright eyes.

"Back, there!" shouted Darrel, as his
canoe grated on the sand, and he
sprang out, confronting the young
ruffian.

"He's nothing but a 'donah' of a
Kanaka!" cried one. "He wanted to
go and try to ship as cabin-boy aboard
your gun-bark, but they wouldn't
take any of us whites there, and we
weren't agoin' to give this covey
savage a chance for the place. He's
no good. Nobody cares for 'Kanaka
Jack'."

"You are mean coveys for breaking his
skiff," said Dave.

"Are we? Well, you'll see we are
coveys that can bite as well as bark."

The speaker, and his companions
were then about to spring past Dave
at the Kanaka, when the lieutenant's
son, again confronting them, hurled
the foremost one against his fellows.

"Touch that boy at your peril!" he
cried. "Away with you!"

Not daring longer to run the risk
of opposing this youthful officer from
a war vessel, the young scoundrels
took to their boat and sullenly rowed
away.

"The little Kanaka thanked Dave for
befriending him. He said that he had
been cast away months before, from a
wrecked brig, on this coast. Disliked
by the boys among the settlers, he
wanted to leave the place, and would
be glad to ship aboard the gun-bark."

"Now they have broken 'Kanaka
Jack's' skiff, him not can earn nothing
at fishing any more," he mournfully
added.

Darrel took him to the bark and
tried to persuade his father to enlist
him as cabin-boy. But fearing that
the lad's imperfect knowledge of Eng-

lish would hinder his understanding
orders, the lieutenant at first objected.
His son, however, so earnestly pleaded
for the boy that the first officer at last
consented to give him a trial. It was
then found that he correctly guessed
if he did not exactly comprehend,
what was said to him, and, as he was
neat, active and obedient, the captain,
before many days had passed, told the
lieutenant he was very well satisfied
with the little fellow. Now and then
he was permitted to accompany Dave
in his canoe, when, being very grate-
ful to his benefactor, he would some-
times dive and bring him up presents
of beautiful shells from the rocks
under the ocean.

The Kanakas, who go in the surf al-
most from infancy, are wonderfully
expert at swimming or diving, and
Jack could remain for a minute under
water, darting into and out of su-

marine caves or gliding among the
silly tassels of the weeds far down in
the deep.

At one time, while out in the canoe
with Jack, Dave, thinking he might
conclude to take a bath, wore only a
light swimming suit, except that he
had on his jacket over the thin under
garment.

The weather was very warm, for it
was the season of the Australian sum-
mer.

Swarms of buzzing flies darkened
the air about the numerous large ant
hills between the coast and the moun-
tains, and the shellfish on the rocks
boiled as if they had been baked by
the heat.

Presently, when close to a long,
wide reef, Jack sprang out upon it to
procure for his companion some of the
beautiful shells culled by the Aus-
tralian natives from the rocks, which he
knew to be found about fifty yards
ahead, where the reef was inaccessible
for the canoe on account of its being
skirted by low, pointed rocks.

After the Kanaka was gone, as Dave
was taking off his jacket, too warm for
that sultry day, his midshipman's dug-
ger, by its short, slipping from the
breast pocket of the garment, fell into
the sea. The lad, who was an excel-
lent swimmer, resolved to try to re-
cover the knife himself, instead of
troubled Jack to come away back and
get it for him. Having hastily stuffed
his jacket in his canoe, he looked about
into the clear water, which at this
place was about eighteen feet deep,
and he could see the red sheath, as it
slowly sank. In the canoe there was
a coil of rope about twenty feet long,
with which, by fastening it to a stone,
he would sometimes anchor his canoe.
As a precaution, he secured one end of
this line about his breast and tied the
other to the middle thwart of the
canoe. Should he be taken with cramp
or otherwise he hindered from coming
up, after going down, Jack, to whom
he now called out, making for the
intention, could haul him to the sur-
face by means of the rope. Without
waiting for the Kanaka's answer, he
dived, but, keeping his eyes open as he
went under, he was not more than two
fathoms down when he was startled at
seeing a strange monster emerge from
the shadow of a projecting shelf of the
reef. Swiftly it swam diagonally up-
ward, working a large pair of hand-
shaped flippers or fore-limbs as if they
were paddles. The big head, the eyes,
the flat nose, the distended nostrils,
and even the mouth, bore some resem-
blance to those of a snake, or a porpoise.
The animal, fully nine feet long,
was of dark color, except about its un-
der part, which was streaked with
white, and its body, thick in the mid-
dle, tapered to slender proportions to-
ward the crescent-shaped tail.

The boy hurriedly rose to the sur-
face. When he reached it he beheld
the singular creature that had alarmed
him, and which was now nearly twelve
feet away, making for a clump of
water-soaked grass that had evidently
drifted from some point far up the
coast. This grass was close to that
part of the line which projected from the
canoe, with one end of it tied, as al-
ready stated, about Dave's breast.

The sleek coils between the canoe
and the boy lay twisted into numer-
ous turns and bights, a little below
the surface of the water. The monster
was very near to these, when it dived
forward with open mouth, showing
two rows of canine teeth, and caught
the clump of grass between its jaws.

"Kanaka Jack," who while nearly a
hundred and sixty feet away had, as
he gathered the shells, been watching
for Dave's reappearance, was now fast
approaching the place where the reef
opposite to which he had come up.

"Hurry! Unfasten line!" he said to
Darrel. "Him dugger—too close to
line—fraid get caught!"

Dave valiantly tried to untie the line
about his breast. The knot having
hardened from being wet, was a diffi-
cult one, and he awkwardly tugged at
it there in the water, he anxiously
watched the creature that Jack had
called a dugger.

He had often heard of but had never
before seen this strange animal,
which is of the family of the manatee,
or manatee, which lives on shore as
well as in the water, and will eat hay,
grass and herbs.

He now swam for the reef, from
which, while keeping himself aloft,
he had drifted about fifteen feet. The
dugger, in a nearly perpendicular po-
sition, with its head and its white
streaked breast above the water, but
facing a little away from the lad, whom,
evidently, it had not yet seen, was
quietly chewing the grass, while
gently working its big, hand-shaped
flippers up and down.

Dave, raising his gaze from it to-
ward the Kanaka as he swam, noticed
that the youth, still rapidly approach-
ing, had dropped the shells he had col-
lected and drawn a small sheath-knife
from a belt about his waist.

"What are you going to do with the
knife, Jack?" he shouted. "I don't
think the fish will attack me."

"No—no—we want to cut line," was
the answer. "Hil, hil! Ne thought so!
You speak too loud and frighten him!"

In fact, on hearing Darrel's shout,
the monster gave a wild shiver and
dived, as if alarmed, its body becom-
ing entangled among the many sub-
merged bights of the slack line. Two
of these bights caught about its form,
close to its forelimbs, when up it again
came, darting swiftly along, alternat-
ly rolling, leaping and plunging, in
and out effort to disengage itself from the
rope.

There was a length of about twelve
feet between the part of the rope
which was around its body and that
part which was fast to Dave, while
about eight feet of the line extended
from the creature to where the hatch
had been secured to the bow of the
canoe. As a consequence, the rope
soon became taut, when both the
boy and the canoe—the latter present-
ly capsizing—were dragged along after
the enroving animal.

Dave's situation was perilous in the
extreme. He was obliged to use his
hands and feet vigorously to keep his
head above water as he was drawn vio-

lently along. Now and then he would
momentarily beneath the surface by the
plunges of the monster. It would only
be temporarily, for the animal would
come up again with a wild leap. But
Dave was becoming weak and faint
from these rude jerks and submersions.

He feared that the dugger, when it
was tired of the sport, would drag him
down, dragging him along under the
sea, where he must soon perish.

Its course was parallel with the
reef, about fifteen feet from it, and
away from the Kanaka boy, who, frus-
trated in his attempt to reach the
position from which would enable him to
effect the imperiled lad's rescue by
swimming out to him and cutting the
line.

Presently the dugger, as if con-
scious that it could not extricate itself
from the line by thus speeding on,
commenced to swim to and fro in zig-
zag directions, now and then rolling,
plunging, springing, bending itself al-
most double and beating the sea to
foam with its strong tail.

The Kanaka soon arrived opposite
to it. Heedless of his danger, with his
knife between his teeth, he swam out
into the midst of the foaming waves,
which the alarmed dugger, now cir-
cling round and round, was constantly
thrashing with its flukes. Nimbly
dodging these tremendous strokes and
narrowly escaping them, he kept sear-
ily succeeded in reaching that point of
light from which would enable him to
cut the line which must be cut to free
Dave, when the monster, as if fright-
ened, gave one mad leap away from
him and slantingly dived. The line,
quickly recoiling from Little Jack, be-
came taut before he could swim to it,
and Dave was dragged under the sea,
where he lay about thirty feet deep.

As he was drawn down strange
sights met his vision there in the
depth. He saw below him submarine
reefs, waving their long, drooping
filices, which, illumined by the faint
light from above, looked like silver
threads. As he sank among these
slimy, glistening meshes shoals of
curious fish, startled in their sea
tower, darted round him with big,

globular, protruding eyes. Others, evil,
and starting, seemed to glare at
him from the multitude of little crea-
tures—the cephalopods that clung to
the holes in the tall, porous rock from
which the weeds hung, but the
dugger, as it descended, sped toward the
line, which had been somewhat
checked by the resistance of the over-
turned canoe, which it had also drawn
with it, and which, as the rope was
fastened to the middle thwart, had
been opened as a sort of drag. The
monster, having reached the reef, after
Dave, to reach him in about ten
seconds.

The Kanaka, as already implied, was
"at home" in the water. Down went
his agile form, sliding as easily as a
dolphin's through the depth, and, with
one stroke, he was at the bottom, cut-
ting the line that held his friend. He soon
rose to the surface with the gasping
lad, and, still supporting him, he
swam with him to the reef.

Dave had been under water nearly
half a minute. While, attended by
his rescuer, he was recovering from
the effects of his late trying expe-
rience, fragments of the canoe, which,
dragged along submarine reefs, had
been crushed, rose near the reef to the
sea surface, ahead.

Assisting the tired lad, the Kanaka
now proceeded along the reef to its
extremity, where he found the end of
the bark, which was at anchor a league
away. The boys then beheld the dug-
ger, now free from the coils of line,
extended on a flat rock that rose a few
inches above the sea, not far off.
Pulling through its big mouth and nos-
trils, and with its hand-shaped flip-
pers spread out, it lay as if for a rest
after its late exertions. Presently,
turning its great head, which had been
averted from the lads, it saw them,
and instantly plunged beneath the
water. Jack now signaled the Plover
by waving his kerchief. A cutter came
and the boys were picked up and taken
to the bark, where Dave gave his par-
ent an account of his adventure.

The lieutenant was very grateful to
Jack for rescuing his son, and prom-
ised to promote him if a chance for so
doing should offer. He now regretted
how fortunate it was that he had
chosen for his cabin boy this Kanaka,
who, by his courage, united to his
skill in swimming and diving, had
saved the life of his only son.—N. Y.
Ledger.

Fame.

"Look you," said Constance Mull
Galloway. Then she tilted him in fa-
vor of a policeman who had got his
picture in the paper for accepting a
bribe. "I cannot marry an obscure
man," she explained, coldly. "I will
be avenged," he cried, merely. He was
true to his word. When he was cured
of a torpid liver and was honored with
a quarter-page portrait in the press he
couldn't notice the little girl he once
had loved. She in turn could only
kiss herself as if her heart would
break.—Detroit Tribune.

—So great is the effect of cleanliness
upon man, that it extends even to his
moral character.—Ranford.

EFFECTS OF SEA AIR.

Usually favorable, but There Are Excep-
tions From a Medical Point of View.

The meteorological features of sea
air, though necessarily varying widely
according to latitude, prevailing winds,
and local conditions of shelter, have
certain more or less fixed characteris-
tics. Sea air is everywhere somewhat
moist; it is generally of relatively high
density; it is always more or less in
motion and it is to some slight extent
impregnated with saline particles; it
is, on the whole, much more equable in
temperature than inland or mountain
air.

As regards its physiological action
upon the healthy organism, sea air is
usually tonic—i. e., it promotes the
process of nutrition; it is also very gen-
erally stimulant—i. e., an excitant of
the nervous system—but to this rule
there are many exceptions. Warm and
moist sea air, combined with conditions
of local shelter, may even be decidedly
sedative in character. There seem to
be grounds for believing that sea air is
always more or less provocative of
metabolism and tissue change in the
organism. The influence of sea air
upon those who are in ordinary health
is, in the great majority of cases, bene-
ficial. Those who are well at home
experience in most cases an accession
of vigor at the seaside; those who are
languid and debilitated from overwork
or long-continued strain, apart from
actual illness, obtain a like benefit
from sea air. In these cases the
justification of the very common
practice of making a sojourn at some
marine resort part of the ordinary
programme of the year. In such cases
as the above the year benefit more
than the old, and growing children
benefit probably most of all.

The applicability of sea air to states
of disease requires rather more care-
ful consideration, and the off-hand re-
commendation of a marine sojourn to
all sorts and conditions of patients is
much to be deprecated. The neurotic,
the hypochondriac, the dyspeptic pa-
tient will as often get injury as benefit
from such a prescription. The sufferer
from cutaneous disease should as a
rule avoid the sea. Rheumatic and
gouty patients do not commonly bene-
fit by sea air. On the other hand,
strumous cases often do wonderfully
well at a seaside resort, especially of
the bracing type. Cases of impaired
convalescence after serious illness or
surgical operation do well at similar
resorts, provided that all acute sym-
ptoms have subsided and all grave com-
plications have become inactive. Sim-
ple debility and anaemia also usually
do well at the seaside, and so do many
cases of incipient or quiescent phthisis.

Such are, in our view, the broad rules
which regulate this important subject.
Let us look at a few of the points in
greater detail. The greatest successes
of sea air are, we believe, attained in
strumous and in hypochondriacal cases
from disease or operation. The ration-
ale of this result is not difficult to con-
ceive. The key to the remarkable ben-
eficial effects of sea air in such cases
is to be found in its property of stimulat-
ing tissue change, by which it tends to
bring the organism back to normal pos-
es and to promote healthy and normal
growth. Appetite is stimulated and
the digestive processes are rendered
more active, provided they have not
become so debilitated as to fail to re-
spond to the tonic properties of sea air.
The good effects of sea air in anaemia
and debility are not difficult to under-
stand. The freshness and purity of
the air, the brightness and the large
average of sunlight are a sufficient
explanation. The effect of sea air upon
the nervous system is a much more
complex question, to which sufficient
space has hardly been devoted. It is
a matter of common observation that
in some cases the nervous system is
rendered more irritable by sea air,
with resulting insomnia, nervous de-
bility, and the like; while in other
cases sea air produces unusually deep
and refreshing sleep, and so induces
of bene effect. In some cases, again, the
effect of sea air is at first excitant and
subsequently sedative. These differ-
ences can hardly be attributed to idio-
syncrasy. Much depends upon the spe-
cial characteristics of any particular
case, and upon the manner in which
the sea air is used. In general, it seems
to be that where there is much irritability,
particularly of the sort that may be termed
"irritable weakness," sea air disagrees.
Where the nervous system is simply
torpid or debilitated, without decided
irritability, sea air will often be found
beneficial. Hence, sea air is contrain-
dicated in hysteria and in most forms
of insanity; it is often indicated in
nervous debility, especially when due
to overwork or the wear and tear of a
tedious illness.

The effect of sea air upon the diges-
tive organs is also somewhat complex,
and cannot be summed up in a sentence
or two. In simple atony of the stomach
and bowels its effect is usually bene-
ficial. In cases where the liver seems
to be involved, where there is a maddy
or slightly jaundiced complexion, a
dusky, purring tongue, brownish
and scanty, high-colored urine, sea air
often does harm. It is probable that
in some cases of chronic dyspepsia sea
air is injurious by stimulating the ap-
petite before the stomach and bowels
have recovered sufficient activity to be
able to dispose of the increased amount
of food consumed by the patient. In
such cases a regulated abstinence from
sea air is indicated. The ill effect of sea
air upon many chronic cutaneous diseases,
especially chronic eczema, is a well-
established and highly important fact,
of which we have not space for a de-
tailed explanation. It may be con-
sidered, however, that the fresh sea
winds, with more or less of saline im-
pregnation, act simply as irritants to the
cutaneous surface. It is not in-
probable that some constitutional fac-
tor may also have its effect. The bene-
ficial action of sea air upon incipient or
quiescent phthisis is probably simply
due to its tonic properties and to the
fact that life at the seaside is usually
conducive to habits of simple living
and healthy out-door exercises which
are so important to those suffering from
phthisis. The amount and stage of the
disease, constitutional peculiarities,

and season of the year must be taken
into account in deciding for the phthisi-
cal patient either stimulating marine
resorts such as San Remo, Malaga,
Bastings, or Cromer, or such sedative
resorts as Arachon, Madeira, Torquay,
Falmouth, or Glengarriff. Another
broad rule that may help in deciding
for or against the seaside is the well-
known fact that all inflammatory con-
ditions tend to be aggravated by sea
air.—London Lancet.

KITCHEN HINTS.

A Variety of Useful Suggestions That
Might Well Be Adopted.

A useful chataleine for kitchen wear
is composed of a tape tied to the apron
string, at the end of which is a holder.
This saves the recording angel much
labor in putting down records of impa-
tience. Another ornament for the
chataleine is a pad of paper or a small
note book with pencil, on which to jot
down the things to get at market, or
any items which occur to the house-
mother and which are liable to be for-
gotten.

A strip of tin with handles will be
found just the thing on which to place
fish to bake. With this the fish can be
removed to the platter without a break.
Any tinman can make one of di-
mensions to suit the family bak-
ing-pan. When the tinman makes that, it
might be well to get him to make a
cream whip. It is made on the plan of
an old-fashioned dasher. There should
be a cylinder of tin two inches in di-
ameter, perforated around the bottom;
the piece which is to act as dasher
must be enough smaller to work easily
up and down. The standards must be
something similar to this to beat choco-
late to a froth.

Another kitchen convenience is a
dish drainer. The originator of this
has never patented it, though it is
worthy of that. It is made in the
shape of a colander, but as large as a
dishpan. At an inch from the bottom
there is a rim which supports a remova-
ble bottom of tin, which is perforated
with holes. The solid bottom under
this has a drain pipe through which
the rinse water runs. Dishes placed in
this and allowed three minutes' rinsing
under a hot water faucet will need no
wiping, and will shine with clean-
liness. The sides are solid and have
handles.

If you have not the improved coffee-
pot but like your coffee filtered, have a
ring made which will fit the top of your
old-fashioned coffee-pot, and to this sew
a bag of cheese cloth. Pour boiling
water on the grounds in the bag. If
you like your coffee strong, turn the
water through it two or three times.
It makes a delicious and healthful
coffee.

It is a good plan to have a supply of
kitchen bags. The bag in which jellies
drain should be used for nothing else.
Bags for straining various cooked arti-
cles are as serviceable as wire strainers,
and, if made to hang, have some points
of convenience which they lack, as one
who has used both will acknowledge.

The "handy man" of the house made
a "housewife's comfort," which any
housewife will admit is properly named.
It is a collection of drawers made fast
to the wall above the kitchen table.
The top supplies a shelf for the kitchen
account book, scrap book and cook
book. There are three rows of drawers
with three in a row, and two as long
as the row of three. The small drawers
are fastened with tin knobs, one close
and to keep the wood from taking the
strength from the contents. These hold
spices, soda, cream of tartar and baking
powder. The large ones are devoted to
measuring spoons, etc., and to what-
ever use the needs of the kitchen
cooker require. Only one who has had
such an article realizes how great a
convenience and time-saver it is.

BREAD FRUIT.

A Superior Vegetable or Delicous Pudding,
as You Wish to Use It.

The bread fruit, an important edible
in most of the tropical regions of the
globe, is a native of the South Sea
islands, and is the product of a tree
which grows to the height of perhaps
forty or fifty feet. The fruit is of the
size and shape of a muskmelon, and
for eating must be gathered before it
is fully ripe, as it has then an offensive
taste; but as different varieties of the
tree ripen their fruit at different sea-
sons, it is easy to have a supply about
all the year around. It may be cooked
in many different ways, but the com-
mon method among the people most
dependent upon it is to bake it in a pit
through the agency of heated stones.
It may be cut in thin slices and dried
in the sun for future use, when it is
available for grinding into flour or for
baking without the focality of pul-
verization. The fruits are sometimes
stored in pits for future use. In that
case they ripen and ferment, giving a
very unpleasant smell, and forming a
substance of cheesy appearance; but
after being baked the offensive odor
disappears, and the food seemed is
palatable and nutritious. An English
writer who had thoroughly tested bread
fruit says of it: "With meat and gravy
it is a vegetable superior to anything
I know, either in temperate or tropical
climates. With sugar, milk, butter or
treacle it is a delicious pudding, having
a very slight and delicate but char-
acteristic flavor, of which, like that of
good bread and potatoes, one never
tires."—Good Health.

Isolate Soiled Linen.

A frequent cause of danger is the
soiled nothing which awaits the week-
ly washing. Instead of being thor-
oughly aired and dried in the sun and
kept in a room remote from the bed-
chambers and living rooms, it is thrown
into a hamper kept standing in a bed-
chamber, or in a pile in one corner of
an adjoining closet, damp with poi-
sonous exhalations from the body, and
here the warmth of the room germinates
and throws off poisonous germs which
are inhaled by the occupants. In the
best governed hospitals and clinics of
the world soiled linen is as much feared
as contagious cases, and is isolated and
fumigated or sterilized immediately
after using.—St. Louis Republic.

A FAT MAN'S NEW BICYCLE.

And Why He Became Bitterly Reproach-
ed Against Whose.

A big fellow, and then two big fellows,
and then a lot more of them shot past
the green car. The fat man on the
rear platform said:

"I suppose if I should ride one of
those things I might get some of this
meat off me."

"I suppose so," assented the man
who stood next to him.

"Fact is," continued the fat man, "I
am certain I might do it, but I am prej-
udiced against the things. I bought
one last spring and tried to ride it.
But for an unforeseen and entirely un-
presentable circumstance I might be a
good wheelman now. You see, I kept
getting fatter and fatter, and last win-
ter my wife began to kick. She said
she didn't mind, but rather liked, a
man of portly presence, but when her
husband presented himself with four
chins she thought it time to enter a
protest. She jolted me along a bit and
then sprang the bicycle scheme on me.
I was clumsy enough to take it all in,
and I bought a machine."

"Well, I live on Richmond avenue,
and when I got the thing home I girdled
up my loins and started out after supper
one night to learn to ride. I got along
pretty well. I didn't fall off until I got
to going down hill. Then the machine
got the better of me and began hustling
along at a Robert J. gait. I tried to
fall off and I couldn't, and I tried to
slow down, and I couldn't do that.
Then I thought of the brake, and I
pulled her down hard. The machine
stopped dead still, but I kept going,
and when I struck I lighted on the side
of my face and plowed up a section of
asphalt."

"George Robinson happened along.
Now, George is an expert. He has rid-
den a wheel for five or six years and
knows all about them. He laughed at
me and then got on to give me an ex-
pert exhibition of brake setting. He
went up the street and came down like
mad. When he got opposite me he set
the brake. The wheel locked, and if
George went a foot he went thirty
feet before he stopped. When he did
land it was on his nose, and he was in
bed for three days."

"Next day I was hobbling around on
crutches, and Lem Johnson called over.
He was another expert wheelman. He
took the machine and started to show
me how to work it. He came down the
street at a two-minute gait and set the
brake. He went up into the air like a
rocket and struck the pavement some-
where in the middle of the next block.
Lem was in the hospital for a week."

"You see, there was a defect in the
tire that none of us had noticed, and
when that spot came around it struck
the edge of the brake and stopped the
wheel as if it had been locked. I don't
suppose out of ten thousand other
wheels there was such a defect. I struck
the wrong one, and that is why I am
not a cyclist."—Buffalo Express.

An Exceptional Case.

Hobbs—I never saw any one so fond
of his relatives as Van Winkle is.

Nobbs—How do you know?
Hobbs—He always speaks to every
one of them he meets on the street.—
Puck.

Gov. De Smith—"By the way, Hostetter,
you owe me two fives for a ten?" Hostetter—
"I have." Gov. De Smith—"Then hand me

Hood's Is the Best

Full Medicine, because it purifies, vitalizes
and enriches the blood, and therefore
gives strength to resist bad effects from
Colds, Catarrhs, Rheumatism, Pneumonia,
Malaria, the Grip, etc., and it cures and
avoids the danger of serious illness. It may
save you many dollars in doctors' bills.
Be sure to get Hood's and only Hood's.

**Hood's Sarsa-
parilla
Cures**

"I can truly recom-
mend Hood's Sarsa-
parilla as an excellent
medicine. I have
taken four bottles and I am better than I
have been for two years past. I was all
run down, my limbs swollen and my blood
was in a very bad condition. Now I am
free from malaria and better in every
way." Mrs. R. C. Conklin, Hume, N. Y.

Hood's Pills cure all liver ills, biliousness,
jaundice, indigestion, sick headache, etc.

**DR. KILMER'S
SWAMP
ROOT**

THE GREAT KIDNEY, LIVER AND BLADDER
CURE.

Rheumatism

Lumbago, pain in joints or back, brick dust in
urine, frequent calls, irritation, inflammation,
gravel, ulceration or catarrh of the bladder.

Disordered Liver

Biliousness, headache, indigestion or gout,
SWAMP-ROOT invigorates, cures kidney
difficulties, brightens vision, urinary troubles.

Impure Blood

Scurvy, malaria, general weakness or debility,
SWAMP-ROOT builds up quickly a run down
constitution and makes the weak strong.
At Druggists 50 cents and \$1.00 Size.
"Hood's" made to Hood's free-consultation free.

SECOND STREET, OAKLAND, MD.

BUY OF US and SAVE MONEY.

OUR WASHINGTON LETTER.

WASHINGTON, Nov. 12, 1894

Mr. Cleveland has, according to trustworthy information, fully decided to give the country a striking exhibition of the man who refuses to either see or heed the object lesson contained in the greatest vote of confidence in the Republican party and condemnation of the Democratic party ever put on record by the people of the United States, by coming out strongly in his annual message to Congress, which is already partially prepared, for the passage by the Senate at the coming session of Congress of the Wilson pop-gun tariff bill placing coal and iron on the free list. It seems almost absurd that he should be willing, after the people have spoken so plainly, to go on record with such a recommendation. But he has so often been guilty of political obtuseness, or, to express less elegantly, blundering, that nothing he does need astonish anybody. In this case it is bound to be a wasted recommendation, even if the Democratic Senators should drop their personal enmity to Mr. Cleveland, which has been intensified by the great Democratic defeat, long enough to try to pass the pop-gun bill, which it will be remembered have already passed the House. The Republican Senators can, and will prevent the passage of any tariff tinkering bills at the short session of Congress, even if it be necessary to block every appropriation bill in order to do so, but extreme measures will hardly be necessary. There are reasons to believe that a sufficient number of Democratic Senators stand ready to pledge their votes against the pop-gun bill to insure their defeat, but it is extremely doubtful whether either of them will be dignified to the extent of being formally voted upon.

The work of Chairman Babcock, of the Republican Congressional Campaign committee, has aroused the admiration of all those who know anything about the management of campaigns. All the world, of course, knows of the result of his work—two hundred and fifty-odd Republican Congressmen and almost certain control of the Senate after next March—but the inside or secret work of the campaign is only known to a few prominent members of the party. They say that Mr. Babcock has proven himself one of the shrewdest directors of campaign work the party has ever had, which is high praise indeed, and already a movement is quietly on foot to have the party get the benefit of that shrewdness in 1896. Whether this will be done by keeping him at the head of the Congressional committee or by

transferring him to the National committee is not yet apparent. Congressman Richardson, of Ohio, a Democrat who was defeated for re-election, is now in Washington trying to find a life preserver. He gives as one of the several reasons why Ohio went Republican by 135,000, that "the pension policy of the administration has been most disastrous to our party in Ohio. Worthily pensioners have been cut off right and left, and it seems that special efforts have been made to humiliate them."

Vice chairman Apsley, of the Republican committee, says: "I suppose that there is no doubt that Mr. Reed will be the next Speaker, but I am not going to be snared into making any predictions about the probable nominee of the Republican party for President. The party has an abundance and a superabundance of good men, and there is time enough to consider possibilities when the smoke of battle has cleared away."

The report that the administration is about to issue another lot of bonds—some say \$50,000,000 and others \$100,000,000—finds many others, notwithstanding Secretary Carlisle's positive denial. There are two reasons for this. First, the report originated with friends of Mr. Cleveland, and was accompanied by the statement that Mr. Carlisle was opposed to another issue of bonds without Congressional action authorizing it and that Mr. Cleveland had taken the matter into his own hands, believing that the necessity for strengthening the gold reserve was urgent and that Congress would not authorize it if it were left to decide the matter; and second, the known need of the Treasury for more money, owing to the failure of the new tariff to produce the amount of revenue that was anticipated. Whatever the administration may or may not do before Congress assembles, the bond question is likely to be a live one during the session of Congress.

When the sweeping nature of the Republican victory is considered, the Republicans have been very modest in their demonstrations of joy. For the most part they have confined themselves to quiet congratulations over the prospect which that victory gives of a permanent revival of prosperity throughout the country, now that business men have something solid upon which to base their future calculations, something which they have lacked for two years, and without which no country can enjoy a real and permanent prosperity. It is regarded as really more of a business than a political victory, and Republicans are all the more proud of it on that account.

VOLUME 18.

OAKLAND, MD., THURSDAY, NOVEMBER 22, 1894

NUMBER 37.

NEWS OF A WEEK.

Happenings in and About Town told in Short Paragraphs.

Call at Sincell Bros', and see their new stock of clothing, etc.

Men's and boys' overcoats and caps at Townshend & Son's. 36-37.

A new line of gloves and mittens at Townshend & Son's. 36-37.

Malette pays highest cash price for game and produce of all kinds.

Malette is giving silverware away. Call and see him and get particulars.

Men's, women's and children's legging at Townshend & Son's. 36-37.

Just received at Townshend's, a nice line of hoods, fasciators and woolen hose. 36-37.

New style fall and winter cloaks just open at M. L. Scott's Baltimore Store.

Blank deeds for sale at this office. The deeds are specially ruled and printed very neatly.

Only two marriage licenses have been granted by Clerk Tower since Tuesday of last week.

Agents wanted at good salary. SWEET & SHACKLEFORD. 37-41. Mt. Lake Park.

Read the Christmas announcement of the Oakland Pharmacy. They have lots of goods at low prices.

Take your produce to Malette. He gives you cash or goods at rock-bottom prices. Don't forget the place.

The foundation for Messrs. D. E. Offutt and Son's new warehouse on Liberty street has been completed.

Send your check books to this office to be numbered. We have a special machine for just this class of work.

Dr. J. Lee McComas, who has been seriously ill for a few weeks, is considerably better and is able to walk around.

Mr. M. M. Bradford told us yesterday that the carpenter work at the school house will probably be finished this week.

We have just received a large and new line of jewelry and silverware. Come in and see us and we will do you no harm. MALETTE.

The new M. E. church at Grantsville will be dedicated in about two weeks. The building is a very handsome and creditable one.

Dr. W. H. Ravenscraft has located his office in The Republican building, Oakland, and is preparing to give attention to all professional calls. See card in another column.

A. D. Naylor will have a fine line of cutter sleighs on hand the first of December. Those wanting anything in that line will do well to give him a call. 36-37.

Only two changes were made in passenger trains in the new schedule. No. 3 is now due to leave at 7:09 a. m., No. 4 due to leave at 9:25 p. m., No. 47 will not run on Monday.

A German statistician has discovered that men are becoming scarcer, and that in 3,000 years from now there will be only one for every 220 women. In those days the divorce lawyer will not be able to earn his salt.

Dr. J. G. Robinson, Dentist, of Baltimore, has decided to locate permanently here in the town of Oakland, where he will be fully equipped to perform in all branches of his profession. Office with Dr. M. C. Hinchbaugh. 35-1y.

A passenger on train No. 7, going west yesterday morning, dined here at about three o'clock, jumped through the window of a day coach just as the train was pulling out of the station. The conductor stopped his train and the crew made a search for the man but he could not be found. He was a Scandinavian and was bound for Missouri.

For a pain in the side or chest there is nothing so good as a piece of flannel dampened with Chamberlain's Pain Balm and bound over the seat of pain. It affords prompt and permanent relief and if used in time will often prevent a cold from resulting in pneumonia. This same treatment is a sure cure for lame back. For sale by Oakland druggists.

Lieut. R. M. G. Brown, U. S. Navy, has been ordered before the naval board of examination for retirement. Several years ago a boat fell on him at Cadiz and broke his breastbone. He has never fully recovered his health. Lieut. Brown is a Prestonian, a son-in-law of Hon. Henry G. Davis.—Journal.

Miss Alice Lawton, who went to Baltimore several weeks ago to receive surgical treatment, returned to Oakland on Sunday morning. An operation was performed on her face and a tumor removed therefrom very successfully by the surgeons of the Maryland University Hospital.

Henry Wilson, the postmaster at Welshon, Florida, says he cured a case of diarrhoea of long standing in six hours, with one small bottle of Chamberlain's Colic, Cholera and Diarrhoea Remedy. What a pleasant surprise that must have been to the sufferer. Such cures are not unusual with this remedy. In many instances only one or two doses are required to give permanent relief. It can always be depended upon. When reduced with water it is pleasant to take. For sale by Oakland druggists.

On last Thursday evening Smith's Military Band, accompanied by a large delegation of ladies and gentlemen of Oakland, went up to Terra Alta to participate in the Republican Jollification held there that night. The enthusiasm of the large crowd present was immense. Mr. Thomas J. Peddicord, in the absence of Hon. A. G. Dayton, congressman-elect from that District, made a short address which was frequently interrupted by rounds of applause. The Oakland party returned on train No. 4 Thursday night.

By reason of the defeat of the School Bond bill the School Commissioners give notice in the columns of THE REPUBLICAN this week that the schools will close on December 7, 1894, making a term of only thirty-five days for the different districts of the county, leaving Oakland thus far with no school at all, although we have it from good authority that as soon as the new school building is finished school will begin at once and by the aid of subscriptions from the people of town the term will probably last four months.

Croup is a terror to young mothers. To post them concerning the first symptoms, and treatment is the object of this item. The first indication of croup is hoarseness. In a child who is subject to croup it may be taken as a sure sign of the approach of an attack. Following this hoarseness is a peculiar, rough cough. If Chamberlain's Cough Remedy is given as soon as the child becomes hoarse or even after the rough cough has appeared it will prevent the attack. It has never been known to fail. 25 and 50 cent bottles for sale by Oakland druggists.

W. A. McGuire, a well known citizen of McKay, Ohio, is of the opinion that there is nothing as good for children troubled with colds or croup as Chamberlain's Cough Remedy. He has used it in his family for several years with the best results and always keeps a bottle of it in the house. After having a grippie he was himself troubled with a severe cough. He used other remedies without benefit and then concluded to try the children's medicine and to his delight it soon effected a permanent cure. 25 and 50 cent bottles for sale by Oakland druggists.

Estray Notice.
Estrayed from my place sometime last spring, a red heifer with a white spot on her forehead and two white spots on left hip. Anyone knowing her whereabouts will please notify JOHN HOLTSINGER. 35-37. Deer Park.

Bucklen's Arnica Salve.
THE BEST SALVE in the world for Cuts, Bruises, Sores, Fleets, Salt Rheum, Fever Sores, Tetter, Chapped Hands, Chills, Burns, Corns, and all skin eruptions, and positively cures Piles, or no pay required. It is guaranteed to give perfect satisfaction or money refunded. Price 25 cents per box. For sale by all druggists. 3-lyr.

It May do as Much for You.
Mr. Fred Miller, of Irving, Ill., writes that he had a severe kidney trouble for many years, with severe pains in his back and also that his bladder was affected. He tried many so-called kidney cures but without any good result. About a year ago he began the use of Electric Bitters and found relief at once. Electric Bitters is especially adapted to cure all kidney and liver troubles and often gives almost instant relief. One trial will prove our statement. Price only 50c. for large bottle. At all Drug Stores. 6

HERE AND ELSEWHERE.

(Subscribers or readers having friends visiting them or acquaintances visiting other places will please make note of the fact and send to THE REPUBLICAN for publication.—Editor.)

Capt. John Jarboe went to Washington the first part of this week on business.

Prof. S. C. Smith returned from a business trip to Piedmont and Elk Garden Tuesday night. He reports business good.

Mr. F. R. Nethken, of near Deer Park, was here for a few hours yesterday.

Mr. M. S. Harvey, of near Kearney, was here yesterday on business.

Miss Mattie Adair, of Terra Alta, is in Oakland visiting friends.

Mr. J. W. Wolf, of Deer Park, was here Tuesday for a short time.

Attorney Thomas J. Peddicord was at Cumberland Monday on professional business.

Mr. M. N. Wilson, of Wilson, was here on last Saturday on business. He reports his father, Hon. George W. Wilson, slightly improved in health.

A very interesting program has been arranged for the Thanksgiving night program of the Oakland Epworth League.

Sheriff Charles Wegman is at Grantsville suffering with an attack of illness.

Mr. Ira Darst, of Bittinger, was in the city Tuesday and called to pay his respects to THE REPUBLICAN.

Dr. Ravenscraft was called to Fairmont Monday by a telegram announcing the serious illness of his wife who is there on a visit to her son Will.

Mr. G. A. Bolden, of Terra Alta, was here a short time on Saturday.

Mr. John Shartzler returned from a trip to eastern cities Sunday morning.

Mr. John W. Averitt, of the Cumberland Evening Times, was an Oakland visitor Tuesday morning.

Mr. Perry W. Rock has sold his barber shop in Oakland to George Crum and will leave sometime this week for his home in Sherwood, O.

Miss Edith Townshend, who has been on an extended visit to friends at Parkersburg, W. Va., returned to her home in Oakland Friday last.

Mr. Lafayette Kennison White, of Germania, was here on Friday and ordered THE REPUBLICAN sent to his address for one year.

Mr. G. S. Hamill was in Cumberland yesterday on legal business.

Mr. C. N. Friend, son of County Commissioner Ira E. Friend, was here yesterday. He reports his father much better.

Mr. James H. Smith, of Hazelton, W. Va., is here on a visit to his brother, Mr. D. G. Smith.

Attorney E. H. Sincell went to Hagerstown yesterday on a professional trip.

Mr. Jacob Feik, of Accident, was in the city a few hours on last Friday.

Take Notice.
All persons knowing themselves indebted to H. J. Mayers will please call and settle at once at the office of Peddicord & Peddicord. Failure to respond will add costs of prosecution to their accounts. 36-2t.

For Rent.
Two rooms in my building formerly occupied by the Mountain Democrat. These are desirable rooms for offices, etc. Reasonable rate of rent. Apply to J. O. Michael or the owner C. C. Michael, Mt. Lake Park. 36-2t.

Hurrah for the Opening of my New Store, Cor. Oak and Second Sts.

Having just returned from the eastern cities with a full line of General Merchandise, goods that will be sold for cash or trade only, will sell at 25 per cent. cheaper, which will be an advantage for fathers, mothers, brothers and sisters, uncles and aunts. Come one and all and give me a call and get the prices to suit your taste. I trust all my former customers and many new ones will grasp this opportunity and help me in my new venture. Yours respectfully, 36-3t. LEWIS GORTNER.

Church Dedication.

The Grantsville M. E. church will be dedicated to the worship of God Sunday, Dec. 2nd, by the Rev. A. H. Norcross, D. D., President of the Pittsburgh Female College. Rev. David Flanagan, of McKeesport, Pa., will also be present and preach and assist with the finances.

Morning service, 10 a. m.; sermon by Rev. A. H. Norcross, D. D.; offering by the people; presentation of church by trustees; dedication.

Afternoon service, 2:30 p. m. Sermon by Rev. D. Flanagan. Evening service, 7 p. m. Short speeches by visiting ministers; sermon by Rev. A. H. Norcross, D. D. All cordially invited.

Wm. H. Knowlton, Pastor.

Flag Presentation.
The Jr. O. U. A. M., of Swanton, will raise a flag upon the school house at Swanton on Thanksgiving day. The following is the program:

Music; prayer; singing "My Country 'Tis of Thee;" presentation of flag by Chas. T. Sweet, Esq.; singing, "Star Spangled Banner;" acceptance of flag address by Hon. A. F. George; singing, "Red, White and Blue;" the principles of the Jr. O. U. A. M., by Mr. J. C. Shackelford; singing, "Nearer My God to Thee;" address by Mr. A. W. Maffett; singing; address by J. W. Laughlin, M. D.; singing, "God be With You 'Till We Meet Again."

The exercises will begin promptly at 1:30 p. m. An invitation is extended to members of the Jr. O. U. A. M. and the public generally to come and help make this a day long to be remembered.

A Tin Wedding.

On Monday evening Mr. and Mrs. King Delawder celebrated the tenth anniversary of their wedding by entertaining a number of friends at their residence on Second street.

Mr. and Mrs. Delawder were the recipients of a large number of useful household articles on this occasion.

Among those present were Mrs. E. M. Spedden, Mrs. L. Stoddard, Mrs. D. M. Dixon, Mrs. G. W. Delawder, Mr. and Mrs. Geo. O. Miller, Mr. and Mrs. Henry J. Mayers, Mr. and Mrs. J. C. Peddicord, Mr. and Mrs. D. M. Mason, Mr. and Mrs. H. C. Sincell, Miss Stoddard, Miss Spedden, Miss Browning, Miss Peddicord, Miss Tanley, Miss Belle Jarboe, Miss Sallie Jarboe, Dr. H. W. McComas, Messrs. F. A. Thayer, O. W. Still, Frank Jameson, Chas. Tower, E. P. Anderson, W. H. Spedden, D. E. Offutt, Jr., W. Weber, John Legge and B. H. Sincell.

Died.

KIMMEL.—On Saturday last at his home about five miles north of Oakland, of typhoid fever, Mr. Jacob Kimmel, aged about thirty years. His funeral occurred on Sunday afternoon. The interment was made at Flatwoods. The deceased was married Nov. 11, 1893, to Miss Lizzie Friend, daughter of Mr. and Mrs. Joseph Friend, of Sang Run.

Epworth League Program.

The following program has been arranged for the Epworth League meeting to be held on Thanksgiving night in the M. E. church. The meeting in charge of Mrs. S. C. Smith.

Devotional exercises. Vocal Solo, Miss Maggie Miller. Select reading, Mrs. F. A. Thayer. Violin Solo, Dr. Robinson. Recitation, Percie Brady. Duet, Misses Maggie Miller and Grace Loan.

Recognition Social. Each member to bring the earliest picture taken of her or himself and place the same in the hands of the committee, who will distribute them to the members of the League for recognition, and prizes will be given to the two members who recognize the greatest number. League Hymn. Collection.

Rogers' Sarsaparilla.

A specific for all. 100 doses for 75 cents. Rogers' Little Liver Pills, best on the market; Cough Cure, Liniment, Appetine and Worm Syrup, sold by A. G. Sturgis, Oakland; Cuppett Bros., McHenry; J. A. DeBerry, Corinth; C. F. White, Hutton; P. T. Garthright, Hayden & Eckles, Mt. Lake Park; Dr. Laughlin, Deer Park; Wm. Frederick, Friendsville; Young Store Co., Jonas Frazee, Robert Liston, Selbysport; W. Wass, Mineral Springs; J. E. Gnagay, Accident; Smith & Callis, Hoyes, and by all general dealers.

GARRETT COUNTY JAIL.

The State Board of Health Makes an Investigation.

As was intimated in THE REPUBLICAN last week the investigation of the sanitary condition of the jail here took place Tuesday by Dr. Stewart, of the State Board of Health.

In addition to what was published in these columns in connection with the jail last week the following facts have been gathered and are presented to our readers.

It will be remembered that on the 4th inst. the young wife of Sheriff Wegman died of typhoid fever in the sheriff's residence. Mrs. Wegman had been one of the healthiest and strongest of women until she and her husband took up their residence in the sheriff's house. She worked hard to keep the old building clean and succeeded to a considerable extent, but the effort no doubt cost her her life. The circumstances of her death caused at the time much comment, as it was remembered that ex-Sheriff Jamison's wife and John B. Brant had also died there of typhoid fever and that both Mr. Jamison and Mr. Wegman were in poor health while at the jail, and the fact that Sheriff Wegman is now at his old home in Grantsville seriously unwell. The sheriff thought that the unhealthy condition of the building caused his wife's death and so reported to Dr. Stewart, of the State Board of Health.

Dr. Stewart was in Oakland Tuesday in consultation with Dr. H. W. McComas, County Commissioner Isaac W. Abernathy, States Attorney G. S. Hamill and clerk Jacob S. Meyers. Investigation revealed the fact that the unhealthy condition of the jail had been complained of for a long time; that more than two years ago the foreman of the grand jury had roundly condemned the building as insecure and unhealthy. Steps had been taken to make the building more secure, but its sanitation had not been improved.

Immediately adjoining the prison room is the sheriff's house, which would be comfortable enough but for its conjunction with the prison. The front door to the house is the only entrance to the prison and the sheriff and his family are as much in jail as the prisoners.

Immediately under the kitchen where Mrs. Wegman spent much of her time, was an old cistern, which had become a cesspool.

Dr. Stewart seemed very much impressed with the condition of things at the jail and will make an official report in a few days. Commissioner Abernathy and the other officials seemed fully convinced of the necessity of immediate and vigorous action and are only awaiting Dr. Stewart's recommendation before beginning work.

Real Estate Transfers.

Henry Yoder to Elijah Livengood, 160 acres and 69 perches of land; \$1925.19.

Miss Edith Townshend, who has been on an extended visit to friends at Parkersburg, W. Va., returned to her home in Oakland Friday last.

Mr. Lafayette Kemnison White, of Germania, was here on Friday and ordered THE REPUBLICAN sent to his address for one year.

Mr. G. S. Hamill was in Cumberland yesterday on legal business.

Mr. C. N. Friend, son of County Commissioner Ira E. Friend, was here yesterday. He reports his father much better.

Mr. James H. Smith, of Hazleton, W. Va., is here on a visit to his brother, Mr. D. G. Smith.

Attorney E. H. Sincell went to Hagerstown yesterday on a professional trip.

Mr. Jacob Feik, of Accident, was in the city a few hours on last Friday.

Take Notice.
All persons knowing themselves indebted to H. J. Mayers will please call and settle at once at the office of Peddicord & Peddicord. Failure to respond will add costs of prosecution to their accounts. 36-2t.

For Rent.
Two rooms in my building formerly occupied by the Mountain Democrat. These are desirable rooms for offices, etc. Reasonable price of rent. Apply to J. O. Michael or the owner C. C. Michael, Mt. Lake Park. 36-2t.

Hurrah for the Opening of my New Store, Cor. Oak and Second Sts.
Having just returned from the eastern cities with a full line of General Merchandise, goods that will be sold for cash or trade only, will sell at 25 per cent. cheaper, which will be an advantage for fathers, mothers, brothers and sisters, uncles and aunts. Come one and all and give me a call and get the prices to suit your taste. I trust all my former customers and many new ones will grasp this opportunity and help me in my new venture. Yours respectfully, 36-3t. LEWIS GORTNER.

Church Dedication.

The Grantsville M. E. church will be dedicated to the worship of God Sunday, Dec. 2nd, by the Rev. A. H. Norcross, D. D., President of the Pittsburg Female College. Rev. David Flanagan, of McKeesport, Pa., will also be present and preach and assist with the finances.

Morning service, 10 a. m.; sermon by Rev. A. H. Norcross, D. D.; offering by the people; presentation of church by trustees; dedication.

Afternoon service, 2:30 p. m. Sermon by Rev. D. Flanagan. Evening service, 7 p. m. Short speeches by visiting ministers; sermon by Rev. A. H. Norcross, D. D. All cordially invited.

Flag Presentation.
The Jr. O. U. A. M., of Swanton, will raise a flag upon the school house at Swanton on Thanksgiving day. The following is the program:

Music; prayer; singing "My Country 'Tis of Thee;" presentation of flag by Chas. T. Sweet, Esq.; singing, "Star Spangled Banner;" acceptance of flag address by Hon. A. F. George; singing, "Red, White and Blue;" the principles of the Jr. O. U. A. M., by Mr. J. C. Shackelford; singing, "Nearer My God to Thee;" address by Mr. A. W. Mallett; singing; address by J. W. Laughlin, M. D.; singing, "God be With You Till We Meet Again." The exercises will begin promptly at 1:30 p. m. An invitation is extended to members of the Jr. O. U. A. M. and the public generally to come and help make this day long to be remembered.

A Tin Wedding.
On Monday evening Mr. and Mrs. King Delawder celebrated the tenth anniversary of their wedding by entertaining a number of friends at their residence on Second street. Mr. and Mrs. Delawder were the recipients of a large number of useful household articles on this occasion.

Among those present were Mrs. E. M. Spedden, Mrs. L. Stoddard, Mrs. D. M. Dixon, Mrs. G. W. Delawder, Mr. and Mrs. Geo. O. Miller, Mr. and Mrs. Henry J. Mayers, Mr. and Mrs. J. C. Peddicord, Mr. and Mrs. D. M. Mason, Mr. and Mrs. H. C. Sincell, Miss Stoddard, Miss Spedden, Miss Browning, Miss Peddicord, Miss Turley, Miss Belle Jarboe, Miss Sallie Jarboe, Dr. H. W. McComas, Messrs. F. A. Thayer, O. W. Stull, Frank Jameson, Chas. Tower, E. P. Anderson, W. H. Spedden, D. E. Offutt, jr., W. Weber, John Legge and B. H. Sincell.

Died.
KIMMEL.—On Saturday last at his home about five miles north of Oakland, of typhoid fever, Mr. Jacob Kimmel, aged about thirty years. His funeral occurred on Sunday afternoon. The interment was made at Flatwoods. The deceased was married Nov. 11, 1893, to Miss Lizzie Friend, daughter of Mr. and Mrs. Joseph Friend, of Sang Run.

Epworth League Program.
The following program has been arranged for the Epworth League meeting to be held on Thanksgiving night in the M. E. church. The meeting in charge of Mrs. S. C. Smith.

Devotional exercises.
Vocal Solo, Miss Maggie Miller.
Select reading, Mrs. F. A. Thayer.
Violin Solo, Dr. Robinson.
Recitation, Percie Brady.
Duet, Misses Maggie Miller and Grace Loar.

Recognition Social. Each member to bring the earliest picture taken of her or himself and place the same in the hands of the committee, who will distribute them to the members of the League for recognition, and prizes will be given to the two members who recognize the greatest number.
League Hymn.
Collection.

Rogers' Sarsaparilla.
A specific for all. 100 doses for 75 cents. Rogers' Little Liver Pills, best on the market; Cough Cure, Liniment, Appetite and Worm Syrup, sold by A. G. Sturgis, Oakland; Cuppett Bros., McHenry; J. A. DeBerry, Corinth; C. F. White, Hutton; P. T. Garthright, Hayden & Eckles, Mt. Lake Park; Dr. Laughlin, Deer Park; Wm. Frederick, Friendsville; Young Store Co., Jonas Frazee, Robert Liston, Selbysport; W. Wass, Mineral Springs; J. E. Gnagey, Accident; Smith & Callis, Hoyes, and by all general dealers.

GARRETT COUNTY JAIL.

The State Board of Health Makes an Investigation.

As was intimated in THE REPUBLICAN last week the investigation of the sanitary condition of the jail here took place Tuesday by Dr. Stewart, of the State Board of Health.

In addition to what was published in these columns in connection with the jail last week the following facts have been gathered and are presented to our readers.

It will be remembered that on the 4th inst. the young wife of Sheriff Wegman died of typhoid fever in the sheriff's residence. Mrs. Wegman had been one of the healthiest and strongest of women until she and her husband took up their residence in the sheriff's house. She worked hard to keep the old building clean and succeeded to a considerable extent, but the effort no doubt cost her her life. The circumstances of her death caused at the time much comment, as it was remembered that ex-Sheriff Jamison's wife and John B. Brant had also died there of typhoid fever and that both Mr. Jamison and Mr. Wegman were in poor health while at the jail, and the fact that Sheriff Wegman is now at his old home in Grantsville seriously unwell. The sheriff thought that the unhealthy condition of the building caused his wife's death and so reported to Dr. Stewart, of the State Board of Health.

Dr. Stewart was in Oakland Tuesday in consultation with Dr. H. W. McComas, County Commissioner Isaac W. Abernathy, State Attorney G. S. Hamill and clerk Jacob S. Meyers. Investigation revealed the fact that the unhealthy condition of the jail had been complained of for a long time; that more than two years ago the foreman of the grand jury had roundly condemned the building as insecure and unhealthy. Steps had been taken to make the building more secure, but its sanitation had not been improved.

Immediately adjoining the prison room is the sheriff's house, which would be comfortable enough but for its conjunction with the prison. The front door to the house is the only entrance to the prison and the sheriff and his family are as much in jail as the prisoners. Immediately under the kitchen where Mr. Wegman spent much of her time, was an old cistern, which had become a cesspool.

Dr. Stewart seemed very much impressed with the condition of things at the jail and will make an official report in a few days. Commissioner Abernathy and the other officials seemed fully convinced of the necessity of immediate and vigorous action and are only awaiting Dr. Stewart's recommendation before beginning work.

Real Estate Transfers.
Henry Yoder to Elijah Livenood, 160 acres and 69 perches of land; \$1925.19.

Geo. P. White and wife to Jos. C. Alderson, lot No. 86 in the town of Lake View; \$100.

Andrew Deitrick and wife to Margaret Deitrick, 59½ acres of a

tract called "Challons;" \$600.

Anne Stuck to Geo. M. Stuck, 17 perches and 46 feet of ground, being a lot in the town of Selbysport; \$1, etc.

George M. Steele and wife to J. H. Cuppett, a lot of ground in the town of Friendsville; \$100.

Thomas J. Peddicord and wife to Donald McLane, 81 square perches of land in McHenry; \$25.

Mt. Lake Park Association to Miss E. B. Swann, lot No. 204 on the plat of Mt. Lake Park; \$150.

Mary D. Crook and Fanny D. Read to Amelia Fringer, lot No. 31 in Dailay's subdivision to the town of Oakland; \$200.

Will You Suffer

With rheumatic pains, sciatica, sleepless nights, dropsical accumulations, or nervous headaches when Messrs. Cober & Boyer will cure you if their directions are followed. Can be consulted at the Central Hotel or at their room in the Pritchard building, Oakland, Md.

When Baby was sick, we gave her Castoria.
When she was a Child, she cried for Castoria.
When she became a Woman, she clung to Castoria.
When she has Children, she gave them Castoria.

Christmas

Is Coming.

We have just received a handsome line of

Christmas Novelties,

and extend everybody a cordial invitation to visit our palace of beautiful things. Our line of goods comprises a large variety of

Toilet Cases, Silver and Aluminum Trays of the latest style, Work Boxes, Jewel Cases, Perfume Sets, Smokers' Goods, Cards, Booklets, Calendars, Imported Cut Glass Bottles, Picture Frames, Albums, Fancy Bottles, Etc., Etc.

We carry the largest and handsomest line of Fancy and Toilet goods in town. Call and see for yourself. Our prices are within reach of all. We take pleasure in showing our goods whether you come to buy or not.

Watch our window displays.

Very truly,

Oakland Pharmacy,
JOS. E. HARNED, Manager.

Oakland, Md.

Free! Free! Free!

Silverware! Silverware!

Say, do you know that we are positively giving away some of the finest silverware ever brought to Oakland?

Don't fail to Call and get our Plan

Come early and take your choice of Butter Dishes, Pickle Castors, Sugar Bowls, Cream Pitchers, Spoon Holders, Syrup Pitchers, Cabinet Knives, Cabinet Forks, Etc.

We wish everyone to know that we have just received one of the newest and largest lines of jewelry in the country.

We Also Have the Best of Everything Good to Eat

and at prices to suit the hard times.

N. B.—Don't forget that we will have the finest and cheapest line of Christmas Goods in town. Give us a call.

Very truly,

W. H. MALETTE,

Fancy Grocer and Jeweler.

A NIHILIST MANDATE.

How Austen Gray Was Relieved of an Unpleasant Task.

HE crimson shade of the lamp cast a warm glow over the room in which a young man sat smoking a sad thinking. It was early in the evening, not long after seven, and he was wondering where to spend the hours till bedtime. A knock at the outer door of his chamber disturbed his reverie. Being alone, he went himself to answer the summons. A lady, tall and thickly veiled, stood in the passage without.

"Mr. Austen Gray?"
"That is my name, madam."
"May I speak with you in private?"
Her accent was foreign.
"Certainly. Will you come in?"
The lady lifted her veil.
"Olga Dobronoff?" cried the young man in a tone of consternation.

"I have not altered so much in six years that you fail to recognize me, then, Cecil Austen?" said she, a faint smile at her start of surprise and sudden pallor crossing her darkly beautiful face. "Cecil Austen! Ah, but you are known more by your nom de theater now, are you not?"

Austen forced himself to appear calm.
"What is your business with me, madam?" he inquired.
"So austere! Your manner toward me was so different six years ago in Russia. Well, well, my business? To give you this."

She handed him a letter, which he hesitated at first to open.
Breaking the seal at length, he cast his eyes over the communication which he drew from the envelope. One glance was sufficient to cause his hand to tremble so violently as to rustle the paper it held. His face deepened for a moment. Then his face flushed and a disdainful look came into his eyes.

"Take this back to those who sent you to me," he said, "and say I have not held myself subject to their orders since I left Russia."
"Remember your oath!"

"Such as it was, I took it in a moment of youthful enthusiasm over things I did not rightly understand. I saw my folly in time and abandoned the society into the membership of which I was beguiled by your father, who traded on my infatuation for you."

"Infatuation! You swore you could never love another woman, and taught me to love you. Her voice softened; her face grew less stern.
"I am sorry for that episode in my life," he answered. "I was learning to forget it, and hoped you had also."

"Never! I shall love you to my dying hour. Oh, my darling!" she cried, clasping her hands passionately and taking a step toward him, "have you really—truly—ceased to love me?"
"The topic is an unpleasant one, Olga—one I have no wish to discuss. It was not love I had for you. I have discovered that."

"You have discovered—ah!"
Her swift flashing eyes fixed themselves on a photograph standing upon the mantelpiece. It was the picture of a young girl whose face was the embodiment of beauty, tenderness and trust.
"You have discovered it, have you? Did she help you to make the discovery?"

"That is the lady I hope soon to make my wife."
"Oh, Cecil," she cried in bitter anguish, "then I must not hope—I have carried your image in my heart."

"You have discovered it, have you? Did she help you to make the discovery?"
"That is the lady I hope soon to make my wife."
"Oh, Cecil," she cried in bitter anguish, "then I must not hope—I have carried your image in my heart."

"You have discovered it, have you? Did she help you to make the discovery?"
"That is the lady I hope soon to make my wife."

"That is the lady I hope soon to make my wife."
"Oh, Cecil," she cried in bitter anguish, "then I must not hope—I have carried your image in my heart."

He remembered the ambassador's ball, at which he first met Olga Dobronoff. He had fallen in love with the surpassingly beautiful girl at first sight—or at least he believed it was love at that time.

He returned to her father—her only living relative—the young Englishman eventually became the recipient of Olga Dobronoff's views concerning his country, but it was not until Austen had strongly expressed his own opinion regarding the Russian system of government, with all its attendant evils, that Olga's father boldly avowed himself a nihilist. Austen applauded the aims of the society and was at length induced to become one of its members, taking the oath to aid them in their secret war against tyranny.

Shortly after this the death of a near relative called him home, and he had been in England but a little time when the conviction grew upon him that his love for Olga, which he had thought so all pervading, was dead. He wrote to her to this effect, but received no reply. Perhaps his letter had miscarried. Having no desire to return to Russia, he resigned his post there, and, having a small competency, devoted himself to literature with fair success. Indeed, only two days previous to Olga Dobronoff's visit, a play of his had been produced and well received by the critics.

"I accept my fate," she said, "and will not trouble you again. You refuse to execute the orders of the nihilist chiefs?"

With head erect she passed out on the staircase, and in a moment was gone from his sight. Austen waited until her footsteps died away, and then slowly, thoughtfully, returned to his room.

The first thing his eyes rested on was the order of the nihilist chiefs that he, Cecil Austen, should take the life of Ivan Bronski, the traitor. It was lying on the floor, with the portrait of Dora Penfield, the girl he loved. With a shudder he cast the obnoxious paper in the fire.

He cast the obnoxious paper in the fire, where it was quickly consumed, and, kissing the picture lovingly, he replaced it on the mantelpiece. His mind was no longer exercised as to where he should spend the evening. The fire was out, the gray dawn just creeping in at the windows, when he at last threw himself on the bed and fell into a troubled sleep.

It was high noon when he awoke. The first thing that arrested his attention was the shouting of newsboys in the street. "Mysterious murder in 'Anstid this mornin'!" was the burden of their cry. As a dramatist his instinct for the sensational prompted him to read for a paper.

Turning to the column headed by the words forming the newsboys' cry, his eyes rested upon a name that sent a sudden agonizing thrill to his very heart center.
"At an early hour this morning," read the sheet, "P. C. Robson found the dead body of a man lying under the trees in Beech Walk, Hampstead. Great reticence is maintained by the local police regarding the affair, but our inquiries have elicited the fact that the deceased was shot through the head, the course of the bullet being from back to front. The weapon has not been discovered. No one in the neighborhood seems to have been disturbed during the night, but this may be accounted for by Beech Walk being a somewhat lonely thoroughfare. The nearest house to the scene of the murder is fifty yards distant. From papers found on the body it is believed that the murdered man is a Russian named Ivan Bronski."

"A later report states that Bronski has been identified by a woman as a man who lodged in her house during the last few months under the name of Peter Dumaroff. Our representative is prosecuting further inquiries, the result of which will be published in our special edition."

The rattle of the postman here resounded through the rooms, and a letter was brought in. Austen was conscious of a faint recollection of the writing on the envelope. He broke it open. Yes, it was from Olga Dobronoff.

"DEAR CECIL, MY LOVE: You were wrong to think lightly of the power of the nihilist chiefs to punish with death those of the brethren who fail to stand by their oath. Had I taken back to them your refusal to carry out their vengeance on a traitor you would assuredly have been doomed. But I will save you. When you read this Ivan Bronski will be a dead man, and my hand will have slain him. This partly to avenge my father, but chiefly to protect you. I am sufficiently acquainted with Bronski's movements to know that the opportunity I require will occur within a few hours of my concluding this letter. Escape for myself will be easy. I trust I shall return to Russia and report to the chiefs simply that their orders have been obeyed, and I advise you at once to communicate with them (I enclose address), asking for release from your oath. My task accomplished, I need say no more than that life will be to me a burden unbearable, and I shall not hesitate to free myself from the torture of regret that is breeding my poor heart away. Good-by, Cecil. May you be happier in your love than I."

OLGA DOBRONOFF.

Little more of importance was ever published regarding the Hampstead affair. An open verdict was returned at the inquest, and the mystery of Bronski's death was never elucidated.—London Tid-Bits.

THE INSULTED GORILLA.

How He Took a Unique Vengeance Upon His Annoyer.

I was down on the old East Dock, where many of the big East Indianmen used to come in. I was a young fellow then, just starting in business, and a junior clerk for one of the big paper warehouses there. One of the firm was great friends with the captain of a big India liner, and on one of the home voyages the captain brought back a big gorilla that he had picked up at some port on the way. He gave him to our boss, and as Mr. Boulder did not have any room for "roars," that was what they called him in his own house. He left him down at the paper warehouse, where he was chained in the engine room, principally because it was hot down there.

He had a nasty temper when they first got him, so that there were very few people who could handle him, but after he had been in the house for nearly a year he seemed to get used to his surroundings, so that he was given the liberty of nearly the whole establishment, and some of us younger fellows used to tease him and would wait a month if necessary to find a chance to get even. And he would not stop at anything in the way of a mean turn to a man he disliked, from upsetting a bucket of engine grease on his head to turning a steam jet on him, which last he did to the engineer once and nearly parboiled him.

But we put up with these little eccentricities for the sake of having such a strange pet about, and everything went all right until Ned Hannan, my particular chum in the store, put a big lamp of kerosene's wax down on the seat where Gooro was in the habit of sitting, and glued him down. He nearly tore the place up, and we had to fairly cut him loose with a hammer and cold chisel. Ned kept shy of him for some days, and we thought the affair had blown over. But we did not know Gooro's capacity for harboring a grudge.

There was a big paper cutting machine in the warehouse, such as you can find in almost any big paper store, only a larger one than usual. It had a six-foot knife like a guillotine that traveled up and down in grooves with a big fly-wheel attachment and multiplying gear that gave force to its stroke so that it would cut through a pile of paper two feet thick, like slicing cheese.

We had taught Gooro to run this machine and use it to make use of him, saving ourselves a good deal of work by putting him up on the iron table and letting him twist the cutting wheel while one of us arranged the piles of paper on the table below. He used to enjoy it, and got so that he would twist the wheel like a windmill, and we did not know how to stop him.

One evening we had a lot of big, six-foot manilla paper to cut, just as big as the machine would take, and as it was a long job Ned and I stayed after the rest of the foremen had gone. We let Gooro work the wheel, and got along beautifully. We had nearly finished the job when we ran out of tobacco, and Ned told me to run up and look in his desk, where I would find some. We were down in the basement, and it was a rather long trip up the front of the store, and when I got back I found some old work on my desk to put away, so that I must have been gone nearly a quarter of an hour.

When I came back I paused at the basement door, and you can imagine my surprise to see Ned stretched out across the table of the cutting machine, pinned down by the knife and the big ape dancing around him and occasionally running over to pinch him or pull his hair or turn the wheel and tighten down the knife a trifle. It was an awful scene, almost as revolting as the sight of the priests deifying new and grotesque tortures for their victims.

Ned told me afterward how it happened. He had been changing the set of the gauge on the cutting table, and after loosening up the screws on the side he was standing, had thrown himself across, without thinking, under the blade of the knife, to loosen those on the opposite side. That was apparently just what Gooro had been looking for, and he spun the wheel around and caught Ned with the knife right across the back. The ape could have cut him in two just as easy as not, and he doubtless would have done it before he got through, but he seemed to want some fun out of the performance first, and he sat down on the end of the table, jabbering and chuckling and pulling Ned's hair, and every now and then taking another turn on the wheel.

Then he would loosen up the knife till there was almost a chance for Ned to wriggle out, but the first move Ned made the hairy devil would pin him down to the table again. As I say, I could not have been gone from the room more than a quarter of an hour, but Ned declared it seemed like two days, and when I came back Gooro had just about made up his mind to finish the job, and was sawing down the knife.

I saw what was up as soon as I got to the door, and I knew that if I went to making any row the gorilla was likely to finish Ned off hand and then take a turn at me, and I knew I was no match single handed for him in a rough and tumble fight. I did not have a gun, and there was not even a pen knife around the place, so far as I knew, but I was looking around my foot hit against a big iron scale weight that was propping open the door. It weighed about five pounds, but I picked it up and threw it as hard as I knew how, and it got the ape, as luck would have it, right in the back of the head.

He dropped on the table as though he had been shot, and I let Ned up in a hurry. But there was no need to hurry, for the gorilla never kicked. When we looked at him we found the blow had broken his neck.

Mr. Boulder never said a word about the killing, and I think he was rather glad to get rid of the beast. But I don't want any more fights with gorillas.—Washington Post.

BASHFUL.
John—Sally, if I was to ask you if you'd marry me, do you think you'd say yes?
SALLY—I—er—I guess so.
John—Wa-al, if I ever git over this 'ere darn bashfulness I'll ask you some o' these times.

Borrowed Butter.
Mrs. Hiclerow—Merey! Did you borrow this butter of Mrs. Nexdoor?
Daughter—Yes.
"It's horrid! It's positively awful! We can't use it at all."
"What shall we do?"
"You must run to the store and buy some. Get the best. As for this, put it on the ice until to-morrow, and then take it back to Mrs. Nexdoor, with thanks for the accommodation, of course. Don't tell her it's the same butter, because it might hurt her feelings. I suppose it is the best she can afford, poor thing."

Mrs. Nexdoor (the next day)—Of all mean people, those Hiclerows take the lead. Yesterday I loaned them a cup of butter, and they have sent back some stuff that isn't fit for axle grease.—N. Y. Weekly.

A SURE SIGN OF DEATH.
Doctor—Calm yourself, dear madam. I do not think your husband is seriously ill.
Mrs. Kentucky Colonel—Oh, he is! I know he is going to die. He has refused his morning drink of whisky.—Judge.

Couldn't Stand It.
Mrs. Flatter—George, dear, the cook is going to-morrow.
George—Why, what is the matter with her? I thought she liked the place.
Mrs. F.—That is the trouble. She says she is too contented with us.—Brooklyn Life.

Maybe He Was Disappointed.
"Did the murderer make any confession?" asked the city editor of the execution reporter.
"Not a word."
"Was he resigned to his fate?"
"He appeared to be quite cheerful, but toward the last he did considerable kicking."—Alex. Sweet, in Texas Siftings.

He Did.
"See, there comes Hummel. I don't want to meet the man. Only last week I asked him to lend me one hundred marks."
"He might have given you the money; he is rich enough."
"Well—um—the fact is, he did."—Illustrated Chronicle.

One When He Wouldn't Gratify.
I made a vow when Jennie said she'd have me—She, young and pretty; I, so old and gray—To gratify her those whim and fancy. And I was doomed to utter disappointment. One cloud I won't remove from Jennie's life. Although I roll in wealth—for I've discovered She wants to be my widow—not my wife.—N. Y. Herald.

Like Mother, Like Daughter.
Mother—Ella, your little friends have come to play with you.
Ella—Tell them I'm not at home.—Flicernde Bluetter.

Why She Read It.
Jack Dashing—Isn't that novel rather of the flesh, fleshy?
Penelope—Yes, but you know I'm a carnivorous reader.—N. Y. World.

Probably.
"How were those seats I sent you for last night's performance?"
"Out of sight."—Truth.

In Self-Defense.
She was the wife of a cavalry officer and she was going to have some fun with the lieutenant of infantry.
"I suppose," she said, "you have often been chased by the Indians on the plains?"
"Never," he responded politely.
"No?" keenly sarcastic.
"No. You see, they are so busy chasing the cavalry, they don't have any time for us."—Detroit Free Press.

What We Are Coming To.
Extract from a novel of the twenty-first century: "As the slender vine stretches out its tendrils and twines itself about the massive oak, so the lovely confiding Reginald clung for encouragement and support to his stately self-reliant bride, who herself seemed to gain additional strength in the realization of his weakness and dependency."—Brooklyn Life.

Her First Chance.
He (just accepted)—You say you were never engaged before?
She—Yes.
He—How is that? I thought all women always had three or four engagements.
She (guilelessly)—Well, I presume I shall, too. You see this is the first chance I have had.—Truth.

A Literary Light.
Hills—Who was that just bowed to?
Hills—Why, that's Jenks, the great fiction writer.
Hills—Never heard of him. What has he written?
Hills—Testimonials for patent medicines.—N. Y. World.

Synonyms.
Broad has been called the staff of life. Which goes perhaps to show Why money, nowadays, is known. Colloquially, as "dough."—Truth.

FUN IN THE BUSH.
Native Humorist—I got a head of him that time.—Life.
A Little Time Needed.
"Will you be mine, Ada, dear?"
"This is so sudden, Edwin! You must give me a little time."
"How much, dearest?"
"Just until I can call mamma in to witness my proposal. She is waiting in the next room."—Puck.

Small Potatoes.
Adams—A smart boy is Johnson's son! quite a little man.
Heaven (who is not friendly to Johnson)—Yes. He resembles his father, who is about as small a man as I ever met.—Alex. Sweet, in Texas Siftings.

Just What's Wanted.
"Hinges has invented a trunk that's going to bring him a fortune."
"What is it?"
"The lid is on the under side, so that everything that is packed at the bottom will be on top."—Answers.

A Difficult Calculation.
Visitor—You say you are sentenced here for life. Does not the future seem perfectly hopeless to you?
Convict—It did; but my friends is tryin' ter git me sentence reduced one-half.—N. Y. World.

Literally True.
"The parents of the India rubber man must have thought him a remarkable child when he was born."
"Yes; a regular bouncer."—N. Y. Press.

In a Chicago Justice Shop.
Magistrate—And did they ever find any clew to that murder mystery?
Officer—Yes, sir; they've found the body of the murdered man.—Plain Dealer.

Lamentable.
He—I wish I could take a nap every afternoon, because it makes me so much brighter in the evening.
She—What a pity you can't.—Detroit Free Press.

BASHFUL.
John—Sally, if I was to ask you if you'd marry me, do you think you'd say yes?
SALLY—I—er—I guess so.
John—Wa-al, if I ever git over this 'ere darn bashfulness I'll ask you some o' these times.

Borrowed Butter.
Mrs. Hiclerow—Merey! Did you borrow this butter of Mrs. Nexdoor?
Daughter—Yes.
"It's horrid! It's positively awful! We can't use it at all."
"What shall we do?"
"You must run to the store and buy some. Get the best. As for this, put it on the ice until to-morrow, and then take it back to Mrs. Nexdoor, with thanks for the accommodation, of course. Don't tell her it's the same butter, because it might hurt her feelings. I suppose it is the best she can afford, poor thing."

Mrs. Nexdoor (the next day)—Of all mean people, those Hiclerows take the lead. Yesterday I loaned them a cup of butter, and they have sent back some stuff that isn't fit for axle grease.—N. Y. Weekly.

A SURE SIGN OF DEATH.
Doctor—Calm yourself, dear madam. I do not think your husband is seriously ill.
Mrs. Kentucky Colonel—Oh, he is! I know he is going to die. He has refused his morning drink of whisky.—Judge.

Couldn't Stand It.
Mrs. Flatter—George, dear, the cook is going to-morrow.
George—Why, what is the matter with her? I thought she liked the place.
Mrs. F.—That is the trouble. She says she is too contented with us.—Brooklyn Life.

Maybe He Was Disappointed.
"Did the murderer make any confession?" asked the city editor of the execution reporter.
"Not a word."
"Was he resigned to his fate?"
"He appeared to be quite cheerful, but toward the last he did considerable kicking."—Alex. Sweet, in Texas Siftings.

He Did.
"See, there comes Hummel. I don't want to meet the man. Only last week I asked him to lend me one hundred marks."
"He might have given you the money; he is rich enough."
"Well—um—the fact is, he did."—Illustrated Chronicle.

One When He Wouldn't Gratify.
I made a vow when Jennie said she'd have me—She, young and pretty; I, so old and gray—To gratify her those whim and fancy. And I was doomed to utter disappointment. One cloud I won't remove from Jennie's life. Although I roll in wealth—for I've discovered She wants to be my widow—not my wife.—N. Y. Herald.

Like Mother, Like Daughter.
Mother—Ella, your little friends have come to play with you.
Ella—Tell them I'm not at home.—Flicernde Bluetter.

Why She Read It.
Jack Dashing—Isn't that novel rather of the flesh, fleshy?
Penelope—Yes, but you know I'm a carnivorous reader.—N. Y. World.

Probably.
"How were those seats I sent you for last night's performance?"
"Out of sight."—Truth.

In Self-Defense.
She was the wife of a cavalry officer and she was going to have some fun with the lieutenant of infantry.
"I suppose," she said, "you have often been chased by the Indians on the plains?"
"Never," he responded politely.
"No?" keenly sarcastic.
"No. You see, they are so busy chasing the cavalry, they don't have any time for us."—Detroit Free Press.

What We Are Coming To.
Extract from a novel of the twenty-first century: "As the slender vine stretches out its tendrils and twines itself about the massive oak, so the lovely confiding Reginald clung for encouragement and support to his stately self-reliant bride, who herself seemed to gain additional strength in the realization of his weakness and dependency."—Brooklyn Life.

Her First Chance.
He (just accepted)—You say you were never engaged before?
She—Yes.
He—How is that? I thought all women always had three or four engagements.
She (guilelessly)—Well, I presume I shall, too. You see this is the first chance I have had.—Truth.

A Literary Light.
Hills—Who was that just bowed to?
Hills—Why, that's Jenks, the great fiction writer.
Hills—Never heard of him. What has he written?
Hills—Testimonials for patent medicines.—N. Y. World.

Synonyms.
Broad has been called the staff of life. Which goes perhaps to show Why money, nowadays, is known. Colloquially, as "dough."—Truth.

FUN IN THE BUSH.
Native Humorist—I got a head of him that time.—Life.
A Little Time Needed.
"Will you be mine, Ada, dear?"
"This is so sudden, Edwin! You must give me a little time."
"How much, dearest?"
"Just until I can call mamma in to witness my proposal. She is waiting in the next room."—Puck.

Small Potatoes.
Adams—A smart boy is Johnson's son! quite a little man.
Heaven (who is not friendly to Johnson)—Yes. He resembles his father, who is about as small a man as I ever met.—Alex. Sweet, in Texas Siftings.

Just What's Wanted.
"Hinges has invented a trunk that's going to bring him a fortune."
"What is it?"
"The lid is on the under side, so that everything that is packed at the bottom will be on top."—Answers.

A Difficult Calculation.
Visitor—You say you are sentenced here for life. Does not the future seem perfectly hopeless to you?
Convict—It did; but my friends is tryin' ter git me sentence reduced one-half.—N. Y. World.

He—I wish I could take a nap every afternoon, because it makes me so much brighter in the evening.
She—What a pity you can't.—Detroit Free Press.

FOR YOUNG PEOPLE.

TWO LITTLE WITCHES.

"If you were a witch, Nan, what would you do?"

"If you were a witch?"

"I'd not be content to ride on a witch," said Nan, as she shook back her shining brown hair.

"Nor get up a storm To brow people harm If I were a witch."

"The snowflakes should fall on a hot summer day."

"They'd all melt away!"

"And in winter the meadows be filled with the gold Of cowslip and daffodil!"—"Ah, but Nan, hold!"

"With a laugh in her eye—"The florists would die."

"Say you were a witch, Meg, what would you do?"

"If you were a witch?"

"Would you sail through the air?"

"But Meg answered, lifting her frank eyes of blue."

"It's no sweeter up there."

"This world came so beautiful out of God's hands."

"I think I would—leave it just as it stands."

"Oh, wise little witch!"

—Ella F. Moberg, in N. Y. Independent.

WONDERFUL MONSTER.

The Pacific Walrus has Most Uncouth and Unusuality of Animals.

A mountain of heaving flesh, wrinkled and rough, ugly as a satyr, and even more clumsy than the hippopotamus, lives in the Arctic ocean wherever there are clam beds and enough open water to afford him a home. The Pacific walrus is the most uncouth and ungainly beast that ever sets foot on land. For two or three centuries he has been called the Moose, and also the sea horse—possibly because he is more like a horse than a humming bird, though not much.

THE PACIFIC WALRUS.

Three hundred years ago, when travelers and men of science were struggling to obtain a mental grasp of the form and habits of this strange creature, but wholly unaided by the collector and taxidermist, their piecemeal efforts produced some astonishing results—just as may always be expected under such conditions.

REDEEMING FORFEITS.

A Few Good Things for the Little Amusement of an Evening.

For a Game of Old Sorts.—Put bag several pieces of paper, on which is written one word, "song," "story," "poem," "joke," then pass it around to the company. Each one draws one slip, and in what is written on it or pay a forfeit. All these things may be either or repeated, except, of course, songs. Here are some good ones to give out for redeeming forfeits or any other game.

Generalized Too Much.

The French are a witty race, but French servants are reported the stupidest in the world. It is of a person of that race that this story is told: Justine was reproved by her mistress for bringing home lobsters that were not fresh.

HABITS OF HORSES.

Some Queer Tales Heard by a Reporter in a Street Car Horn.

Did you know, boys, that you can teach an intelligent colt or horse to do almost anything by patiently making him go through the performance many times, day after day? That is the way the circus trick horses and ponies are taught. After a colt is once trained to perform a variety of tricks he becomes very valuable. Circus shows will buy such horses at big prices. A few years ago a boy in western Pennsylvania trained a colt to perform as he had seen horses perform in shows, and when the next circus came around the proprietor gave him \$500 for the animal. The New York Times gives an account of a street car horse named Charley, on the Central "Cross-town" line. Bill Smoot had driven Charley for a long time, but Bill was discharged one day and a new driver took charge of the horse. The account says:

All went well until the corner of Broadway and Seventeenth street had been reached. Then Charley stopped, turned about, faced the driver, elevated his upper lip and opened his jaws. The man dropped the lines in horror. Reinforced by the conductor he tried to get Charley to "tend to business," but the beast was obstinate and had to be taken to the barn, the incident causing some little blockade of travel. The next day the horse went out under fresh guidance and at the same place repeated his previous antics. "You fellows dunno how to drive a horse, that's all," remarked Bill, who put in his leisure hours teaching the barn.

"If you can make him go you can have your place back," responded an official, who overheard the criticism. "Hitch him up," said Bill, "and I'll do the trip on schedule time, you bet."

While waiting for the car to come out for a moment. Returning, he took the lines, and the outfit went gayly away. It will be certain and a more substantial than could be had. It was possible except for the photo. The verdict of November 6. One even more satisfactory feature of about times is the universal aversion to the played to any revival in the of a "boom."

In some quarters there is a position to exaggerate the effect of low prices for wheat and cotton upon the agricultural interest in it is overlooked that both wheat and cotton can be raised much more cheaply than formerly, and driver costs less to handle and train these articles than ever before. Some portions of the south, and can be grown probably with land even at the present depressed rate and in other sections where prices press hard some corn, but it is had from better forer than better methods of cultivation. Again, we have a great abundance of these low priced commodities which brings their aggregate value up to normal volume. Corn are benefited by these low prices and have more to spend in directions. About 50,000 bushels of wheat have already been fed to cattle with advantage, a wasted, and good authority that mate that as much again. The used before the next crop. It is of all these and other offsets appropos, it will be seen that the present condition of the divided farmer, while bad enough, should quite so wretched as many had to have us believe. Through a long months of panic and of a we have had fewer complaints from the farming than from the two in common with other. The sharing the cheapened cost of food we cannot believe that the third worse off than other divisions labor.

As for the industrial side, it is that is hopeful. Our textile industry is not fully employed, with some turning out a larger proportion of better profits than six months. The boot and shoe trade has been very active in low prices for several months. The iron receives very slowly, still the annual degree of confidence in the future, and many.

HOW IT IS DONE.

bottom of the jar on account of the water entering through the small holes in the bottom. But when the water penetrates into the bottle within the box and mixes with the powder it produces a great quantity of carbonic acid gas, which expels the water through the box and allows the latter to rise to the top of the jar, the gas in side keeping the inner disc of the valve closed. When however the cork outside rises to the top of the water it releases the valve and the gas escapes. The box is now in its first condition, and the water, being enabled to enter by the holes at the bottom, again fills the box and sinks it until the gas is once more forced when it rises anew to the surface. This rise and flow will continue for some time. This curious experiment may be performed on a larger scale in a water tank of a bath, the box, of course, being made in proportion.—N. Y. Recorder.

Tidied Girl of Her Age.

Mile. Paulina, of Holland, is probably the tiniest girl of her age in this planet. She is eighteen years old, weighs less than nine pounds and lacks four inches of being as high as a two foot rule.

FARM AND GARDEN.

EXPENSE OF ROADS.

A Simple Statement from a Plain Householder's Point of View.

In almost every highway, there is the same commendation of the object, the same disposition to dwell upon the comfort and profit if that object can be realized, but then comes, with a lament and an apology, a positive prohibition of progress by calling attention to the enormous and intolerable expense.

This inverted climax is reached by aggregating in one vast sum the cost of furnishing an entire state or county, or even a township, with durable roads properly constructed in any enterprise. The farmer who counts only the cost will never sow any wheat. To a man who knows nothing but the cost of bread and butter, it would be impossible to feed the people of the United States for one year. If all the social drinking in the United States had to be done at a gulp and paid for upon a signal, it would not only kill all the drinkers, but for the time would make an unheard-of stringency in monetary affairs. To get nine hundred million of dollars ready all at once to make money in money or currency would drain the banks to their reserves, and empty the pocket-books of the people. Things are not done that way.

Expenditures are made from year to year, as accumulations create. The burden is adjusted so that like the pressure of the atmosphere it is never felt, and if known is only known as a blessing.

But the principal fact in this connection is that there need not be an increase of expenses, but there should be a wiser use of the expenditures that are annually made. Not heavier taxation, or an increase in corporate and municipal debts, is the first aim, but permanent work, so that each year's work may join and supplement the work of the previous year. If any one will take the pains to calculate the amount ordinarily expended upon our roads to make them nothing the better, but rather the worse, and to disappear before storm and flood and frost of the next winter and spring, he will find that the sum in almost every of our older states rises into the millions. And this wasteful expenditure has been repeated year after year for two or three generations, and bids fair to be repeated for generations to come. The waste already amounts probably to a sum equal to all our public debts, and out of it all we have few miles of really good roads.

No, the problem of first consideration is not how to raise more money, but rather to expend what we do raise so that the work may be satisfactory and permanent. Our roads would now be in better and more serviceable condition if all the public work had been done to secure properly-constructed roadbeds, without metallizing—roadbeds of clay, thoroughly underdrained, with sufficient shingles, either of iron pipe or of clay tile, protected at the openings with hands of masonry. The material will not decay. It will bear up any load that horses can pull. It is smooth, firm and elastic.

When the time might come to put on metal—to complete the structure by putting on the roof—the metal would remain until worn to powder by the wheels and hoofs passing over it. Over such roadbeds a coating of macadam three inches thick, broken, spread and rolled according to Macadam's rule, would be quite sufficient for any ordinary country road. Where travel is very heavy a greater depth of metal might be required, but the writer knows of a road which bears a heavy traffic, out in a hillside, that has but five inches of broken stone. It stands and wears, year after year, always smooth and dry. But it was thoroughly constructed and drained before the stone was placed upon it, under the direction of an engineer with competent knowledge and good common sense.—Col. W. D. McLaugh, in Good Roads.

Tight Covers for Cisterns.

An unfreeable cistern that has running water under it, and by running water a tight-fitting cover. A New York subscriber has tried cement, but every winter it breaks up as far as the frost reaches. He wishes to make a pond fifteen feet across to contain running water. Prof. Walter Flint of the Maine agricultural college, says: "The only way to make a cement cistern that will stand winter weather is to have a tight cover. With running water and a cover, freezing can be prevented, and that is the only way to save a cistern no matter what it is made of. Freezing will destroy even a boiler iron tank. The chances are that with a cement cistern, even if the water is drawn off, the outside frost will crack the cement."—American Agriculturist.

Road Dust for Poultry Houses.

The great drought this summer has afforded the farmer an endless opportunity of laying up a supply of road dust for the winter. It is to be hoped that the supply is a liberal one, for it is not merely essential to the welfare of the hens as a dust bath, but if properly utilized may be made a great saver of labor. By keeping the door of the poultry house well covered with dirt the cleaning problem will be greatly simplified, and the dirt, being a deodorizer, will keep the place much sweeter. Whenever a cleaning is necessary, the old dirt with the droppings should be swept off and packed in barrels, while fresh dirt may be scattered freely over the floor.

Careless picking of fruit, bruising it, etc., are like producing a valuable picture and then defacing it.

ROYAL Baking Powder

Absolutely pure.

Highest of all in Leavening Strength. U.S. Govt. Food Report.

The official report shows Royal Baking Powder chemically pure, yielding 160 cubic inches of leavening gas per ounce of powder, which was greatly in excess of all others and more than 40 per cent. above the average.

Hence Royal Baking Powder makes the lightest, sweetest and most wholesome food.

ROYAL BAKING POWDER CO., 108 WALL ST., NEW-YORK.

Insomniably Repressed.

Dipping his golden pen into his crystal inkstand, the dramatic critic wrote thus: "The chief interest, of course, centered in the debut of Miss De Whoop as Ophelia. Miss De Whoop has a magnificent presence, good voice and fine appreciation of her lines, but she is obviously handicapped in that she is only charged with cruelty and inhuman treatment. She was quite unable to hold the interest of the large and cultured audience last night and did not receive a single curtain call. The friends of Miss De Whoop comfort themselves with the reflection that she is still young and will undoubtedly develop."—Detroit Free Press.

The Autumn Crop.

Van Dorn—Why did Highflyer look so depressed this morning? Jellie—Why, he called on Mabel Wilson last night and found Miss Dollars and Miss Banks both there. Van Dorn—Well? Jellie—Why, you see he's engaged to all of them.—Judge.

Look Out for Cold Weather.

But ride inside of the Electric lighted and Steam Heated Vestibule Apartment trains of the Chicago, Milwaukee & St. Paul Railroad, and you will be as warm, comfortable and cheerful as in your own library or boudoir. To travel between Chicago, St. Paul and Minneapolis or between Chicago, Omaha and Sioux City, in these luxuriously appointed trains is a supreme satisfaction; and, as the somewhat ancient advertisement used to read, "for further particulars, see small bills." Small bills (and large ones also) will be gladly exchanged and step your tickets by all coupon ticket agents. For detailed information address Geo. H. Pearson, General Passenger and Ticket Agent, Chicago, Ill.

Perry useful years behind are fifty urgent pleas for greater usefulness in the future.—Young Men's Era.

The peacemaker need never be out of employment.—Rum's Horn.

After Getting His Work In.—"But I must not dwell," cheerfully hummed the host, quite fitting away from his victim's nose just as the slap came.

"Oh, yes, when I was in England I was enthusiastically received in court circles. She (snuggled)—"What was the charge against you?"—Judge.

Poor Brooklynite.—"I tell you, Brooklyn is growing rapidly." Second Brooklynite—"I should say so! The rooms in some of the new flats remind you of Harlem?"

The devil does a big day's work on the day he makes a preacher afraid of the poorhouse.—Rum's Horn.

"It was pretty stormy last night." "Yes; and as I was late in getting home, and my wife was waiting for me, I found it stormier inside than out."

A HOUSEKEEPER UPON SAYS that her grocer is so slow with his deliveries that when she orders eggs the boy brings chickens.—Philadelphia Record.

LECTURER (to medical student)—"This subject's right leg is longer than his left, which causes him to limp. Now, what would you do in such a case?" Student—"Limp, too, I guess."—Philadelphia Record.

"I do not know whether to accept Willie Hinkins or not," said the young woman. "He's so wonderfully well satisfied with himself." "Well, he'd surely be easy to get along with," replied the companion. "What makes you think so?" "He must be easily pleased."

Hall's Catarrh Cure. Is taken internally. Price 75c.

The man who loves his duty will not slight it.—Rum's Horn.

Hypochondriac, despondent, nervous, "tired out" men—those who suffer from backache, weariness, loss of energy, impaired memory, dizziness, melancholy and discouragement, the result of exhausting diseases, or drains upon the system, excesses, or abuses, bad habits, or early vices, are treated through correspondence at their homes, with uniform success, by the Specialists of the Invalids' Hotel and Surgical Institute, of Buffalo, N. Y. A book of 136 large pages, devoted to the consideration of the maladies above hinted at, may be had, mailed securely sealed from observation, in a plain envelope, by sending 10 cents in one-cent stamps (for postage on book), to the World's Dispensary Medical Association, at the above mentioned Hotel. For more than a quarter of a century, physicians connected with this widely celebrated Institution, have made the treatment of the delicate diseases above referred to, their sole study and practice. Thousands, have consulted them. This vast experience has naturally resulted in improved methods and means of cure.

Piles.

Piles is so common that every other person you meet is troubled with it more or less. It seems to be a little thing and usually gets little attention. It may not be serious at first, but it makes a man sick—makes him nervous, cross, irritable—unfit for business. It robs him of sleep, takes his appetite—cuts down his flesh—and yet he is careless about it.

will cure Piles. It will cure other things, too, but it is particularly good for Piles. It stops the itch and the ache at once. It may take several days to wholly allay the inflammation and reduce the swelling, but it will do it—sure. Has done it in innumerable cases. Never has failed.

Good for Eczema, Ring Worm, Tetter, Itch, Salt Rheum, Dandruff, Pimples, and all Skin Diseases.

50 Cents—Drug Stores.

FOSTER MEDICINE COMPANY, BALTIMORE, MD.

FOSTER'S GERMAN ARMY AND NAVY CATARRH CURE cures Catarrh, Hay Fever, Cold in the Head and all Inflammation of the Nasal Mucous Membrane.

Dr. A. S. Todd's Anti-Bilious Pills

For Biliousness, Constipation, Headache, Stomach Ache, Indigestion, Nervousness, Irritability, and all Bilious Disorders.

Laughlin's Infant Cordial

For Colic, Wind, Spasms, and all Infant Disorders.

Laughlin's Warm Syrup

Errors of Youth BLOOD POISON

Or your back aches, or you are all worn out, really good for nothing. It is general debility. Try **DR. THEEL'S BLOOD PURIFIER**. It will cure you, cleanse your liver, and give you a good appetite.

FINANCIAL REVIEW.

Henry Clews' Weekly Letter on the Business Situation.

NEW YORK, Nov. 17.—Although the immediate effect of the bond issue was a realization of profits made in anticipation of the event itself, its ultimate effect will be to strengthen confidence both at home and abroad. Nobody contradicts the fact that the necessity of the loan is a misfortune; but the determination of the government to protect the national credit by the best possible expedient, until the deeper causes for distrust of our currency system can be remedied, is the strongest sort of argument for confidence. Mr. Cleveland has been lavish enough in promises to this end; yet his action in the matter has not been prompt enough to meet the preferences of the banking community. Europe, however, can now rest assured that our currency will be maintained upon a gold basis, and this will do much towards overcoming the prejudice of foreign holders, who have very naturally feared that interest and principal of our securities of our money might some day become payable only in debased money. As for business interests, sufficient time has not yet elapsed to actually feel the results of the late election. Everybody now believes that silverism, populism and tariff agitation are questions of the past; or at least that the country is assured of a rest from such disturbances for some time to come. Industry will thus receive encouragement towards renewed exertion, and while from the nature of the case recovery must be slow, it will be certain and vastly more substantial than could have been possible except for the popular verdict of November 6. One of the most satisfactory features of the times is the universal aversion displayed to any revival in the shape of a "boom."

In some quarters there is a disposition to exaggerate the effects of low prices for wheat and cotton upon the agricultural interests. It is overlooked that both wheat and cotton can be raised much more cheaply than formerly, and that it costs less to handle and transport these articles than ever before. In some portions of the south cotton can be grown probably with profit even at the present depressed price, and in other sections where low prices press hard some compensation is had from better fertilizers and better methods of cultivation. Again, we have a great abundance of these low priced commodities, which brings their aggregate value up to normal volume. Consumers are benefited by these low prices, and have more to spend in other directions. About 50,000,000 bushels of wheat have already been fed to cattle with advantage, not wasted, and good authorities estimate that as much again will be used before the next crop. When all these and other offsets are considered, it will be seen that the present condition of the American farmer, while bad enough, is not half as wretched as many would have us believe. Through all these long months of panic and distress we have had fewer complaints from the farming than from the manufacturing districts; and as the farmers in common with others are sharing the cheapened cost of living we cannot believe that they are worse off than other divisions of labor.

As for the industrial situation, that is hopeful. Our textile mills are not fully employed, but they are turning out a larger product at better profits than six months ago. The boot and shoe trade has been very active in low-priced goods for several months. The iron trade revives very slowly, still there is an unusual degree of confidence in the future, and many of the western establishments which are most favorably circumstanced as to locality and plant are running close to their full capacity. The stock exchange is not blind to all these factors. Investors show general confidence in the future, and while not often able to buy, stubbornly refuse to sell; in fact the tenacity with which stocks and bonds are held is unusual. Money is plentiful and easily obtained for enterprises of merit; but railroad stocks and bonds are naturally neglected while earnings continue so poor. Better business, however, will soon result in improvement in this respect; hence railroad shares will quickly share and possibly anticipate the brighter prospects now in view.

A Novelty for '07.

Mr. W. F. M. McCarthy has been commissioned by a syndicate of local capitalists to prepare a novel attraction for the Baltimore exposition of 1907. The attraction is to be known as "A Journey to the Centre of the Earth."

A shaft is to be sunk into the ground to a great depth. At the bottom will be shown, under the glare of electric lights, the methods of mining gold, silver, coal, copper and other minerals. Miners will

be constantly at work in the various departments, and all the processes of mining and loading each of these minerals will be accurately reproduced. There is also to be a reproduction of Dante's Inferno in this underground region, and adjoining it will be a fairy grotto, with music and ballet dancing.

One of the merits claimed for the underground project is that it will afford an excellent opportunity for studying the geological formation of the earth, and of examining the various strata as the shaft descends. At the top the shaft will be brilliantly lighted, and the lights will grow dimmer as the descent is made until they will go out altogether, leaving the visitor in total darkness for a few seconds before the bottom is reached. In the caverns at the bottom will be myriads of colored electric lights.

The trip downward is to be made by means of an elevator 45 feet long and 12 feet wide, capable of accommodating 150 persons. The cost of the project is estimated at \$350,000. This plan is the opposite of the Ferris wheel at the Chicago Fair, which carried passengers up into midair.

To the Editor of the Republic.

You will please give me space in your paper for a few thoughts on the schools of our country.

As the bonds are voted down by a large majority it causes the future of our schools to look rather dim. This cannot be helped at present, but a few thoughts as to the future: I would suggest that our school board hereafter would not use one dollar of the regular appropriations for any other purpose than for teachers' salaries, but have the Legislature to authorize by law our county commissioners to levy any sum necessary for building houses not exceeding \$4,000 annually, and also levy the examiner's salary and school commissioners' salaries and let the teachers' salaries be reduced two dollars per month. This would go far toward paying incidental expenses. By this method we could have five months school from year to year.

I tell you, my dear friends, if we don't improve our schools soon there will be an exodus from the county that will not be wholesome. The above are my ideas on the school question and I hope some one will improve my plans.

A. M. Keyser, Md., Nov. 19, 1894.

To the Editor of the Republic.

After a long but rather pleasant journey, Willie and I reached Denison in safety. Stopped in St. Louis for a night's rest. Passing through Indian Territory we were informed that trains were frequently "held up" in that vicinity. We experienced no vicissitudes, but a few days later the train was stopped and robbed, both gentlemen and ladies having to give up money, watches and other valuables.

Many parts of the country were beautiful. The large fields of cotton are partly picked. Found Mr. Tasker well, and quite elated over the completion of a fine new church and a cozy parsonage adjoining. A generous people had stored our pantry with necessities and luxuries. I never met with kinder or more pleasant friends. We have our own horse and buggy and I enjoy driving around the lovely country. Wish I could call for some of my Oakland friends. The climate is very temperate, but high winds are quite a drawback. People here are used to them, but to me they suggest cyclones.

Denison has eighteen thousand inhabitants, street cars and electric lights. I think we will like our new home.

Mrs. D. Tasker, Denison, Texas, Nov. 18.

Sam Jones Discussed.

A Parkersburg dispatch says that Rev. Sam Jones, who has been lecturing throughout West Virginia during the past three months and who still had an extensive itinerary marked out for him, has cancelled all his future engagements and quit the state in disgust. He explains that the people are not up to the appreciation of his style, or lack of it, and that when only a hundred and twenty persons met to hear Sam Jones many of them women and "kids," as he expresses it, he was able to say it was the meanest crowd he had faced in twenty years.

It was not Mr. Jones' intention to compliment the people of West Virginia but his assertion that they are unable to appreciate his style is a tribute to their good taste and reverence for things divine, nevertheless. It speaks well for the intelligence and devoutness of the Christian people of the state that they have refused to encourage a clown wearing the livery of Heaven in his hippodrome tour. Mr. Jones' peculiar style in the pulpit makes a farce of religion, and the good people of West Virginia will not tolerate it.—Intelligencer.

GEOLOGY OF ROADS.

Decayed Stone Does Not Cement and is Poor Material For Road Metal.

Functional information for the guidance of all interested in the good roads movement is embodied in an important report of the United States geological survey on the geology of the common roads of the United States, prepared by (geologist) N. S. Shaler. The report outlines the history of American roads, discusses the geological condition of road materials and reviews the sources of supply of road stones.

"With the invention of macadam," says Professor Shaler, "a new path in road construction was opened. The peculiar advantage arising from his discovery is that roads can be constructed at a relatively small expense as compared with pavements made of blocks, and the work can be done in many regions where suitable paving blocks cannot be obtained. If a mass of broken stones is allowed to lie with the fragments resting on each other no evident trace of cementation takes place, but if the materials be repeatedly traversed by heavy rollers or a roller of great weight then as soon as it is wet the cementation sets in.

"This fixing of the bits of stone together has been attributed to the interlacing of their rough surfaces when they are driven together. The effect, however, is due mainly to the fact that the friction of bit on bit produces by the grinding action a sufficient amount of powdered rock to form the required cement. The binding strength of the cement exists in some measure with all the species of stone.

"No decayed stone retains the capacity of cementation when powdered, though in some few cases where material is charged with iron oxides it may undergo a certain binding, and no ordinary flinty gravels free from iron oxides can be made to form a firm roadbed. Pebbles, even though they cannot be made to cement in their natural state, will do so when broken into bits. Thus the macadam invention can be applied in three ways—breaking stone which is taken from the quarry, using stone broken by natural processes and which is not decayed, and by rebreaking pebbles which in their natural state cannot be made to unite by the cementing processes.

"The volcanic rocks, the dyke-stones and large crystalline masses and the superficial lavas are the best fitted for road-making, and of these the material known as basalt is much the best. The lavas which have cooled in fissures are stronger than those found on the earth's surface.

"Almost as important as the character of the road surface is the grade, and experience shows that, except under peculiar conditions, it is very profitable to build roads having five feet of fall in each 100 feet of length."

In general, the report concludes: "The greater part of the United States is characterized by great seasonal variations and those climatic features which most affect the conditions of carriage roads. There is prevailing an alternation of heavy rainfall and protracted drought. During rain periods the roads are subjected to a deep penetration of water and serious washings. In the dry season the upper surface becomes powdery, and these conditions make high grade roads peculiarly necessary and make their maintenance costly."—Philadelphia Press.

Pea Ridge.

After remaining silent for some time I will endeavor to pen a few happenings of the past.

Our school is progressing very nicely under the care of Mr. M. H. McKinzie.

Carpenters are at work rebuilding the Drust cottage, near Flowing Spring, and it will be occupied in the near future by Mr. and Mrs. Frank Lancaster.

Mr. Walter Lancaster is erecting a dwelling house on his farm and it will be finished by the first of next month. This is quite an improvement.

Mr. Waldo Broadwater visited Westernport last week and reports times very hard.

Mr. W. M. A. Robeson has moved his saw mill to J. F. Robeson's and is doing a booming business.

William Broadwater visited the swamp Monday.

Married.

Isaac Newton Bowman and Miss Amytha L. Snider, both of Kalona, were united in marriage at the Presbyterian manse, by Dr. Edward N. Barrett last evening.

Following the marriage came a reception at the hospitable home of Mrs. Tantlinger, on Burlington street, an elegant supper being served.

The happy couple left on the evening train for their future home at Kalona. Friends wish them much happiness.—Iowa City Republican, Nov. 15.

Ripans Tabules relieve headache.

CASTORIA

for Infants and Children.

"Castoria" is so well adapted to children that I recommend it as a superior remedy for all ailments of infants, children, and young people. It is a safe, reliable, and pleasant medicine, without injurious medication.

"The use of 'Castoria' is so universal and its merits so well known that it needs no work of supererogation to endorse it. Few are the intelligent families who do not keep Castoria within easy reach."

CHARLES MARTIN, D. D., New York City.

Castoria cures Croup, Constipation, Stomach Troubles, Diarrhea, Indigestion, Flatulency, Worms, Green Stools, and promotes healthy action, without injurious medication.

"For several years I have recommended your 'Castoria,' and shall always continue to do so as it has invariably produced beneficial results."

EDWIN F. PARKER, M. D., 125th Street and 7th Ave., New York City.

THE CASTORIA COMPANY, 77 MURRAY STREET, NEW YORK CITY.

BALTIMORE BARGAIN HOUSE

OUR WASHINGTON LETTER.

(From our Regular Correspondent.)
WASHINGTON, Nov. 19, 1894.

Mr. Cleveland will probably find himself in hot water as soon as Congress meets, and judging from the number of Democrats now engaged in gathering fuel there is little probability that the supply of hot water will be allowed to run short during the session. First and foremost Democrats from the west and south will begin to ask unpleasant questions about the bond issue announced last week—Secretary Carlisle may yet have to explain why he persisted in saying up to the day before the call was issued that no issue of bonds was contemplated. Representative Hooker, of Minn., voiced the sentiment of these Democrats when he said publicly: "This issue of bonds is a defiance of Congress, and it seems to have been intended as such. There is nothing in the financial situation, or in the condition of the Treasury department, which made it necessary for the President to negotiate this loan before the representatives of the people could assemble, and there would seem to be every reason why the representatives of the people should be consulted about the matter. The fair conclusion would appear to be that the President feared that his policy would be disapproved if submitted to Congress, and he desired to assume this authority for himself at a time when he could not be interfered with." It is significant that it is the President, and not the Secretary of the Treasury, who is blamed.

Another question that promises to give Mr. Cleveland trouble is: By what authority the President attempted to mediate between China and Japan? The Republicans will take a hand in the discussion. Some of the ablest constitutional lawyers in Congress, without regard to party affiliation, say that Mr. Cleveland had no more authority to offer to arbitrate between China and Japan than he has to declare war upon one or both of these nations without submitting the matter to Congress, or to make a treaty without the concurrence of the Senate. They argue to act as arbitrator between China and Japan is to assume responsibilities which may lead to war with any one of several European nations, as it is generally understood that it was British diplomacy which caused China to ask this Government to mediate, and that it was done by Great Britain because she did not care to run the risk of a war with Russia by making the offer herself. It is characteristic of John Bull to make use of others to accomplish his own end. He seems to have had no difficulty in pulling the wool over the eyes of Secretary Gresham and Mr.

Cleveland, who have been peculiarly unfortunate in their dealing with foreign nations. Aside from the constitutional question, there is another reason why many are opposed to Mr. Cleveland's too hasty acquiescence in the request of Great Britain made by China—it reverses the American policy of keeping clear of foreign entanglements.

It is also on the program for the Hawaiian question to make more trouble for Mr. Cleveland. It will be remembered that early in the year Mr. Cleveland sent Admiral Walker to Hawaii, as commander of the Pacific squadron, with his personal instruction to make a thorough and concise report of condition of affairs in that country. It was generally understood at the time that the object in view was to get a report that would endorse the one made by "paramount" Blount. Admiral Walker's report was made months ago, but it has never been made public, and probably never will be, unless Congress adopts a resolution asking for it, and that is just what a number of Congressmen will try to have done. The cause of the suppression of Admiral Walker's report is no secret in Washington. He, like most of the officers in our Army and Navy, is thoroughly honest and patriotic. His report contained only the unvarnished truth. He found that the Hawaiian republic was firmly established and well able to maintain itself against the few royalists who still cling to the idea of a restoration of the throne by Mr. Cleveland; also, that the sentiment of the citizens of Hawaii was overwhelmingly in favor of a political union with the United States, and finding those things he dared to write them down in his report, although he knew very well that such a report would not be favorably received.

It is not probable that Republicans will take any part in the fight that will be made on the administration because of the bond issue further than to emphasize the fact that the Democratic administration has found itself by reason of its incapacity and unsound methods compelled to borrow \$100,000,000 inside of ten months. That fact will of itself speak sufficiently loud to the common sense of the country without comment, and it is upon the common sense of the country that the Republican party relies for future power.

Very few Republican Senators and Representatives have yet arrived in Washington, and not many are expected until after Thanksgiving. Those who are here are not doing much talking about the future program of the party. They all appear to have adopted Mr. Lincoln's favorite maxim—"don't cross the bridge before you get to it."

North Glade.

The health of our community is very good.

Almost everyone appears well pleased over the result of the election.

J. L. Fitzwater is making considerable improvement at his house.

Our Epworth League is progressing nicely. A special program is being prepared for Thanksgiving evening. All cordially invited.

Geo. W. Moon is having good success with our school again this winter. This is one of the best schools in the county, but one of the poorest houses.

It was fully understood that we would get a new school house this year; we didn't get it.

Sufficient taxes have been levied and paid to run our schools at least two terms, but we don't expect to get one full term.

A store and postoffice is needed here for our convenience. This is good stand, we think, and we expect some one to engage in that business ere long.

Ye teachers of vocal music take notice: Quite a number have expressed their desire to have a singing school organized here.

Our new pastor, Rev. W. W. Lloyd, is well received by this congregation. He has preached two excellent sermons for us.

Col. McCrobie is very ill. His recovery is doubtful. He is 82 years old.

An immense crop of potatoes has been raised in this vicinity. Scarcely anyone raised less than one hundred bushels. Edward Beckman raised eight hundred bushels of saubie ones.

J. L. Fitzwater raised over one thousand bushels. Theodore Beckman had ten acres planted and of course will surpass all others, but his amount is not ascertained yet.

J. L. McCrobie had seven hundred bushels on a little more than two acres of ground. Elijah Moon had about three hundred bushels on one acre. A great many others we might name had several hundred bushels each. But they don't only raise potatoes, but almost everything else.

Dead Letter List.

List of mail matter remaining unclaimed in the postoffice at Oakland, Garrett county, Maryland, for the week ending Nov. 24th, 1894, the parties addressed being unknown to the postmaster.

Mr. J. B. Brooking, Mrs. John Jackson, Miss Annie McNelly.

One cent on each article is chargeable for advertising. Parties calling for this matter, will please say it is advertised, otherwise they may not receive it.

E. H. BARTLETT, Postmaster.

Malette has everything good to eat at a reasonable price. Try Enthal floor.

VOLUME 18.

OAKLAND, MD., THURSDAY, NOVEMBER 29, 1894

NUMBER 38.

NEWS OF A WEEK.

Happenings in and About Town told in Short Paragraphs.

Bread is now selling at three cents a loaf in Cincinnati.

Mr. Jacob D. Schroyer, of Accident, has been granted a pension.

Call at Sincell Bros', and see their new stock of clothing, etc.

Men's and boys' overcoats and caps at Townshend & Son's, 36-37.

A new line of gloves and mittens at Townshend & Son's, 36-37.

Malette pays highest cash price for game and produce of all kinds.

Malette is giving silverware away. Call and see him and get particulars.

Men's, women's and children's leggins at Townshend & Son's, 36-37.

Mr. A. D. Naylor's new building on Railroad street is nearing completion.

Just received at Townshend's, a nice line of hoods, fascinators and woolen hose. 36-37.

Malette has everything good to eat at a reasonable price. Try Eulalie flour.

New style fall and winter cloaks just open at M. L. Scott's Baltimore Store.

Blank deeds for sale at this office. The deeds are specially ruled and printed very neatly.

Agents wanted at good salary. SWEET & SHACKLEFORD, 37-47 Mt. Lake Park.

Take your produce to Malette. He gives you cash or goods at rock-bottom prices. Don't forget the place.

Mr. Samuel Lawton has secured the contract for placing the steam heating plant in the new Commercial hotel.

Send your check books to this office to be numbered. We have a special machine for just this class of work.

We have just received a large and new line of jewelry and silverware. Come in and see us and we will do you no harm. MALETTE.

The lumber for Messrs. D. E. Offutt & Son's new warehouse on Liberty street has been placed on the ground. The building will be 40x60 feet.

Just received at City Roller Mills one ear shelled corn containing 821 bushels. Will sell same for 60c per bushel or trade a portion for good oats. 35-37.

A. D. Naylor will have a fine line of cutter sleighs on hand the first of December. Those wanting anything in that line will do well to give him a call. 36-37.

The annual financial statement of the School Commissioners of the county as made by Treasurer Wm. Hinebaugh appears in this issue of THE REPUBLICAN.

A very valuable cow belonging to Mr. George W. Legge was struck by a freight engine at the Washington Spring crossing and so seriously injured that she had to be shot.

Dr. J. G. Robinson, Dentist, of Baltimore, has decided to locate permanently here in the town of Oakland, where he will be fully equipped to perform in all branches of his profession. Office with Dr. M. C. Hinebaugh. 35-37.

Owing to the illness and consequent non-arrival of the Rev. S. M. Engle, of the Presbyterian church, Rev. S. K. Arbutnot, of St. Paul's church, preached in the Garrett Memorial church Sunday morning last. His was a typical Thanksgiving sermon.

At Parsons, W. Va., the grand jury returned indictments against L. Rosenthal and Herman Bloch, of New York; J. Kaplan, of Frostburg; Frank Hildeson and Solomon Lazarus, of Parsons, for having set fire to their store last January and causing the destruction of three buildings.

Rev. Butler will preach in St. Mark's Lutheran church Sunday morning next. Rev. Butler was recently called by the congregation of the Lutheran church, and this will be his first sermon. He will arrive here on Saturday accompanied by Rev. E. R. McCauley.

For a pain in the side or chest there is nothing so good as a piece of flannel dampened with Chamberlain's Pain Balm and bound on over the seat of pain. It affords prompt and permanent relief and if used in time will often prevent a cold from resulting in pneumonia. This same treatment is a sure cure for lame back. For sale by Oakland druggists.

It has been announced by the committee having the affair in charge, that the young ladies of Oakland will give a festival in Offutt's Hall Thursday and Friday nights of next week, for the benefit of the Oakland Fire Department. The members of the department have had the engine house plastered and papered at their own expense, and it is hoped that the public will patronize the festival very liberally.

On the part of the Zeller Concert Band, of this place, we have been requested to thank Smith's Military Band for its excellent music and highly appreciated services rendered at this place last Thursday evening. Also, on the part of the Terra Alta Republican Club a vote of hearty thanks is returned to the many members of the Oakland Club for their presence in Terra Alta on the above occasion.—Oracle.

The school house at Oak Grove near Terra Alta, was burned down Monday night about midnight by some unknown person. Trouble has been brewing for some time about having a teacher that some of the patrons did not want, and as the teacher was qualified to teach, the only way to prevent having school was to burn down the school house, which occurred as above stated.

The removed case of Hiram P. Tasker vs. the County Commissioners of Garrett county has been entered upon the docket of the Circuit Court at Hagerstown. The plaintiff sues the county for \$15,000 for services in compiling a list of titles to lands in Garrett county, etc., which he claims occupied him six years. B. A. Richmond and Ferdinand Williams for plaintiff; E. H. Sincell and J. J. Hinebaugh for defendants.

Sheriff Wegman of Garrett county, Md., was a welcome caller at the Commercial office Monday. He was en route to Grantsville, his native home, but intended to stop at Salisbury while the Republican barbeque and political meeting were in progress. He was badly crippled, too, by a Job's comforter on his knee, but as that is only temporary in nature, he bore it good naturedly. Sheriff Wegman is one of the best officers Garrett county has ever had, a high meed of praise for one so young.—Meyersdale Commercial.

Henry Wilson, the postmaster at Welshton, Florida, says he cured a case of diarrhoea of long standing in six hours, with one small bottle of Chamberlain's Colic, Cholera and Diarrhoea Remedy. What a pleasant surprise that must have been to the sufferer. Such cures are not unusual with this remedy. In many instances only one or two doses are required to give permanent relief. It can always be depended upon. When reduced with water it is pleasant to take. For sale by Oakland druggists.

Alexander Reed, Esq., a Garrett county farmer, had on exhibition in Oakland yesterday, a variety of Irish potatoes grown on his farm, which were the finest specimens we have ever seen. Mr. Reed planted a bushel and a half and from that quantity of seed raised eighty bushels. He is preparing to plant about thirty bushels of the same seed the coming spring and expects the finest yield in the county. These potatoes are called the "American Wonder," and in size and beauty excel any potatoes we saw on exhibition at the World's Fair.—"T. J." in Cumberland News.

W. A. McGuire, a well known citizen of McKay, Ohio, is of the opinion that there is nothing so good for children troubled with colds or croup as Chamberlain's Cough Remedy. He has used it in his family for several years with the best results and always keeps a bottle of it in the house. After having la grippe he was himself troubled with a severe cough. He used other remedies without benefit and then concluded to try the children's medicine and to his delight it soon effected a permanent cure. 35 and 50 cent bottles for sale by Oakland druggists.

HERE AND ELSEWHERE.

Subscribers or readers having friends visiting them or acquaintances visiting other places will please make note of the fact and send to THE REPUBLICAN for publication.—Editor.

Mr. Chas. Hough, of Fairmont, was in the city Monday on business.

Mr. S. B. Kirk, of Masontown, W. Va., was here on last Saturday.

Hon. A. F. George, of Swanton, smiled on us Saturday afternoon.

Mr. Isaac Feather, of near Cranesville, was in Oakland Saturday on business.

Mr. T. O. Collier, of the Cove, was in the city Monday on business. While in town Mr. Collier paid his respects to THE REPUBLICAN.

Mr. L. C. Lantz, of Annapolis, was here on Monday for a short time.

Mrs. S. O. Sawyer, of the Assembly House, Mt. Lake Park, was here Tuesday to take the train for Wheeling, where she will remain during the winter.

Mr. and Mrs. Jacob S. Jamieson, of Piedmont, spent Tuesday in Oakland with friends.

Mr. Henry Weber has gone to South Carolina on business and will be absent for about three weeks.

Mr. W. H. Malette went to Baltimore last Saturday to purchase his Christmas stock of goods.

Mrs. W. T. Jamieson, of Piedmont, is here on a visit to her daughter, Mrs. King Delawder.

Mr. and Mrs. Samuel E. Boyer spent Tuesday in Cumberland.

Sheriff Chas. Wegman returned from a visit to his home in Grantsville Saturday last.

Mr. Asa E. Riley, of Selbysport, is here for a few days on a business and pleasure trip.

Mrs. E. G. Rathbone left Oakland for her home in Hamilton, O., last night and will remain there during the winter.

Croup is a terror to young mothers. To post them concerning the first symptoms, and treatment is the object of this item. The first indication of croup is hoarseness. In a child who is subject to croup it may be taken as a sure sign of the approach of an attack. Following this hoarseness is a peculiar, rough cough. If Chamberlain's Cough Remedy is given as soon as the child becomes hoarse or even after the rough cough has appeared it will prevent the attack. It has never been known to fail. 25 and 50 cent bottles for sale by Oakland druggists.

The Republicans are talking over the qualifications of the various gentlemen who have been spoken of in connection with the gubernatorial nomination. The general feeling here is against what is known as the tax dodge class. This county is in great need of a reassessment of property and they desire above everything else an executive who will aid in securing this much desired result. The Democratic party has so completely ignored the wishes of the people on this subject that they expect nothing from it. The general feeling among Republicans in this county is that Lloyd Lowndes would fill the bill exactly.—"T. J." in Cumberland News.

Rogers' Sarsaparilla.
A specific for all. 100 doses for 75 cents. Rogers' Little Liver Pills, best on the market; Cough Cure, Liniment, Appetite and Worm Syrup, sold by A. G. Sturgis, Oakland; Cuppett Bros., McHenry; J. A. DeBerry, Corinth; C. F. White, Hutton; P. T. Garthright, Hayden; Eekles, Mt. Lake Park; Dr. Langhlin, Deer Park; Wm. Frederick, Friendsville; Young Store Co., Jonas Frazee, Robert Liston, Selbysport; W. Wass, Mineral Springs; J. E. Guagey, Accident; Smith & Callis, Hoyaes, and by all general dealers.

Marriage Licenses.
Edward Thompson, of Clarksburg, W. Va., and Emma Copelin, of Bridgeport, W. Va.
Samuel Rowe, of Corinth, and Vernie Plum, of Tucker county, W. Va.

Noah E. Hershberger and Savilla S. Yoder, both of Grantsville, and Elias Fletcher McIntire and Ella Victoria Hildreth, both of Harrison county, W. Va.

A Birthday Party.

On the evening of the 26th inst. Master Lee Mason invited a number of his little friends to a party given by him in honor of his birthday. Among those present were Misses Percie Brady, Mollie White, Flo White, Benlah Longbridge, Annie Bolden, Edith Bolden, Estelle Rasche, Nellie Miller, Jessie Conaway and Ella Conaway. Masters Wellington Crane, George Leggett, Eddie Schaffer, Daniel Schaffer, Robert Shirer, Leo Rasche, Charlie Orentt and Harry Rasche. The afternoon was delightfully spent in playing games until supper was announced, when the boys escorted their little lady friends to a sumptuously laid table, and the banquet the boys had in a long time. The birthday cake was just grand. All report a very pleasant time and wish that Lee's birthday would come every day.

ONE OF THE BOYS.

Four in Jail.

On last Saturday Robert Male, of Mt. Lake Park, was arrested by Sheriff Wegman on a warrant charging him with stealing a gun belonging to Mr. R. S. Jamieson, of Oakland. He had a hearing before Justice Gonder, who sent him to jail to await the action of the grand jury.

Winfield Chidister, of Deer Park, was arrested on a warrant last Friday. He was charged with breaking into and stealing goods from the residence of Mr. John W. Williams at Deer Park. He had a preliminary hearing before Justice Gonder in Oakland on Saturday. The hearing was continued until Tuesday, when evidence was adduced sufficient to send Chidister to jail to await the action of the grand jury also. The goods stolen from Mr. Williams' residence were recovered Tuesday. They had been sequestered under the Methodist church at Deer Park.

William Mowery, of near Deer Park, was sent to jail for one year by Justice Hove for a breach of the peace.

Hiram Griffith, formerly of Oakland, who was indicted by the last grand jury for breaking into the Livery of S. E. DeWelling therefrom some household articles and clothing, was arrested last Friday. He is in jail and will remain there until the next term of the Circuit Court unless bail can be furnished which is considered doubtful.

When to Stop Advertising.

When the population ceases to multiply and the generations that crowd on after you and have never heard of you stop coming on.

When you have convinced every one whose life will mingle with yours that you have better goods at lower prices than he or she can get anywhere else.

When you perceive it to be the rule that men who never advertise are outstripping those in the same line of business who do.

When men stop making fortunes right in your sight solely through the discreet use of this mighty agent.

When you forget the words of the shrewdest and most successful business men concerning the main cause of their prosperity.

When every man becomes a creature of habit so thoroughly that he will buy this year where he bought last year.

When younger and fresher houses in your line cease starting up and using the newspapers in telling the people how much better they can do for them than you can.

When you would rather have your own way and fail than to take advice and win.

When nobody else thinks it pays to advertise.—New York Furnisher.

Hurrah for the Opening of my New Store, Cor. Oak and Second Sts.

Having just returned from the eastern cities with a full line of General Merchandise, goods that will be sold for cash or trade only, will sell at 25 per cent. cheaper, which will be an advantage for fathers, mothers, brothers and sisters, uncles and aunts. Come one and all and give me a call and get the prices to suit your taste. I trust all my former customers and many new ones will grasp this opportunity and help me in my new venture.

Yours respectfully,
36-37. LEWIS GORTNER.

Bucklen's Arnica Salve.

It is guaranteed to give perfect satisfaction or money refunded. Price 25 cents per box. For sale by all druggists. 3-57.

Died.

On the 19th inst., of that dreaded disease, diphtheria, little May, aged 8 years, daughter of Mr. and Mrs. James Lechery, of Thayersville, Md. How feeble are words to carry consolation to hearts bereaved of a beloved daughter! A tender clinging vine interwoven in sweet memories from the hour the angel first gave her to your home; a gentle spirit of light that fitted in and out like a gleam of sunshine. No one can fill her place in the vacant chair, no one will take her place in your hearts, no one will occupy her place in her teacher's class. It will be a sacred thought in the years to come to parents, teacher, school-mates and friends that she shed radiance in the home as long as she did. It will be a blessed recollection that she loved and was loved by those who will ever so tenderly cherish her sweet and pure memory. But in nature fruits fall and so do blossoms and buds. In the ways of kind nature this is perhaps best and in the taking from home this little one we will try to accept the cross and bear it, believing that the blossom will yet bear fruit in the angel land and that our loss is her eternal gain.

RILEY.—On last Thursday at his residence at Blooming Rose, this county, of typhoid fever, Mr. William H. Riley, aged about fifty years. Mr. Riley was twice married and leaves eight children, three of them by his first wife. His funeral took place on Saturday and the interment was made at Blooming Rose.

December Forecast, 1894.

The month will most likely open in a wave of fair though cold and frosty weather, generally in all sections. In the west the cold will react about the 5th, growing warmer which will be realized in central and eastern parts on or about the 4th and 5th, and resulting in rain and snow in quite moderate quantities. A cold wave will follow the disturbance which will hold a fairly tight reign up to the 9th, when its grip on the meteorology will relax. After this year will see a meteorological weather slide, landing us in the rigors of the arctic region, where ice and snow are the stored products of past ages. No, it will not differ from past Decembers. Its waves of storm will come and go, bringing snow and cold snaps, some of them being more intensified than others that have gone before, or those which may follow. However, between the 9th and the 12th snow and sleet, turning to a blizzard in northern sections, will likely prevail, while central and eastern portions may not have the central force of it, yet they will likely have more than will be desired. From the 14th to the 17th embraces a stormy period much intensified and dotted by storms and blizzards reaching far south and then following the wave of disturbance will be severe cold. On or touching the 20th the temperature will grow warm, then resulting in more storms and cold about the 21st and

22nd. The last disturbed wave of the month will centre on the 27th, which will be followed by very cold and freezing weather up to the close of the year. January will likely be a severe winter month.

P. R. SMITH.
Nov. 20, 1894.

Will You Suffer
With rheumatic pains, sciatica, sleepless nights, dropsical accumulations, or nervous headaches when Messrs. Cober & Boyer will cure you if their directions are followed. Can be consulted at the Central Hotel or at their room in the Pritchard building, Oakland, Md.

Estray Notice.
Estrayed from my place sometime last spring, a red heifer with white spot on her forehead and two white spots on left hip. Anyone knowing her whereabouts will please notify JOHN HOLTSINGER, 35-37 Deer Park.

When Baby was sick, we gave her Castoria. When she was a Child, she cried for Castoria. When she became Miss, she clung to Castoria. When she had Children, she gave them Castoria.

Christmas Is Coming.

FARM AND GARDEN.

DESTROYING TICKS.

How to Prepare a Dip That Has Proved to Be Effective.

The most troublesome external parasite in northern flocks now is the sheep tick, *Melophagus ovinus*. Like most of the parasites of sheep it is an importation from Europe. Though having no wings it belongs to the family of flies. It may be distinguished from the true ticks by its having only six legs, whereas the true ticks have eight. It has a circular, flattened, leathery body, unsegmented and semi-transparent.

They reproduced by means of eggs, which contain a partially developed young at the time of depositing. A female produces from one to eight of these pupae during a lifetime. They spend their whole life upon sheep, experiments with them showing that they die in a few days after being removed. They live by sucking blood from the sheep through a small tube with which they puncture the skin. The itching sensation which causes sheep infested with them to rub and scratch arises from a slight poisoning by a fluid injected while feeding. This shows itself by a slight swelling at the point where the skin was punctured.

The loss of blood is considerable where there are fifty or more ticks upon a single sheep, but the annoyance is of greater detriment. Sheep cannot thrive when tormented by them. It is not only humane but financially profitable to destroy them. The simple and effective method is to immerse the sheep in a watery solution of some insecticide. There are very many prepared dips that are very inexpensive compared with their value. Directions for using are given with each package.

An effective dip may be made by boiling tobacco stems and using the liquid while hot. The same batch of stems may be rebolled, so long as they yield a liquid of sufficient strength. Tobacco stems may be gotten at any size factory for little or nothing as they throw them away and have to pay for having them carted off. This makes the cheapest preparation for the work but it is very unpleasant to work with.

Each sheep should remain in the dip long enough to become thoroughly wet. If the work is thoroughly done a single treatment will be sufficient. It will be a good plan to shear early lambs before dipping. An oil barrel with about one foot saved from the top makes a satisfactory vat; a draining board upon which to lift the sheep from the barrel completes the outfit. —Ohio Farmer.

CHEAP STABLE PEN.

Insertion of One That Can Be Put Up in a Few Minutes.

It frequently happens that one desires to make use, for an emergency, of a stall or pen in the stable which is not at hand, and for which there may not be convenient room as a permanent structure. Our illustration shows how such a pen may be made in a moment's time in a corner that ordinarily may be used for other purposes. Two gates are made and hinged against the walls in the manner shown. Ordinarily they are folded

CHEAP STABLE PEN.

back snugly against either wall, but when a pen or "box stall" is suddenly needed the two ends are swung together and locked with bolts, and the needed accommodation is secured. Such gates should have slots quite near together, and should be of good weight to accommodate both large and small animals. —Orange Judd Farmer.

TO PREVENT CASTING.

Simple Arrangement for Carrying Horses of a Vicious Habit.

Writing from Missouri a subscriber asks for a description of means to prevent a horse from getting cast in the stall. The illustration below shows

how this can be done. A strap runs from the top of the halter and is fastened in a ring in a joist overhead. It is a simple device and is sure to effect the desired object. It does not interfere with the animal's lying down, but it is impossible for it to get its head down and without doing that it cannot get cast. —Farmers' Voice.

FACTS FOR FARMERS.

Prove your garden this fall.

The Florida honey crop has been good one this year.

Swine fever is unknown in France. Its absence is attributed to the use of green fodder.

Wheat mixed with whole-ground wheat, corn makes an excellent feed for pigs, either for growth or for fattening.

It is said that 100 pounds of hay will make 172 pounds of manure; oats, 204 pounds, while grass will make but 64 pounds.

ECONOMICAL DRAINAGE.

A Serviceable Drain That Can Be Made Entirely at Home.

The undergrounding of land is one of the greatest aids to improved agriculture, but many who are well acquainted with the beneficial results following draining feel unable to undertake the expense of putting in tile. Even in these days the expense of tile is a heavy load for the poor land owner to carry, and yet he cannot afford to let his land lie wet and, in many cases, very largely useless for a large part of the year. Surface drainage will do something to aid in promptly freeing the land from surplus water, but not all. There is nothing like undergrounding to keep the land light and porous—in a condition to readily let all surplus water quickly run down through it, and, sponge-like, to draw up moisture from the depths below when such moisture is needed upon the surface. The cost of digging ditches is not burdensome, because considerable of it can be done with a plow, if rightly managed, while the actual digging can be done at odd jobs when other work

is not pressing. The illustration accompanying this shows a drain entirely of home manufacture, which the writer remembers to have seen illustrated twenty years or so ago, but which many young farmers of to-day may never have seen described or in practice. The ditch is dug with a flat bottom (flat from side to side), and of sufficient width to place three logs in it in the position shown in the cross-section. The two lower logs may well be pinned together, as suggested, for in such drains, and in stone drains, the tendency is for the sides to settle together by the pressure of the earth above and at the side of them. Secured in this way the three logs must maintain the same relative position, with reference to each other. If possible, let cedar logs, or rails, be used, but if these are not at hand, or if they are worth too much for such use, if at hand, then let the next most lasting wood be selected. Most kinds of wood prove very durable when placed in the earth at a depth where they are kept constantly moist; so that such a drain will last and do good work for years. The logs should fit well together, so that the earth will not have large openings to sift down into, and the whole should be covered with hay, or some such material, to keep the earth from settling back into the drain. The earth will become well packed before the hay decays. —Webb Donnell, in N. Y. Tribune.

TANNING GREEN HIDES.

Something Every Farmer Who Keeps Live Stock Should Know.

Thoroughly work over each hide in warm water to clear of grease, spread hair side up and brush until clean. It should then lie for 12 hours in a mixture of 4 gallons rain water, 1/2 pint soft soap and 1 1/2 ounce pulverized borax; then add 5 gallons rain water, 4 quarts fresh burned and slacked quick lime, 4 quarts hardwood ashes and 1/2 pound dried molasses. Let the skin lie in this mixture for 2 to 3 days and until the hair can be pulled with the fingers. Then wash in rain water, rub off the hair and cut off ears, tail and toes.

Cut the skin in two parts lengthwise, and hang the two sides across, or on something, and scrape clean on both sides with something sharp, as hogs are scraped when killed, and rinse off with water until it is clean. Pickling is done quickest with salt and alum. For each two skins take 10 quarts water, 5 pounds alum and 1/2 pounds salt. Let the alum and salt dissolve in the water, then add the salt and keep on stirring for awhile, and when lukewarm put the mixture in a tub, then spread a skin in the mixture and pull it back and forth. They must be pulled back and forth until they will lie smooth and not wrinkle up. Let both lie in this liquid 4 or 5 days, but pull and stir them occasionally. To make sure that they have been in the liquid long enough, take the skin with the thumb and forefinger of the right hand on the meat side, while you hold the hair side on top and squeeze hard, then blow on the squeezed side; if the skin has been in the liquid long enough, it will show a white mark. The skin should then be stretched over a wooden rack. When well stretched, the skin is hung up to dry and is finished. —Farm and Home.

Poultry in the Vineyards.

An English authority calls attention to the fact that some of the best French poultry emanate from the wine districts of France. In the Medoc, where charet comes from, they are to be seen in large numbers, although the vines are not more than fifteen inches in height. Here they are given full liberty and allowed to wander where they like for ten months in the year, only being removed during July and August, when the grapes are ripening. Instead of being injurious, they are found very serviceable indeed in clearing the vines of insects and grubs, cleaning the land and supplying it with a valuable manure. This arrangement fits in with the requirements of poultry, for by the beginning of July there has been a great reduction in numbers, the chickens for marketing purposes having all been killed by that time, and thus the stock is more limited in number than it would be earlier in the year.

THE HOSPITABLE HOSTESS.

She Always Allows Her Guest a Great Deal of Freedom.

There are homes in which you are always conscious of your bounden duty to conform to rules. You feel that you must get up to a six o'clock breakfast when you have been accustomed to indulge in morning naps until nine; you cannot don your wraps and saunter out to enjoy an hour or two in an art gallery or a library of rare books, where one wants to invite one's own soul for companionship, without your too solicitous hostess urging you to wait till she has ordered luncheon so that she may "go with you and tell you all about them."

There are homes where the rules are not flexible because the makers of them are cast-iron people, but there are others where they lack elasticity simply from the family's want of tact in pleasing those whom they are anxious to please.

The really hospitable hostess is the one where the guest has been asked to come in order that she may be given an unusual pleasure, and where, for the time being, all the uncomfortable requirements of her individual home are set aside for a Bohemian freedom and unaccountability.

The young married hostess may chaperon without monopolizing the salons of her girl guests. She sets these callers frequently in general society, and on many occasions for a chat, soliloquy, or when they are also old friends, is only in town for a brief stay and often grins inwardly at having to sit in enforced silence while her hospitable hostess rattles away the precious moments.

The visitor, like the editor, can stand a good deal of letting alone. Of course, if she is called a "bore" eight or ten times, "one must be taken from the crown of the Liberty statue to the roof garden ermine, she will not want to be let alone, or to let any one else alone."

To be indifferent about a guest's ennuis is the grossest evidence of ill breeding and callous feeling after extending an invitation, but far too few people understand the exquisite spirit of hospitality underlying the greeting of the Spanish hostess, when she so graciously says: "The house is yours, senorita." —Chicago News.

THE NAPOLEON REVIVAL.

Why the Emperor is the Most Popular Character in History.

With the past year there has been a revival of interest in the career of Napoleon Bonaparte, that almost phenomenal figure in literature he has figured in the pages of memoirs and reminiscences by those who came into more and less intimate contact with him. In art not only has he been a potent inspiration to modern painters and sculptors, but he has made priceless pictorial records of his time. In the drama he poses as the most picturesque figure that has been brought upon the stage within the century. Personal relics of the man are held as sacred and beyond all price. As Paul Heyse has said, "Napoleon's name is France's sting of defeat." The Franco-Prussian war turned the thoughts of all to their period of greatest glory, and so it needed but time to see Napoleon enshrined as an idol. An equally logical explanation is found for the most notable feature of the Napoleon revival in this country. The Emperor's life of the emperor was projected five or six years ago, before anyone could have foreseen the present attitude of the public mind. It was undertaken solely with the idea that Napoleon was one of the greatest, most forceful and picturesque characters in the entire range of history, and that hitherto he had been inadequately represented. For that reason Prof. William M. Sloane, the greatest American student of French history, was commissioned to write the life, and his years of study and unpublished research have brought out his completed labor at the most opportune moment. And Prof. Sloane shows as a new Napoleon, a devourer of books, an unselfish literary aspirant, an ineffectual Corsican political agitator, but the new Napoleon certainly makes the old Napoleon more easily comprehensible.

"Dan's one respect," said Uncle Eben, "in which our man is 'bore' to be generous. He can't move trouble for his life without getting somebody else a share in it." —Washington Star.

"Ours think," said one Parisian to another, as pictured in illustration, "only think, if I don't mind, had not lived we should be Englishmen!" "That is true," replied the other; "but, then, it would have been who won the battle of Waterloo?"

What fruit is the most visionary? The apple of the eye.

The difference between a wise man and an enthusiast is, one drives with reins and the other without.

Sue—"You've been drinking, you wretch!" He (reproachfully)—"My dear, why don't you let bygones be bygones? I'm not (hic) drinking now, 'm I?" —Puck.

"How do you pronounce this word, good Mr. Hike?" "I don't really know, Miss Wilkins. Some people call it golf, to rhyme with dolly; some call it golf, to rhyme with stuff, and a Boston girl I know called it golf in a little verse she wrote to rhyme with laugh." —Harper's Bazar.

There is more "I" than "ideal" about some people who are continually speaking of their ideals.

We are never willing to admit there is insanity in our family until some member of it makes a will that doesn't suit us. —Tit-Bits.

"I am aware, doctor, that the stomach is a delicate organ." "Tactful doctor—" "Then why do you treat it as if it were a barrel organ?"

"Have you done anything for the social freedom of women?" asked the lady with egotism. "No," said the judge who sat in divorce cases and was a cynic; "but I've done a heap for the emancipation of man." —Chicago Record.

Social unrest on the part of the poor is partially the result of too much rest on the part of the rich.

"And so you married in haste. Well, did you repent at leisure?" "Hardly. I have not had a leisure moment since the ceremony." —Truth.

Piles.

Piles is so common that every other person you meet is troubled with it more or less. It seems to be a little thing and usually gets little attention. It may not be serious at first, but it makes a man sick—makes him nervous, cross, irritable—unfit for business. It robs him of sleep, takes his appetite—cuts down his flesh—and yet he is careless about it.

Will cure Piles. It will cure other things, too, but it is particularly good for Piles. It stops the itch and the ache at once. It may take several days to wholly allay the inflammation and reduce the swelling, but it will do it—sure. Has done it in innumerable cases. Never has failed.

Good for Hemorrhoids, Ring Worm, Tetter, Itch, Salt Rheum, Dandruff, Pimples, and all Skin Diseases.

BUILDING ASSOCIATIONS.

Judge Stake Renders an Important Decision Affecting Them.

Judge Edward Stake has filed an opinion in the circuit court of Washington county, which is of importance to building and loan associations. In 1891 the Hagerstown Mattress and Upholstery Company borrowed \$5,000 from the Middle States Loan, Building and Construction Company, of Hagerstown. After keeping up the monthly dues for several years, the mattress company offered to pay off the loan and tendered the sum of \$3,126.60, but the Middle States Company demanded \$3,735.98.

The Middle States company denied the right of the mattress company to participate in any dividends on the stock held by it before the same has matured, because they paid off their loan. They also denied that the contract was a subscription of extra shares of stock which would not be made. The court says: "A building association in its relation with its members is not a lender and the member is not a borrower of money. All the members are partners in a joint stock enterprise. The stockholders who are commonly but incorrectly called borrowing members are simply receiving in advance the future value of their stock, for which advance they pledge to the association their stock in the enterprise and mortgage their real estate and in redemption of the stock and real estate they are to pay the legal interest at stated periods on the amount advanced to them, and in addition, with the members who are not receiving advancements, make payments in stated installments of an equal sum toward the expenses of conducting the association, and another installment as dues, until the installments and a just proportion of all the profits and earnings of the association equal the amount advanced to them, and in so doing redeem the stock and real estate mortgaged."

The case will in all probability go to the Court of Appeals.

Communicated.
Will you please allow me space in your paper for a few remarks in regard to the plan our friend A. M., of Keyser suggests.

He suggests to have the Legislature authorize by law our County Commissioners to levy any sum of money for building purposes not exceeding \$4,000 annually.

Now, my friend, how far would this go toward paying for the buildings put up this year? Of course we do not need as much every year as we did this year; but I would suggest that any time it should require more than \$4,000 for the commissioners to levy the full amount required.

Our friend is one I presume that was opposed to the people of Oakland having a fifteen thousand dollar school house. They were fully entitled to a good house and I think it is just and right for the commissioners to levy them the full amount it requires to pay for it.

He also suggests that the teachers' salaries be reduced two dollars per month. If this should be done I would like to know where you would get your teachers from. The teachers of our county are not getting now what they should have. They are getting the small sum of \$25 and \$30 per month. Let a teacher who is getting \$25 per month pay his board of \$10 and other expenses and see what he has left—hardly enough to pay expenses while attending Normal during the summer.

Some of our best teachers now have gone to Allegany county and other places where the salaries are better, and if this reduction should be made it would cause more to flee from this place of we and seek for refuge somewhere else, and finally Garrett county would be left without teachers. Then we could use all the money for incidental expenses. This, I think, would be a poor way to improve our schools. It would bring the exodus without fail, that our friend A. M. spoke of.

I would suggest that our friend of Keyser would bring out a better plan. Then some one will help it along.

X. Y. Z.
Accident, Nov. 26, 1894.

Railroad Enterprise in West Virginia.
A dispatch from Grafton, W. Va., says that a monster coal railroad enterprise has been sprung in West Virginia, this time to begin with a connection with the West Virginia Central and Pittsburgh railroad, owned by the Davis-Elkins syndicate, and extending through Clarksburg to the Ohio river at New Martinsville. It will be a connecting link between the Davis-Elkins syndicate on the north and Camden systems, the Ohio River and West Virginia and Pittsburgh railroads on the south and west. It will pass through some of the finest coal in the South, and lap territory entirely new and never before touched.

Roads in Minnesota.

The lighter, sportive side of Minnesota serves to draw out the nails driven by the cares of business, for Minnesota is not lacking in business. Minnesota is one of the largest states in the Union. She has the largest logging mills in the world has the largest logging and lumbering companies in the world, and, added to this the state has recently found itself to be the owner in fee of rich mineral lands which rendered a direct income to the state treasury of \$184,528.95 in the year 1892, which, from the present indications, is but a faint foreshadowing of the wealth to be realized from this source in the future.

By wisdom wealth is won,
But riches purchased wisdom yet for none.
With all her natural wealth and beauty Minnesota has not shown great wisdom on the subject of road improvement. The leading business men of the state, including the best farmers, are ready for an advanced step in the road reform movement, but the average farmer is inclined to be suspicious of everything indorsed by the city men and the daily papers, so that in this state it is simply a question of how long it will take to remove prejudice and educate the obstructionists to the wisdom and importance of the reform now heartily indorsed by our leading men. This educational work is being done as rapidly as circumstances will permit.—A. B. Choate in Good Roads.

The Maryland Bible Society.
Rev. Robert W. Todd, of the Methodist Episcopal church, Baltimore, has been elected general agent of the Maryland Bible Society. Mr. Todd is an earnest and enthusiastic worker and a pulpit orator of ability. Rev. Dr. Thomas Myers held the position of general agent of the society during eight years preceding his death last July.

The society is endeavoring to supply every person in the State with a bible, and 20,510 books valued at \$8,542, were distributed last year.

The officers are: President, John R. Kelso; vice presidents, William Woolyard and Charles Markell; treasurer, J. Thomas Smith; corresponding secretary, Joseph Merrifield; recording secretary, J. V. L. Graham.

Mountain Lake Park.

Our correspondent was misinformed last week. Work on the lake has not been suspended for the winter. Carpenters, masons and laborers are at work building houses, making improvements etc. The first section, 108x303 feet, of a series of three ice houses is going up.

"Squire Crane has leased the ice privilege from the lake for the season of 1895.

Oak Hill.

Our school is getting along very nicely under the care of Mr. Kim Welch as teacher.

The Accident farmers have been busy getting out lime rock, amongst them being Messrs. Jacob Moser, John Sparline and Henry Schlossnagle.

Mr. Joseph Groer raised five hundred and thirteen bushels of buckwheat on ten acres.

Mr. David G. Evans has about completed sawing for Joseph Groer. He has been selling his lumber to the Ohio Lumber Company.

Mr. J. S. Smeadman and son have taken a trip to Swanton to buy a farm. We are sorry indeed to lose them. They will be greatly missed in this community.

Mr. and Mrs. Levy Switzer, of Swanton, are visiting friends and relatives in this community.

Mr. Silas Treat is doing a booming business blacksmithing.

We take notice that Valentine Kahl, Jr., and B. F. Schroyer are still hauling lumber to Friendsville.

Savage River.

We are having nice weather at this writing.

The farmers are about done husking corn.

G. L. Broadwater, who was reported very ill, is better at this writing.

Rev. Enlow preached for us last Sunday night.

Ada McIntyre was the guest of W. J. Broadwater Sunday last.

T. J. Broadwater was at Barton last week on business.

Some of the New Germany folks attended church at Guey's school house on Sunday last.

Warnick Bros. have their new shingle mill and will soon be in running order.

Howard Miller paid friends a flying visit here Sunday last.

We would be glad to hear from the New Germany correspondent.

Valuable Advice.
Avoid law suits and loss by consulting H. P. Tasker and examining his abstracts of the "conflicting titles" before paying for Military Lots. Charges reasonable. Office in Colander Cottage, opposite the bank, Oakland, Md.

PRINCESS BISMARCK DEAD.

The Wife of the Great Chancellor Expires in His Arms.

BERLIN, Nov. 27.—Princess Bismarck died at Varzin at five o'clock this morning. Her elder son, Count Herbert Bismarck, arrived at Varzin yesterday evening in obedience to a summons, and other members of the family are on their way there.

Johanna Friedrike Charlotte Eleono Von Bismarck was born on April 11, 1824, of a noble Pomeranian family. Her father, Heinrich-Ernst Jacob Von Puttkamer, of Viarthem, belonged to the ancient family of lords of the manor, Von Schlau, Von Rungenwalde, and Counts of Neuenburg and Tachel, who, since the fourteenth century, have ranked among the most powerful of the Pomeranian nobles.

Prince Bismarck first made the acquaintance of his late wife in 1845, at the house of his friend, Moritz Von Blankenburg, a well-known leader of the conservative party in the Prussian house of delegates, and the diet.

The acquaintance became more intimate while on a journey to the Harz, on which both accompanied the Blankenburgs. In 1847, two years after the acquaintance began, Bismarck asked Franklin Johanna to become his wife.

Her family was not at first disposed to accept his proposals and at that time Bismarck enjoyed a rather unique reputation. He was nicknamed "Der Tolle Bismarck" (Mad Bismarck), and had earned this title by his numerous duels, his daring feats of horsemanship, and some widely spread anecdotes concerning his attitude generally towards professors, burgomasters and other respectable members of what German students call "Philistine Society." To quiet, respectable, religious people like the Puttkamers he did not appear a very eligible snitor for an only and beloved child.

Bismarck, however, settled the question at once. He walked up to Franklin Johanna, and having ascertained by a look that she sided with him, he folded her in his arms and said, turning to her astonished relatives, "What God has united, no man shall put asunder."

No man attempted to do so, and shortly after the first German diet in which he began to take a stand as a political leader, on the 28th of July, 1847, Deichhauptman Von Bismarck Schoenhausem married Franklin Johanna Von Puttkamer. They went to Italy on their wedding tour and then set up housekeeping in the old stone mansion of the Bismarcks at Schoenhausem, in their old provincial home.

Princess Bismarck is completely broken down by the death of his wife, although her death was not altogether unexpected, in view of her recent repeated attack of fainting fits. A few weeks ago, when the Princess' condition was growing worse, Prince Bismarck said to his old Butler, whose wife was dangerously ill: "My friend, I share your grief heartily. I am in the same terrible position as yourself. Everybody is passing away before ourselves."

The Princess died in the arms of her husband, who had been watching her throughout the night. She was fully conscious until fifteen minutes before her death.

Political Force of Buckwheat.
Frost Bros., growers, Kansas City, Mo., successful Frothing boys, write to the Journal explaining how "Missouri went Republican."

"We have been feeding the Missourians on Maryland buckwheat—27,000 pounds—over a car-load, bought from Eli Stanton, Grantsville, Md., this season. This combination cost us here over \$800, but it is a trade-winner and a great rectifier of Missouri politics."—Frothing Journal.

Some Important Facts.

The evenings are long enough now for every person to devote some time to reading. The best literature is the daily newspaper, and the best daily newspaper is *The Pittsburg Times*. It is complete in every department, gathering promptly the news from all parts of the world and presenting all sides of every public question fairly and intelligently. Its market reports are models of accuracy; its departments for women readers and for the farmer are useful and useful and entertaining, and its serial stories are by the most noted writers. The aim of its publishers is to make *The Times* a paper for the home above everything else, and they have succeeded admirably.

The Times is delivered by agents for one cent a day, or will be sent by mail for thirty cents for one month; fifty cents for two months; seventy-five cents for three months; \$1.50 for six months or \$3.00 for one year. If there is no agent for *The Times* in your locality write for sample copies, which are sent free, and terms to agents.

SLEEPIN' IN THE ATTIC.

I remember when my pa said: "Jimmie, go to bed."
"Pa, I'm kind of things went scuttin' through my head."
"For I sleep in the attic, where share-things come at night."
Where goldens grow from rafters, an' 'nurses hide from sight."
An' wait to jump out on yer when yer most asleep."
An' where there's funny crawlin' things 'at creep, creep, creep."
"Up on the bed, an' grab yer throat, an' make yer eye an' growl."
All 'jes because yer have to sleep up attic all alone."
An' I remember pa said he thought most any kid 'ould like to sleep up attic, leastwise he always did."
An' when yer hear the rats or rumpin' round at night."
An' yer think perhaps they's bogie men with long white teeth at bite."
An' they the moon comes in 'an' lays er white 'rains on th' floor."
An' yer gotter sleep an' dream about th' bogie men some more."
An' the cobwebs on the rafters look like fairy castles—most."
An' yer think perhaps the moonlight is Jimmie Nolan's glow."
For Jimmie when he worked here said 'at ghosts live in th' house."
An' they were live er little like the moonshine er a moon."
An' so I took my head down where the bogie men can't see."
Right in th' bed, an' that's th' way for little folks like me."
An' once at night I know, I see a funny thing an' scream."
Pa come up an' laughed, an' said he guessed I'd dreamed."
But I wa'n't er dream at all, I know, for over by th' wall."
Er yeller man hung by his neck, an' he was awful tall."
An' he kept movin' back an' forth an' kicked his legs at me."
An' pa said in the mornin' if I'd look there I would see."
"Twas jes' th' yeller cown 'at hung a drestin' nothin' more."
Then he went out with th' candle an' shot th' attic door."
An' then I see him shake again, the yeller man an' cry."
Er haughe by his neck there in th' dark up in wall."
An' then I tucked my head down in th' clothes an' couldn't see."
An' th' first I knew twas mornin' an' pa was callin' me."
—Walter M. Hazeltine, in Housekeeper.

Margaret could have the first reading of the news. Usually she took it a day old.

Someway the good things of life Miss Margaret, or else not at all. Perhaps that was the reason why her face, which had been handsome once and full of promise, had such sharp lines about the mouth. It was a thin, angular face, and the scant, straight hair above it, which she used to be so black, was streaked with gray.

At the other side of the small round table sat Miss Margaret's sister Harriet, placidly knitting. If her face bore fewer traces of disappointment than Margaret's, it was not because she had had more of the joys of life. Perhaps it was because she had expected less. Harriet Staples had been called a very plain girl, but now hers was a pleasant face to look upon, round and peaceful, the touch of rose color in the cheeks contrasting prettily with the snowy whiteness of her soft, heavy hair. The eyes were pleasant and friendly; at the corners of the mouth were the little wrinkles that come from smiles, and, altogether, the face was very lovable.

Suddenly the paper dropped from Miss Margaret's hands and she looked up at Harriet, her pale face almost ghastly.

"What is it, sister?"
"Bob Barton's dead!"
"You don't say!"

Even Miss Harriet's calm face showed signs of agitation, and her hand shook as she reached for the paper.

There were only two lines of it. Robert Barton had been found dead that morning, in the little room which was the only home he had known for forty years.

The paper had lost all attractions for Miss Margaret and Harriet's stocking fell to the floor unheeded. The room was very still—only the little old clock ticking in the corner, and the purring of the great, gray cat on his cushion.

Outside, in the street, people were passing to and fro. Sometimes their voices were loud and penetrating, but the sisters did not hear them. They were back in the long ago, when handsome Bob Barton used to spend an evening, now and then, in this same sitting-room, which in all these years had never quite lost the glory of his presence.

By and by two tears forced themselves from Harriet's eyes. She wiped them away hastily, and glanced furtively at her sister. Margaret had not seen the tears, and her face wore such a softened look that Harriet ventured to speak.

"Father used to set such store by him," she said, softly. "Twas you he always used to come to see. I always knew that."

"Me?" "Twasn't neither! Everybody knew he wanted you—if it hadn't been for his miserable father!"

"O sister! don't say that!" pleaded Miss Harriet, her pretty old cheeks

wet with tears which now she did not try to hide. "I'm sure we all thought 'twas you. He always looked at you the whole evening."

"Him he talked to you. And didn't he give you that shell box?"

"Poor women! For the first time in all their lives they spoke the one thought that had meant more to them than everything else. Even Bob Barton's name had never passed their lips since that day when the news came that it was disgraced forever by his father's crime. They knew, in a way, what had come to him—that he had felt the disgrace as only a sensitive soul can feel; that, with hopes and ambitions blighted, he had passed the fifteen years of his father's imprisonment in bitter loneliness; and that his life since then had been devoted to the broken old man, who came out from

STILL THE TWO SISTERS SAT THERE.

the prison walls, cuffed in mind and body and helpless as a child.

"The must 'a' been awful poor!" Miss Harriet spoke again, after a long silence.

"Yes, I s'pose he was."

"I don't believe there's enough for a decent buryin'."

"I don't believe there is."

There was silence again. The gray cat wakened, yawned and stretched himself; then he jumped down from his cushion and rubbed his sleek sides against Miss Harriet. She did not notice him, and he, surprised at such unusual neglect, stalked to the door and requested, after his fashion, to be let out. Miss Harriet rose mechanically, picked up her knitting and opened the door. She sat down again and slipped the yarn over her finger, but at the first stitch her hands dropped idly in her lap. The old clock ticked on. The noises in the street had ceased. The fire was out and the room cold, but still the sisters sat there, unmindful of all save the past. Finally, after much fidgeting in her chair and many uneasy glances at her sister, after opening her mouth only to close it again, Miss Harriet broke the silence.

"Sister?"

Her voice had a half-frightened quaver in it.

"Well?"

Miss Margaret's tone was so much less sharp than that of Harriet took courage and went on.

"Why, you know that money we've saved, in case we should get sick or anything?"

Harriet paused to note the effect of her words.

"Well?"

There was no surprise in the tone, no change in the pale face.

"Why, seems to me we could get on; it only took us ten years to save it, and we ain't very old—and—and—we're pretty healthy—and we can be more so."

"We don't need that. We don't need that, and we can get along without them new dresses—mine ain't been turned out once."

"Well, what do you want to do?"

Miss Margaret's tones were sharp enough now. It irritated her to have Harriet so long in coming to her from the beginning. But it was something that she did not exclaim at once against the spending of their carefully hoarded fund, and Harriet went on bravely.

"Why, I'd thought mebbe we could take that money and bury him decent—and—"

"And what?"

"And get a little headstone." Harriet's voice had sunk almost to a whisper. "Father thought so much of him, you know."

Again there was silence. Miss Margaret rose, folded and laid by her work, locked the door, wound the clock and took up the lamp.

"Come to bed," she said. "It's half-past ten."

They put out the light and went to bed. If they slept or waked if they slept, their poor hearts ached with the pain of forty years ago, they did not tell each other of it.

They were astir early next morning. The September sun had hardly begun to warm the world when their scanty breakfast was over, the dishes washed and put away, the old carpet swept and the room dusted.

Miss Margaret came out of the tiny bedroom with her bonnet on.

"Where are you going?"

Harriet looked up, surprised; she usually did the errands.

"I'm going to ask Mr. Morgan to see to things for the funeral. I'm the oldest, and it's proper I should do it. You'd better put on your other dress, an' go an' get that money out of the bank."

And so the matter was settled; and poor old Bob Barton, who had died alone, and left not a relative in the world, nor a cent of money, instead of being laid in a paper's grave, was decently buried, and followed to his last resting place by two sincere mourners.

When the expenses were all paid, the sisters found their little sum reduced more than they had anticipated.

"We can go without our roast beef Sunday," Harriet suggested, timidly.

"Yes, and tea once a day's enough for anybody," Margaret answered. So, without a word of regret, or a thought of yielding their project, the sisters made their sacrifices, and then

they went to give their order. After all, their money would procure only the simplest of simple stones; but they were satisfied.

"What's the inscription?" asked the man in attendance, when the stone had been selected.

Harriet turned helplessly to Margaret, and Margaret looked blankly at Harriet. Neither of them had thought of that.

"Why—his name—I suppose," Miss Margaret began.

"No, sister, don't," pleaded Harriet. "Let's wait and talk it over and come again."

And so they walked slowly home. They had a way—these sisters—of not speaking until they had thought a thing out, each for herself. Miss Harriet lighted the fire when they reached home, and made the tea, while her sister set the cups and plates on the table, sliced the bread and put on the wee bit of butter. It was a chilly evening, but they put on their shawls and let the fire go down. There was no paper to read to-night, so they both waited.

Miss Harriet worked steadily, while Margaret stopped now and then in an absent-minded way, and she passed over more than one dropped stitch without seeing it. It was she, of course, who finally broke the silence.

"I can't bear to have that name go on a stone," said, "even if it was his. He never disgraced it."

"But whoever heard of a tombstone without any name on it?"

"Well, we could put on his first name—and—and—a verse of poetry, mebbe, or somethin' from the Scriptures."

"Harriet Staples! Poetry! The idea! It ain't belittlin'—and you know it. Nor yet Scripture. He was a good man, but we don't know nothing about his religion. I don't suit, somehow. I guess if I'll have to be jest the name—Robert."

"That sounds kind o' cold like," Miss Harriet hesitated. "Nobody ever called him that. Couldn't we have the other—Bob—your know?"

"No, we couldn't," snapped Miss Margaret. "We ain't goin' to have no nick-names on that stone."

Harriet said no more, and the next day they gave their order. Miss Margaret was even more quiet than usual during the remainder of the day, and when night came she went to bed earlier than was her custom. In the morning, when Harriet awoke, she was startled to find her sister gone. She kindled the fire, wondering what could have taken Margaret out so early. By the time breakfast was ready her anxiety had increased to such an extent that she was in the act of putting on her own bonnet to go in search of her, when the door opened and Margaret appeared. She looked cold and blue, and her thin lips were shut slightly together.

"Is anything the matter, sister?" Harriet asked. "Where have you been?"

"Of course there ain't anything the matter. Can't I go out for a little without your gettin' riled up?"

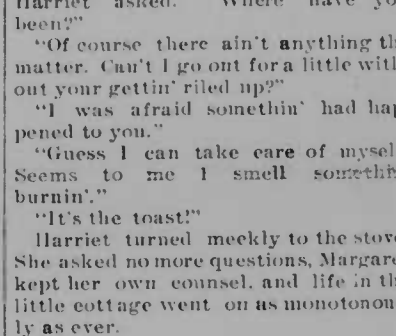

"I was afraid somethin' had happened to you."

"Guess I can take care of myself. Seems to me I smell somethin' burnin'."

"It's the toast!"

Harriet turned meekly to the stove. She asked no more questions, Margaret kept her own counsel, and life in the little cottage went on as monotonously as ever.

It was a cold, bleak day in early November. There was not a bit of greenness left anywhere; the frosts had been early and severe. Even the bright-tinted leaves had fallen from the trees, and the whole landscape was brown and dreary. In the old cemetery, where the hill slopes gently to the south, stood two women, looking

"I'M GLAD WE DID IT, ANYWAY."

ing down upon a grave. The wind blew Miss Margaret's scant skirts about her ankles, and puffed out Miss Harriet's shawl behind, like a balloon. Miss Margaret's face was cold and pinched, with the thin wisps of hair blowing about it, and her nose reddened by the wind. Some people were passing. A pretty girl in a party giggle and said something to the others about the "two old maids." But the sisters were allie consciousness of the grotesqueness of their appearance, and the pathos of the white stone that marked an old man's grave with its one word—"Bob."

"Why, sister?" Miss Harriet looked alarmed. "Why, he's made a mistake! We told him Robert."

"No, 'tain't a mistake," Margaret answered. "I told him to change it—you were so set against Robert. And it does look more natural," she added, after a moment. "We always called him that."

Nothing more was said, and presently they turned away. They walked home silently. Once Harriet spoke. There were tears on her cheeks; Margaret had seen them, and Harriet's tones were apologetic.

"I always knew 'twas you he come to see, sister. I always knew it."

"Twasn't no such thing, Harriet Staples!"

"Well, I'm glad we did it, anyway. I thought so much of him."

JUMPING HURDLES.

A Dangerous Pastime That Requires Much Practice.

In jumping hurdles the one thing which is imperative is not to jump. Hurdle racing has become entirely an artificial sport. It was discovered that by taking off from one foot and landing on the other, and by covering the ten yards between each hurdle in three strides, the hurdles could be run over, instead of jumped. It was also discovered that the man who couldn't perform this acrobatic feat was not in the same humor with the man who could. A long jumper with a turn of speed has a much better chance of becoming a good hurdler than a high jumper.

A pastime which requires much practice. You must harden your shins and keep as near to the top bar of the hurdle as you can. If you are clearing the hurdles by too much, you must practice by leaving part of the skin of your leg on the top bar.

A famous hurdle racer, H. K. Upcher, of Oxford, who by assiduous practice brought the arduousness of the sport to the highest point of perfection, was in the habit of jumping each hurdle in practice to make sure he was not going too high, and of going through the top rail when it was movable, and sometimes when it was not, in order to be quite certain that there was nothing unnecessary to spare.—Fortnightly Review.

HOW TO CHOOSE A SPONGE.

Don't Buy One of the Bright Yellow Kind, and Look Out for Discolorations.

Although the difference between a good and a bad sponge is very marked, but few people seem able to appreciate it. The first requisite of a good sponge is that it should be dark in color. The beautiful yellow sponges, commonly seen in druggists' windows are a delusion and a snare. The natural color is a light to medium brown, and the yellow sponges have been bleached by a vitriol bath, which destroys their elasticity and makes them wear out much sooner.

The feel of a sponge should be velvety, it should compress into a very small bulk by squeezing, and it must be of a uniform color. The best and most expensive are Levant sponges. They come from the eastern Mediterranean. The Dalmatian sponge is next in quality and price. There are very many others, however, known to the trade as horse sponges, Zimocca sponges, yellow, velvet, sheep's wool and glove sponges. The prettiest, and at the same time the cheapest, is the grass sponge, which is made up of myriads of small filaments and looks like a ball of yellow wool.

The majority of sponges used in this country come from Florida. Cuba also supplies a good many. The sponge, after being detached from the bottom, either by a dredge net or an instrument something like a sickle, which is made for the purpose, is allowed to lie in the sun until the flesh decomposes.

The sponges are then trodden under foot in running water until the flesh is all washed away, leaving the skeleton, which is the sponge as we know it. If the decomposition is allowed to go too far, yellow spots will appear upon the sponge and damage it. They are then packed up and sent to the dealer, and after a further washing, put on the market. The export trade of New York in sponges is very large and they are exported to every country in Europe.—N. Y. World.

THE TEXAS FAST MAIL.

New and Rapid Mail—and Passenger Service Between St. Louis and the Southwest.

Commencing Sunday, December 2, 1894, the IRON MOUNTAIN ROUTE will inaugurate a Fast Mail train between St. Louis and points in Arkansas, Louisiana, Texas and the Southwest. This train, which will be a veritable "flyer," will leave St. Louis 3 a. m., after the arrival of the Fast Mail from the East, and in addition to its mail complement, will carry Pullman Buffet Sleeping Cars and Tourist Sleeping Cars destined to California points. This new schedule will hasten the mails into the Southwest by from eight to fifteen hours over the present time, and keep fully abreast with the passenger service of the day. The through California cars will be placed at some quiet spot in the yards at St. Louis, and will be opened for occupancy as early as 6 o'clock in the evening. For full particulars address company's agents, or H. C. Townsend, General Passenger Agent, St. Louis, Mo.

FAITH—"Are you superstitious? Do you believe in signs?" Successful Merchant—"No; newspaper advertisements are better—and cheaper."—Fraser's Ink.

You Can't Eat Wrought Iron Nails. Of course, and expect to digest them, but you can eat ordinary food that is wholesome and digest it, too, after your stomach, fortified, has been strengthened by a course of Hostetter's Stomach Bitters. Your kidneys, liver and bowels will be rendered active and vigorous by the great tonic, and your system fortified against malaria and rheumatism. Use it, also, if you are nervous and sleepless.

Acorns, Vocalists, Public Speakers praise Hale's Honey of Horehound and Tar. Hale's Toothache Drops Cure in one minute.

Love always weeps when it has to whip. The best cough medicine is Piso's Cure for Consumption. Sold everywhere. 25c.

The things which do most to make us happy do not cost money.—Ran's Horn.

98%

of all cases of consumption can, if taken in the earlier stages of the disease, be cured. This may seem like a bold assertion to those familiar only with the means generally in use for its treatment; as, nasty cod-liver oil and its filthy emulsions, extract of malt, whiskey, different preparations of hypophosphites and such like *palatiatives*. Although by many believed to be incurable, there is the evidence of hundreds of living witnesses to the fact that, in all its earlier stages, consumption is a curable disease. Not every case, but a large percentage of cases, and we believe, fully 98 per cent, are cured by Dr. Pierce's Golden Medical Discovery, even after the disease has progressed so far as to induce repeated bleedings from the lungs, severe lingering cough with copious expectoration (including tubercular matter), great loss of flesh and extreme emaciation and weakness.

Do you doubt that hundreds of such cases reported to us as cured by "Golden Medical Discovery" were genuine cases of that dread and fatal disease? You need not take our word for it. They have, in nearly every instance, been so pronounced by the best and most experienced home physicians, who have no interest whatever in misrepresenting them, and who were often strongly prejudiced and advised against a trial of "Golden Medical Discovery," but who have been forced to confess that it surpasses in curative power over this class of cases, all other remedies with which they are acquainted. Nasty cod-liver oil and its filthy "emulsions" and mixtures, had been tried in vain, all the cases as had either utterly failed to benefit, or had only seemed to benefit a little for a short time. Extract of malt, whiskey, and various preparations of the hypophosphites had also been faithfully tried in vain.

The photographs of a large number of these cured cases, including bronchitis, lingering coughs, asthma, chronic nasal catarrh and kindred maladies, have been carefully selected and placed in a book of 100 pages which will be mailed to you, on receipt of address and six cents in stamps. You can then write those cured and learn their experience.

FOR YOUNG PEOPLE.

ACCOUNTED FOR.

I am not feeling well to-day.
But why I cannot see.
I had some tea-cream 'cross the way.
And pancakes home for tea.
I also had some caramels.
And sugared almonds too.
And when I met with Tommy Wells
A stick of fine tolu.
But I was careful with each one—
Too much of none I ate.
It cannot be that pretty bun.
And yet the pain is great.
I had six cookies, but I've had
Six cookies off before.
They've never left me feeling bad.
Nor pickles—three or more.
The soda-water couldn't make
Me ill—twas Billie's treat.
I want to think this fearful ache
Comes wholly from the heat.
—Harper's Young People.

TIGER'S MERRY-GO-ROUND.

A Cat Has an Exciting Ride on the Wings of a Windmill.

Frank Dellan has an amusing story of "Tiger" in St. Nicholas. The cat was in disgrace from having been caught in an attempt to purloin a bluefish from the kitchen. So it set off for an adjacent mill, to console itself with a meal of mice.

The trip to the windmill was not, however, a purely pleasant task in the first place, the tall mill itself was not a homelike, familiar place, like a house or a barn, particularly on windy days when the four great sails were going around with a creaking noise, up on

THEIR DID A DESPERATE THING.

one side and down on the other, flung shadows that hurried over the ground and up along the sides, while from within the building came great rumbling and buzzing sounds. Another trouble was the fact that Mr. Dellan, the miller, had a dog, "Black," who was in Tiger's eyes an ugly and dangerous brute. But Tiger was so cowardly that he was not the cat to go and fight his way to a dog. So he

hid in the mill. But this was one of those days when everything seems to go wrong. Over the door of the mill Tiger saw that the sails were not at rest, but wheeling around in a brisk wind, and when opposite the miller's house, although he kept himself carefully in the high grass, he was caught by Jack, who challenged him with a sharp bark. Tiger pretended not to hear this, and passed shyly on beyond the mill, to deceive the dog, who, as he well knew, would object to his hunting there, although it was sheer malice on Jack's part to grudge his neighbor a few mice. For the miller's cat was old and lazy, and he himself despised any smaller game than rats.

At length, by leaping under cover of the beach plum and bay bushes, Tiger reached his goal, and soon took up a position near a promising-looking bush by the shady side of the "shingling" mill. This happened to be also on the leeward side, so that the huge arms as they wheeled around were not in sight. It was a good, quiet place to compose his ruffled nerves. Tiger no longer felt too restless to lie in wait, so he tucked his feet comfortably under his body, curled his tail around them and settled down to await some foolish mouse.

But the windmill mice were probably well fed and in the habit of taking noonday naps, for not the tip of a nose or the faintest squeak came from the hole. Tiger grew drowsy. Luckily for himself, he did not fall into a deep sleep, for he was in more danger than the mice for whom he had set an ambush. Jack, the cross terrier, divining the pouncer's intentions, was stealing a march on him. Without a growl or warning he had crossed the road, forcing the miller's house and, with a running leap, he was on the mill, catching sight of the unsuspecting cat calmly seated, his nose toward the mouse hole and his back toward the coming danger. With a startling yell Jack sprang toward his victim.

It was shabby of Jack to take Tiger off his guard, and it is not a matter of the slightest reproach to the courage of Tiger that, roused to his peril at the last moment, he gave a desperate bound and fled.

It was a race for life! Around the mill they flew—there was no room, no place of refuge near, but Tiger's small size gave him an advantage on the circular race track. Five times the lower end of one of the great sails happened to sweep near the ground just ahead of him; he made a great forward and upward bound, clutched the framework and canvas, and instantly was borne aloft toward the clouds as if by the arm of a friendly giant; it was enough to make a cat's head swim, but Tiger was safe. If he could keep his hold, for in a few moments the baffled terrier was barking furiously forty feet below him.

The Landlady's Tip.
New Boarder (complainingly)—I can't eat this steak, madam.
Mrs. Slimdick (accommodatingly)—You'll find an excellent dentist right opposite.—N. Y. Weekly.

THE WATER SPIDER.

Its Taste Inclines to "A Life on the Ocean Wave."

Some of the spider family have a liking for living in or near the water. Most of the spider family with which you are familiar live in the corners of rooms or in dark closets. But this water spider has quite a curious home, and if you look sharp you may find one of them some day on the banks of a stream.

This curious little spider builds a pretty house of silk about the shape of a thimble. This house is fastened among the water plants growing under the water, and naturalists tell us that when her house is finished the spider carries air in her body, bubble by bubble, until she fills her tiny house under the water full of air. In this house she lives, carrying her food down to eat, and making her nursery in one corner of the house. And here her children live until they grow big enough to build little thimble-castles for themselves.

Another curious little fellow is called the raft spider. This creature constructs an odd little raft of leaves and sticks, held together by the silken threads which all spiders use. On this raft the spider sails about, not stopping in any one place, but steering his little boat wherever the fancy takes him. His food consists of small insects which he finds in the water around him. He is said to be able to row upon the water as well as sail upon it, so altogether he is quite an accomplished creature. His little raft is his home, his castle, his yacht and his nursery, and he doubtless finds "a life on the ocean wave" quite to his taste.—N. Y. World.

THE DANCING DOLL.

How to Make a Whirling Creature of Paint and Pasteboard.

Draw on fine pasteboard or Bristol-board a doll about a foot high and paint her face and hair handsomely; then cut her out, says the Dolls' Dress-maker. Make separately from the doll a pair of pasteboard arms and a pair of legs of the same material, and paint the hands and feet. The doll's torso must be covered with a body or corsage of silk or satin, lined and made shapely with a little wadding. Cover the arms with white sleeves of crepe or thin muslin; let them be wide and full and confine them at the wrist. Sew on the arms to the shoulders or bust of the doll. They must be made as if she were holding out her frock with them.

Prepare a silk skirt and plait on to the doll's waist, concealing the joint with a belt or sash. You may add an apron of thin crepe trimmed with ribbon and tucked up at one corner with a small bow.

Put silk shoes on her feet, having sewed on the legs of the doll in such a manner that they will move easily from the knees.

Take a small spool or bit of black sewing silk. Pass one end of it through

DANCING DOLL.

the body of the doll, and, having made a large knot at this end, tie it to the back of a chair. Slip the doll around the thread of silk till she is about a yard from the chair. Then place yourself in front of her, holding the spool in your hand; you may stand two yards from the doll. Jerk the thread up and down so as to move the doll, and make her feet go as if they were dancing.

When you are about to put her away draw in the thread close to her back (the knot will prevent its coming through), wind up the spool and lay it with the doll in her box or drawer.

There must be a flat skirt of pasteboard under the silk skirt to shape it out, and to the middle of this pasteboard the legs must be loosely fastened, but not so as to endanger their dropping off.

The Crown Prince of Prussia.

Crown Prince Frederick of Prussia is now in his twelfth year. He is so far advanced in his studies and so mature for his age that Emperor William is thinking of giving him an establishment of his own, with a separate retinue of servants, in order that the prince is a remarkably bright lad, and is said by an English visitor to the place to speak our language fluently and talk it, not only rapidly, but well.

Makes His Dog Run the Press.

Thomas Meredith, a Chicago lad, owns a printing press and a Newfoundland dog. At first glance there doesn't seem to be much connection between them, but Thomas has managed to make a power press out of his dog. In this way he gains sufficient power to run his printing press, which is of course not a very large one.

A Crack Shot at Seven.

It is not often that a seven-year-old boy is a fine rifle shot, but Joe Thorne, of Atlanta, Ga., is an exception. He is a bright little fellow, with a true eye and a steady hand, and he can put his ball in the bull's-eye at fifty feet. That is what he has done more than once.

TEMPERANCE NOTES.

RUM'S EVIL EFFECTS.

Terrible Results of Alcoholic Indulgence in the Vital Organs.

It may not be generally known that the evil effects of drinking are far more pronounced in the case of the "steady" drinker than in that of the man who goes to occasional excesses. By a "steady" drinker is meant one who drinks regularly, every day. He may never become fully intoxicated, but he keeps the system saturated with alcohol all the time. The other man—the periodical drunkard—takes alcohol, and gets drunk, through, and remains so for a number of hours, or for a day or two; but between these he drinks nothing, and the body has time to get rid of the poison. Hence such a man is less likely to suffer from severe organic troubles due to alcohol than the steady drinker, who keeps his body full of the poison all the time. We propose to briefly indicate the effects of alcohol as a poison upon the great organs of the body.

Those most subject to fatal disease as the result of alcoholic indulgence are the liver, kidneys, and lungs. The liver is the most liable, because it is the one most liable. Most of the liquids we swallow are carried directly from the stomach and digestive tract into the liver through the portal vein; hence the alcohol imbibed reaches the liver in full quantity, and must pass through its tissues before it can possibly get into the general circulation and reach other portions of the body. The result of this stream of alcohol pouring through the liver is to inflame the liver, and to lead the way to a large number of grave complications. The liver is the main source of sugar and uric acid in the system. Alcohol increases the amount of these products, and hence leads to and aggravates diabetes, which is characterized by sugar being found in the urinary excretion, and gout, which is caused by an excess of uric acid. Besides these effects of the inflammation induced by drink, it often results in cirrhosis, in which the liver becomes contracted, hard and irregular in shape; and in enlargement or fatty degeneration of the organ, in which the liver fails to perform its functions properly, and death eventually results.

As soon as the alcohol imbibed passes through the liver and gets into the general circulation, the lungs and the skin begin to get rid of it. At every breath the expired air carries off a portion of the alcohol, and in the insensible perspiration from the skin. Hence the kidneys do not receive the full amount of alcohol, as does the liver; but enough passes through them to cause the gravest disorders, and all of them fatal. Drinking is a source of danger to the kidneys, which is a degeneration of their structure. The kidneys aid in the task of ridding the system of the alcoholic poison; they are easily overworked, and the extra labor imposed upon them causes this degeneration. Other diseases of the organs are caused by drink. Spirituous liquors are the more apt to cause "granular kidney," while beer drinking brings on fatty degeneration. Albuminuria, in its most troublesome forms, also results from steady drinking.

The effects of alcohol upon the heart are of a peculiar kind. The liver is that it acts on the nerve centers like various other poisons—atrophy, for example—paralyzing to some extent the vagus nerve, which has a checking or retarding effect on cardiac action. Released partially from this control, the heart starts off like a wild. Its action is quickened, the blood is driven through the arteries with increased force, the face is flushed, and other familiar phenomena of accelerated circulation follow. If the dose of alcohol becomes largely increased, the paralyzing effect of the nerve center, as well as retarding nerves, and the heart's action becomes slow and weak, the man's breathing stertorous, and death even may supervene. For the benefit of medical readers, we will say that the above explanation of the mode of action of alcohol on the heart is that of the London Lancet—well known to be the medical journal of the highest authority in Great Britain.

So much for the immediate action of alcohol on the heart; now for its effects resulting from steady drinking. It is the universal testimony of the medical profession that intemperance is a fruitful cause of heart disease. In all forms of heart disease, among those most frequently met with, due to this cause, are hypertrophy, dilatation, valvular disease, and fatty degeneration—all of them fatal eventually. These pernicious effects extend to the entire circulatory system, and cause fatty granular (atherosclerotic) degeneration of the walls of the arteries, a weakening of the coats of the capillaries, causing their permanent distension (the cause of the chronic redness of the nose and face from drink); and these largely increase the liability to apoplexy, which is simply the rupture of a blood-vessel in the brain.

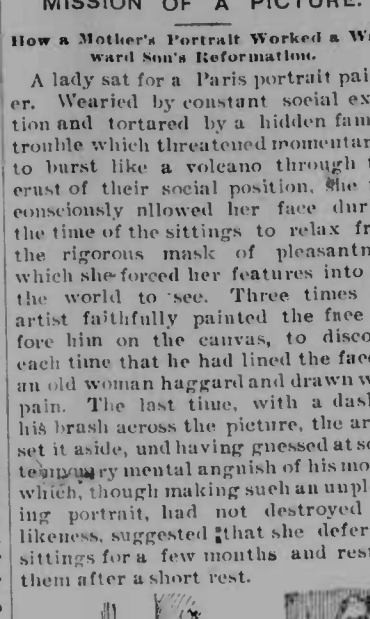

The London Lancet recently gave a series of tables, showing the death-rate, between the ages of 25 and 65, of men engaged in occupations that put before them constant temptation to drink, and those who were not thus exposed. These showed that for every 297 deaths from liver diseases in the former, there were but 96 in the latter; and that to 182 deaths from kidney diseases among the former, there were but 107 among the latter. And in the cases of deaths from diseases of the heart and of the circulatory system, 411 died of the former class to 250 of the latter. That is, the death rate from diseases of these three great organs is more than twice as great among the classes exposed to the temptation of drink as among those not so exposed.

The law lays its heavy hand upon the sale of all other poisons, and hedges it about with the utmost precautions; but the sale of alcohol, in its myriad seductive forms, is unrestricted in any such way. Yet more men die of its poison per annum than of the aggregate of all others for a score of years!

MISSION OF A PICTURE.

How a Mother's Portrait Worked a Wayward Son's Reformation.

A lady sat for a Paris portrait painter. Worn by constant social exertion and tortured by a hidden family trouble which threatened momentarily to burst like a volcano through the crust of their social position, she unconsciously allowed her face during the time of the sittings to relax from the rigorous mask of pleasantness which she forced her features into for the world to see. Three times the artist faithfully painted the face before him on the canvas, to discover each time that he had lined the face of an old woman haggard and drawn with pain. The last time, with a dash of his brush across the picture, the artist set it aside, and having gazed at some temporary mental anguish of his model, which, though making such an unpleasant portrait, had not destroyed the likeness, suggested that she defer the sittings for a few months and resume them after a short rest.

BLUNDERING INTO THE STUDIO.

Rumor makes the romantic continuation of the story, and upstairs the prodigal son, who was one of the immediate causes of the care-worn lines, which the unwilling artist had copied into the mother's likeness, and staggered with intoxicated blundering into the open doorway of the painter's studio, instead of that of one of his comrades on the next door, was confronted by the face of his mother above the long, white, shroud-like blur, which was meant to have obliterated the face. The shock is said to have sobered the young fellow, and after convincing the artist of his sincerity, he persuaded him to be allowed to carry home the disfigured painting, where, within the year, he hung it on the wall of his own room, and beside it a little miniature of the same face with all the pain smoothed out by his own reformation.—N. Y. Herald.

ARE POISONERS-GENERAL.

That is How John Wesley Characterized Dealers in Alcoholic Beverages.

A thirteen-year-old boy in New York city was given a glass of whiskey by a woman, and soon after drinking it fell in a drunken stupor and was carried in a lifeless state to a hospital, where after vigorous treatment by the surgeons here recovered so as to be taken home to his parents. Our children are being poisoned by the wholesale. One glass of the poison is deadly. John Wesley, in referring to the dealers in alcoholic beverages, said:

"All who sell them in the common way to any that will buy are poisoners-general. They murder his majesty's subjects by wholesale; neither does their eye pity nor spare. They drive them to hell like sheep, and what is their gain? Is it not the blood of these men?"—National Temperance Advocate.

CHILDREN OF DRUNKARDS.

The children of drunkards die like flies; if they survive, they grow up dirty, repellent, depraved, thieves, beyond the reach of beneficent activity, to occupy the cell of the felon, to lie in the suicide's grave, or to become the scourge of the society of which they have been the helpless victims.—Archdeacon Farrar.

BITS AND BREVITIES.

TEMPTATION will follow us to the gate of Heaven, but it can not go in.—Raim's Horn.

TAKE your first drink with the devil and you are in danger of taking your last with death.

Some folks confound genius with the privilege of getting drunk with impunity.

THE devil is not much afraid of the prayer of the man who never does or says anything in opposition to the liquor traffic.—Raim's Horn.

ACCORDING to the laws of Massachusetts, the punishment of a liquor dealer, in case he is not legally responsible, can be sued for selling intoxicants to intemperate persons.

LADY HENRY SOMERSET has been made president of the league for the prohibition of the sale of intoxicating liquors to children, whose headquarters are in Liverpool.

A CORRESPONDENT is about to be opened near the Union Pacific railway shops, in Omaha, where two cups of good coffee are to be sold for a nickel in opposition to the free lunch and beer.

THE Turkish censors have confiscated the Union Signal, and will not permit it to enter the country, on the ground that it is not to the interest of the government to have the people taught not to drink liquor.

PRACTICE ON FACES.

Experience of a Barber When He Shaved His First Man.

It was a dull day in the barber shop. John, the proprietor, was resting his razors and doing some reminiscence of his youth. Somebody had asked him if he remembered the first man he ever shaved and what his feelings were at the time.

"My feelings," said John, "were probably worse than those of my man. I have, however, an exceedingly vivid recollection of the scene. I was at work in North Clark street shop. My duties were that of porter, errand boy and general constabulary. One day I told the proprietor I wanted to be a barber. He gave me some encouragement and told me my chance would soon come. One day he gave me a chair and an old razor. Next day I got a pair of scissors and a comb and brush and a shaving mug. Then I donned an apron and tried to look as if I was an old hand at the business. The barbers 'guyed' me, but I wanted to learn the trade and I was not to be laughed out of my intentions.

"I was well aware that I was not allowed to take any customer that came in. That would never do. Apprentices must find their own victims, so I skirmished. For several days I put in all my spare time looking for a man to shave, and I was not long in finding him. He was a fellow who couldn't be found. I approached two or three men who looked as if they might appreciate the bixaries of a free tontorial treat, but I evidently gave them a mistrust of myself, and in each case the offer was declined.

"At last, by daylight, I was unemployed and looked it. He wanted the price of a bed. It was in the evening and only one or two of the barbers were in the shop with me. I told the man I would give him a quarter if he would let me shave him, shampoo him and cut his hair. He agreed to let me and I shaved him with him, but I was so earnest about it that he finally came to my terms. He regretted it afterward. So did I.

"For four solid hours I worked on that man. It was awful. I was as badly frightened as he was, and what with his tough beard and my bad razor the job became a torture to us both. He was pretty good-natured, however, and as I had some court-plaster and patched up his face when the job was over he came to the conclusion that a quarter was easily earned. His hair looked as if it had been eating it and my hands were trembling with excitement when I brushed him off, but it was a great event in my life. I had shaved my first man. He came to me again in a few days and arranged to be shaved twice a week and, besides, he brought his mother to me, so from that time I had plenty of practice. Then I was given a chance at regular customers. I made a success of my trade and now I own a shop."

"Barbers," said one of the men who had heard John's story, "are a queer lot. I travel a good deal and I had all sorts of things outside of Chicago the first thing a barber does when he wants to inspire confidence in his customer is to tell him he has worked in the Palmer shop at some time in his life. Once, in Atlanta, I was a barber chair and the knight of the razor at once sized me up as being from the north, so he asked me if I was ever in Chicago. I knew what was coming. He was going to tell me he had worked in the shop paved with silver dollars. So, to lead him on, I told him I had never been in Chicago. Then I had never seen the Palmer house barber shop. No, I had never seen it. He had worked there once. Would he tell me what it was like, as I had heard stories about it. Then that barber romanced a bit. The floor, he told me, was made entirely of dollars. There were sixty chairs in a place and each barber shaved a full dress after six o'clock. Of course, he had never been in Chicago. I thought first he was having some quiet fun with me, but after I found he was doing his talking from the whole cloth.

"The nearest experience I ever had with a barber," continued the man, "was in a little Kansas town. It was the Fourth of July and I couldn't get away from the place. There was one barber there and his shop was in the rear of the grocery store, where the past office was located. I found the barber busy, but soon my turn came and I got into his chair. He chatted pleasantly. He told me how long he had been there. Then he gave me his family history. Then he told me a few of the town scandals. I knew the Palmer house barber story was there, so I encouraged him. Finally it came. O, yes, he had worked in the Palmer shop. Was foreman there six years. The shop was a good one, but not what it was believed to be. He left because the barbers were compelled to eat in the restaurant of the house. He wanted to take his meals at home and didn't like the rule. So he went to Kansas.

"He was about half through with my face at this juncture when a man came up to him and whispered to him. 'Is that so?' he asked.

"Yes," said the man.

"Just excuse me a minute," said my barber. Then he walked to a chair near by, took a square drum, hung it around his neck and went with the other man. In five minutes I heard 'Marching through Georgia' being played by the village band. The latter dried my face. I put some more on and tried to finish my shave. Then I heard 'Star Spangled Banner.' The latter dried again. I tried to convince myself that I looked well enough half shaved. It didn't succeed. Then I swore. In exactly twenty-five minutes from the time he left my barber came back. He was so cheerful that I forgot to keep my resolution and frightened him to death with an outburst of indignation. The fellow was smiling and as he placed the drum on the chair he remarked:

"We've got a good band here and I'm the only fellow in town who can play 'The Star Spangled Banner.'"

"Then he finished shaving me, while he told me about a man in town who had the toughest beard he ever met."—Chicago Tribune.

MISCELLANEOUS.

—There is as much responsibility in imparting your own secrets, as in keeping those of your neighbor.—Darley.

—Among the Turks the bodies of the dead are held in extreme reverence, though the cemeteries are used as picnic grounds.

—The leaders of a flock of migrating wild geese become tired sooner than others, and are frequently relieved by their fellows.

—According to the accounts found in the library of Nebuchadnezzar, wheat cost about in cents of our money a bushel, and wine 11 cents a "cupful," about two quarts.

—'Is gwine ter write poetry,' said Erastus Pinkley. 'Who's gwine ter do despellin' foh yer?' 'Is gwine ter stah! wif dialekt same as de mullah polikes does.'—Washington Star.

—When the common earthworm is cut in two, to the tail there grows a head and to the head there grows a tail and two animals are formed. As the wound heals a small white button is formed, which afterwards develops into rings and a perfect extremity.

—Animals are often able to bear very protracted fasting. In the Italian earthquakes of 1755 two hogs were buried at Soriano in the ruins of a building. They were taken out alive forty-two days later, but very lean and weak. A dog, at the same time and place, was buried for twenty-three days and recovered.

—W. S. Morris, superintendent of the motive power of the Chesapeake & Ohio, has completed a new stock car, which, it is said, will revolutionize the business of transporting stock. The new car will only weigh about 25,000 pounds and will be made largely of iron. It will be the lightest stock car in use.

—When an American meets an acquaintance after dark, no matter the hour, he says, "Good evening," and when they separate he says, "Good night." But in Canada one often hears the latter phrase in salutation as well as in good-bye. To an American it seems old when, on seeing a friend, the latter advances with, "Good night, sir. How are you?"

—When the new bell of the Philadelphia State house was hung in 1733 a noteworthy bell was rendered for hanging. It included charges for half a bushel of potatoes, forty-four pounds of beef, four gammons of bacon, a choice of thirteen pounds, thirty-six pounds of bread, 200 times and three gallons of rum. When another bell was hung toward the end of the century customs had so changed that the bill was merely for the pay of so many riggers and their assistants.

—Miss Sadie Monroe, of Massachusetts, has won distinction in two ways. She is the official reporter of the Middlesex and Barnstable terms of the supreme court, being the first woman officially recognized as a court stenographer; and this summer she made a bicycle record of less than ten hours over the route from Yarmouth to Boston, eighty-eight and a half miles. She is said to be the first woman to make the run.

—Americanism in politics.—Wherever Americans plant stakes, we hear of political agitation. The speeches of the great mass meeting of Americans at Boston, held the true American ring, there may have been other political mass meetings in Alaska, but the news of them has not reached us. The Junean meeting was the first important political demonstration in that part of our domain, the northern shores of which are lavished by the waters of the Arctic Ocean.

—At some of the Canadian post-offices the sign is displayed: "United States stamps sold here." This has no sanction from the authorities, but the clerks are allowed to buy and sell their own private stock of Canadian stamps, and Canadians who want to send small sums by mail, or to enclose stamps for answers. They charge a profit of about ten percent on stamps, in bulk. Any one who has spent two hours running about New York trying to find a 2-cent penny stamp, or an answer to a business letter addressed to London, and has had to pay 10 cents for it when he finds it, must realize that here is an industry that might be profitable in American cities.

—Congress to-day would be rather surprised at a proposition that it should print an edition of the Bible. Yet such a proposition was made in a memorial to Dr. Allison, on which a special committee made a report in September, 1777. The report of the committee was adverse, chiefly, it would appear, on the ground of expense. The decision was reached "after conference with the printers," and the recommendation was made that instead of advancing money for importing type and printing this Bible, the committee on commerce should order 20,000 Bibles from Holland, Scotland or elsewhere. Thus a deathblow was given to serious Bible work in the first industry of America.

—In 1782 congress was asked to approve an American edition of the Bible, and William White and George Duffield, the champions of congress, made a report recommending the work.

In the West.

—Easterner—How long have you lived in the west? Westerner—Twenty years.

—Isn't it dangerous out there? "Well, I reckon if some of them I've had to do with was livin' now they might say it was."—Detroit Free Press.

YET, AM I OLD.

I never knew that I was old—
Till the loveliest photo told
Me I was old!

As children turn from ghostly dais,
As our hearts melt at barbarous tales,
We will not look, we will not look,
Our age to make!

We know our hope has broken wing,
We know we shall not miss the world;
But all is nothing to the sting
The old lines bring!

Yet, after all, when once we bow
Submissive to the iron fact,
We find that life is, even now,
Forthright, unshorn!

Eyes that can kindle look the gray
That shimmer on our whitening head;
Kisses from lips we love delay
Joy but a day!

—Rosa Hawthorne Lathrop, in Ladies' Home Journal.

VIRGINIA MOUNTAIN FOLK.

I stumbled down the mountain amid
A whirl of leaves and twigs, making
straight for the valley. I had left the
path, and suddenly found myself
breaking through a brush fence and
half way across a "clearing." The
place was unfamiliar to me. A cabin,
preserving a miraculous balance,
titled forward from the steep side of
the mountain. Its plank roof was
weighted down by rocks, and the log
chimneys leaned out on either side
like ill-set ears.

The door was opened for me by an
old woman, who shut it as soon as I
had entered. She gave me a chair,
hoped that I was "peart." Plank shutters
had been put before the windows,
so the rain might not come in. When
my eyes became accustomed to the dim
light, I saw that a man and girl sat on
a bench in one corner. The girl was
small and slight, and her hair hung
short, like a child's, about her throat,
but her eyes were womanly. The man
was a specimen of hardy life, with a
broad, deep, full chest, great hands,
all brown and muscled, and a head set
well back, covered with short, crisp
curls, that in themselves spoke of his
splendid vitality. This couple gazed
curiously at me for a time, but they
did not speak.

The old woman began talking in
a cracked, tremulous voice. She had
fine eyes, undimmed, and full of wis-
dom. Her head was tied in a snuff-
colored cloth that disclosed at the
back a hard knot of gray hair. She
was so bent that her waist had sunk
out of sight, and her head and shoulders
at the back, exposing the white knit
stockings. She talked to me about the
folks thereabouts, and, finding that
many of them were intimates of
mine, she told me all the gossip of the
mountain.

The rain poured in a steady stream,
beating through the chinks between the
logs, down the chimney, and
against the plank shutters. The old
woman talked on, treating me to sage
advice and sound philosophy. The
two in the other corner sat silent;
neither had spoken since I had come in.
But I noticed that the man's fingers
moved rapidly all the time and that
the girl kept her eyes on them.

"That's the way he talks to her,"
the old woman said to me. "He's the un-
fortunatest critter ever was. Can't
speak no better. But then, Docly,
knows well enough what he means by
them finger tricks. They've been
keepin' company gones for four year,
Budge an' Docly has," she went on
without lowering her voice. "She's my
girl; an' Budge's father was my
brother de! That makes 'em kin.
Budge has stayed with me, an' I
me ever since her pa been dead.
Seemed kinder likely they'd be carin'
for one another."

I wanted to ask why they had not
been married, but I had discovered
that the old woman was stone deaf.
With quick perception she knew my
question. "Budge is kinder foolish,"
she said, "an' somehow he ain't never
made fixins for her gittin' fixed.
Cert'ly can't Docly's business to see
about it."

A dog whined outside, and, at a mo-
tion from his sweetheart, the man
went to open the door. I saw then that
he had a wooden leg.

"He fell off a pine tree into Har-
ris' Level, an' broke his leg," the old
woman said to me. I knew the place.
A boulder hangs far over, above a
flat stretch of land that slopes
down to the mountain side. "It was
bad broke," she went on, "an' Dr. Joe
had to cut it off—thar, you see, clean
above the knee joint. It was 'bout
then that Budge an' Docly found out
they was likin' of one another—jest
'bout the time when he broke his leg,
an' Dr. Joe got out another feller
valley. Dr. Joe could ha' got 'em
joined by the preacher, an' I asked him
to do it. But he said as how Budge
was simple, and they was too near kin.
'Tears to me if they's carin' of one
another can't be no harm noway what-
soever comes 'bout."

She paused, and redoubled, then
turned to her daughter. "It's 'bout
time you was gettin' supper," she said,
"the sun's drappin'; it'll soon be the
edge or darkness."

The girl rose and went into the
inner room. A potlatch from crested
the man's face, but passed, leaving it
childishly bright, as it had been be-
fore. The old woman sat thinking for
some minutes, then she said to me:
"See how it ken be fixed: I've bin
studin' 'bout it; you ken see 'bout the
preacher jinin' kin." She looked at
me eagerly. "You don't see no harm
in their bein' kin, do you, nor Budge
bein' foolish, neither?" I shook
my head. She looked pleased and
said: "Go in thar," pointing to the
inner room, "an' talk to Docly 'bout
it."

I went into the kitchen. The girl
had lit the fire, and now stood stirring
the contents of a big pot. The glow
from the pine wood softened her
pinched features and brightened her
hair. I saw by this better light that
she had an earnest brow and an inno-
cent mouth. When I asked her if she
would like to marry Budge, she an-
swered: "Yes," quite simply, contin-
uing to stir the meat and cabbage.

Presently Budge came into the
kitchen. When Docly explained to
him what I had proposed in regard
to their union he laughed delight-
fully, showing his strong teeth and two
dimples. He nodded his head many
times to tell me of his willingness and
looked at his sweetheart with a smile
on his cheek. Before I left the cabin we
had arranged a plan by which the two
were to come down to our church
in the valley on the next Sunday.
Neither had ever been off the moun-
tain, but Budge could find his way
anywhere, Docly said, with an air of
pride.

I scarcely believed that Docly and
Budge would venture down their
mountain even to be married, but the
next Sunday I found them at the
church. Budge, recognizing the im-
portance of the occasion, wore a satine
dress, on which twined yellow snakes,
their heads at the hem and the tails
reaching her waist. On her head was
a man's straw hat, such as are to be
had at country stores for a nickel. It
was tightened at the crown with a
shoestring, and its brim, measuring
several feet in circumference, hid the
upper part of her face. She seemed a
little conscious, but Budge was su-
perbly happy and unembarrassed.

The young minister had on his sur-
plice, and was just going to begin the
services when I told him that there
were couples that wished to be mar-
ried. His fair, beardless face flushed
at the delay, but he accompanied me
to the churchyard, where Budge and
Docly stood with a young lady from
Manchester. They spoke to him civil-
ly, but seemed to find him a little
look at. When I told them he was to
marry them they talked together rap-
idly for a minute, then Docly turned
to me.

"Budge says," she said, "as how we
won't want to be joined by no 'oman.
It won't 'pear exactly square."
The young minister flushed pain-
fully. Budge nudged Docly and said
something else.

"Budge says," she continued, "spe-
cially when she wears breeches under-
neath her coat, an' them slavin'!"

When assured of his sex they agreed
to be married by him, and Mr. Lovell
told them they might come up to the
railing when he had finished his ser-
mon. Every time there was a pause
in the services the two arose and
started toward the minister, who had
to hurry on at break-neck speed.

The church was crowded that Sun-
day. The day was hot; some bumble-
bees had made a nest in the gallery
and droned in a monotonous hum.
The light through the colored win-
dows was subdued and the congrega-
tion dozed. Through the church there
faintly echoed an unmistakable stir-
ring sound. We started to water-
proofness and saw that the crowd, lifting
the broad brim of her hat, had kissed
the bride. These demonstrations con-
tinued at intervals throughout the
sermon, until, overcome by the fatigue
of their walk, they fell asleep, her
head on his shoulder and his resting
on the crown of her hat.

When his sermon was over Mr. Lovell
dismissed the congregation. The
young minister looked at us appeal-
ingly and then came down into the
church. He awoke the bride and
groom and led them to the railing.
Docly did not take off her hat, hold-
ing it with gentle persistence when
Mr. Lovell tried to remove it. And so
the ceremony began. The groom could
not, and the bride would not, make
the responses, but they smiled so hap-
pily at each other that formality was
unnecessary. They had brought a
ring, and when the minister asked
them to be united by the ring they
turned to us for help. By this time
every soul was interested in them, the
man's beautiful face and irresponsible
attitude appealing to us all. We
looked anxiously at each other; a ring
must be found. Budge and Docly
stood close together, and Budge, say-
ing contentedly, while we questioned
him, "What should be done in the emer-
gency. At length the young lady from
Manchester solved the difficulty by
miniking the little silver ring from her
parol.

Then the ceremony proceeded hap-
pily until the time came for the two
to kneel. Budge could not kneel be-
cause of his wooden member, so he
had to receive the blessing standing.
And when Mr. Lovell pressed Docly
on the shoulder she would not bend,
but when he increased the pressure
she sank flat on the floor, her little
rough shoes, with their toes turned in
toward each other, straight out in
front of her. And in this attitude the
benediction was given.

While the congregation was saying
the prayer I saw that Budge was spell-
ing to Docly on his fingers. As soon
as the amen was pronounced she still
sitting on the floor, hid her face in her
hands and said aloud:

"Oh, Lord, hein' as he can't talk to
yon hisself, Budge have asked me to
say as he is mighty thankful to you
for gettin' us joined. An' he says as how
he'll do anything for you 'cep'n what
takes talkin'; nor ken he do no steady
jest walkin' (Budge ain't strong on his
leg, hein' as he ain't but one), an', O,
Lord, don't you thing Budge is bad
cause he can't say his prayers; he
would, onliest, O Lord, he can't talk.
And Budge is the best man in the
world, an'—amen, O Lord!"

She pulled herself to her feet with
the aid of her husband's wooden
leg, and they walked down the aisle.
After they had received our congratu-
lations, and the young lady from Man-
chester had thrown her bright silk
scarf over Docly's serpentine dress,
they went out into the churchyard,
and, sitting on a flat slab, took off
their shoes and stockings. The last
we saw of them they were trudging
toward their mountain, the midday
sun full on their faces. Budge limped
briskly along, supported by Docly's
sturdy young shoulder. —Richmond
Dispatch.

No Use for It.—Peddler—"That
little book on 'How to Preserve the
Hair,' is a key to the entire situation."
Baldy—"I am very sorry, but I haven't
a single lock that it would fit."—De-
troit Free Press.

MISCELLANEOUS.

—Agreeable advice is seldom useful
advice.—Massillon.

—Shelbygan means "Stream that
comes from the ground."
—Nothing so much convinces me of
the boundlessness of the human mind
as its operations in dreaming.—Chalov.

—The last sale of the stock of the
Chemical bank of New York, was at
\$1.40 per share. For the stock of the
Fifth Avenue bank, \$2.00 per share is
bid, and for the stock of the First Na-
tional, of New York, \$2.50 per share is
bid.

—The frog deposits its eggs in shal-
low water, where the warmth of the
sun promotes speedy hatching. The
common snake often selects a bed of
decomposing vegetable matter. The
crocodile and the clumsy sea tortoise
go ashore to lay their eggs.

—On the walls of a grocer's store in
Pompeii was found the following in-
scription: "H. D. INL. ANVNGIA.
P. G. ALIV. MANVPIOS. CCL."—which
has been interpreted to mean: "On
July 25, here's land, two hundred
pounds garlic, two hundred bunches."
Whether these articles were bought or
sold, does not appear.

—Busts or statuet of nearly all the
Roman emperors have been recovered.
None are known to exist of one or two
of these rulers, for the reason that they
signed no orders, the style of their
was not time to have them made, while
others are very scarce, because, after
the murder of an unpopular emperor,
the rabble destroyed his statues.

—Superintendent Sandt, of the Ren-
dell railroad machine shops, has re-
ceived orders to change the grades of
all the passenger locomotives on the
Lohman Valley, East Penn and unit
line of the road, so that blackhead
coal can be used for fuel instead of the
large sizes. It is claimed that the
change will effect a saving of at least
\$100,000 annually.

—Maine has a law that authorize
any citizen to kill a dog that is engaged
in hunting deer. The old sports in this
state are a patient lot, and it angers
them when a hunter from the city goes
up there with a couple of yelping
hounds to start the deer toward war.
Malignant imported dog has met a vir-
lous death in the chase and his owners
did not dare to complain, because the
game wardens are pretty stiff enforcers
of the law.

—Rice bread is a dainty that the
south learned of the Indians. The
grain is ground into a pulp, which is
baked in a western bread. It is ex-
ceedingly light and makes a breakfast
luxury when served hot with butter.

—It may be made into large loaves
and cut into slices. It is deemed unfit
to eat when cold, but may then be made
into soup by boiling it with chicken.
The Indians fasten the rice bread by
mixing in hot water, but yeast may be
used as a leaven.

—Attorney-General Hengel, of Penn-
sylvania, whose home is at Lancaster,
sometimes astonishes his friends by
showing what he calls his "B.O.O.G."
watch. Mr. Hengel's watch is a
Lancaster watch, the stock of a
watch factory established there some
years ago, and the managers of the
factory made and gave to each of the
subscribers a handsome gold watch.
The factory afterward failed, and the
subscribers have only the watches to
show for their money.

—Big Four officials state that out of
the 15,000 freight cars in use on that
system, 6,000 are now equipped with
automatic couplers and air brakes. All
new cars built for the road are so
equipped when they are turned out,
and all cars that go through the shops
to be rebuilt or extensively repaired
are fitted up as required under the law.
In addition, 25 cars are each month put
through the shops and supplied with
automatic couplers and air brakes.

WEAPONS OF THE ORIENTALS.

Even the Moslems Carry Dangerous
Looking Daggers.

Almost every one in Hyderabad is
armed to the teeth, and the spears,
sabres, daggers and pistols, which
glare amid the white and crimson
panes, or in the such and turban
confer the entire city into a formidable
armory. Daggers filled with deadly
weapons brighten dim alley and mold-
ering arcade with the polished steel
and burnished brass of a hundred an-
tiquarian native instruments of attack
and defense.

Slender Persian rapiers are
held in place by the sharp scabbards
of numerous, double-edged scimitars;
and swords with watered blades of
fabulous value fence off a jagged heap
of pointed "scorots" and crooked "tal-
wars." A strong handle of twisted
steel, some pointed the yielding blade
to the subtle "jambia," narrowing to
a vicious-looking hook; and the tur-
ban armor leaves his anvil to show
as the needle-like "karoll," minute
enough to be concealed in the palm of
the hand, and used by distraught
lovers to inflict the wounds provoked
by jealousy or disappointment.

Spiky "murus" of sharpened black
backbone, and piercing blades known as
"bichwas," or "scorpions," fill a
brazen tray; and a bundle of elephant
teeth, laid with ebony and silver,
forms against a stand of shining spears.
Daggers, curved and straight, rough
and smooth, jagged and pointed, show
unless possibilities of inflicting every
degree of punishment, from a death
slow to a scratch, from the severing of
an artery to a puncture deep and dan-
gerous, but small enough to defy detection.
The main parlors of the passing mul-
titudes are thickly set with inlaid dag-
gers and glittering blades.

The merchant who smokes his nar-
ghel among green and purple bales
of costly embroidery carries a sharp
dagger behind his ear, and pricks off a
list of goods with this warlike instru-
ment. A haughty-looking noble, on a
richly-upholstered elephant, examines
the temper of a huge sword which he
draws from a jeweled scabbard as he
rides on his way; and a money lender,
shining the heavy native rapier into a
river bowl, looks up as a certain
pamphlet darkens his doorway, and
sees the caller a parchment scroll on
the shaft of a long knife without rising
from his seat.—All the Year Round.

FIRESIDE FRAGMENTS.

—Potato Balls.—Flouring the hands,
work cold mashed potato into small
round cakes and fry brown in lard,
with a sprinkling of salt, or meat drip-
pings, which is better. Parsnips are
nice cooked in this way.—Housekeeper.

—To Fry Oysters.—Have a brisk fire,
put on a deep skillet full of lard. Pre-
pare your oysters by draining and
wiping each one dry on a clean tea
towel, then season and roll in corn-
meal. When the lard is boiling drop
in the oysters and let them fry until
brown. Be sure the lard is boiling hot.
St. Louis Republican.

—Grape Pie.—Crush the grapes, re-
moving their skins, and simmer the
seeds and pulp together in a porcelain
kettle, pressing through a colander to
remove the seeds. Then put skins and
pulp together, sweeten to taste, stir in
a teaspoonful of flour if very juicy, and
pour into a pie plate lined with paste.
The pie is baked with an upper cover.
—N.Y. Observer.

—Sunday Pudding.—Two eggs,
their weight in butter, flour and sugar.
Beat the butter and sugar to a cream,
add the eggs, and lastly the flour,
which has had half a teaspoonful of
baking powder mixed in it. Butter a
shallow pie dish, spread with a layer
of flour, mix the mixture over, and bake for
an hour.—Ladies' Mercury.

—Cocoanut Tarts.—Dissolve half a
pound of sugar in a half a pint of water;
add a pound of grated cocoanut and
stir over the fire for five minutes. Let
cool. Add the beaten yolk and the
white of one egg. Line little tart pans
with puff paste; fill with the mixture
and bake. A lemon or almond mixture
may be used to fill the tarts in place of
cocoanut if desired.—Western Rural.

—Custard Souffle.—Rub two scant
tablespoonsful of butter to a cream,
add two scant tablespoonsful of flour.
Pour over this gradually one cup hot
milk and cook eight minutes. Beat the
double boiler, stirring often. Beat the
yolks of four eggs, add two tablespo-
onsful of sugar, stir into the milk and set
away to cool. Half an hour or so be-
fore serving beat the whites of four
eggs stiff and add to mixture lightly.
Bake in a buttered pudding dish in a
moderate oven thirty-six minutes.
Serve at once.—N.Y. Ledger.

—Apple Pandowdy.—This is another
old-time dish, none the less delectable
on account of its antiquity. Line the
bottom and sides of a deep baking dish
with thin slices of buttered bread, let-
ting them take the place of the usual
pastry lining. Put in as thick a layer
of thinly sliced apples as the dish will
accommodate, sprinkle with nutmeg
or cinnamon, and turn over a cupful of
brown sugar dissolved in half the
volume of hot water. Over the top put
another layer of the bread, cover the
dish with a plate, and bake slowly for
an hour and a half. It is served hot,
inverted on a platter, with liquid sauce
or cream.—Good Housekeeping.

A GREAT DIVIDING LINE.

The Desert Strip Which Separates Europe
and Asia.

Between Mesopotamia, where the
swarming human race reared its tower
of Babel, and the western plains of
Hindustan, with their teeming popula-
tion—in some parts two thousand or
more souls to the square mile—a trans-
verse zone, containing less than two
inhabitants to the same surface, runs
from north to south between the Gulf
of Oman and the icy Arctic sea. This
almost uninhabited zone begins just
west of the plains of the Lower Indus
and its frontier mountains, in the de-
sert tracks of southern Heliochistan,
scattered with rare oases. Between
India and Afghanistan it stretches
north and northeast along the rugged
escarpments of the Salween, Irrawaddy
and other ranges, whose hidden basins and
narrow gorges give shelter to mountain
tribes living far from the hamlets of
civil man, except when the martial
fury seizes them and brings them to
blows with their neighbors of the lower
land or the plains.

To the northwest of Hindustan the
fold of the soil becomes deeper and
more numerous, sharply dividing the
world with their countless walls. The
high summits of the Hindu-Koosh, in-
ferior only to those of the Himalaya of
Nepal, tower above these ridges and
spread their glaciers to enormous dis-
tances. Beyond these rugged and
towering masses of almost impassable high-
lands which have been called the "Roof
of the World," continue the line of de-
marcation very effectively between
Hindu-Koosh and Thian-Shan, and the
ill-watered adjacent plains broaden at
many points the median zone of separa-
tion between east and west.

Finally farther north, in the great
depression, the salt borders of
Balkhash and the barren reaches
of Semipalatinsk and the "Hungry
Steppe" stretch between the Hindu
and the Yenisei along a band of thinly-
habited country which loses itself in
the frozen tundras. The researchers of
Gmelin and other naturalists have es-
tablished the fact that the true separa-
tion between Europe and Asia lies
here, in these low and arid regions,
and not along the green heights of the
Ural mountains. —Elliott's Herald.

The Poverty of the Romantics.

Some time before the death of his
father, Gen. Marboul had married, and
the pecuniary supplies to his boy friend
soon after that event to have stopped.
Mme de Marboul was left with four
infant children: the youngest, Jerome,
but three months old. Their great-
uncle, Lucien the ardeur, was a
kind, and Joseph, abandoning all his
ambitions, returned to his family, if
poverty was therefore no longer rela-
tive or imaginary, but real and hard.
Drawing more closely than ever within
himself, he became a still more ardent
reader and student, devoting himself
with an industry akin to passion to the
works of Rousseau, the poison of whose
political doctrines instilled itself with
they and grateful stings into the thin,
cold blood of the unhappy cadet.—Prof.
Sionne, in Century.

THEIR MELANCHOLY DAYS ARE COME.

When Women Vain.
O, mother, please mother, come home with me
now.
The afternoon's slapping by fast
You said you were coming right home from
the mills.
As soon as your ballot was cast,
Poor father came in for his dinner at noon
And not a mouthful could he find.
And the words that he said, as he slammed the
front door,
Left a strong smell of sulphur behind.
—Kansas City Journal.

TAKEN AT HIS WORD.

"The love of two persons, Victoria
dear, grows stronger the farther the
two persons are separated."
"Do you believe that, hubby dear?"
"Certainly."
"Then you must send me to a winter
resort at once."—Elliott's Herald.

The Soldierly Way.
The lady was seeking to be disagree-
able to the young army officer.
"I suppose," she remarked with a
faint sneer, "that sometime in your
career you have beaten a retreat?"
"Ah, indeed? Will you tell me how
you did it?"
"Certainly, madam. I did it by mak-
ing an advance. That beats a retreat
all to pieces."—Detroit Free Press.

Mixed Proverbs.
"How are you coming on with your
music? Can you play Beethoven's
symphonies?" asked Judge Peterby of
a young Harlem lady who is learning
to play on the piano.
"I've not got quite that far yet. You
can't learn everything at once. You
know Columbus' egg was not laid in a
single day," was the reply.—Texas
Siftings.

A Horrible Example.
Bilal—I understand you have been
making love to my wife.
Tapleigh—Er—er—
Bilal—I want to give you a warn-
ing!
Tapleigh—Er—er—
Bilal—Look at me, and see what
you'll come to if you persist. Good
day.—Town Topics.

LETTING HIM OFF EASY.

Lawyer—Well, sir, the suit has final-
ly been decided in your favor and the
property is now ours.
Client—Mine, eh?
Lawyer—No, sir; ours. The fees of
myself and associate are some two
hundred dollars in excess of the value
of the property, but you can have that,
sir; we will allow you that.—Judge.

Reached the Orang-Outang.
Dude (trying to tease a savant)—How
far have you progressed in your great
work on apes?
Professor—I am just busy with an
orang-outang.—Truth.

Feminine Amenity.
"I can't understand why Mr. Brown
never comes to see me now."
"Did you ever play to him?"
"Yes, and sang too."
"Ah, that accounts for it!"—Judy.

It Was Late.
"I suppose," said a would-be con-
tributor to the editor, "that you are
bothered a good deal by being offered
jokes that have been printed already?"
"Yes, that is true."
"Well," said the caller, as he pro-
duced a manuscript from his inside
pocket, "there is one that I will guaran-
tee is original. It has never been in
print."
The editor read it and replied:
"I'll tell you something else about
this joke."
"Well, sir?"
"Not only has it never been in print,
but it never will be."—Town Topics.

Heon Thera Before.
Jimson (hotly)—I want to sue Dr.
Dosen for five hundred dollars dam-
ages.
Lawyer (briskly)—Yes, sir—yes, sir;
what for?
"I bought a bottle of his toothache
drops, paid one dollar for 'em, and they
don't do a bit of good."
"Them?" But five hundred dollars
rather high damages to claim."
"Yes, but I suppose your bill will be
about four hundred and ninety-nine
dollars, and I want to get my dollar
back."—N.Y. Weeklie.

Supreme Advancement of the Sex.
Young Man—Look out! There's a
mouse!
The Advanced Young Woman (calm-
ly)—Oh, how cunning! Can't you coax
the little dear out this way?—Chicago
Record.

For They Surely Will.
Young hands with dim salaries
They now begin to figure
Upon the probabilities
That sleeves will soon be bigger.
—Chicago Tribune.

AN APPEAL.

"Mind Percy Shiner, listen to me.
Me an' my child is desolate since you
have took from us our purtector an'
support. If my words cannot move
you, let the wasted form of this poor
child melt your heart, if it be not made
of adamant or cask iron."—Life.

The Kind of Gun He Meant.
Woodbee Lyster—I thought you said
these lots were within gunshot of the
depot.
Real Estate Agent—So they are;
those new dynamite guns, you know,
can shoot a distance of twenty miles or
more.—N.Y. World.

Two Generous.
Mildred—Is your husband a very
generous man?
Margery—Indeed he is. You remem-
ber those nice earrings I gave him for a
birthday present? Well, he smoked
only one and gave all the others away
to his friends.—Truth.

Worthy of Confidence.
McNish—Do you think that McSimum
is a man whom it is safe to trust?
McNish—I certainly do. He bor-
rowed a lead pencil from me the other
day and returned it as soon as he was
through with it.—South Boston News.

In the Saneum.
Visitor—Are you acquainted with
Scribbler, who writes poetry?
Editor—I should say I knew him. I
had to buy a new waste basket last
week on his account.—Tummy
Times.

Strange.
Mrs. Jameson—Did you try that deaf
mute servant I sent you?
Mrs. Kestling—Yes—but she didn't an-
swer.—Truth.

A Question of Dollars and Sense.
Jack—I wonder why Pillsbury com-
mitted suicide?
Meg—Oh, it is so much cheaper than
divorce, you know.—Life.

Scholastic.
Student—Professor, which is a logical
way of reaching a conclusion?
Professor—Take a train of thought,
my boy.—N.Y. Herald.

Address: THE REPUBLICAN, Oakland, Md.

THURSDAY, DEC. 6, 1894.

One Item of Expense.
The addition of \$100,000,000 to the national debt within ten months is a fair sample of a Free-Trade "object lesson." It is a "condition" that confronts the people, not "a theory." This addition of debt during ten months of a Free-Trade Administration is at the rate of \$10,000,000 a month. It has cost the people \$333,333 during each and every one of the 300 days in these ten months to pay for the privilege of threatening Protection. It has cost over \$230 every minute; it has cost the country almost \$4 during every second of the ten months. This is only the cost to the people, as represented by the actual increase in the national debt in the sum of almost \$4 during every second of the ten months; over \$230 during every minute; \$13,900 every hour, and \$333,333 every day of that time. The cost of a course of lectures delivered by a Buffalo lawyer and a West Virginia college professor is certainly considerably more than it is worth and very much more than the present generation of people will ever pay again.

Free School Books.
The public school commissioners and the examiners of the State held a meeting in Baltimore last week, and among the important questions discussed was "Free School Books," a subject of great importance and one that has occupied the attention of the press and the people of the State on frequent occasions. Referring to this discussion the Baltimore Herald says:

"This discussion by the county school commissioners did not develop anything new. Some of them were indisposed to consider its merits, speaking merely of the financial side, and, doubtless, reflecting home sentiment without regard to ability or expediency. They spoke as politicians and not as schoolmen having the interests of public education at heart. They were willing to admit that free books might be good for Baltimore or any other place which could afford it, ignoring the inexorable logic that a system good in one place is good everywhere. It made no difference to these men that Pennsylvania and Delaware have found free books very advantageous; they knew that their counties could not afford it.

"The most noteworthy remarks were those delivered by Professor Prettyman, principal of the State Normal School, and a practical educator. He took up, one by one, the objections urged, and disposed of them in a convincing manner, saying pertinently that any argument used against free books is as much an argument against the whole free school system. This is the meat of the account. If it is right for the State to establish schools and tax the citizens for their support, it is incumbent on the State, in order to secure the full benefits of the system, to provide free books. Without them the schools do not accomplish their whole mission, but fall far short of their purpose.

"Professor Prettyman is qualified by long experience to speak authoritatively and it is hoped that the report prepared by a committee will give due weight to his utterances."

Coke Crows Out Coal.
The officials of the Pittsburgh division of the Baltimore & Ohio have decided to use crushed coke instead of coal as fuel on their passenger engines. By January 1st all the through engines will carry coke. One of its great advantages is that it is smokeless. The grates under the locomotive boilers will require slight alteration to adapt them to the new fuel, and the tenders will have to be built higher. If the change proves successful the crushed coke fuel may be used on all passenger trains.

EX GOVERNOR BOWIE DEAD.

He Was Governor of Maryland From 1867 to 1871.
BALTIMORE, Md., Dec. 4.—Ex-Governor Oden Bowie died at 2:30 this morning at his home, Bowie, Md. He had a stroke of paralysis last Monday night, which was the immediate cause of dissolution. He was 68 years of age and a prominent figure of Maryland. He was in the Mexican war and served several terms in the Maryland Legislature. He was governor of the State from 1867 to 1871, and since that time has continuously been president of the Baltimore and Potomac Railroad company and of the Baltimore City Passenger Railway company.

SKETCH OF HIS LIFE.
The ex-Governor was born in Prince George's county, Md., November 10, 1826. His father was Wm. D. Bowie and his mother Eliza Oden, both representatives of prominent old Maryland families and natives of Prince George's. Oden Bowie went to the preparatory school of St. John's College upon the death of his mother when he was nine years old. He remained there three years and then went to St. Mary's College, Baltimore, where he was graduated with honors in July, 1845.

The next year he enlisted as a private in the Baltimore and Washington Battalion under Lieut.-Col. Wm. H. Watson and went off to the Mexican war. At the battle of Monterey he was promoted to the rank of lieutenant for gallant conduct, receiving a compliment from General Taylor. President Polk subsequently appointed him senior captain of the Voligeur Regiment, of which Joseph E. Johnson was Lieutenant-Colonel. Captain Bowie's health failed and he returned home in consequence before the close of the war. His gallant conduct was recognized by the Legislature of Maryland by complimentary resolutions.

Mr. Bowie's first appearance in politics was as candidate upon the Democratic ticket for the House of Delegates the year he returned from Mexico. He was defeated by ten votes, but two years later was elected, being the only successful Democrat. In 1861 he was a candidate for the Senate, but was defeated by military interference. In 1864 he was nominated for Lieutenant-Governor of Maryland and defeated by the vote of soldiers. All during the war he used his utmost endeavors to keep the Democratic party organized. He was during that time chairman of the State central committee. It was largely the result of his negotiations that Governor Swann allowed the Democratic majority in the State to assert itself and take possession of the State government.

He was a delegate to the Chicago convention which nominated McClellan in 1864, and it was largely through his efforts that the following Democratic National convention was held in Baltimore.

In 1867 he was elected governor by over 40,000 majority. Among the leading questions settled during his administration were oyster difficulties with Virginia, the collection of arrears from the Baltimore and Ohio railroad, repayment by the United States of money loaned to the federal government for war purposes and the conversion of the Chesapeake and Ohio canal into a paying enterprise.

Mr. Bowie was a great lover of horses and was the first president of the Maryland Jockey club. The Saratoga meet in August 1890, was the last at which Governor Bowie entered his horses. Immediately after he sold his racing stable of ten horses on the advice of his physicians. Nine were bought by Sirs. Brothers, of New York, and one (Loadlike) by Mr. M. Gorman, of Canada.

Governor Bowie was married December 3, 1851, to Miss Alice Carter, a sister of Mr. Bernard Carter, of Baltimore. The marriage took place at "Goodwin," the home of Col. Chas. Carter, in Prince George's county. He has seven children. The eldest son, Wm. Duckett Bowie, is the present State Senator from Prince George's county. His other children are Oden Bowie, jr., a stock broker in New York; Carter Bowie, Washington Booth Bowie, Mrs. Owen Roberts, Mrs. Eugene Roberts, and Mrs. Thomas Whitridge.

Thanksgiving.
The *Fairfax Republican*, published at Davis, W. Va., last week contained articles from the different ministers of that town on their ideas of "What We Should be Thankful For." Rev. Geo. W. Keplar's article on the subject we reproduce for our readers.

"Praise to God, immortal praise,
For the love that crowns our days;
Bounteous Source of every joy,
Let thy praise our tongues employ."
"A nation great in all things material, rich in every blessing, has been commanded by the chief rulers to stop amidst the rush of business

and the pursuit of pleasure, and for one day lay every care aside, and turn the thoughts back over the year in retrospect. If we do so we shall see that a Benign Creator has kept our land by His almighty power, preserving it in peace, and blessing it with plenty. As we look backward we will see that in the common blessings of God all have shared, but all have not shared equally.

"Some have had a 'Benjamin's portion,' much more every way than their fellows. Their measure of blessing has been filled to overflowing. They have had constant health, that blessing without which all others may seem a doubtful good. With them business has prospered, riches have increased, and all creature comforts have been enjoyed. The death angel has not knocked at the door to summon loved ones away; not once in all the year has sorrow's cup been tasted. No thorns have been in their pathway, but flowers full blown and fragrant have strewn all the paths which they have trod. No clouds have obscured their sun, no storms have swept their seas. To these we have crowned their year with this goodness they owe a debt of gratitude, and wise will they be if they fully pay it.

"To others blessings have come in lesser measure—perhaps they have been meager indeed. It may be that the year has been one of constant storm to them, their craft has been driven by winds and tossed by waves. The billows of adversity may have rolled over them, sweeping away possessions and submerging loved ones beneath them, out of their sight never to return to them again. But still there has been enough for thankfulness. The day might have been darker, the night might have been without one star of hope, burdens could have been heavier, comforts fewer and mercies less. Through ever vicissitude, through every sorrow God has brought us to the frosty nights, and the sunny days of another autumn, the time of ripened fruits and golden grain.

"But while retrospecting the year that has gone, we can also anticipate experience in the year that is to come. If faith and gratitude has led us to thanksgiving for blessings past, they will help us to trust in God for all the future. Blind indeed must be the soul that will dare to enter the unknown future alone. See what another year has in store for mortal men. For millions it will end time, and begin eternity, it will rock cradles, ring graves, ring marriage bells, and sing funeral dirges. Faces will be wreathed with smiles, hearts will be crushed with grief. These, and much more than these, are absolute certainties. And yet possibilities and opportunities will come to us all, possibilities and opportunities of self improvement in mind and heart, of culture and development in all that is good and pure in life, possibilities of making others happy, and of helping them to carry their burdens.

"But the year has gone with all its joys and sorrows, with all its responsibilities. The future is before us with the bright star of hope to light its way. The present is here with duties to God and to our fellow men, and wise will we be if we are true to these.

"G. W. KEPLAR,
"Pastor M. E. church."

The Local Paper.
No man is too poor to take his village newspaper, says an exchange, and it is false economy to get along without it.

Hardly a week passes that something does not appear in its columns that will be a financial benefit to the subscriber, and by the end of the year he has made or saved from one to twenty times its subscription price.

The city papers do not take the place of your village paper, although some people seem to think they do. The city papers are all right in their way, but they don't give you what you are most interested in, your local and county news. You cannot learn from them when and where public meetings are to be held, who are dying or who are marrying, who are moving in and who are moving out, court proceedings, who wants to sell land—in fact, hundreds of items which might be of particular importance for you to know. Such matter city papers cannot furnish, but your village paper can and does.

Dead Letter List.
List of mail matter remaining unclaimed in the postoffice at Oakland, Garrett county, Maryland, for the week ending Dec. 8th, 1894, the parties addressed being unknown to the postmaster:
Thomas French, Miss Mary Gank, Oliver Moore, Miss Edith Eysell, Henry Sleser, Mrs. Emma M. Harrington, Mrs. Samuel R. Jordan.

One cent on each article is chargeable for advertising. Parties calling for this matter, will please say it is advertised, otherwise they may not receive it.
E. H. BARTLETT, Postmaster.

LOCH LYNN HEIGHTS.

Rapid and Substantial Developments Going On.

Loch Lynn Heights Hotel is no myth or venture. Most of the first story is up and work being pushed on the second story. The contract for lathing has been let to E. B. Fuller, who built the heavy stone basements of the hotel. The contract for plastering has been given to Messrs. Rulifson & Culkins, of Jamestown, New York. The floors of the elegant ball room, billiard room, rotundas, parlors, dining rooms in the first story will be laid with beautiful maple furnished by the Pickens Lumber Co., of Randolph county, W. Va. The laundry engine in rear of the hotel will force the water from the well into a large reservoir fifty feet high for the hotel and surrounding cottages. The hotel will be completed by the first day of next April, and has been hired for three years to the most popular hotel keeper in the country. It will be crowded the first year. Several rooms have already been engaged for next season.

The brick and tile works are being built and will be running in a short time.

Pittsburg parties are arranging to erect a roller process flour mill, electric light plant, cracker factory, steam bakery. The B. & O. R. R. is putting in a siding 1500 feet long running past the planing mill, the green house, mill and electric light plant, down through Alderson's meadow to the brick and tile works.

Mr. Z. C. Gibson has completed the large stone dam, laid in cement, across Trout run, which will throw the water one half mile up the stream and furnish abundant pure spring water ice not only for Loch Lynn Heights and Mountain Lake Park, but Oakland and Deer Park also, if necessary. Squire Crane has leased the ice privilege for five years and will furnish his customers as usual. The lumber for the ice house is on the ground and the building will soon be completed.

Messrs. Rulifson Bros. & Culkins, bright, pushing young men, who are architects, contractors and builders from Jamestown, New York, have located here and purchased twelve lots on which they will begin immediately erecting desirable and attractive cottages for rent or to sell. They have just completed fifteen buildings near Jamestown on Lake Chautauque and have also finished the cellar and stone basement for Capt. S. M. Taylor's nice cottage on Lothian St. C. M. Rathbun & Co. have the contract to build this cottage to be completed by May 15, 1895. Messrs. Rulifson & Culkins' first cottage will be erected near the hotel and the White residence overlooking the B. & O. R. R., Mt. Lake Park and the lake. They are prepared to do excellent work on short notice at reasonable figures.

Mr. D. J. Slabach has the frame work of his cottage on Seneca avenue completed.

Geo. P. White will move this week into his attractive new residence on Roanoke avenue and Thos. will occupy the old White residence until his own is completed which is being built on 2nd avenue. The carpenters are at work in full force on Link Callis' large blacksmith, wagon and carriage shops on 2nd avenue, which will be completed and occupied within the next two or three weeks, when our citizens and farmers can be accommodated with anything in his line on short notice and first class workmanship.

Mr. Abe Spiker is hauling lumber for his new house on the corner of Wyandotte St. and 2nd avenue. Messrs. Sweet & Shackelford have completed their beautiful green house and received last week their first car load of flowers, plants, etc. They are prepared to furnish nursery stock, flowers and plants.

E. W. Williams has a force of hands and teams cutting and hauling cord wood and material for his brick and tile works and will soon be ready to furnish anything in his line.

Ed. Callis has purchased four lots on 2nd avenue and will erect a residence on same.

Jerry Moore will erect his cottage next spring on his lots on 2nd avenue.

Messrs. C. M. Rathbun & Sons are fencing in their lots on Alderson street and 3rd avenue and will build in the spring.

Mrs. Chas. Sweet has purchased two lots on Roanoke avenue and will build a permanent residence at once.

Mr. E. B. Hook, of Friendsville, has also purchased two lots on Roanoke avenue and will build immediately a large boarding house.

The frame work of A. C. Combs' residence is up and will soon be completed.

The Lee residence on the corner of Paull and Second avenue is about completed.

Mr. Henry Beckman is hauling lumber, etc., and will begin at once the erection of his cottage

on Paull street just above the Lee residence.

Mr. L. H. Friend has completed his residence on Seneca avenue. Dr. H. W. McDonald has fenced up his village on Bernice Boulevard. Mrs. Pysell has about completed her residence on Hoyer avenue in Barley's addition.

Judge W. S. Haymond, Attorney F. T. Martin and C. L. Skidmore, proprietor of the noted Skinner Hotel, of Fairmont, W. Va., have just purchased twelve most desirable lots on 2nd Avenue and Dunbar Street, and will begin soon to erect three beautiful cottages.

A company of capitalists will erect a brick block of three business houses, three stories high on 2nd Avenue, as soon as the brick can be made at the Williams brick works. The second story will be occupied as offices and town hall and the third as lodge rooms.

J. W. Leathers has purchased a lot on 1st Avenue and will soon erect a nice business house.

Mr. S. P. Baker and Harvey Spiker, of McHenry, will each establish dairies in the spring on the Baker and White farms, and furnish fresh milk and butter to the citizens of Loch Lynn Heights and Mt. Lake Park.

D. E. Saunders has purchased two lots on 1st Avenue and will erect a business house.

Maj. Alderson has sold over forty lots within the last two weeks, making over three hundred sold up to this time to over one hundred persons, nearly every one of whom will erect nice and attractive cottages between now and the first of next July. Many of them will build this winter if the weather continues good. You can confidently expect to see somewhere near one hundred buildings and over one thousand people in Loch Lynn Heights by the 1st day of next August.

There are good openings here for all lines of trade, and desirable lots can yet be had on very reasonable terms, which will undoubtedly double or triple in value by next season.

We know of no more attractive or desirable place to invest or locate than at this place.

We need a church in Loch Lynn and will have one soon. Rev. D. R. Wagner, the pushing pastor of the United Brethren church near this place, has taken steps for the immediate erection of a chapel here, and Major Alderson has very kindly donated the ground for the same. He expects to dedicate the edifice next July.

MORE ANON.

A Quarter Century Test.
For evidence of a century ago's New Discovery has been tested, and the millions who have received benefit from its use testify to its wonderful curative powers in all diseases of the Throat, Chest and Lungs. A remedy that has stood the test so long and that has given so universal satisfaction is no exaggeration. Each bottle contains a quantity of the medicine, or the money will be refunded. It is admitted that the most reliable remedy for Croup, Croup, and all other ailments of the Throat, Chest and Lungs, is at all Drug Stores. Large size 50c and \$1.00.

ORDER OF PUBLICATION.

Henry A. Rasche, Leo J. Rasche, Estelle M. Rasche, John R. Rasche, Agnes J. Rasche, Veronika M. Rasche, who sue by their next friend, Kate Rasche, and Kate Rasche, vs. Edmund Rasche, Ellen Gibson and P. H. Gibson, her husband, Nannie Brunton and John Brunton, her husband, Patrick R. Rasche and Veronika M. Rasche, Dennis Ryan, Nellie Ryan, Katie Ryan and Agnes Ryan.

In the Circuit Court for Garrett County, Equity, No. 67.

The signed of this bill is to produce a decree for the sale of the real estate of which Henry A. Rasche died, seized and possessed for the purpose of partition.

The bill alleges—
1st, That Henry A. Rasche of Garrett County, died on the 10th day of September 1891, intestate, leaving Kate Rasche, his wife, who survives and interest in the real estate hereinafter described and following children and heirs at law, to-wit: Henry A. Rasche, Leo J. Rasche, Estelle M. Rasche, John R. Rasche, Agnes J. Rasche, Veronika M. Rasche, all of which are under twenty-one years of age, Edmund Rasche, his uncle, who is married with P. H. Gibson, Nannie Brunton and John Brunton, her husband, Patrick R. Rasche and Veronika M. Rasche, leaving three infant children, Nellie Ryan, Katie Ryan and Agnes Ryan, all of whom are non-residents.

2nd, That at the time of his death the said Henry A. Rasche owned and possessed of the following described real estate situate, lying and being in Garrett County, Maryland, to-wit: First, the property known as the Oakland Flouring Mills at the foot of Water street on the Little Youghiogheny River. Second, the dwelling house, which was occupied by the said Rasche at the time of his death on Water street. Third, the store room and dwelling house at the South-west corner of Oak and Second streets. Fourth, four improved town lots near the property of Joseph Helbig, Fifth, an unimproved lot of three and a half acres adjoining the cemetery. All of said lots being in the town of Oakland, Garrett county, Maryland. Sixth, military lot number nine hundred and eighty-six. Seventh, military lot number ten hundred and forty-six.

3rd, That the said Ellen Gibson and P. H. Gibson, her husband, Nannie Brunton and John Brunton, her husband and Patrick R. Rasche, Dennis Ryan, Nellie Ryan, Katie Ryan and Agnes Ryan are non-residents of the State of Maryland.

4th, That the above mentioned real estate is not susceptible of partition without loss and injury.

5th, That it will be to the interest and advantage of the infant heirs to have said real estate sold.

6th, The prayer of the bill is for a sale and distribution and for general relief.

7th, The bill also contains the usual prayer for process and for an order of publication against the non-resident defendants.

It is thereupon ordered by the Court this 17th day of November, 1894, that the complainants cause a copy of this order, together with the object and substance of the bill to be inserted in some newspaper published in Garrett county, once a week for four successive weeks before the 21st day of December, 1894, giving notice to the non-resident defendants in said bill, and warning them to appear in this Court in person or by solicitor on or before the 6th day of January, 1895, to show cause, if any they have, why a decree shall not pass as prayed.

TRUSTEE'S SALE

OF VALUABLE

REAL ESTATE

—AND—

Personal Property

NEAR GRELLIN, MD.

Under and by virtue of a power of sale contained in deed of trust from Adrian Gladfley to the undersigned, dated the 10th day of November, 1891, and duly recorded among the Land Records of Garrett county, the undersigned trustee will sell at public auction to the highest bidder on

FRIDAY,

THE 7TH DAY OF DECEMBER, 1894,

at 10 o'clock a. m. of said day, and if not completed on that day, said sale will be continued on the following day, on the premises where the said Adrian Gladfley died, to-wit: about two miles south of Oakland on the Youghiogheny River and about two miles from Hanton, the following personal property, to-wit:

Four head of Horses, seventeen head of Cattle, thirty-two Sheep, sixteen Stacks of Hay, one Rick Straw (outs and wheat), fifty bushels Potatoes, two hundred and thirty bushels of Oats, fifty bushels of Corn, two Hogs, forty barrels of Corn, one Mower, one Hay Rake, one Spring Wagon, one Webster Wagon, one three horse Wagon, one two horse Wagon, one two horse Plow, Harrows and many other articles too numerous to mention, two thousand feet of Pine Lumber, one Fanning Mill and a lot of Household Goods.

And at the hour of two o'clock p. m. of said day the firm on which the said Adrian Gladfley now resides, it being all that part of a tract of land called

"BUCKS DALE,"

containing one hundred and ninety-four and one-half acres of land, and

"PINEY BOTTOM,"

containing the quantity of two hundred and seventy acres, excepting twenty-one acres of "Piney Bottom," and both of said tracts of land comprising one farm, and being also the same lot of ground that was conveyed to the said Adrian Gladfley by deed from Charles Gladfley and others, dated the 25th day of April, 1884, and duly recorded in Volume W. H. T. No. 10, folio 20, &c., one of the Land Records of Garrett county, shall be offered at public auction to the highest bidder. One-third of the purchase money in cash on the day of sale, and the balance in two equal installments, in one and two years from the day of sale, said payments to bear interest from day of sale and to be secured by the notes of the purchaser, with security satisfactory to the trustee. There are about two hundred acres of land cleared and under cultivation, which is improved by a

GOOD DWELLING HOUSE,

a stable, granary and other outbuildings and an orchard. Said farm is situated on the edge of the large lumber plant of the Potomac Lumber and Coal Company, where there is always a good market for farm produce. It is well adapted to be one of the most beautiful farms in Garrett county, and is well improved.

The personal property will be sold as follows: All purchases up to ten dollars cash on the day of sale, and the balance in two equal installments, in one and two years from the day of sale, said payments to bear interest from day of sale and to be secured by the notes of the purchaser, with security satisfactory to the trustee. For further particulars write to the undersigned Trustee, Adrian Gladfley, Grellin, Md.

G. S. HAMILL, Trustee.

36-41.

ORDER NISI.

Buchanan Schley et al., vs. Washington Bowie et al.

In the Circuit Court for Garrett County, No. 66 Equity.

ORDERED, This 17th day of November, 1894, by the Court, that the said Buchanan Schley et al., do cause to be published in some newspaper printed in Garrett County, once in each of three successive weeks before the 17th day of December next, the amount of sales to be \$234.00.

E. Z. TOWER, Clerk.

37-41

EXAMINER'S NOTICE.

NOTICE is hereby given, that the undersigned, appointed by the County Commissioners of Garrett County, to view the lands through which the proposed change in road, including it in a public road, three rods out of Walker's gate on Deer Park road and running thence south 30 feet, thence west 70 feet to intersect Third and Oakland at the point where said street merges into the said public county road, and to examine whether or not the said public road should be changed to the proposed change, and to view the lands through which the proposed change in road, including it in a public road, three rods out of Walker's gate on Deer Park road and running thence south 30 feet, thence west 70 feet to intersect Third and Oakland at the point where said street merges into the said public county road, and to examine whether or not the said public road should be changed to the proposed change, and to view the lands through which the proposed change in road, including it in a public road, three rods out of Walker's gate on Deer Park road and running thence south 30 feet, thence west 70 feet to intersect Third and Oakland at the point where said street merges into the said public county road, and to examine whether or not the said public road should be changed to the proposed change, and to view the lands through which the proposed change in road, including it in a public road, three rods out of Walker's gate on Deer Park road and running thence south 30 feet, thence west 70 feet to intersect Third and Oakland at the point where said street merges into the said public county road, and to examine whether or not the said public road should be changed to the proposed change, and to view the lands through which the proposed change in road, including it in a public road, three rods out of Walker's gate on Deer Park road and running thence south 30 feet, thence west 70 feet to intersect Third and Oakland at the point where said street merges into the said public county road, and to examine whether or not the said public road should be changed to the proposed change, and to view the lands through which the proposed change in road, including it in a public road, three rods out of Walker's gate on Deer Park road and running thence south 30 feet, thence west 70 feet to intersect Third and Oakland at the point where said street merges into the said public county road, and to examine whether or not the said public road should be changed to the proposed change, and to view the lands through which the proposed change in road, including it in a public road, three rods out of Walker's gate on Deer Park road and running thence south 30 feet, thence west 70 feet to intersect Third and Oakland at the point where said street merges into the said public county road, and to examine whether or not the said public road should be changed to the proposed change, and to view the lands through which the proposed change in road, including it in a public road, three rods out of Walker's gate on Deer Park road and running thence south 30 feet, thence west 70 feet to intersect Third and Oakland at the point where said street merges into the said public county road, and to examine whether or not the said public road should be changed to the proposed change, and to view the lands through which the proposed change in road, including it in a public road, three rods out of ARE YOU HAPPY!

Make yourself and friends happy by purchasing your Christmas Goods of us.

We have just received a full line of Xmas goods, of every description. A nice line of Toilet Cases, Work Boxes, Writing Desks, Photo. Albums, Autograph Albums, Jewel Cases, Shaving Sets, Whisk Holders, Photo. Cases, Necktie Cases and many other beautiful things suitable for presents. We have also a beautiful line of celluloid novelties such as Calendars, Necktie Cases, Jewel Cases, Whisk Holders, etc.

RIGHT NOW.

whether you wish to buy or not, it is worth your while to see our collection of Xmas Novelties. Assortment full and very attractive. Prices we believe to be the very lowest.

Silverware! Silverware!

We have the latest novelties in silver, such as Pin Trays, Bon Bon Boxes, Calendars, Glove Buttons, Paper Cutters, Book Marks, Satchel Tags, Belt Buckles, and many other novelties.

We also have a full line of sterling and plated hollowware, among which are Butter Dishes, Berry Dishes, Casters, Cream Pitchers, Pickle Dishes, Syrup Pitchers, Sugar Dishes, Cake Baskets, Napkin Rings, Knives and Forks, etc.

Don't forget that we are giving silverware away. We present you with your choice of any of the above pieces of silverware when you have purchased goods from our store to the amount of Thirty Dollars. We guarantee every piece for ten years.

FOUND

Is an exceedingly pleasant word, especially when you have lost anything of value, since it indicates that you have recovered it. There are no lost articles in our stock of

WATCHES, CLOCKS, JEWELRY AND SILVERWARE,

But all the same you will find many things which it will please you to possess. You will find the stock going at very reasonable prices, too. Don't lose a moment in profiting by our offers. Lost jewels may be found, but lost opportunities—never. Find what you want to-day.

ANOTHER ADVANTAGE.

Persons intending to buy goods for holiday presents, but who are for some reason or other not prepared to buy just now, can select from the full stock early, and by depositing 20 per cent of the purchase price have the goods laid away until called for.

Bring us your jewelry repairs. All work guaranteed to give satisfaction. Our work is done by one of the best workmen in Western Maryland, P. J. Smith, of Cumberland, Md.

It is surprising how far a dollar will go in buying goods at our store.

Musical Instruments.

We have the largest and most complete line of Stringed Instruments in town, Guitars, Banjos, Violins, Mandolins, Accordions, Phonographs, Autoharps, Zithers, Fifes, Drums, Harmonicas, in fact everything of the line of music.

Yes, we can suit you and tickle your purse to the opening point.

OH, HOW SWEET!

We have a Ton of Candy of every description and kind, from 7 cents per pound up to 75.

Of course we have a nice line of fruits and vegetables always on hand.

GROCERIES.

Well, they all come in under the Wilson bill.

20 pounds Granulated Sugar.....	\$1.00
Best tea, per lb.....	25 to 30

Mint and Wintergreen Lozenges, per lb.....	16

Best Water White Oil, per gallon, 9 Cents.

We Want Your Trade.

Our stock is large, our goods new, our prices low.

Don't buy until you see what we have.

Inspect us, criticise us, know us, and you will find we deal fair and save you money. Our prices are always right.

We will pay cash or exchange goods for Butter, Eggs, Lard, Poultry, Fruit, Vegetables and Country Produce of all kinds. Thanking you for your kind patronage thus far, and soliciting a continuance of the same, we remain, Very truly,

W. H. MALETTE,
Fancy Grocer and Jeweler.

OAKLAND, MD.

Communicated.

To the Editor of the Republican.

Well the avalanche has come and the people of Garrett county have avowed to run the school machinery—in the ground—for a while yet. The survivors of the crash are experiencing varied sensations, shaped by their aims and expectations. Many hopes for the betterment of our schools and the rapid growth of our county have been crushed and the disappointed ones, the friends of education, are wearing countenances about as grave as though they were listening to their own funeral orations. We sympathize with disappointed ambition and hope that some plan will be adopted by which the standard of our schools will be improved. No man's ignorance should justify him in signing his own death warrant, nor can his allegiance to his family justify his affiliation with aiding and abetting the element that aims at the overthrow of his dearest earthly interests—the education of his children.

Some of the heavy taxpayers who opposed the issue of bonds favoring a direct tax, but only a sufficient sum to defray the indebtedness acquired by the erection and equipment of the new school house in Oakland. This method would do for the present time only, and our school term would be very little if any, longer than it was last year.

The same problem of building would arise next year and year after year until the fifteen or twenty houses now needed shall have been erected and our school terms would follow along in the same old rut, getting narrower and shorter, until a man could not be found wearing the title of school teacher.

If a levy of \$25,000, the amount asked for, could be made for a building fund and all the needed houses be built at once, we could run our schools a reasonable term, and in a few years our increased taxable property would enable us to keep our schools open long enough to reap the benefit of the state appropriation. But just as long as we drive investors away for want of schools, just so long we fail to receive the benefits from increased valuation and our present taxable property will greatly depreciate in value. What we need to raise the standard of our schools, lengthen the terms, and give us better teachers, is ready money. The bond system would have given us the cash, and, we think, would have given entire satisfaction. It would have been so mild that scarcely a taxpayer would have felt the weight of slightly increased tax, and by keeping the schools open 7½ months the amount received from the state would have exceeded the interest on the bonds by about \$350 annually and the taxpayer would, virtually, not pay one cent of interest on the bonds. By a direct levy we would save \$1350 a year, but it would come pretty heavy at first. The increase in valuation would, in a few years, increase the amount of our annual tax sufficiently to make a lower rate on all taxable property. I concur with "X Y Z" that the teachers salaries should be raised to a fair basis with adjoining counties, thereby stimulating the teacher to greater efforts in preparing himself for his duties. The standard of our schools cannot be successfully raised without infusing greater energies, higher ambitions and nobler purposes in the minds of the teacher. Make the salary an object to the teacher and he will prepare himself to render better service and the patrons will receive the direct benefit.

If I were to suggest a plan to bring up our schools to an equality with other counties, since the defeat of the bonds, I would say submit it to the people once more at the earliest possible day and make it for bonds or for direct tax.

Krug, Md., Dec. 5, 1894. X.
Rogers' Sarsaparilla.
A specific for all. 100 doses for 75 cents. Rogers' Little Liver Pills, best on the market; Cough Cure, Liniment, Appetite and Worm Syrup, sold by A. G. Sturgis, Oakland; Cuppet Bros., McHenry; J. A. DeBerry, Corinth; C. F. White, Hutton; P. T. Garthright, Hayden & Eckles, Mt. Lake Park; Dr. Laughlin, Deer Park; Wm. Frederick, Friendsville; Yongh Store Co., Jonas Frazee, Robert Liston, Selbyport; W. Wass, Mineral Springs; J. E. Gunney, Accident; Smith & Callis, Hoyes, and by all general dealers.

Valuable Advice.
Avoid lawsuits and loss by consulting H. P. Tasker and examining his abstracts of the "conflicting titles" before paying for Military Lots. Charges reasonable. Office in Colardean Cottage, opposite the bank, Oakland, Md. 41-1f.

Bucklen's Arnica Salve.

TEMPERANCE NOTES.

STORY OF TWO YOUNG MEN.

Moral Preached by Their Studious, Temperate Habits and Those of an Intemperate Clerk.

Thirty years ago two Irish immigrants employed as porters in New York warehouses undertook to study law. After working from morning until night, packing goods, loading drays and making deliveries, they sat up until twelve o'clock in their rooms in a boarding-house reading law books and discussing principles and cases.

The ambitious young men were so deeply interested in their night work that they frequently argued points of law during leisure moments at the store, and naturally exposed themselves to chaffing and ridicule. With Irish wit they parried every thrust, and never lost their tempers.

Their companions nicknamed them the "Judge" and "Lawyer John," and asked them mockingly whether they thought that merchants would consult them as lawyers after employing them as porters.

"They may do it," answered the "Judge," "after we have worked up a fine criminal practice in keeping out of the penitentiary night-brawlers like yourselves, who ought to be in their beds and asleep."

JUDGMENT MAY BE AFFIRMED.

"Instead of leading your drays," said an intemperate clerk, "you stand there arguing whether an injunction could not be brought against the firm for obstructing the sidewalk. You are your own lawyers, and you have fools for clients."

"Judgment may be affirmed," said "Lawyer John," "but not with costs. We have borrowed our law-books, and we save money by keeping out of the saloons. It costs us less to fuddle our brains with law than with drink. A lunch over Blackstone leaves a better taste in the mouth than a night spent in carousing."

So the laugh in the end turned against the intemperate clerk. The young porters knew how to take and return a joke. By their good humor they amused everybody in the store, and it was not long before members of the firm helped them to get clerkships in law offices.

One of them today is on the bench, and the other is a lawyer with a lucrative practice. They made their way rapidly, and neither criticism nor ridicule kept them back.—Youth's Companion.

WIFE OUT THE SALOON.

Why Should This, the Greatest Evil of Home and Nation, Be Allowed to Exist?

The saloon is the vital point in the ruin traffic. It is the fortification behind which the traffic is securely concealed. Through its means, the drink habit is learned by thousands who would never have become its victims had there been no saloons, the centers of social life with so many thousands. The saloon is the great enemy of the home. Its garish lights, its shine in attractive, the evening hours around which gathers the family circle at home; its throng of gay revelers seems better company to the inexperienced boy than that of mother and sisters around the family hearstone. By allowing the saloon to exist, we say in effect, to these sons, experienced in the ways of the world, yet eager to join its pleasures and taste its unknown joys, "you may fall into temptation, and probably will; but that is your own lookout. You can not walk from home to your place of employment without passing these places, whose throes hold you should never cross. Let these saloon-keepers must be maintained, and if you are foolish enough to become their victim it is your own lookout."

But would it not be better, knowing the evil of the saloon, to banish it, destroy it, that the rising generation shall be delivered from an utterly needless temptation? Is there a thinking man, no matter even if he be not a total abstainer, who will hesitate to aid by his influence and his vote, the effort to eradicate this great evil? The saloon is a trap for the young, the snare of all mankind. It even lays its hands upon the salubrious, and destroys its sanctity by turning it into a holiday or drunken revel. It lays a heavier tax upon mankind than the most despotic government upon earth would dare to inflict upon its slaves. It reaches out to destroy the home, it enters the political arena, and controls the destiny of the country. It overshadows the land as did the faded up-tree, whose breath was death to all unfortunate to come under its influence.

The saloon should go; it must go. The blood of the myriads it has slain cries out from the ground for its overthrow. The tears and sorrow of heart-broken parents, the shame of widowed women, the degradation and pauperism of a countless host of children, cry unto Heaven in one mighty chorus of accusation against it. Why should our eyes be the longer blinded that we can not see the malignant curse upon the nation which it really is? Are we so utterly selfish, so indifferent to the welfare of the people, that we do not rise in our might as a nation of brethren, and exterminate this plague-spot of modern civilization, and shut for-

ever those gates of death through which each year an army of seventy-five thousand persons marches to perdition? When will the people rise in majesty, abolish the ruin traffic, close up the saloon, and pulverize the ruin power.—Tolledo Blade.

ITS HEREDITARY EFFECTS.

Drinking Fathers Leave Sinful Heritage and Make the Poorest Husbands.

Anthony Comstock in reply to the question from Demorest's Magazine as to "Who makes the best husbands?" writes:

I have studied the laws of heredity, practically, and with hundreds of living illustrations, right here in this office, for twenty-two years, and I have reached a firm conviction that no man is worthy to become a husband and father who is not always sober and clean. I find that nine out of every ten men who drink had drinking fathers or a drinking family before them. The father says: "Oh! I only drink a little, you know; it never affects me." But the father never knows what terrible effects of just drinking "a little" may be revealed in his offspring; what awful influence it may have upon the mind and habits of his child. You can not enervate the mind and body and have strength and intellect remain. If you are a father, as you sow strength and intellect in your children, if drunkenness and licentiousness go hand in hand, if we are producing at the same time an unclean race. There is room here, I repeat, only for the cruel, hard facts. Let thinking men and women consider them; and above all, let the wives bring all their loving influence to bear upon their husbands to restrain those very husbands from drinking. And the woman who can keep her husband from drinking will have the very best husband.

SOME STARTLING FIGURES.

Five Times the Total Gate Receipts of the World's Exposition Paid Every Year to Chicago Saloon-keepers.

At a largely attended meeting of the Catholic clergymen and laymen of one of the leading parishes of Chicago, Father M. P. Dowling, one of the most earnest of those demanding reform, made an address in which he gave some startling figures. He said that the total cost of the World's exposition was \$25,000,000, the gate receipts \$10,000,000 and the appropriation of the city of Chicago \$5,000,000. And yet, stupendous as these figures are, the money annually paid to the Chicago saloon-keepers is nearly twice the combined construction and general expenses of the World's fair, about five times the total gate receipts and nearly ten times the city's appropriation. During the six months of the fair the saloons of the city received not less than three times the gate receipts, \$75,000,000 going to them for every \$1,000,000 paid for the fair. He made a terrible arraignment of the saloon and appealed for help to save the perishing thousands whose degradation is due to drink.—Illinois Watchman.

Sermon Preached by a Companion.

The United Kingdom Temperance and General Provident Institution of London has since 1840 issued more than 15,000 policies. It had June, 1891, over 45,000 policies in force, covering insurance to the amount of over \$10,000,000. For twenty-eight years past it has had two sections—a "Temperance Section," in which abstainers only are insured, and a "General Section," in which those who use intoxicants "moderately" are included. The record of the twenty-eight years shows that the "Actual" claims in temperance section have been about 70 per cent. of the "Expected," while in the general section they have been about 98 per cent. of the "Expected."

Evil of Post Exchanges.

Referring to the regulations governing "post exchanges," Gen. O. O. Howard, in his report recently filed in Washington, says: "I believe the increase of cases of court-martial is largely due to these exchanges. I form this opinion from the cases that have come before me, and believe the drinking habit is increased by the encouragement given them. As I have said, regarded as extreme, the words of the department inspector are at least suggestive: 'From the amount of beer consumed in them (the exchanges) it is to be feared that no soldier has many phrenetic and gaudy soldiers in the course of their providing the restriction on length of service is taken off.'"

Typographical Union Goes on Record.

The International Typographical union in session recently at Louisville, Ky., instructed its delegates to the American Federation to favor the national and state destruction of the liquor traffic. The resolution was adopted almost unanimously, and a gift of a flask of whiskey for each member, male and female, which was sent to the convention by one of the city officials, was declined with thanks.

TEMPERANCE TIDINGS.

CLEVELAND, O., has one saloon to every 175 inhabitants.

A RECENT dreadful murder in Connecticut was committed by a man who was drunk on hard cider.

At the crimes on earth do not destroy so many of the human race nor alienate so much property as intemperance.—Lord Bacon.

ONE of the by-laws of a newly organized church among the Zulus is that "no member shall drink the white man's grog."

The annual liquor bill of the United States is over one-fifth of all our expenses and between a fifth and a sixth of all we produce.

The New York Tribune says: "The liquor traffic is today the heaviest drag upon the progress, and the deepest disgrace, of the nineteenth century. It is said that Benjamin Franklin while working as a printer among London beer drinkers, was known as the 'American aquatic' because he drank only water."

SCIENCE AND INDUSTRY.

—Mr. W. L. Dallas reports that the observations of twenty-five years, made in the Bay of Bengal by the Indian government meteorologists, have shown that the average temperature rises during years that sun spots are numerous, and sinks when they are few. When the number of sun spots exceeded the average, the barometric pressure was less than its average.

—Mr. M. S. Denton finds by experiment that increase of temperature around a warm-blooded animal lessens its output of carbon dioxide to a remarkable degree, and diminution of temperature increases it. The reverse is true of cold-blooded animals. Up to the twenty-first day a developing chick reacts like a cold-blooded animal, and after that like a warm-blooded.

—According to a French statistician, there were in 1891 51,000 breweries in the world. Germany heads the list with 26,310, and England comes next with 12,874 breweries. The United States is third with 3,300 breweries. Austria has 1,942 breweries. Belgium has 1,370 breweries and France 1,044. The annual allowance of beer per head of population in Bavaria is 221 liters; in England, 143; in the United States, 31; in Sweden, 11, and in Russia 5.

—At the recent meeting of the American Association for the Advancement of Science in Brooklyn, Mr. A. Spinning entertained the chemists and physicists of the section with the music of a violin made of aluminum instead of wood. In the paper he read, it was asserted that such instruments had the advantage of wooden ones in that they would neither warp nor crack, and that they lacked the uncertainty and lack of individuality characteristic of the latter.

A writer in The English Mechanic states that he wrecked the web of the geometrical or garden spider (Epeira) in sitting down, when she in a moment devoured the whole of the web. "I was taking great pains to leave not a strand behind," he says, "and she, the one-strand which formed her only path during the feast," and asks if this proceeding is a rule or exception in spider life. His query is answered by another correspondent who says that it is a common practice with spiders to eat their webs.

—Dr. J. H. Kellogg, of Medicine, has taken up the question of the healthfulness of bicycling, and at a recent meeting decided to investigate the subject thoroughly. Besides a number of sudden deaths from heart disease ascribed to the practice, cases of paralysis of the lower limbs, and of vertigo, were reported. Kellogg and his colleagues have taken up the question of the healthfulness of bicycling, and at a recent meeting decided to investigate the subject thoroughly. Besides a number of sudden deaths from heart disease ascribed to the practice, cases of paralysis of the lower limbs, and of vertigo, were reported. Kellogg and his colleagues have taken up the question of the healthfulness of bicycling, and at a recent meeting decided to investigate the subject thoroughly. Besides a number of sudden deaths from heart disease ascribed to the practice, cases of paralysis of the lower limbs, and of vertigo, were reported. Kellogg and his colleagues have taken up the question of the healthfulness of bicycling, and at a recent meeting decided to investigate the subject thoroughly. VOLUME 18.

OAKLAND, MD., THURSDAY, DECEMBER 13, 1894.

NUMBER 40.

NEWS OF A WEEK.

Happenings in and About Town told in Short Paragraphs.

Musical instruments of all kinds at Cheap John's.

Go to Cheap John's for holiday goods. Prices reasonable.

Thos. Nelson rode the Jr. O. U. A. M., went on Tuesday night.

Mr. N. Grottelty, of Accident, was in this city Saturday on business.

Malette is giving silverware away. Call and see him and get particulars.

Mr. W. C. Kidd, of Baltimore, spent Sunday in Oakland with friends.

China and silk goods, books and everything for Christmas at Offutt & Son's.

Mr. G. A. Bolden, of Terra Alta, was in the city Friday morning on business.

Malette has the newest and nicest line of Xmas goods ever brought to Oakland.

Mr. Clifton White of this city was the guest of friends in Terra Alta Sunday.

Candies, toys, etc., furnished for Christmas trees at reduced prices at Newman's.

Malette has everything good to eat at a reasonable price. Try Eulalie flour.

Mrs. E. M. Spedden was the guest of friends in Terra Alta since our last issue.

Newman has a fine line of Meerschaum pipes, Meerschaum cigar holders, etc.

The finest line of dried fruits, nuts and candies—prices defy competition. Offutt & Son's.

Messrs. Charles E. Hillery and Arthur Chisholm, of Germania, were in this city last Saturday.

Miss Mattie Porter who is teaching school at Elkins, W. Va., is here on a week's visit to relatives.

James Wolbert, son of Mr. and Mrs. Thomas Wolbert, is very ill with an attack of typhoid fever.

Japanese and Chinese fancy china in bewildering variety, just opened. Come and see it. Offutt & Son.

Mr. Ed. Baldwin, of Wheeling, was here Monday and Tuesday looking up business for his firm.

Mr. Daniel Bowman, of Accident, was in the city Tuesday and paid his respects to THE REPUBLICAN.

Miss Annie Jordan, of Kingwood, was the guest of Prof. and Mrs. S. C. Smith in Oakland on last Monday.

Mine Host Boyer, of the Central Hotel, is making some very great improvements in the interior of his hotel.

The plant of the Oakland Electric Light Company is advertised for sale by the assignee of the mortgage.

We are in it. We give you a 25 cent doll with every dollar's worth of toys you buy, at the Oakland Candy Co.

Mr. C. M. Beachy and force of men are at work putting on the slate roof of Mrs. Lowenstein's house on Oak Street.

Tobacco, cigars, cigarettes of all kinds, and don't forget the place. No. 1 Railroad Ave., Oakland Candy Co.

Mr. T. C. Hinebaugh has accepted the position of traveling salesman for the Mayers Drug Company, and will go on the road in a few days.

Mr. J. Ed. Kildow, editor of the Enterprise, published at Beverly, W. Va., spent Sunday in Oakland with his mother and other relatives.

Notice, Sunday schools, that we sell them goods at cost, and don't see them at the Oakland Candy Co.'s.

Mr. Thos. W. Ashby, of Elk Garden, who is at Crellin on a visit to his former home, was here Monday and called to see THE REPUBLICAN.

According to a correspondent, the Emperor of Germany bids fair to become the most extravagant of European monarchs. Naturally, mental vagaries require deep pockets to sustain them.

Buy your toys, candies, nuts, fruits, etc., from Cheap John.

The largest and most complete line of Xmas novelties at Malette's.

Cheap John has the best selection of toys in Oakland. Opposite the postoffice.

New style fall and winter cloaks just open at M. L. Scott's Baltimore Store.

China and silk goods, books and everything for Christmas at Offutt & Son's.

The Oakland Fire Company are receiving new members every business meeting.

Blank deeds for sale at this office. The deeds are specially ruled and printed very neatly.

Mr. W. A. Luke, of Piedmont, was in the city yesterday on business connected with his firm.

Just go and Cheap John's toys and fancy goods, books, sleds, musical instruments, etc., etc.

The non-jury term of the Circuit Court for this county will convene on Monday morning next.

Mr. Jas. D. Harvey of Kearney, was in the city Tuesday and made this office an agreeable call.

Japanese and Chinese fancy china in bewildering variety, just opened. Come and see it. Offutt & Son.

Mr. Merritt Wilson, of Wilson, W. Va., was in the city Tuesday on business before the Orphans' Court.

Why don't you go to Newman's for your pipes, cigars, tobacco, etc. He has pipes from 1 ct. to \$8 each.

The Orphans' Court will meet on Thursday, December 27, 1894, instead of Tuesday December 25, 1894.

Agents wanted at good salary. SWEET & SHACKLEFORD. 37-41 Mt. Lake Park.

Go and Cheap John's great stock of toys. Newly opposite the postoffice. Best selection in town.

Messrs. Daniel Conaway and A. Nelson, of Oakland, went to Lonaconing, Md., this morning on business.

Take your produce to Malette. He gives you cash or goods at rock-bottom prices. Don't forget the place.

Send your check books to this office to be numbered. We have a special machine for just this class of work.

Call on Chas. J. Newman if you want anything in the way of fancy goods or toys. He has them at rock bottom prices.

Mr. Samuel E. Miller, of the Cove was here Monday and Tuesday on business. Mr. Miller is engaged in the mercantile business at the Cove.

Mrs. Thomas J. Peddicord and her son, James C. Peddicord, Esq., made a visit to friends and relatives in Montgomery county last week.

Candy, nuts, oranges, peanuts, chocolate candies, the very best the market affords, lemons, citron, and don't forget the place—Oakland Candy Co.

Mr. Jesse Michaels, of Barton, an old soldier, was found dead in his bed Saturday morning by his wife. Heart trouble was the cause of his death.

Oh my! I was at the Oakland Candy Co.'s toy store. They are almost giving toys away. Call and see them before buying elsewhere. They will treat you right.

The Baltimore and Ohio railroad puts through each week five or six solid trains of perishable goods, such as beef, pork, lard, &c., in five hours less time than can be made by any other line.

The Rev. J. W. Butler, new pastor of St. Mark's Ev. Lutheran church, Oakland, Md., arrived with his family, to-day, and will preach in said church next Sunday, the 16th inst., at 10.30 a. m.

Mr. Chas. J. Newman is now agent for the sale of school books and supplies. This change from Examiner Hinebaugh's office to Mr. Newman's store was made necessary because of the limited space in the School Board's office in the new public school building.

Rev. John M. Davis, Col. A. G. Sturgiss, Mr. Geo. L. Bosley and Mr. E. H. Sincell went over to Wilson Monday to attend the funeral of Mr. Geo. W. Wilson.

The farm on which Abraham Lincoln was born about forty miles from Louisville, has been purchased by A. W. Dennett, of New York, for \$2,000. The farm will be made a park for the public.

The shops of the West Virginia Central and Pittsburgh railroad are all working nine hours, and have plenty of work to do, and there is no doubt but there will be work at full time all this winter.

We have on hand the finest line of pipes, cigarette and cigar holders, tobacco pouches and match safes ever brought to this city. You can get them at No. 2, Railroad Ave., new Oakland Candy Co.

Bird cages, cups and saucers, Christmas tree ornaments, vases, small dishes and cooking stoves for children, mugs and fireworks regardless of cost. These goods must be sold at the Oakland Candy Co.'s.

Dr. J. G. Robinson, Dentist, of Baltimore, has decided to locate permanently here in the town of Oakland, where he will be fully equipped to perform in all branches of his profession. Office with Dr. M. C. Hinchbaugh. 35-ly.

Mr. W. H. Cecil, of Clarksburg, W. Va., who had the contract of plastering the new Commercial Hotel has finished and gone home. The work is done in a workmanlike manner and gave entire satisfaction to the parties interested.

The attention of our readers is called to the card of Mr. A. C. Mason, practical surveyor, which appears in these columns to-day. Mr. Mason, before he went to Florida several years ago, had a large practice at his profession and gave entire satisfaction.

For rheumatism I have found nothing equal to Chamberlain's Pain Balm. It relieves the pain as soon as applied. J. W. Young, West Liberty, W. Va. The prompt relief it affords is alone worth many times the cost, 50 cents. Its continued use will effect a permanent cure. For sale by Oakland druggists.

Come to Santa Claus' headquarters for your dolls, drama, albums, dressing cases, writing desks, rocking chairs, harmonicas, whistles, pocket books, or any kind of a toy you want, as we bought our toys from the largest firm in the United States, and we can beat the world on prices. Oakland Candy Co.

Prof. Whitehill, the expert chemist at our University, has succeeded in liquefying and solidifying natural gas, and exhibiting the result of his experiment to the Post yesterday. The specimen looks like a lump of snow; is very cold, and froze the mercury thermometer 125 degrees below zero. Touched by the finger it is very cold but burns like a red hot iron. It evaporates rapidly and disintegrates in contact with the air, emitting a smoke like phosphorus.—Morgantown Post.

Owing to the large increase in sale of lots and the improvements going on at Loch Lynn Heights, Major J. C. Alderson, general manager, gives notice in these columns that no lot will be sold at Loch Lynn after January 1, 1895, for less than one hundred dollars. We would therefore advise parties who anticipate purchasing lots at Loch Lynn Heights to secure them at once as there is no question that every lot there will bring double or triple the price by the first of next July.

It is a pleasure to sell Chamberlain's Cough Remedy," says Stickney & Donder, druggists, Republic, Ohio. "Because a customer after once using it, is almost certain to call for it when again in need of such a medicine. We sell more of it than of any other cough medicine we handle, and it always gives satisfaction." For coughs, colds and croup, it is without an equal. For sale by Oakland druggists.

Christmas at North Glade.
A correspondent has sent us for publication a very lengthy program of the services Christmas over at North Glade. The program consists of prayer, singing, recitations by the children, addresses, etc. Our columns are crowded and we regret that we are unable to publish the program in detail.

Mr. I. P. Westmore, a prominent real estate agent of San Angelo, Texas, has used Chamberlain's Colic, Cholera and Diarrhoea Remedy in his family for several years as occasion required, and always with perfect success. He says: "I find it a perfect cure for our baby when troubled with colic or dysentery. I now feel that my outfit is not complete without a bottle of this Remedy at home or on a trip away from home. For sale by Oakland druggists."

Anyone who has children will rejoice with L. B. Mulford, of Plainfield, N. J. His little boy, five years of age, was sick with croup two days and nights. He tried various remedies recommended by friends and neighbors. He says: "I thought sure I would lose him. I had seen Chamberlain's Cough Remedy advertised and thought I would try it as a last hope, and am happy to say that after two doses he slept until morning. I gave it to him next day and a cure was effected. I keep this remedy in the house now and as soon as any of my children show signs of croup I give it to them and that is the last of it." 25 and 50 cent bottles for sale by Oakland druggists.

Died.
DEWITT.—At his residence, six miles south of Oakland, Dec. 11, 1894, of typhoid fever, George W. DeWitt, aged 40 years, 5 months and 5 days. The deceased was a member of the U. B. Church.

The Prince of Peace.
The Sunday school of Accident Evangelical Lutheran church will celebrate the birthday of our Savior by a festival on Christmas eve. A special service of song, scripture reading and recitations will be rendered by the school.

Will You Suffer
With rheumatic pains, sciatica, sleepless nights, dropsical accumulations, or nervous headaches when Messrs. Chamberlain & Boyer will cure you if the following directions are followed. Can be obtained at the Central Hotel or at their room in the Pritchard building, Oakland, Md.

Bucklen's Arnica Salve.
This Bucken's Salve is the world's best for Cuts, Bruises, Sores, Ulcers, Salt Rheum, Fever Sores, Tetter, Chapped Hands, Chilblains, Corns, and all Skin Eruptions, and positively cures Piles, or no pay required. It is guaranteed to give perfect satisfaction or money refunded. Price 25 cents per box. For sale by all druggists. 3-lyr

Valuable Advice.
Avoid lawsuits and loss by consulting H. P. Tasker and examining his abstracts of the "conflicting titles" before paying for Military Lots. Charges reasonable. Office in Colardean Cottage, opposite the bank, Oakland, Md. 41-4f.

A Quarter Century Test.
For a quarter of a century Dr. King's New Discovery has been tested, and the millions who have received benefit from its use testify to its wonderful curative powers in all diseases of the Throat, Chest and Lungs. A remedy that has stood the test so long and that has given so universal satisfaction is no extemporized. Each bottle is positively guaranteed to give relief, or the money will be refunded. It is admitted to be the most reliable for Coughs and Colds. Trial bottles free at all Drug Stores. Large size 50c and \$1.00.

Rogers' Sarsaparilla.
A specific for all. 100 doses for 75 cents. Rogers' Little Liver Pills, best on the market; Cough Cure, Liniment, Appetite and Worm Syrup, sold by A. G. Sturgiss, Oakland; Cuyper Bros., McHenry; J. A. DeBerry, Corinth; C. P. White, Hutton; P. T. Garthright, Haylen & Eekles, Mt. Lake Park; Dr. Laughlin, Deer Park, Wm. Frederick, Friendsville; Young Store Co., Jonas Frazee, Robert Liston, Selbysport; W. Waas, Mineral Springs; J. E. Gnagney, Accident; Smith & Callis, Hoyes, and by all general dealers.

Announcement.
Having removed my stock of goods from the Offutt building to the one built by A. D. Naylor, (second building east of the B. & O. depot) I am now prepared to show to the people of Oakland and vicinity one of the most complete lines of fancy goods, toys, etc., ever brought to Oakland, and I will be pleased to show goods and quote prices whether you wish to buy or not. Hoping to receive a part of the patronage of the general public, I remain,
Truly yours,
CHAS. J. NEWMAN.

IF YOUR BACK ACHES.
Or you are all worn out, really good for nothing, it is general debility. Try BROWN'S THON TONIC. It will cure you, cleanse your liver, and give you a good appetite.

Dead Letter List.
List of mail matter remaining unclaimed in the postoffice at Oakland, Garrett county, Maryland, for the week ending Dec. 15th, 1894, the parties addressed being unknown to the postmaster.

Robert Cass, Flemming McSparran, Rock Van Allen, Jesse B. Thomas, John Ryan, Jacob P. Gauer, Ira A. Chapman, John Rice, Mrs. H. S. Ogden, Mrs. Lea Plush.

One cent on each article is chargeable for advertising. Parties calling for this matter, will please say it is advertised, otherwise they may not receive it.

E. H. BARTLETT, Postmaster.

New B. & O. Heaters.
All local and through passenger cars on the Pittsburg division of the Baltimore and Ohio are being equipped with the Gold steam heating system. The system used heretofore on the Baltimore and Ohio while they have been made to answer the purpose, have several defects which the new system has not. Recent tests have been made by the company and for all practical purposes the Gold system has been agreed upon, and all coaches, not only on the Pittsburg division, but over the whole system as well, are to be equipped with these heaters at the works of the Gold company at Baltimore.

On an average three coaches are being sent to Baltimore daily, and at this date more than half of all the coaches on the division are fitted with the new heaters. Those which have been so equipped, however have not been put into service on the road, and will not be until the system is uniform. On the entire lines this means a change of heating system for 600 passenger and 250 baggage, express and postal cars. All the cars on the Pittsburg division will be provided with the new heaters by January 1st.

Fearer.
Wet weather and plenty of mud at present, and our roads are in a deplorable condition. It is almost impossible to walk over the road between the Virginia line and Buffalo Run, much less to wagon over it.

Mr. Amos Umble returned from Barton last week and reports the produce market active. Eggs worth 25 cents retail.

Chas. Thomas has resumed work at Krug on the stove mill.

L. L. Savage, formerly of this place, was here last week on business.

Our school has progressed nicely with an enrollment of forty-two pupils, with Noah Fearer as teacher.

Mr. Walker Ross, of Midland, Allegany county, is here visiting friends.

Grover Cleveland declared in one of his messages that "public office is a public trust," but he has undoubtedly changed his mind. At any rate when he went to the White House in 1885, he was a poor man; now his estimated worth is estimated at from four to six millions. Where did he get it? He and Wall Street men are intimate friends, so says Mr. Howard, formerly a Democrat, but now a Populist. Grover is like a good many of our business men—believes in making a public office a private snap, no doubt. Would like to hear from the wide correspondent of this place. Wake up and let us hear from you again. YX.

HOME OF THE FAIR.
(The following poem was written by Mr. Bruce McKinley, a student at the Buckhannon, W. Va., Seminary, and is published by request in these columns. The faculty of the institution is building a new dormitory, and this poem is supposed to be the young men's lamentations over being separated from the ladies.—ED. REPUBLICAN.)

In early dawn of the creation
Of all man held supreme possession;
The very lord of nature's life
Had all he wished except a wife.

But soon this issue was decided
That he with Eve should be provided,
(In sin man since has loved to revel
O'ercome by the repulsive devil.)

These two were on equality
In virtue or morality.
They being placed here side by side
One for the other's earthly guide.

They doubtless then had equal rights
But customs change with wondrous flight;
The modern views of policy
Make barriers to society.

Some advocate the separation
Of sexes during education
And seem to think the better plan
That man should mingle here with man.

Or all the earth the saddest spot
Is on this forty acre lot.
We here behold a score at toll
Uplifting tons of nature's soil.

The pick and mason's implements
Resound with tones of saddest accents,
They seem to say we're building slow
A mansion where the boys can't go.

The basement is of solid stone
As strong as adamant alone.

While added to this walls of brick
Perhaps some three or four feet thick.

Life has two phases rather double—
The one is joy the other trouble—
'Tis sad indeed to tell the story
The object of the Dormitory.

The boys are free to go here and there—
The others scarcely have free air.
The one shut in thus bleaches white
Because excluded from sunlight.

O, fair young girls, with happy faces,
Possessing all of woman's graces,
We cannot bear to see you go
We'll miss you; how our tears will flow!

O comfort come to soothe our sorrow,
Come for to-day then for to-morrow,
Create within us resignation
To stand this dreful separation!

Friendship and joy may sometimes sever
But schoolboy's enmity will live forever,
Our youth and hope may pass away,
These fairest gems will ne'er decay.

Associations! Oh how sweet
To be with those we love to greet!
Let's take these chances now or never
And battle on with best endeavor!

Will stars and planets cease to whirl
When they can't talk with his best girl?
Will father time come to an end
When friend can't interview with friend?

Will it not be a sad procession
When they march out to take possession?
How can we bear this dreadful view
To clasp their hands and say adieu?

Will loved hearts with emotion thrill
While gazing on the last sad drill?
From windows high will heads protrude
To watch the Seminary chimes?

In after years when far remote
On rugged waves our craft may float,
I've should chance to meet again
Will we likely know each other then?

Enraptured by sweet memory
We battle on with constancy.
The pleasure of education
Will furnish thought for meditation.

Commencement comes to close the year
And lovers come from far and near,
"Say, friend, will you please to be kind
"Help me my student girl to find."

Proceed straight to the campus ground
And there a building will be found,
You'll find her there shut in a pen
Excluded from the rest of men.

Some live in hope, some in despair;
We still hope in this affair.
Some one we know must keep their ties,
To do this we have great desires.

Permit this then we'll compromise
That when they go far overseas
Allow the boys to go along
And softly whisper their love song.

An Old War Relic.
Dr. John E. Miller, this city, has in his possession a curious war relic. It is a heavily bound book, the title of which is "Regulations for the Army of the Confederate States," by J. P. Benjamin, Secretary of War. The book has the inscription "Major Edward McCrady, 1st Regiment South Carolina Volunteers." The following inscription appears on the fly leaf, but is almost obliterated by time and blood stains: "Commissioned captain June 15, '61; commissioned major 14th December, '61; commissioned lieutenant-colonel, July 1, '63." The book was found near Clearfoss, on the line of Lee's retreat, shortly after the battle of Gettysburg.—Hagerstown News.

Christmas Is Coming.

We have just received a handsome line of

Christmas Novelties,

and extend everybody a cordial invitation to visit our palace of beautiful things. Our line of goods comprises a large variety of

Watch our window displays.

Very truly,

Oakland Pharmacy,

JOS. E. HARNED, Manager.

Oakland, Md.

The Republican.

BENJ. H. SINGELL, Publisher.
OAKLAND, GARRETT CO., MD.

IN THE NICK OF TIME.

A True Story of Adventures on the Great Plains.

There sits in my office while I write, a veteran prospector and miner, Daniel Evans by name, who, now in his seventh year, is still as alert and active as are most men of fifty.

"Uncle Dan," as everyone calls him, is an intelligent and fairly well educated man, quite unlike what you would expect of the pioneers of western travel to be. He forsook a wandering life more than a quarter century ago, married and settled down in Michigan to enjoy his well-earned competence. Having myself been for many years a California and Australian gold digger, Dan's reminiscence of those times greatly interested me, as I trust, to my last story may do my readers. I give it, nearly as possible, in his own words, promising that during the whole narrative he never, for himself or others, used the unsmooth dialect which some imaginative writers are fond of ascribing to all the early California gold seekers, whereas, as a matter of fact, only the uneducated and rougher class of these men ever spoke in such fashion. But to Dan's story, which, from his well proved veracity, is, I am sure, entirely true.

On the 13th of July, 1880, when I was a young fellow of twenty-six, our overland train, consisting of four prairie schooners and thirty men, beside our guide, old Bill Somers, reached the western part of Arizona without having lost a man.

Early that morning we crossed the Big Sandy, eight or ten miles above its junction with the Santa Maria, and a little south of Innapai mountain, a certain pass through the foothills of which we designed to take. This route, of Bill's own choosing, lay far to the south of that usually followed. Hence we found no trail—no wheelmarks nor foot prints—to guide us; but, as Somers felt confident of finding the desired short cut, we did not trouble ourselves about that.

On coming to the foothills, however, and inspecting several ravines in succession, he declared all to be impracticable. "No," said he to Tom Granger, our captain, "I know there's a pass hereabouts. I went through it alone in '89, and I'm bound to hit it off. Keep your train where it is, Tom, while I go ahead and climb one of those cottonwoods, to look around a bit. I'll be back in half an hour, tops."

So, leaving his horse and rifle behind, the guide set off on foot and quickly disappeared among the quaking ash bushes at the foot of a mountain spur.

We all watched the tall cottonwood trees growing higher up, expecting every moment to see him shining up one of them; but we never did.

The half hour and another passed away; yet not a sight nor sound of Bill could we see or hear.

"It's mighty queer," said last grumbled Tom Granger. "What on earth can keep the old man?"

"Oh, he'll be back directly," said some one. "Likely he's found a pass that looks about right and is tracing it out to make sure. He's safe enough or he'd have heard a shot or two from his revolver."

Now, since entering Arizona, we'd had two ugly skirmishes with Apaches, but as we hadn't seen one, nor an Indian of any kind, for the last week, we couldn't think of any possible harm happening to our friend. Any one of us might have lost himself in the foothills, but such an idea in connection with the guide was absurd. Still he didn't come. It was getting late in the forenoon, and there we were—loafing around and doing nothing.

With the exception of Abe Johnson, a forty-five-year-old Kentuckian, we were all young men, knowing only so much of Indian ways as we had learned on our present journey; but Abe had served both in the Seminole and Mexican wars, and was pretty well posted in regard to the "varmints," as he called them. When first organizing, we had elected him to the captaincy, an honor which he modestly declined, saying that the young giant, Tom Granger, was far more fit for it than he.

Well, when ten o'clock had come, without a sign of Somers, Abe began to suspect mischief.

"Stay right here, boys," he said. "I'll make a little scout." And off he went in the direction previously taken by the guide.

We saw him at intervals and again lost sight of him, exactly as we had done with Bill, but, unlike the latter, he came safely back in thirty minutes or so, looking much distressed.

"Boys," he quietly said, "you want to wheel right about and form a corral out on the open plain, forty rods clear of cover. Poor Bill's in the hands of the Indians, sure. The varmints have sneaked up and snatched him, or struck him down before he could pull trigger or give the alarm."

Where they hauled him "way down into a pass he'd found, and they're hiding in there now, waiting for us to come along."

"Do you think they've killed Somers?" asked Granger.

"No, cap, I don't believe he's hurt a mite, for I don't see a drop of blood anywhere," replied Abe. "The reds have likely choked him senseless and dragged him off to be tortured to death. And, boys, we've got to rescue him before sundown; for when those devils see that we're not going to fall into the trap, they'll begin their hellish work just at that time."

"We'll do that or die," savagely exclaimed one of our men. "How many of the brutes are there, Abe, and how far off?"

"Can't say; maybe twenty—maybe a hundred, but judging by the sign, no more than half a dozen tackle. But I don't know where the main crowd's holed, but it's sure to be near the narrowest and busiest part of the pass."

"Abe," said Tom Granger, "you'd better take command of the party till this thing's settled; and I'll be right with you, taking orders. Besides, you know what ought to be done, and I don't."

All of us seconded Tom's request, and the old soldier finally consented to the arrangement.

While this was going on we moved away from the foothills, and on reaching a little creek in the vicinity where there was not a tree, shrub or rock to shelter an enemy, we corralled the wagons, tethered the horses out to feed and got our own dinners.

Then Johnson said: "Now I want nineteen volunteers besides myself for this job." Every man of us jumped up on the instant, and Abe smilingly continued: "Well, since you all want to go, we'll draw lots, so as to give every one an equal chance. I'll put twenty-nine numbered tickets in my hat, and you'll draw the fellows that draw the first nineteen will go with me. The other ten must stay to guard the camp."

All right, "That's fair enough. Go ahead, Abe," we agreed. And the little pieces of pasteboard, cut from an old book cover, were placed in the hat, each man shutting his eyes, afterwards withdrawing one. Both Tom Granger and I were among the lucky nineteen, and the disappointed ten submitted gracefully.

In addition to his muzzle-loading rifle, each one of us carried a heavy Colt's revolver, a mighty costly weapon at that time—so twenty of us could fire, in all, one hundred and forty shots without reloading.

"Friends," thoughtfully observed our new captain, "of course the redskins have scouts out watching us. They're marked on our change of position and will reckon on us staying right here and sending a squad into the pass to hunt for our comrade. If we were fools enough to do that not a man would ever come back. Then they'd try to wipe out the rest of us and capture the stock about daylight."

"If they don't see us make a move all the warriors ambushed in this end of the pass will fall back on the main body before sundown, and not one of the band will ever think of being attacked from the further end of the gorge."

"No," said he to Tom Granger, "I've got a plan. The bank of this creek's high enough to hide us completely, and we'll sneak along its bed till we get to the timber this side of the Big Sandy. Then we'll work our way round the spurs to the west end of the pass and take the trail. I'll be a twelve or fifteen mile tramp, I reckon, but nothing else can save Bill Somers."

"Do you think we can get there in time, Abe?" I asked.

"Easy enough, Dan," he replied. "There's seven hours of daylight left. The way we're going, though impassable for wagons, will likely be not bad to rush through on foot, and we ought to reach the far end of the pass in four hours. That'll leave us three to creep up on the reds. They can't be any great distance from the west opening, but we'll have to crawl like snakes for the last half mile or so. There's sure to be good cover, though, and if we get there before sunset we'll save Bill, even if there's a hundred of the murdering villains. So, stick hunting knives in your belts, recap rifles and pistols, take plenty of grub and let's start. I'll post a flank of brandy in case it should be wanted."

Shaking hands with our stay-at-home comrades, who were hardly likely to see all of us again, we entered the bed of the creek, our movements being perfectly screened by the light-topped wagons until that purpose was served by the bank itself.

Sometimes wading in the water, sometimes skirting its edge, we safely gained the timber.

Then for three hours we struggled through an undergrowth so dense that our progress was not necessarily slow; but the sun was still high when we arrived at the end of a pass, which a fresh trail of pony tracks at once proved to be the right one.

Carefully examining the telltale hoofmarks, Abe said: "There's from fifty to sixty warriors in the lead, and a good many more of saving the boys. Our only hope of saving the guide is in a surprise so sudden and complete that they won't have a chance to kill him, which, if not too busy saving themselves, is the first thing they'd do on being alarmed."

On either side of the trail and well up on the slopes of the pass was a heavy growth of trees and bushes, now in full leaf. Spreading ourselves out, each one wormed his way as if all depended upon his individual action, though the whole twenty of us kept almost within touch of each other.

For hours, silently, shadows and intent watching, we crept on and on; but during all that time had probably not advanced over one mile.

Then, as if by word of command, the line stopped; for, right before us, the gulch opened out into a kind of amphitheater, nearly bare of undergrowth, and we heard the gentle stamping of incalculable ponies, and a group of dismounted warriors numbering over half a hundred, who seemed to be engaged in an excited discussion. We could see them quite plainly, though completely hidden ourselves in the dense scrubwood.

The sun was now within a few minutes of setting; but the light was still good. Presently the arguing Indians had apparently settled some disputed point, and then we saw a slight which drove us nearly mad with fierce intolerance for our leaders' signal. Four warriors disappeared for a moment behind a big rock, and on emerging bore between them the bonnet and half-naked form of our old guide. Meantime two others of the reds knelt themselves in preparing, from green rods, a number of small, pointed

stakes. The four braves in charge of Somers then carried him to a clear spot of ground and cut the thongs from his wrists and ankles preparatory to further proceedings.

No sooner, however, were the gallant fellow's limbs free than, uttering a taunting shout, he struck out right and left with his hands and feet, his captors heading to the earth, his evasive design being to provoke the crew into killing him at once. But a dozen of the miscreants threw themselves upon him in a body and bore him down again.

Then, while some of the other devils seized his arms and legs, others drove the sharpened stakes into the ground, and soon the poor fellow, never for a moment ceasing to revile his enemies as "white-livered squaws and cowards," was stretched out, face up, and securely bound by his extended hands and feet to the stakes. The monsters intended to build a fire upon his stomach and thus slowly burn him to death—and all this within fifty yards of where we crouched!

Every man of us, half crazy for action, held his rifle ready for instant use, but still there was no signal from Abe, and nothing but our perfect confidence in his judgment prevented an attack. Our cruel wait was nearly ended, however.

While the main body of savages, yelling and prancing in hellish delight, formed a great ring around their victim, two braves approached, one of whom bore an armful of dry twigs and the other a lighted brand.

The circle was just opening to let them pass, when, like the tramp of doom, there rang out from the bosom of our leader the signal word "Now!"

'Twas the last earthly sound heard by nearly a score of blood-thirsty Apaches, for a rifle bullet flies faster than its report, over so short a space, and those who fell dead on the firing of our simultaneous volley heard only the signal shot.

Never was surprise more complete or victory more instantaneous. The four conspicuously tall warriors, the two executioners and twelve other braves dropped dead in their tracks; while the survivors, utterly panic-stricken, stood for one moment in amazement, then turned to fly, as above their frightened cries arose the triumphant cheer of the saved prisoner.

"Revolver, boys! Give it to them!" yelled Capt. Abe, and, firing as we went, we all dashed forward in pursuit of the scurrying band. Three were felled at our first volley, and even those few who happened to have their bows in hand never stopped to draw them, all rushing for cover at their utmost speed.

As we charged along, Tom Granger—six feet three inches in height, strong as a bull buffalo and as swift as a fly, as above the rest of us behind, and raging like a maddened tiger, he overtook two of the savages ere they could gain shelter. One fell with bullet through his brain, but the other, suddenly turned and struck with a jagged knife at his head, fell swiftly swerving.

Tom avoided the deadly blow, caught the fellow up in his arms and contemptuously shouting: "I'll not waste lead on your carcass," dashed him down with terrific force on a piece of rock, killing him as suddenly as might a thunderbolt.

By this time not a live Indian was to be seen; more than one-half the captured force lay dead upon the ground, and many others had limped away, more or less wounded. So, giving up the useless pursuit, we turned to free Bill Somers.

"That was a mighty close call, boys," he cooly said as we lifted him up. "Which of you fellows laid out this raid?"

"The Johnson did; the Lord bless him! I never could have planned it," generously answered Granger.

"Well, Abe, I'm everlastingly beholden to ye. The oldest Indian-fighter in the whole west couldn't have done it better, and all the boys backed you up like lions. I'm real proud of our little raid."

"The smokin' varmints came upon us just as I'd found a good pass. Not thinking there was a red hereabouts, I'd been careless like, and the first thing I knew, I waked up right here, tied fast hand and foot."

"Exactly as I guessed," rejoined Abe. "I'll take a pull of this," he said, holding over his flask.

On looking around, we found fifty-three ponies knee-lattered in a grassy hollow a few rods away, while all the lances, war-club and most of the bows and arrows belonging to the routed savages had necessarily been left behind.

About twenty-five of the varmints have got away," said Somers, as he was hungrily devouring some hard-tack and bacon, "but as they've nothing but knives left, we needn't bother about them. All creation couldn't coax them out of their pitch into this party."

Make a bonfire of all the weapons, boys, then we'll mount a pony apiece, lead the spare ones and push right through the pass to camp. "It isn't more than two miles away, and we'll make it before it gets real dark. Of course, the reds will be watching us, and that's the best of the joke, for they can't meddle with us, and the sight'll be worse than poison to them."

"Tomorrow we'll come through here with our whole train just as safely as along a St. Louis street, and in ten days we'll strike the Big Colorado all right."

The ten men left at the corral had heard the firing and were extremely anxious about us. When, therefore, we arrived with the rescued guide, the string of ponies and without a scratch on any of ourselves there was a perfect jubilee of rejoicing.

On passing through the defile next day not a dead warrior was to be seen—all had been removed during the night—nor did we the remainder of our journey see a single hostile Indian. Best of all, while making our way to the then small town of Santa Fe, we sold the whole herd of captured ponies at a good figure.—At Santa Constitution.

EYES AND EYE DOCTORS.

How Science Has Helped to Improve Defective Vision.

In no branch of surgical science has more progress been made of late years than in that which concerns itself with the eye. Within the memory of men now living persons with defective vision were divided into myopes or short-sighted people and hypermetropes or long-sighted people, and for the former concave spectacles were devised which threw the focus of vision back, while for the latter convex spectacles brought the focus in front of the retina. It was assumed that the only difference in these two forms of visual disturbance were differences of degree, and when the half-blind person could see the effect determined through the spectacles which the optician tendered him he was supposed to have got all the relief which science could afford him. Science has now done for the eye what specialists are trying to do for the nerves. It has diagnosed a variety of ailments which were unknown to our fathers, and for these it is busily engaged in devising remedies. The human eye, when studied under the microscope and in accordance with the laws of optics, is found to be one of the most perfect organs in the body. There are few perfect works in the world. The refracting surfaces are constantly curved so as to blur the image, and to produce what the doctors call astigmatism. They are frequently opacities in the transparent media, which cast a shadow on the retina, and distort the vision. Sometimes the retina acts like a lens and disperses the various pencils which constitute white light. These and other defects can be detected by the modern ophthalmologist, and treated by the knife or by suitable glasses. With this instrument the structure of the eye can be determined at leisure and its defects from the normal detected. The ophthalmologist then goes to work and devises a pair of glasses with just the curves required to correct the defects of the eye; these glasses described in mathematical symbols, are the patient's prescription. In the case of a competent optician, there are in European and eastern cities ophthalmologists who do nothing but fill such prescriptions. They work over glasses as Aladdin worked over his magic lamp. The curves must be mathematically true, or the glasses will not fulfill their purpose. But when the ophthalmologist knows his business, and the work is done according to the prescription, the defects of the eye are cured.—San Francisco Call.

GEOLOGICAL SCIENCE.

The Value of This Branch of Study to Mankind.

Although the advancement of geological science and its present great share in human affairs is mainly due to the measure in which it is known to help men in their practical dealings with the earth, we must not forget the value of the science in a high point of view, the most important part of its work, that which has come from the better knowledge of man's place in nature which it has afforded. With the ancients we find a totally different conception as to man's relation to the universe from that which is now held, and this difference depends a great and an important part of the intellectual and moral conceptions which we form concerning man's origin, duty and destiny. Of our kind seemed to be a mere accident with no connection with the rest of the world, the meteoric relation from the planet to the earth, which falls from the sky. In this day, however, we qualify the conception, we perceive that man is in his body akin to all the life of the earth, and that he has come forth from the system of the sphere, even as have the plants which give him dwelling place. The contributions to the thought of the world due to geological science have one eminent peculiarity which gives them a unique value. In all other branches of natural inquiry the student is practically compelled to deal with phenomena on the plane of the moment. He cannot see in astronomy, for example, imperfectly distributed the facts in the succession of the ages. In a word, geology is a time science, as well as a space science. The students of it must follow through the eons of the past, the succession of eons, and substantially the manner in which the embryology of the earth, the brief series which he observes in the development of a germ.

In the time to come when we have learned how to avail ourselves of the teaching resources afforded by the physical sciences, this feature in geology will be valued in the true measure of its worth.—Prof. N. S. Shaler, Sc. D., in Chautauquian.

Brandy Cooling in Fashion.

Fashion exerts considerable influence on the fur market, as any one can understand who observes how sealskin jackets come and go in feminine favor. A most striking example occurred in the case of ermine fur. For many years this beautiful fur was quite out of favor; nobody wore it, nobody asked for it, and by the skins practically disappeared from the market.

Then, a year or two ago, a demand for ermine mysteriously sprang up and began to grow. The fur merchants, looking about for supplies, saw none coming forward, and, of course, the price differed. The Chinese, who in former years used to supply nearly all the ermine sent to London, were asked why they did not now send on skins. Their reply was that they had long ago given up catching them, because they were unsalable when sent to market. But they set to work anew, and at the spring sales this year 10,000 skins were received and sold at double as much as they would have brought a year ago, and probably considerable less than they will bring a year hence. If fashion keeps this skin in favor over the winter.—Chamber's Journal.

PUNGENT PARAGRAPHS.

—Vegetarian (who has been chased across the fence by cattle)—"Just wait, you stupid brutes. From this moment I am no longer a vegetarian."—Flinch-guards Blather.

—Traveler—"You can form no conception of the extent of our business. Only imagine, we did not discover till our last stock-taking that two cashiers were missing."—Tit-Bits.

—Thinker—"You complain of the expense of a typewriter; why don't you have your wife do it?" Henpeck—"I can't dictate to my wife."—Syracuse Post.

—Figg—"Yes, I allow that his singing is something terrible, but I guess we shall live through it." Forge—"That is the most terrible thing about it."—Boston Transcript.

—Manager—"Are you able to reach high C without any trouble?" Applicant for Place in Light Opera—"I've never tried that, but a tambourine held at six feet six I've never yet failed to kick."—Later Ocean.

—Tenant—"Why, I haven't been able to make a fire in this fireplace all winter. It doesn't draw." Landlord—"So? Then it must have saved about £5 for you in fuel. In such a case I'm afraid I'll have to raise your rent."—Comic Cuts.

"Have you a time table here?" asked the seedy stranger. "Our terms," replied the restaurant keeper, "are cash in advance." "Failed again," hissed the seedy stranger between his useless teeth.—Indianapolis Journal.

—Irritable Old Guy, who has been to a dance against his wishes—"So you have returned at last, daughter of Satan!" Rebellious Daughter—"Yes, father."—London Clipp.

—Not a Competent Witness—"Tommy—You don't know nothing at all about the case, ought to be hanged for it." Sammy (with much fierceness)—"St. Paul doesn't say a word about it. He's dead!"—Chicago Tribune.

—After a row with his wife, who violently expressed a wish that he were dead, an Irishman said: "O, it's a bedad, I'll take good care you're no widow as long as I live."—Tit-Bits.

—"Do you go to school, Willie?" queried the visitor. "No," said Willie, who has a tutor. "School comes in the way of my going to school, but there ain't any too wet for Mr. Diggins."—Harper's Young People.

—Mrs. Orsman—"What on earth do you suppose the sultan of Turkey has his horses fed dried currants for?" Mr. Orsman—"To give them some color, anything else you want to know?"—Indianapolis Journal.

—"Every kind of game is getting scarcer and scarcer in this country," remarked the man with the gun-case. "That's so," replied the personage who wears conspicuously striped trousers. "I reckon de fox on p'ine cards has a good deal for do with it."—Washington Star.

—Thoroughly Fitted for It.—Manager (of packing-house)—"Yes, we need a man to stick pigs, but that's a job that requires experience, and you don't look old enough. Have you any references or recommendations?" Young Man—"Yes, sir. Here's my high school diploma. I could cut up a live frog or a jack-rabbit quicker'n any other boy in school."—Chicago Tribune.

A KIND OF TELEPHONY.

He Was Nervous, But the Saleswoman Knew What He Wanted.

It was only one of several hundred customers in a large Washington street establishment, and there was nothing to a casual observer. The distinguished man from the mass of humanity that was pushing and crowding him along. But to an initiated eye he was different. And the black-eyed, black-haired little girl who had charge of several departments on the floor recognized the difference.

It was Saturday afternoon, and he had come on an excursion. The conductor had forgotten to take the check out of his hat, and he was afraid he'd lose it, so had pinned it to the band.

His face was the shade of red that showed plainly that harvest was over, while his sand-colored trousers looked like the faded green of a young man's twenty-three, rural, unsophisticated and abashed.

He had stood grazing in the window in a sheepish, half-frightened manner for ten minutes before he came in, after glancing nervously at the door and darted into the store between two real other-looking ladies. His eyes wandered nervously from one to another in the crowd, as though afraid of being recognized, and then he was slowly pushed along by the crowd to ward the little black-haired clerk, who had been watching him with some amusement. She was standing at the button counter at the time.

The crowd stopped in its irregular ebb and flow, and the young man was grounded directly in front of her. His face rosier than ever. Perspiration started out and oozed in great beads, and he unconsciously with a smile.

He stammered, took off his hat, raised one foot and slowly scratched the other leg with it and tried to speak. It was of no use. He just couldn't.

"I know," she said, kindly, as she came up, "don't worry about it. You want to look at baby carriages. This way, please."

His hat dropped to the floor, and he gasped as though choking on a spoonful of prunes.

"Why—it was only Wednesday—how I know?" he stammered.

"Never mind," she replied, kindly. "We get so we can tell. There is a nice one for five dollars."

It was just what he intended to buy, and he bought it as though in a dream. And then he walked out with the red check still fastened to his hat band with the tell-tale safety pin.—Indianapolis Sentinel.

A Disappointing Circumstance.

Traveler (inquiring at feudal castle)—"Can I see the antiquities to-day?" Servant—I am afraid not, sir. My lady and her daughter have gone to town.—Judge.

Weak as a Cat.

Is a bad simile, for the cat is a very mischievous animal for its size. But to be as weak as a cat is a worse simile, for a cat is as weak as a coney after a wasting and protracted disease is to be weak indeed. Nothing in the way of a simile promotes convalescence, restores a gain in strength, restores the stomach, restores the appetite, helps digestion and induces sleep. Nervous invalids derive from it unspeakable benefit. It cures malaria, rheumatism, constipation.

Ready to Go with Mother.—At Frank's house they had quince jam for supper, but Frankie had been ill, so his mother said to him: "Frank, you cannot have any jam; it will make you sick, and then you might die." Frank took this like a little man until he saw his mother leap herself to jump a second time. Then he pushed his plate slowly toward the forbidden dish and said, with deliberation: "Well, if you are going to die, I don't as well die, too. Gimme some of it."—Harper's Bazar.

A Child Enjoys.—The pleasant flavor, gentle action and soothing effect of Syrup of Figs, which is used by a laxative, and if the father or mother be constipated or bilious, the most gratifying results follow its use; so that it is the best family remedy known and every family should have a bottle.

Diplomatic Tutor.—"We now come to the Emperor Caligula. What do you know about him, Francis?" (Pause, occasioned by the silence of the august pupil.) "Your highness is right, perfectly right. The less said about this emperor the better."—La Revue de Poche.

Harvest Excursions.—Nov 30th, Dec. 4th and 18th the Missouri, Kansas and Texas Ry. will sell tickets at greatly reduced rates to all points in Texas, Idaho, New Mexico, and Lake Charles, La. For particulars address H. A. Chemin, Room 32 The Rookery, Chicago, Ill.

Jack Form.—"I say, old man, is there anything between you and that little Laugha-girl?" (Pause.) "Only a little matter of \$100,000 I haven't got."—Smith, Gray & Co's Monthly.

Double the Quantity, Same Price.—Such is the highly important change made by the proprietors of that standard remedy, Perry Davis' Pain-killer, for internal and external use. This will be very acceptable to the public, and will doubtless result in a largely increased demand for this justly popular preparation.

Before the Court.—Judge—"Are you guilty or not guilty?" Prisoner—"That's what I'm here to find out."—Detroit Free Press.

Is a Constitutional Cure.—Price 75c. APTHECARY (putting his head out of the window, as the night bell rings at 3 a. m.)—"Well, Ringer—No, not well; confound you! I'm sick!"

DAUGHTER—"Yes; but, mamma, I was only looking to see if you were looking to see if I was looking; that's all."—Town Topics.

CLYDE STANLEY

Little Clyde Suffered

With sore throat and pain on the top of his head. One bottle of Hood's Sarsaparilla perfectly cured him.

Hood's Sarsaparilla Cures

feetly cured and the disease has never reappeared. He is as healthy as any child. We praise Hood's Sarsaparilla. CHAS. H. STANLEY, General Agent.

Hood's Pills are safe, harmless, sure.

DR. KILMER'S SWAMP ROOT

THE GREAT KIDNEY, LIVER AND BLADDER CURE.

Biliousness

Headache, foul breath, sour stomach, heartburn, pain in chest, dyspepsia, constipation.

Poor Digestion

Distress after eating, pain and bloating in the stomach, shortness of breath, pain in the heart.

Loss of Appetite

A splendid feeling to-day and a depressed one to-morrow, nothing seems to taste good, tired, sleepless and all unstrung, weakness, debility. Swamp-Root builds up quickly a rundown constitution and makes the weak strong.

At Drugists 50 cents and \$1.00 size. (Traveler's Guide to Health) free—Consultation free. DR. KILMER & CO., BINGHAMTON, N. Y.

I suffered terribly from itching in my head during an attack of catarrh, and because very dry, used ELY'S Cream Balm and in three weeks could hear as well as ever.—A. E. Newman, Grating, Mich.

CATARRH

ELY'S CREAM BALM

Opens and cleanses the nasal passages, Allays Pain and Inflammation, Heals the Sore, Prevents the Membrane from becoming raw, restores the voice, and relieves the throat. The Balm is quickly absorbed and gives relief at once.

A particle applied into each nostril and is agreeable. Price 50 cents at Drugists, and 100 cents at Wholesale. ELY'S BROTHERS, 57 Warren Street, New York.

Want a Farm? Why Not go on the Home-Seekers' Excursion

On December 18th? Round-trip tickets will be sold at REDUCED RATES. Write to or call upon nearest SANTA FE agent, CHICAGO, for full particulars. See THIS PAGE every day for rates.

TEMPERANCE NOTES.

THE SONG OF WINE.

SMILE in the Lethan bowl,
And peer from its sparkling brim
At the death of a ruined soul,
At the wreck so ghastly and grim
God's image I ruthlessly bear
With wine so tempting and red
The sting of grim conscience I wear
Till hope, like a passion, has fled.

I heed not the madman's grin,
I turn all men to brutes.
My robes are red as the fire of hell,
That roars and upward shoots.
Drowning the soul's lost cry
With remorse that comes apace,
Till the world that never dies
Is the fear of a devil's face.

I fear no kingdom, I heed no law;
My vassal desire, with blood on fire,
Is the drinker's insatiate maw.
That chants on hope's red pyre
The song of the soul's despair.
That rings in the realms of dread,
Where the Krin's serpent hair
Feeds on the souls of the dead.

Like the angel of death, I am near,
And count each moment my gain,
Drop for drop, tear for tear,
And laugh as they struggle in vain.
For bread I give them a stone,
For love the scorpion's sting,
My harvest by devils sown
Is the song my bacchant's sing.

Hope is a stranger within my dear wall
Where all the dark shadows of woe,
Bear over the shroud of a funeral pall,
Like mourners that mercifully go
To the death of horror and shame,
And mourn for the helpless lost.
Pilgrims, whose nameless name
From God's record is fearfully crossed,
—Julius S. Hempstead, in the Voice.

FIGURES THAT TALK.

Proving That Alcohol Is the Greatest Destroyer in the World.

In spite of the persistent efforts of too many of our *fin de siècle* financiers it remains a fixed and stubborn fact that figures do not lie. When, therefore, all men come to know that the death-rate of those engaged in the liquor traffic is twenty-eight in one thousand—far greater than in any other calling—there can be no doubt that alcohol will take its place as the greatest destroyer that has appeared upon earth since that solitary occasion when the windows of heaven were opened and all men outside of the ark of safety were swept to their doom by the waters of the flood.

The next victim in order of fatality is that of mining—twenty in one thousand—an occupation so hazardous that "Another Mining Horror" is one of the most frequent paragraph headlines in the daily newspapers. Mother Earth, indeed, only too often proves herself a veritable stepmother, but all the death-rolls from her various mines, supplemented by a list of all the victims of earthquakes, are, when compared with a number of those done to death by alcohol since its first introduction, as Saul's slaughtered thousands to David's tens of thousands.

Should the deep give up her dead to-morrow, it would be found that great as is the peril of those who go down to the sea in ships, greater is that of those who have to do with strong drink in any form.

It is said that when a newly-enlisted soldier first faces gunpowder, he imagines every gun is pointed at him; but the veteran experiences much less concern, having learned that to kill one man in battle a man's weight in lead must be shot away. It is not so with the shots fired by the alcohol fiend; every one of these tells. The son never sees upon a man who indulges in strong drinks without leaving him in worse condition than did the setting sun of the day before. These shots may do their work slowly, but there are only a few drinking men, comparatively speaking, who, in being all the while undermined in physical, mental and moral strength by what they foolishly fancy to be the best substitute known to man for the faded waters of Lethe.

Fire is spoken of as being a bad master. Nevertheless, fire in a state of insurrection is a far less destructive agent than alcohol. Where one inmate of a burning building fails to make his escape, or some careless fire-builder uses recklessness to his loss of life, a score of wretched human beings die either of alcohol, pure and simple, or of one of the host of diseases to which alcoholism lends the way.

Figures do not lie. This should ever be borne in mind by those who must needs listen to the smooth-tongued advocates in the pay of Satan's vice-regent here above, or those bewildered and bewildering legions who, ignoring a major premise, contend that God made alcohol, therefore alcohol is not to be condemned by man. Of these latter we can only say: "Now, may the good God pardon such good men!" men who do not choose to reflect that all such reasoning is in danger of the *reductio ad absurdum*.

Figures are the strongest supporters of the common-sense view of the question: "To drink or not to drink?" We may, if we choose, turn our backs on theology or ethics, but figures confront us everywhere. The hell that awaits the drunkard may be sneered at as a fable of the dark ages, but death we see with our own eyes, and an abnormally large death rate belongs to the category of certified facts. It is true that only once in awhile does a man of today die as Alexander did, from the immediate effects of a poison mightier than Alexander; but whether a drunkard dies thus, or whether he cuts his throat in the frenzy of delirium tremens, or whether he dies by inches from the effects of an immoderate liver, the cause is the same—his case goes to swell the death-rate produced by alcohol.

Life is dear to us all, and should be especially dear to those unfortunate who, having accepted the doctrine of the Sadducee, would claim that the three-score and ten years of earthly existence are our all in all. Let such wretches, above all other men, beware of the stuff the traffic in which kills off annually twenty-eight in every thousand of those engaged in it. A short life and an empty one is sometimes claimed as a motto, but in sober earnest the man must be dependent indeed who would consent to be defrauded of the smallest fraction of his span of existence. Let it be conceded, then, after taking the testimony of statistics, that which transforms good days into evil, will also shorten them in number, and each man who either favors its production or assists in its consumption stands self-confessed as an accessory before the fact to manslaughter or as his own open-eyed, worst enemy.—Clara Marshall, in National Temperance Advocate.

AN HONEST FORTUNE TELLER.

She Reveals to a Patron the Name of a Very Intimate But Wholesome Friend.

Even in this intelligent age of the world there are too many people who believe in the humbuggery of "fortune-telling," but if all so-called "fortune-tellers" were as frank as the one mentioned in the following story, which is borrowed from the *Detroit Free Press*, and which may or may not be true, they would have fewer patrons than they now have.

A man was having his fortune told. "I see," said the "seventh daughter of the seventh daughter," contracting her eyebrows, "I see the name of John."

"Yes," said the sister, indicating that he had heard the name before.

"The name seems to have given you a great deal of trouble."

"It has."

"This John is an intimate friend."

"That's so," he said, wondering.

"And often leads you to do things you are sorry for."

"True; every word."

"His influence over you is bad."

"Right again."

"But you will soon have a serious quarrel, when you will become estranged."

"I'm glad of that. Now spell out his whole name."

The fortune-teller opened one eye and carefully studied the face of the visitor. Then she wrote some cabalistic message and handed it to him in exchange for her fee.

"Do not read it until you are at home," she said, solemnly. "It is your friend's whole name."

When he reached home he lit the gas and gravely examined the paper.

There he read, in picket-fence characters, the name of his "friend":

"Demi-John!"

WHO STANDS THE EXPENSE?

A Cartoon from the Toronto Grip Which Illustrates Just Where the Burden of Temperance Falls.

We hardly think the accompanying picture needs a word of comment. It carries its own lesson. In the year ending June 30, 1893, the people of this country consumed 1,207,731,908 gallons of liquor. There is no getting around the fact that the money paid for this stuff was wasted. It is also true that the drinking of this liquor made it necessary to provide vast sums of

THE CRUSHING WEIGHT LABOR CARRIES.

money for jails, insane asylums and poorhouses. What a fool a man would be to fasten a fifty-pound weight to his back and carry it around wherever he goes! Yet worse folly than that is the action of those temperance people who realize the evil of the saloon, and yet do not trouble themselves to put it down.—Rural New Yorker.

To Prevent Liquor Selling on Palace Cars.

A movement has begun against the Pullman and Wagner cars to prevent them from selling beer and spirits while in service. It is claimed that on some trains this service is the same as a second-class saloon, and is a source of much complaint to many travelers.

VARIOUS NOTES.

Hon. JOHN D. LOAN calls whiskey "the dynamite of modern civilization."

"The reason some men can't make both ends meet, is because they are too busy making one end drink."

The Catholic Bishop Keane says truly, "The bar tender is not a pander to vice, and the saloon the gate to every species of depravity and crime."

INDIANA'S liquor bill is \$40,000,000 a year. In silver dollars placed flat edge to edge it would cover the entire boundary line of the state, including its tortuous river lines.—A. Huntsinger.

The Melbourne Sportsman is responsible for the statement that "drunk and inept" was the charge brought against five hundred children under ten years of age in Christian London for one year.

The Canadian Temperance league recently presented a gold medal to the pupil in the public schools of Toronto who passed the best examination in the study of temperance and physiology.

As the production of beer New York leads and Pennsylvania, Illinois, Wisconsin, Missouri, New Jersey and Massachusetts follow in order. New York produces two-thirds as much as all the other states put together.

MISCELLANEOUS.

—Hell Gate was called by the Indians "Mounkath," "Place of Bad Water."

—An ostrich will never go straight to its nest, but always approaches it with many windings and detours in order, if possible, to conceal the locality from observation.

—The natives of the Titicaca Basin in Peru, who inhabit a district 12,000 feet above the sea, prepare their potatoes by soaking them in water, then freezing them, then steeping them in water and mashing them to remove the soluble matter.

—The alligator never leaves fresh water, while the crocodile frequently travels long distances by sea. It has been seen 1,000 miles from land, and it is possible that these sea-going crocodiles have given rise to sea serpent stories.

—A country cat can always be kept at home by cutting off her ears, or by a time by clipping out the hairs in the interior. The long hairs serve to keep out the drops of dew that fall from the leaves of plants and grasses, and when the hairs are removed the cat will stay at home rather than claw the water out of her ears.

—The Bayards used to own Bombay Hook Island, in Delaware Bay, a place locally famous, now as a summer resort. They Bayard obtained the title to the island in 1681, and later one of the Bayards, who accepted the Labors of Hercules, and became deeply immersed in religion, retired from his world to this island, and lived out his days in a solitude it no longer affords.

—The Trans-Siberian railway, which is to be the longest in the world, has now been opened as far as Omsk, and one may go there from St. Petersburg, 2,200 miles, in less than five days. The difficulties encountered have been prodigious, and in draining a bog of sixty miles, wide engineers and men had to live in huts built on piles and accessible only in boats. Four thousand masks were bought to keep off the venomous mosquitoes.

—Gossips on the eastern shore of Virginia still point out the spot where Rachel Donelson, the wife of Andrew Jackson, was born, a black-eyed girl of reputed Indian ancestry. Jackson married her two years before she was divorced from her first husband, Lewis Roper. A loutish fellow, who was presented to Jackson at Cumberland, Md., asked him a question about his marriage, and was almost transfixed by the gaze that Jackson turned upon him as the old soldier said: "You are a very brave man, sir; a very brave man."

—Down in eastern Long Island the people rarely fish with beef crabs, as is done in other parts of the country, but in their spare time, as a rule, and when they want an evening's profitable sport, they use for their "jack" for them, after the fashion of deer hunters. With a bright light over the bow of a rowboat they can see the crabs clearly and approach as near to them as may be, according to the degree of darkness, and when they are within reach they throw their "jack" for them, after the fashion of deer hunters. With a bright light over the bow of a rowboat they can see the crabs clearly and approach as near to them as may be, according to the degree of darkness, and when they are within reach they throw their "jack" for them, after the fashion of deer hunters.

—The sacred cattle of India take more readily to American ways than do the people of that land, according to the caretakers of the national quarantine for cattle at Gardfield, N. J., where there is a small herd of the animals, imported for Oliver H. P. Belmont. Said one of these men: "Mr. Belmont sent over for the cattle some of the native feed. It is a grain or berry which when ground and pressed makes a delicious feed for the cattle. The cattle ate it all right, but after a few days they became sickly. The superintendent gave them some Yankee feed, on which they immediately began to thrive, and now they won't touch the feed sent over with them."

—One of the first military incidents connected with the American flag occurred on August 2, 1777, when Lieut. Bird and Lieut. Brant, invested Fort Stanwix of Schuyler, commanded by Col. Peter Gansevoort. There was no flag in the garrison when the enemy appeared, but pride, patriotism and humanity soon overcame the matter. The design for the flag just adopted by congress was known, and a flag was quickly made. Sheets were cut up for the stars and the white stripes, the red was supplied from bits of scarlet cloth collected from the soldiers, while the blue was obtained from a Dutch stock belonging to Col. Abraham Swartout, of Dutchess county. The siege was raised August 22, but what became of the improvised flag is not known.

—The advance of a wave of cold weather has set the commercial traveling men to searching for their money wreathes, with which they overcome the desert of country landlords at excessive economy in the matter of steam. Hotel keepers in the smaller cities set the valves of the steam radiators at a point which they think will allow sufficient steam in the rooms to transient guests, and remove the wheels of the design for the valves. To circumvent the landlord and secure greater warmth many drummers carry small adjustable wreathes, with which they can turn the valves at will. Some of the drummers also carry an extra lava tip for the gas burner, one which will supply six feet of gas an hour, with which to replace temporarily the landlord's three-foot tip.

—The Santerre always liked the reply of an old dandy who was unfortunately sentenced to imprisonment by the police justice for some petty offense.

"Well, Sambo," said one who attempted to console him, "adversity tries us and develops our better qualities."

"Twasn't that way at all with me, sah," replied Sambo, indignantly. "It wasn't adversity what tried me, sah, but a ole food judge, and he de welped all off my bad qualities and none of my good ones."

This is much the same fate as they are sure to receive who get far enough into politics to become candidates for office.—Boston Budget.

SMART BEARS.

Their Actions Surprised Uncle Bill Hammond Till He Learned the Cause.

I've always said, an' stuck to it through thick an' thin, said Uncle Bill Hammond, of Eldred, that Sullivan county bears, an' specially them that lives in Eldred way, was the smartest bears on earth, an' now I'm glad I done it, for they're provin' to me this season in the most amazin' way that I ain't the victim o' misplaced confidence. I tell you, I'm proud o' Sullivan county bears this season. I'm kind o' sorry they done it, though, 'cause it seems to me now that it ain't much better'n harder to go out an' knock one o' them bears over.

I generally start out to'fable early in the season to skirminish round in the woods up in the Eldred district, so's to see what the prospect is for bear an' things, an' while I had always seen a heap o' evidence that our bears was uncommon smart, it hadn't never s'prised me much, knowin' that they was Sullivan county bears, livin' in the Eldred woods, an' so couldn't help it. But there ain't no doubt that when the my skirminish' tramps through the woods this season I was s'prised from the ground up. As I was goin' along a to'fable 's'prised bear jumped out of a hollow stump. Course there wasn't nothin' s'prisin' 'bout that, but 'tild o' givin' me a grin, as our bears usually do when they seen me in the woods, an' then trottin' off, this bear riz up on his hind feet, gave a few lively jig steps, flopped over on his fore feet, as slick as anything, an' stood there as stiddy as if he'd been planted there. Now that was s'prisin'.

"Great Natur!" says I. "If this was any bear but one o' ourn's, says I, 'I wouldn't a' loved it!"

The bear stood on his hands for a minute, an' then flopped back ag'in to his feet, an' 'fore I'd hardly ketcht my breath he turned a back summer-s' clean over the stump, an' cockin' his head to one side an' grinnin' at me, as much as to say:

"Well, how does that strike you?"

There are also sleeping figures of the Princess Adelaide and the dowager duchess, the latter clothed in the royal mantle and wearing the diadem crown. This was the work of the young Barre.

On July 13, 1859, the duchess of Wartemberg, second daughter of Louis Philippe, was interred here. The bishop of Chartres officiated at the funeral services, which took place in the presence of the entire court and at the presence of the duke, Dupre, sang the requiem music.

The duke of Orleans was laid to rest with his sister on August 4, 1847, a victim of the accident which he met with on July 13. A fine statue made by Loison, after a model by Ary Scheffer, represents the duke in full uniform, pressing his drawn sword to his heart.

Near by rests the duchess of Orleans, who died at Richmond in 1858. Her statue, by Chapu, represents her with her face turned toward her husband and her hands clasped in prayer.

OUR WASHINGTON LETTER

(From Our Regular Correspondent.)
WASHINGTON, Dec. 10, 1894.

The most striking thing of the first week of Congress has been the apparently concerted effort of the Democrats and Mugwumps to stir up jealousy and bad feeling between the friends of those Republicans who are prominently mentioned as Presidential possibilities, by distorting their replies to questions and in some cases by actually putting words in their mouths which they never thought of using. Representative Bottelle, of Maine, rightly calls this "an old trick of the democracy to invent a phrase or catch-word which they seek to make odious by iteration, and then to use it as a bugaboo with which to scare timid and feather-brained Republicans." The trick consists in asking some unsuspecting Republican whether the party will re-enact the McKinley tariff law, when it returns to power. If he answers in substance, that changed conditions may make some changes necessary, as most sensible men are apt to do, he will find his remarks distorted and published under a scare-head, "McKinleyism is dead," or something with a similar meaning. The object is so plain that Republicans in Congress smile at the attempt, but this mention is made to put Republicans in your vicinity on their guard against accepting as true any interview purporting to have been held with any Republican Senator or Representative, in which protection is lightly spoken of. There have been no such interviews. If there is a Republican in either the Senate or the House who is not a protectionist, he is not known to the leaders of the party.

Mr. Cleveland and Secretary Carlisle have apparently captured the Democratic members of the House Committee on banking and currency. Ten days ago Chairman Springer of that committee, publicly declared that it would be impossible for that committee to agree upon any current bill; to-day he says the committee will before the holidays report a currency bill to the House, and that it will be along the line proposed by Secretary Carlisle and endorsed by Mr. Cleveland. This week is to be devoted by the committee to hearings, the list including Secretary Carlisle, Controller Eekles and a number of bankers. Secretary Carlisle has at the request of the committee submitted a rough draft of the bill giving his ideas of what it ought to be in order to carry out his recommendations. Whether this bill can pass the House after it is reported will depend largely upon the attitude of Speaker Crisp who dominates the committee on rules,

which must report an order limiting debate thereon, if it is to have any chance for getting through. Mr. Catchings, of Mississippi, is the only member of the committee on rules who has publicly committed himself to the Carlisle-Cleveland plan.

The cautious of Democratic Senators included a "currency bill" in its directions to the steering committee to provide an order of business for the session, but that is a long way from an indication that the Democratic Senators are ready to accept whatever currency bill the House may pass and send over. Those who are disposed to believe that the Senate will pass a House currency bill without amendment should turn their memory back to the Wilson tariff bill for a few minutes. But even if the Democrats were willing to accept a House bill that would make no difference in the result. The decision not to change the rules of the Senate leaves the decision as to what bills shall pass the Senate in the hands of the Republican Senators, who are not likely to favor hurried legislation on such an important question as the currency of the country. The other bills named by the Democratic caucus were those for the admission of Arizona and New Mexico; Nicaragua Canal; Bankruptcy and the Indian Territory bill.

The administration is pulling all the wires at its disposal to force the free ship bill through Congress. It would throttle another American industry — shipbuilding. It is claimed by the friends of the bill, who consist mostly of misguided Democrats and the paid representatives of English shipbuilders, that it will certainly be passed by the House at this session, but this claim is at best a very doubtful one. If, however, the bill should get the support of the committee on rules, which it must have, to get passed by the House, there is not the slightest possibility that it can get through the Senate. Just why Mr. Cleveland and his administration should have lent themselves to the support of this bill is one of the numerous things which are difficult to understand, assuming them to be entitled to the honesty and patriotism they claim.

The attorneys of H. L. Preston, publisher of a Kansas City paper (C. L. Trevitt, of Washington, and H. L. Strohm, of Kansas City) have filed a bill in equity against John Wedderburn, manager of the Press Claim Co., of Washington, and W. R. Hearst, of the Examiner Claims Bureau, asking for the cancellation of a contract made with the said Press Claim Co., by Preston, because of misrepresentation, and that Preston be paid \$840 for advertising the concern. The

attorneys say there will be some revelations of interest to publishers having similar contracts with the Press Claim Co. when the suit is tried.

FARMS FOR SALE.

I offer for sale the following desirable farms, situated about three and one-half miles north-east of Oakland:
1. The farm of Mrs. G. W. Gault, containing 100 acres, all under fence—good barn, small frame house, young orchard, about 20 acres cleared. Price \$2,000. Cash payment of \$500; balance of 20 years with interest.
2. Farm of Mrs. Antoinette Jones, containing about 125 acres, nearly all under fence; about one-half cleared; good barn, frame house. Price \$2,500. Cash payment of \$500; balance of 20 years with interest.
3. Farm of Mrs. M. V. Gault, containing 60 acres, under fence; orchard of 150 trees; stable, frame house. Price \$1,200. Cash payment of \$200; balance of 20 years with interest. These farms are all under fence, and a fine opportunity is offered to secure a home on most favorable terms.
4. Also for sale "Seven Meadows" tract containing about 500 acres, lying about four miles south of Oakland. Will be sold as an entire tract or subdivided to suit purchasers. Terms: E. H. SINCELL, AUCTIONEER, Oakland, Md.

West Virginia's Brightest and Best Newspaper.
The splendid popular triumph for the cause of protection opens up a new chapter, and one of the most interesting in the history of the country. It has carried West Virginia into the column of protection and produced a revolution in the politics of the State. There will be new and important developments by reason of the great victory of 1894—developments that will have a decided influence on the presidential campaign of 1896—and the Weekly INTELLIGENCER will follow them closely in all their details. It West Virginia the Wheeling Intelligencer is the recognized leader of the cause of protection and State development.
All the foreign and home news of the year will be faithfully chronicled in the Intelligencer's telegraphic columns.

VOLUME 18.

OAKLAND, MD., THURSDAY, DECEMBER 20, 1894.

NUMBER 41.

NEWS OF A WEEK.

Happenings in and About Town told in Short Paragraphs.

Musical instruments of all kinds at Cheap John's.

Go to Cheap John's for holiday goods. Prices reasonable.

Now is the time to buy your Xmas toys at Newman's.

Mr. J. T. Copeman, of Kingwood was here one day last week.

Four years ago Tuesday we had 26 inches of snow in Oakland.

Buy your toys, candies, nuts, fruits, etc., from Cheap John.

Mr. Ed J. Frantz, of Selbyport, was here last Thursday on business.

The largest and most complete line of Xmas novelties at Malette's.

Malette is giving silverware away. Call and see him and get particulars.

Go to see Chas. Newman. He has 50 pounds of tobacco to give away.

Mr. Baker Johnson, of Grantsville, was in the city Monday on business.

Malette has the newest and nicest line of Xmas goods ever brought to Oakland.

Candies, toys, etc., furnished for Christmas trees at reduced prices at Newman's.

Cheap John has the best selection of toys in Oakland. Opposite the postoffice.

New style fall and winter cloaks just open at M. L. Scott's Baltimore Store.

Newman has a fine line of Meerschmumpf pipes, Meerschmumpf cigar holders, etc.

Malette has everything good to eat at a reasonable price. Try Entalle flour.

Mr. John T. Mitchell was in Cumberland last Friday on professional business.

We have several communications on our table which will appear in our next issue.

Blank deeds for sale at this office. The deeds are specially ruled and printed very neatly.

Lost.—Black and tan setter dog; \$5 reward if returned to W. R. Mason, Oakland, Md.

Mr. W. C. Devenom, of Cumberland was here on Tuesday and registered at the Glades.

Mr. Jonas Weitzell, of Lonaconing, was here on Tuesday and paid this office a business call.

Just go and C Cheap John's toys and fancy goods, books, sleds, musical instruments, etc., etc.

Miss Hattie Bartlett went to Cumberland Monday morning to visit relatives for a short time.

Go and C Cheap John's great stock of toys. Nearly opposite the postoffice. Best selection in town.

Why don't you go to Newman's for your pipes, cigars, tobacco, etc. He has pipes from 1 ct. to 88 each.

Take your produce to Malette. He gives you cash or goods at rock-bottom prices. Don't forget the place.

Send your check books to this office to be numbered. We have a special machine for just this class of work.

Tobacco, cigars, cigarettes of all kinds, and don't forget the place. No. 1 Railroad Ave., Oakland Candy Co.

We are in it. We give you a 25 cent doll with every dollar's worth of toys you buy, at the Oakland Candy Co.

Read Sincell Bros. new advertisement in to-day's REPUBLICAN. There may be something in it that will interest you.

Mr. E. P. Anderson was at Newburg, W. Va., last Wednesday to witness the marriage ceremony of one of his sisters.

Call on Chas. J. Newman if you want anything in the way of fancy goods or toys. He has them at rock bottom prices.

Notice, Sunday schools, that we sell them goods at cost, and don't you think otherwise. Just call and see them at the Oakland Candy Co.'s

Mr. Jonas Frazee, formerly of Selbyport, but now of Pittsburgh, Pa., was in the city on last Thursday and Friday.

Mr. Merritt Wilson has been appointed administrator of the personal estate of his father, the late George W. Wilson.

Messrs. Thomas and Andrew Nelson started for Cincinnati, Ohio, Tuesday night where they will remain during the winter.

Mr. Lloyd Bell has purchased the Pennington property on Second street and is repairing the house preparatory to moving into it.

Messrs. Frank Deitrick, of Point Marion, Pa., and George Deitrick, of Stewartstown, Pa., are here as the guests of the Central Hotel.

Mr. J. Lee McComas who has been in Chicago for a number of months administering school returned to Oakland last Sunday morning.

Posters are out announcing a musical concert and ball to be given on Christmas night in Offutt's Hall by the members of Smith's Military Band.

Candy, nuts, oranges, peanuts, chocolate candies, the very best the market affords, lemons, citron, and don't forget the place—Oakland Candy Co.

Dr. J. Lee McComas went to Washington yesterday morning to see Judge Jeremiah Wilson on business connected with the electric light plant.

Mr. Samuel Lawton has received the boiler and fittings for the heating plant at the New Commercial Hotel and is now engaged in installing the same.

Oh my! I was at the Oakland Candy Co.'s toy store. They are almost giving toys away. Call and see them before buying elsewhere. They will treat you right.

Daniel Augustine, of Addison, is undoubtedly the wealthiest man in Somerset county, Pa. He is the owner of 106 farms and parcels of real estate, and has \$80,000 at interest.

Mr. U. G. Palmer, of the Enterprise Tanning Co., was an Oakland visitor Monday. He was accompanied by a Mr. Bullard, of Pennsylvania who represents a life insurance company.

A scaffold at D. E. Offutt & Son's new building fell last Saturday and precipitated Messrs. S. E. Bolden and David Glaze to the ground. They escaped with a few slight bruises and sprains.

Sweet & Shackelford, Mt. Lake Park, tell us Asa E. Riley reports sales which would entitle him to a salary of \$93.75 per month, and that they will take a few more good men.

We have on hand the finest line of pipes, cigarette and cigar holders, tobacco pouches and match safes ever brought to this city. You can get them at No. 2, Railroad Ave., now Oakland Candy Co.

Bird cages, cups and saucers, Christmas tree ornaments, vases, small dishes and cooking stoves for children, mugs and fireworks regardless of cost. These goods must be sold at the Oakland Candy Co.'s

Owing to the non-arrival of either of the three judges of the Circuit Court on last Monday no business could consequently be transacted at the court house and the non-jury term of court has been postponed until the 2d of January.

The Hagerstown fireman and the Hagerstown city council are in the midst of a most delightful row over the new fire alarm telegraph just erected in that place. Just what it is all about we don't understand but we think the firemen are right all the same.

Mr. E. R. Evans, who has been here for a year or more as book-keeper for the Preston Lumber Co., returned to his home in Pennsylvania last night. Mr. Evans during his stay in Oakland made many friends who will be sorry to learn of his departure.

Come to Santa Claus' headquarters for your dolls, drums, albums, dressing cases, writing desks, rocking chairs, harmonicas, whistles, pocket books, or any kind of a toy you want, as we bought our toys from the largest firm in the United States, and we can beat the world on prices. Oakland Candy Co.

At Chas. Newman's, Railroad street, you can get 15 volumes of Dickens, bound in cloth and gold, for \$5.00; Sir Walter Scott's Waverley novels, 12 volumes, \$5.00; Wm. Thackeray's complete works, 10 volumes, \$6; Bulwer Lytton's works, 13 volumes, \$6.

The ban has been removed from secret societies in the United States, except the Masons, by the Catholic authorities. Many laymen of that church are now joining the secret orders. No public decree has been rendered, but the consent of the church is given.

Rev. Butler, the newly elected pastor of St. Mark's Church delivered his first sermon last Sunday morning to a large congregation.

Mr. Butler is a forcible and logical speaker and impressed his hearers very much. He will preach again on next Sunday morning and evening.

Dr. J. G. Robinson, Dentist, of Baltimore, has decided to locate permanently here in the town of Oakland, where he will be fully equipped to perform in all branches of his profession. Office with Dr. M. C. Hinchbaugh. 25-ly.

Mr. Wm. Craig, formerly an old engineer on the Third Division of the B. & O., was struck and killed by the B. & O. yard engine on the Main street crossing at North Baltimore, O., Saturday evening, Dec. 15, 1894. He leaves a young wife and five or six small children in very poor circumstances.

An exchange gives the following receipt: There is no use walking the floor with a felon. Wrap a cloth loosely around the felon, leaving the end open. Pour gun powder in the end, then keep it wet with camphor. In two hours the pain will be relieved and a perfect cure will follow quickly.

For rheumatism I have found nothing equal to Chamberlain's Pain Balm. It relieves the pain as soon as applied. J. W. Young, West Liberty, W. Va. The prompt relief it affords is alone worth many times the cost, 50 cents. Its continued use will effect a permanent cure. For sale by Oakland druggists.

This week there was printed at this office one hundred and fifty beautiful invitations for a ball to be given at the Glades Hotel on next Thursday night under the auspices of the Uniform Rank, Knights of Pythias. An elaborate supper will be served during the evening. The music will be furnished by Prof. Daisy's orchestra.

Capt. Thomas F. McCordell, editor of the Cumberland News, the Republican organ of Allegany, was a gallant Confederate soldier and last summer ran on the democratic ticket for clerk of the reorganization of Cumberland. He is the father of Mr. Roy M. McCordell one of the editors of Pack and his daughter Miss Jessie is an amateur actress of note.

Since the flower shows in the cities at which Messrs. Henry Weber & Sons, florists of Oakland had exhibits and to whom a number of awards were made, the firm has been receiving orders almost daily from different parts of the country for plants, etc. The demand has lately grown to such proportions that the Messrs. Weber have been compelled to erect additional hot houses at their garden near Oakland in order to supply the demand.

Mr. Ira P. Westmore, a prominent real estate agent of San Angelo, Texas, has used Chamberlain's Colic, Cholera and Diarrhoea Remedy in his family for several years as occasion required, and always with perfect success. He says: "I find it a perfect cure for our baby when troubled with colic or dysentery. I now feel that my outfit is not complete without a bottle of this Remedy at home or on a trip away from home. For sale by Oakland druggists."

The Famous Jesse Coxey. Jesse Coxey, son of the noted leader of the late industrial movement, is now a student of St. John's College at Annapolis, and is preparing for the Naval Academy, to which he has been appointed. Young Coxey is a youth of 18, and it will be remembered, was frequently left in charge of the army during the absence of his father, and in other ways kept himself before the public gaze during the progress of the abortive Coxey pilgrimage. He is the object of considerable attention from his school-mates.

It is a pleasure to sell Chamberlain's Cough Remedy," says Stickney & Dentler, druggists, Republic, Ohio. "Because a customer after once using it, is almost certain to call for it when again in need of such a medicine. We sell more of it than of any other cough medicine we handle, and it always gives satisfaction." For coughs, colds and croup, it is without an equal. For sale by Oakland druggists.

Any one who has children will rejoice with L. B. Mulford, of Plainfield, N. J. His little boy, five years of age, was sick with croup. For two days and nights he tried various remedies recommended by friends and neighbors. He says: "I thought sure I would lose him. I had seen Chamberlain's Cough Remedy advertised and thought I would try it as a last hope and am happy to say that after two doses he slept until morning. I gave it to him next day and a cure was effected. I keep this remedy in the house now and as soon as any of my children show signs of croup I give it to them and that is the last of it." 25 and 50 cent bottles for sale by Oakland druggists.

Final arrangements are making for the beginning of the construction of the great American University to be erected under supervision of the Methodist Church, in the northwest suburbs of Washington. The endowment now amounts to over \$700,000. The university will be surrounded with ninety acres of high and beautiful grounds, most of it given by the Methodists of Washington. The general plan of the university provides for three buildings for the use of all the departments. They will probably be connected, though as yet they have not been definitely decided upon. The structure will be of bluestone or granite. At some future time there will be established in connection with the university a school of theology for the higher education of Methodists. It is intended that the whole project shall involve \$5,000,000.

Rev. Wm. L. Wilson, who is well known to several of our readers, having misrepresented them at Washington for a number of years, in a short letter to the *Republican* last week requested that his name be dropped from our subscription list. This is very sad and has already cost us several sleepless nights, as it impairs our business prospects seriously. How in the world a man who is credited with such a superabundance of brains as Wm. L. Wilson is can exist without reading the *Republican* is more than we can comprehend. When we think of the amount of free advertising we have given the professor in the last few months, such inhuman conduct and lack of appreciation for service rendered is horrible. But we will desist, the subject is too painful, and our heart of hearts is breaking. Oh! Willie, how could you? —Fairfax Republican.

Notice. All persons knowing themselves indebted to Andrew Shartzer are requested to call and settle either by note or cash on or before January 1, 1895, otherwise the accounts will be placed for collection.

Notice. We have employed a first-class baker and he bakes every night. Anyone wanting nice warm bread, buns, rolls and pies in the morning call on the Oakland Candy Co.

Christmas Glory. The Sunday school of the M. E. church, New Germany, will commemorate the joy of Christmas time in a special service of song and scripture reading on Christmas eve. A treat for the children with a Christmas tree.

Notice. On account of the construction of the large hotel, the many other attractive and expensive improvements being made, and the quick sale of over 300 lots at Loch Lynn Heights to over 100 prominent persons within the past four months, I have determined to dispose of no lot after January 1, 1895, at less than \$100, 6 per cent. off for cash, and 10 per cent. additional for building.

Parties desiring to purchase lots can secure them only this month at the old price of \$75 and 6 per cent. off for cash.

J. C. ALDERSON, Gen. Man. Loch Lynn Heights, Md., Dec. 12, 1894. 40-3t.

Buckley's Arnica Salve. THE BEST SALVE IN THE WORLD for Cuts, Bruises, Sores, Fleets, Salt Rheum, Fever Sores, Tetter, Chapped Hands, Chilblains, Corns, and all Skin Eruptions, and positively cures Piles, or any required. It is guaranteed to give perfect satisfaction or money refunded. Price 25 cents per box. For sale by all druggists. 3-lyr.

Valuable Advice. Avoid lawsuits and loss by consulting H. P. Tasker and examining his abstracts of the "conflicting titles" before paying for Military Lots. Charges reasonable. Office in Colardeau Cottage, opposite the bank, Oakland, Md. 41-4f.

Attention, Comrades! There will be an informal meeting of Frank Thomas Post No. 30, Department of Maryland, Grand Army of the Republic, in the J. O. U. A. M. Hall at Deer Park, on Saturday, December 14th, at 2.30 o'clock p. m. All old soldiers, whether members of the order or not, are cordially invited to attend.

A Quarter Century Test. For a quarter of a century Dr. King's New Discovery has been tested, and the millions who have received benefit from its use testify to its wonderful curative powers in all diseases of the Throat, Chest and Lungs. A remedy that has saved the best, so long and that has given so universal satisfaction is an experiment. Each bottle is positively guaranteed to give relief, or the money will be refunded. It is situated in the most reliable of all the world's stores. Large size 50c and \$1.00 a bottle. 41-4f.

Will You Suffer? With rheumatic pains, sciatica, sleepless nights, dropsical accumulations, or nervous headaches when Messrs. Cober & Boyer will cure you if their directions are followed. Can be consulted at the Central Hotel or at their room in the Pritchard building, Oakland, Md.

Reduced Rates for Christmas and New Years. The B. & O. R. R. Co. announces that excursion tickets will be sold between all stations on its lines east of the Ohio river during Christmas and New Year holiday at reduced rates, for all trains December 22, 23, 24, 25, 29, 30, 31, and January 1, 1895, valid for return passage until January 3, 1895, inclusive.

Christmas Bells. The Sunday school of Trinity Reformed church, New Germany, will commemorate the joy of Christmas time in a special service of song and scripture reading, on Christmas evening. A treat for the children and a Christmas tree with suitable decorations will be provided for the delight of everyone. All are cordially invited to attend.

Farms for Sale. We offer for sale two farms lying 2 1/2 miles west of Deer Park and 6 miles north of Oakland, containing 123 acres, about 60 acres being cleared. The improvements consist of two barns and three houses, an orchard of 1 1/2 acres. The farms are well watered and there is some good timber land. These farms will be sold in one piece or divided to suit purchaser.

MRS. C. MISER, JOHN HALLSNER, Deer Park, Md. 41-3t.

Announcement. Having removed my stock of goods from the Offutt building to the one built by A. D. Naylor, (second building east of the B. & O. depot) I am now prepared to show to the people of Oakland and vicinity one of the most complete lines of fancy goods, toys, etc., ever brought to Oakland, and I will be pleased to show goods and quote prices whether you wish to buy or not. Hoping to receive a part of the patronage of the general public, I remain,

Truly yours, CHAS. J. NEWMAN.

A Correction. The members of Garrett Council No. 35, Jr. O. U. A. M., are requested to meet in Sturges' Hall Sunday, Dec. 30th, at 10 o'clock, to attend divine services at the M. E. church, instead of Dec. 23d as previously stated.

W. F. KING, Rec. Sec.

Rogers' Sarsaparilla. A specific for all. 100 doses for 75 cents. Rogers' Little Liver Pills, best on the market; Cough Cure, Liniment, Appetite and Worm Syrup, sold by A. G. Sturges, Oakland; Cuppet Bros., Mehan; J. A. DeBerry, Corinth; C. F. White, Hutton; P. T. Garthright, Hayden & Eckles, Mt. Lake Park; Dr. Laughlin, Deer Park; Wm. Frederick, Friendsville; Yough Store Co., Jonas Frazee, Robert Liston, Selbyport; W. Wass, Mineral Springs; J. E. Gnagay, Accident; Smith & Callis, Hoyes, and by all general dealers.

Dead Letter List.

List of mail matter remaining unclaimed in the postoffice at Oakland, Garrett county, Maryland, for the week ending Dec. 23d, 1894, the parties addressed being unknown to the postmaster.

Mr. Elsiea Bauger. Mrs. Mary Bauger. One cent on each article is chargeable for advertising. Parties calling for this matter, will please say it is advertised, otherwise they may not receive it.

E. H. BARTLETT, Postmaster.

An All-day Meeting. An all day meeting will be held in St. Paul's M. E. church, Oakland, on Thursday, Dec. 27, 1894, conducted by the eminent evangelist, Miss Jennie Smith. Meeting will begin promptly at 10 a. m. and proceed continuously until 9 p. m. Bell will ring every hour. The last two minutes of each hour will be spent in silent prayer. Different leaders will have charge of the meeting and leaders will change every hour. Come if you cannot spend but a few moments.

These all-day meetings have been held all over the country with marked results for good. Many who attend say these days spent in meetings are the shortest days they ever spent. Many persons bring their luncheons and spend the day. We will be glad to see our friends come in from all parts of the country. Other places people have come forty miles to attend an all-day meeting.

JENNIE SMITH, Evangelist. S. K. ARBETHNOT, Pastor.

Bittinger. We have had nice weather this fall, but to-day we have a wind storm, rain and sleet.

Our public school closed on the 7th, according to notice, and the principal, Mr. Moffett, opened a private school on the following Monday with between thirty-five and forty on the roll and most all large pupils.

Alas! for those poor children whose parents are too poor to send to private school. Now is this not a waste of time and money to just start the pupils, then take them out of school for nearly a year to forget what they learned? Why open schools at all? And as my mind wanders over our county, I cannot help but pity the poor, innocent children, and I wonder if the members of our school board feel proud when they stand and view the splendid and magnificent school building which has been built with the money which has been appropriated for five months school, and out of which the innocent children have been cheated, because, in our humble opinion, it is not the parents nor the tax-payers, but the poor, innocent children who are being robbed of their education. Unless there is a change soon in these sad conditions of school affairs, there will be almost a general exodus.

Christmas Is Coming.

We have just received a handsome line of

Christmas Novelties,

and extend everybody a cordial invitation to visit our palace of beautiful things. Our line of goods comprises a large variety of

Toilet Cases Silver and Aluminum Trays of the latest style, Work Boxes, Jewel Cases, Perfume Sets, Smokers' Goods Cards, Booklets, Calendars, Imported Cut Glass Bottles, Picture Frames, Albums, Fancy Bottles, Etc., Etc.

We carry the largest and handsomest line of Fancy and Toilet goods in town. Call and see for yourself. Our prices are within reach of all. We take pleasure in showing our goods whether you come to buy or not.

Watch our window displays. Very truly,

Oakland Pharmacy,

THE UPLIFTED HAND.

BY EMMA LOUISE GRUETT.

The waters of the fair Connecticut shimmered in the glow of sunset, that with soft tints was lighting up the face of a young girl standing on the quiet banks of the river. Unconsciously Annie Matthews crossed a handful of autumn leaves she had been gathering, as with a sigh she turned from the setting sun and its brilliantly tinted clouds, to let her glance sweep eastward. Her thoughts carried her through the forests, bristling with foes, on across the wide ocean to the sunny England of childhood's memory.

For an instant a great longing came into her heart for a glimpse of her old peaceful home. The sound of a well-known voice at her side quickly dispelled the dream, bringing smiles to her lips. But at sight of the intense purpose revealed in the young man's face the smiles were changed to a sob.

"Oh, Robert!" she exclaimed, eagerly, "tell me you, too, are going to battle with the savage foe north of us. I cannot hear it." Her voice trembled.

"My heart will break. You may die simply to let an Indian live."

The last words, hung out somewhat scornfully, accompanied with a sudden flash in the girl's eyes, were softened, however, by the tears on her cheeks.

"Annie!" The voice was low and soft, with a dash of mischief purposely lurking in the tones, though Robert's heart was also burdened with anxiety. "Annie, dear, the usually clear light of your mind is in shadow. Have you learned me to so little purpose as to suppose I hold myself so cheaply?" he laughed. "Besides, I love you, dear, too well, and life also, to be so generous as you mention. But, with growing seriousness, 'it is more than that, as we are going to battle with others protect their homes, and in so doing I may protect our own; now one that is to be. See it over; there, my brave girl? The light is dim, and the trees hide it, but it is there, and nearly finished."

Robert fairly ended with a kiss on the trembling lips.

Annie gazed silently at the tall, muscular man beside her. His features were cut in noble lines, full of action and enthusiasm. The dark, wavy hair, the equally clear light of his eyes, the handsome blue eyes sent a keen, penetrating glance into her own. "And do you go in the morning?" she at length gasped.

"A company starts to-night," he calmly answered, drawing the girl nearer to him. "At a late hour to-night. The day that we are safe here makes the duty to help our friends to the north of us all the greater."

"And their leader?" came in hoarse whisper. The full tones could not yet come at bidding.

Robert gathered her tenderly in his arms. "His name is Robert Fuller," he replied in low, steady tones. "My father has given much money to quell this King Philip, and my brother Jonathan is hourly expected to give himself in our behalf, if need be. Shall I refuse what service I can render him in trouble?"

"Why have we dallied with these savage foes?" Annie burst out, her eyes flashing fire. "Why have we not ruthlessly butchered them, as they will murder us? Why let our civilization, our religion, strive with them, only to be the mine of our own ruin?"

"It is not my strong, tender, conscientious maiden who is talking now," and Robert pressed her closer to his heart.

"No," with a spurt of defiance. "It is the loving maiden, who would rather lose all else than her lover."

"All—Annie?"

"Do not tempt me with such questions to-night. It may be our last."

Robert gently smoothed the fair brow, choking back his own emotion. But Annie caught the sound of sobbing in his throat. Instantly she sprang out of his arms.

"Forgive me, Robert," she breathed, "forgive me for causing you a moment's pain. It was because I love you so much. But I, too, have the blood of warriors in my veins," she exclaimed. "Help me to be brave—your own are so strong and fearless. I will be worthy a warrior's bride. We are going to die, but I will watch and wait and serve my duty here as you serve yours."

"God bless you, my dear, brave girl," "flush" whispered Annie, and took a step in advance. "Do you not see something dark on the river, quite a distance up the stream?"

"Yes," Robert replied, peering into the dusk. "It is a canoe. Do not fear," he whispered, throwing an arm protectively around the girl. "We are in no danger here. Our Indians have been friendly for forty years."

"Have the fortified houses been made secure?" Annie persisted.

"They are impregnable."

"Let me tell you," Annie shuddered. "King Philip's crews broods over this settlement. Any protestations in our favor are used to throw us off our guard. They are only waiting to sweep over us."

"We are safe, dear. It is the north that is in danger."

"They are so strong."

"But skill surpasses strength."

"The canoe steadily approaches us. It is nearing the eastern shore."

"I will accompany you home, then, return to watch. We do not start till after midnight. I promise to see you again. Brave heart, my darling."

Even as he spoke the little hand of Springfield was doomed. The shadow of King Philip's war lay over the country, and it was the evening of October 4, 1675.

Robert left Anne at her home, then slowly retraced his steps, thinking of the mirror. Moccasined feet made no sound. His name suddenly breathed in undertone startled him.

"It is Wahnonah," the voice went on. Her speech was a mixture of Indian and broken English.

Robert stopped and looked keenly at the maiden before him. Though apparently scarcely more than sixteen, she was tall and shapely. Her rich coloring, not too deeply tinged, glowed in cheek and lips, while her eyes seemed to have stolen some of the fastidiousness of the race from which she came. Rich hair and wampum strings made it picturesque, and formed a setting for her splendid, vigorous beauty.

"Does the young paleface with his followers go to the north on the morrow?" she asked, hoarsely.

"Wahnonah, you are Indian. Think you I will answer this night with your warwhoops all about us?"

"I am Indian," Wahnonah replied, taking a step nearer, "but the white blood within me is at war with the savage part of me. Why does Wahnonah betray her own?" she ended fiercely.

Robert's heart beat faster. "What would you say, Wahnonah?" he asked, kindly.

"The heart of Wahnonah beats for revenge on many of the palefaces—but not on one," she went on, with a soft intonation that gave a new idea to Robert. "She would not leave her mother's forest if she could—no, not even to please the one whose life she would save. But, listen," she hurried on, "they are coming to kill him, to kill them all, to burn their homes. Soon, she knows not when, and—might not tell if she could. Stay, go not away to-night, to-morrow. You have a place of safety here."

"This is nonsense," Robert answered, eying the girl keenly, and also listening as he spoke. "What do you know?"

"I have told you," Wahnonah almost whispered, standing firm in her young dignity, looking steadily into Robert's eyes.

"You may be deceiving me."

A spasm of pain passed over her features. "Do palefaces, too, care more for glory than for sweethearts?" she gasped.

"It is not for glory we go. It is for their safety and ours."

"Stay. Seek your places of safety. An enemy will follow your footsteps. It is you he seeks. And others will come to burn your homes and whet their scalps in the war dance," she ended pleadingly.

"How did you learn this?" Robert demanded earnestly. "Are you betraying me even now?"

Another look of pain flashed over the girl's face as she proudly stepped back. Then drawing something from her bosom she held it toward Robert.

"Place this piece of wampum on the new home nearly done, and it shall be saved. Wahnonah promises. Her mother was a chieftain's daughter, and the chieftain knows her work and will grant what she asks."

Robert mechanically took the trinket, and inclined to believe the girl's warning.

"Then he shook off the fear, and said, 'Who will follow me, Wahnonah?'"

For a moment the girl did not reply. She clasped her hands and looked straight before her.

"Who is it?" Robert entreated.

"Osego. Tell of her who serves you, and her life will be worth no more than your own."

"He whose wigwam you will keep?"

"He whose wigwam I am commanded to keep. But do not linger. Time is short," she urged. "Hasten."

Robert silently gazed at the girl. Surprise made him speechless as he read the love in her eyes. In another moment she was gone.

Robert mechanically stuffed the piece of wampum into a pocket, and began pacing back and forth, trying to decide the best course to pursue. He could not believe Wahnonah was really deceiving him. He had known her several years, and his family and himself had been kind to her. They were sorry for the girl. The white blood in her veins made life less agreeable and more difficult than to her darker sisters. But until now he never supposed either for himself or the inhabitants of the settlement.

"I will go to Mr. Wellman's," he decided, with a heavy thought. "It will have the appearance of cowardice to postpone our departure now, when none believe any danger threatens us at present."

Mr. Wellman thought the girl was overexcited, and still, with her keen observation, might she not possibly be right? It was decided, however, to say nothing about the matter till morning, and to delay the departure of the little band till daylight.

"It will be well to guard your own steps," Mr. Wellman advised, as Robert left the house. "I half believe the girl knew what she was talking about in that respect."

Robert said good night, and hastened for a final farewell with Anne Matthews. He resolved not to needlessly alarm her or add further to her trouble by relating his interview with Wahnonah. He took a short cut through the edge of a bit of forest. The woods absorbed the light, turning stumps and trees into the semblance of hostile foes, but his heart was fearless, and he did not see a shadow following in his wake, and the moist path gave out no noise.

Annie met him with eyes both radiant and fearful. Only a few words were said, and then, with tears on her whitened cheeks, for a moment they held each other in silent embrace, and Robert was gone. But unexpected events were hovering near.

Immediately on leaving the home of Annie Robert sought his own family. To his great delight and surprise he found his brother Jonathan had ar-

rive from Salem. A great relief came to his mind, for, though he would scarcely acknowledge it to himself, he had felt all through the day a strange, unaccountable yearning for his brother's arrival.

After the hearty welcome and a little chat Robert and Jonathan set out to finish the preparations for the morning's departure. On the way Robert confided Wahnonah's warning to Jonathan, who was much impressed and troubled at the strange recital, and thought it advisable to heed it. He listened thoughtfully to Robert's account of greatly benefiting Osego, and not actually saving his life, and how his brother had since been called "the medicine man." But finally the thought drifted to other things until they reached a friend's house, thinking only of the morrow and the troubles at the north.

As soon as they disappeared within the door Wahnonah, who had watched every step, turned and almost ran in the direction of Annie's home. "To save him," she thought. "I will even ask help of the fair paleface he loves. If I must, I will ask her to save them all."

It was getting very late. Most of the lights were out, but a few gleamed here and there—sleepless eyes watching the dawn. The moon was down and the sky had become clouded. As Annie Matthews for a moment stood in the doorway for a last look out into the night, her troubled eyes wandering in the direction of Robert's home, then lovingly lingering on the spot where the new dwelling was hid in the darkness, she heard her name softly spoken.

Turning around, her glance changed to one of surprise as Wahnonah stood before her. Then, before she could speak, the half-breed had clutched her arm and quickly thrust her out of the glare of the kitchen light.

"Come, quick," she urged. "Robert Fuller's life is in danger. I have warned him, but he will not heed me."

As she spoke she untwisted a long red blanket from her head, its long ends hanging gracefully over her left arm, and thrust it forward, leaving a dark dress, without a bit of color. "Come," she said breathlessly, clutching Annie's hand, "she has just gone to Mr. Goodman's dwelling." Wahnonah led the way behind a cluster of trees and paused. Till now Annie had followed her own path, but now she was so startled at the words of the Indian girl, that now she began to comprehend the truth of her statement.

"What is it, Wahnonah?" she whispered, trembling so she could hardly stand.

Just then a faint rustle reached Wahnonah's trained ears. Instantly she dropped on her knees in the shadow, pulling Annie down with her. A dusky form passed in the distance and all was quiet.

"Wahnonah breathed in a whisper. 'Go to Mr. Goodman's home and tell him I sent you to plead with him. Do not stop to question. Keep to the right, and out of sight. It is Osego.' She ended, with her ear close to Annie's. 'Run!'"

Annie sped into the night, with a pale complexion at her heart. Already a sudden commotion was stirring in the further end of the settlement. Wahnonah, with eyes and ears on the alert, saw Robert come out of Mr. Goodman's house alone, before Annie could be half-way on the roundabout path she had taken to avoid being seen.

Crouching down, she watched and waited.

Robert hurried past with long strides, softly chanting a few strains of a pretty love ditty. Immediately a figure sprang from out the darkness and followed. With catlike steps Wahnonah glided on a few paces from its side, thinking the Good Spirit for the clouds so quietly gathered and so dense.

Suddenly all was tumult. A messenger from the south had ridden in their midst, giving the alarm to the ill-fated town. The Indians were on the way to pillage, murder and burn. The confusion had caused Annie to retreat her steps for a nearer way to Mr. Goodman's, and also to seek further aid from Wahnonah. In her haste she was face to face with Robert without noticing him. "Annie!" he exclaimed, "why are you here?"

In a word she gave her errand, and then they were surrounded with people of a pretty love ditty. Many of the first establishments keep those costumes complete, or one can purchase patterns with all of the details of making up.

Course black rough and ready straw will be worn through the autumn. Indeed, it is not unusual to see these hats and holiday things.

Felt hats are shown with indented crowns and brims quite decidedly rolled. The brims are a little broader than those heretofore worn.

Partly worn sleeves may be made as good as new by cutting off the lower portion and putting in deep cuffs of any suitable material.

A peculiar and striking costume is of brocade in two shades of green, with bodice, sleeves and sash of thick, white moire.—N. Y. Ledger.

Napoleon at St. Helena.

It was the autumn of 1858 when Napoleon went to Paris. He was in the sixtieth year of his age, entirely ignorant of what were then called the "humanities," but well trained in history, geography and the mathematical sciences. His knowledge, like the bent of his mind, was practical rather than theoretical, and he knew more about metaphysical abstractions, more about the deeds of history than about his philosophy. His defiant scorn and habits of solitary study grew stronger together, finding no vent except in a powerful memorial addressed to the master of war on the proper training of youth in French military schools. Nevertheless, he found almost if not altogether for the first time a boy friend in the person of Des Nazis, his room-mate, a youth noble by birth and nature, a pensioner, moreover, like himself.—Prof. Sclane, in November Century.

JAPANESE AT HOME.

Their Rooms Made Any Size to Suit at a Moment's Notice.

The Japanese home has been well described as a sort of which house might be called a thousand diameters. "All wood and wicker and white paper!"

Almost every house in Japan, however humble, has a garden. Some of these gardens are very beautiful, with large leaved palms, shady maples, leaved bamboos and bright-colored shrubs and flowers. Humblebees, broad winged butterflies, half-tamed crows and sweet humming birds enliven the scene.

The entrance hall is a platform raised a couple of feet above the ground. Here the foreigner removes his boots and the Japanese his sandals. The division of the rooms for sliding panels, ingeniously arranged in their grooves to enclose a space at the pleasure of the householder. A large room can therefore be converted into a number of smaller rooms, and as almost every inch of the room is used for a purpose, the rooms become divided into a number of sleeping chambers. Chairs and tables are almost unknown. The posture of repose is a "squat." At mealtimes you squat anywhere and your food is placed before you. When you are tired you throw yourself anywhere on the floor, and when you return to bed the panels have been removed. The bath is a great institution in Japan. A great big tub of water with a stovepipe rising up inside of it filled with red-hot charcoal. There you sit until the pores are opened, and the cold douche follows.

The Japanese dinner is excellent. The dishes are endless. They usually begin with a dish of soup and another of fish brought in upon a lacquer tray. You drink the soup out of the bowl and eat the fish with your chopsticks. After the dish comes another of soup, a dish with four or five heaps of food. A small bird or wild fowl, some roasted chestnuts, a few boiled lily roots, and some steamed seaweed. Wine is always served with a good Japanese dinner, and the waiting girls take care that the cup is full. Still the dishes come in. Raw fish, green salads and sweet sauces.

When you have well eaten and drunk to the full, then tea is served with small cakes, and the Japanese pipe follows. The Japanese householder is a social being. The festive meal is prolonged by a thousand jokes, room of merry laughter and endless conversation.

In the houses of the wealthy the girl musicians and dancers entertain the guests during the dinner hour or immediately after. While you are sipping your tea, perhaps, they are singing to the accompaniment of a harp. They twine themselves round the corner, and at the threshold falls upon her hands and knees and bows her head to the floor in salutation to the guests.

Japanese dancing is chiefly posturing, with special attention to the management of the fan. The dancer interweaves her poses with but slight grace. Her steps are made upon the flat of the foot, the toes not being used more than in walking. Still, in the undulations of the body, the serpentine movements of the hands and arms, and in her complete mastery of the fan, the Japanese dancer shows marvelous agility, and skill.—Chicago Times.

FASHION'S MIRROR.

So ne Leather Trimmings in Female Apparel.

Leather trimming, which was introduced some years ago to a limited extent, is to be again brought out. Some of these garments are elegant in the extreme. The only difficulty is that they are too big in appearance.

They are too big in appearance for most of the tailor costumes, and are really adapted for no other style of dress, although they have been put on all sorts of fabrics.

There are new and stylish coat-jackets of cloth in various shades of gray and brown. The coats have deep collar and cuffs of velvet with flat pockets. Many of the latest coats are cut quite on the fashion of those of gentlemen, with the exception of the additional fullness at the skirts.

A stylish and becoming dress for a small box is a high collar and long skirt. The first establishments keep those costumes complete, or one can purchase patterns with all of the details of making up.

Course black rough and ready straw will be worn through the autumn. Indeed, it is not unusual to see these hats and holiday things.

Felt hats are shown with indented crowns and brims quite decidedly rolled. The brims are a little broader than those heretofore worn.

Partly worn sleeves may be made as good as new by cutting off the lower portion and putting in deep cuffs of any suitable material.

A peculiar and striking costume is of brocade in two shades of green, with bodice, sleeves and sash of thick, white moire.—N. Y. Ledger.

SCIENCE AND INDUSTRY.

It is proposed to make the port of Bristol, England, accessible to Trans-Atlantic vessels at all times by damming the River Avon at its mouth and using locks. According to the plans of the engineers a constant depth of thirty-two feet can be obtained and the necessary docks and breakwaters constructed for \$11,000,000.

An adult specimen of the sole, fifteen inches long with symmetrical eyes, has been found on the British coast. It was as usual in all respects except that the left eye had retained its position on the left side of the head, and the colors were normal, the right side being brown, and the left side white.

Bread, as a daily article of food, is used by only about one-third of the fifteen hundred millions that constitute the present population of the earth. In the staff of life is the banana, on the Pampas dried beef, and in Eastern Asia rice, either in the form of soup or thick gruel. "He has eaten his last rice," say the Chinese in anticipation of a famine.

The color of leaves is affected by light, but this does not hold true of flowers. Last winter a blue hyacinth found itself under a flat stone six inches beneath the surface. As it could not reach the light, it developed leaves and flowers under the stone. The leaves were blanch as white as the stalk of celery, but the flowers took on the natural deep blue. It is said the same results attend when the hyacinth blooms in a dark cellar.

The quantity of food products raised in the southern states increases each year. It is conceded that more southern planters will feed their stock this winter than at any time since the war. This statement applies in general to the southern states, but especially to North Carolina, whence the report comes that there is more home-raised bacon and beef in the local markets than ever before in the history of the state.—Baltimore Herald.

A. P. Anderson, of the State university of Minnesota, by a long series of experiments, finds the pumpkin does most of its growing after 7 o'clock in the evening, and diminishes its activity as the sun rises and begins to act upon the leaves. From 1 o'clock in the afternoon the weight of the fruit diminishes, owing to the evaporation of water from the leaves of the plant. The general results show that when the fruit grows most the vine grows least, and vice versa.

Nearly all the Greenland glaciers and tongues from the interior ice cap terminate in vertical faces from one hundred to one thousand feet high, presenting facilities for investigation. The vertical faces reveal pronounced stratification on the basal ice, even the ice being arranged in layers. Fine laminations were seen, twelve or twenty to an inch. The layers are sometimes twisted and contorted, and even "shoved" over each other. The glacier movement at the ice border is a foot per day to a foot per week.

There is a "recharge" milk treatment as well as a skim milk cure, and an advocate of the former says that a patient requires from five to six quarts daily while confined to bed, and from one to four quarts more when working. To digest all this, free action of the skin, lungs and other organs must be secured by daily warm baths and an unlimited supply of fresh air night and day. Under this treatment the heart quickens, the alimentary canal enlarges and its glands increase in size and number, and the arteries enlarge and furnish to all parts of the body an increased supply of blood. A patient with a supposed mortal disease was cured under this treatment between July 15 and October 25, and during that time increased in weight from 150 pounds to 175 pounds 14 ounces.

FLAIDS NOT IN STYLE.

Always to be in fashion, but they never are—Egyptian Flashes.

At this juncture of the year, the same prophecy is always made: "During the forthcoming autumn and winter season plaids are to be fashionably and generally worn."

Many do believe in the prediction always and by being deceived. Tartans never become generally fashionable by any means.

Its history: The tartan is indeed a genuine outcome of the primitive instincts of tribal pride, which dates to the remotest antiquity.

The difference of clan tartans are no doubt traceable to localities, since the women, who spun the wool from their home flocks, dyed it with natural dyes found in the fruits, vegetables and herbs of their own neighborhood, where they grew plentifully, and the red berries by the wayside, there the colors of yellow and red predominated in plaids.

Speaking of plaids, it is imagined that kilting—that is, the plaiting of any fabric, silk or woolen—was first adopted by the Highlanders, but I learn that this is far from being the case.

Plaiting, a survival of one of the prettiest of fashions, dates back to the dimmest of pasts; and thousands of years ago the Egyptians showed, as we can see in their sculptures, as passionate a love for "recondition" plaiting as we do to this day.—Gentleman.

Proof Positive.

"Hat ha!" shouted the enthusiastic scientist. "I have discovered one thing in which the Chinese did not anticipate."

"What is that?"

"Football. I can prove it by the way they wear their hair."—Washington Star.

An Insuperable Place.

"You have only very nice people in your town, I hear, Cadley."

"Yes, all swells, confound it! There's nobody in the whole place for a gentleman to look down on. It's really distressing."—Judge.

Wife—"The price of the clock was \$10, but I got a discount, so it only cost me \$8."

Husband—"Yes, but you could have got the same thing at a lower price. Why—'That same thing at a lower price.'—'You could have got it, but then, I wouldn't have taken off anything.'—Boston Transcript.

Way Up—Frankington—"I understand that you had to go to law about that property that was left you. Have you a smart lawyer?"

"Mr. Madge married a man of regular habits?"

"Six months ago I was in very poor health. Had stomach and bowel trouble, dizzy spells, also very sick turns (stomach), with beating and throbbing of chest and head. I was

Nearly Deaf.

In the right ear it seemed like a saw-mill running in my head. I used two and one-half bottles of Hood's Sarsaparilla when I felt a change for

Mr. E. Stiff.

hearing has been restored and the other ear is now as good as the first. I keep Hood's Sarsaparilla on hand, also Hood's Pills."

AN ANGEL IN THE HOUSE.

[A wellspring of pleasure.]
He was so helpless, he was strong,
The four-year-old,
All things unto the king belong
Of doves and fowl.
The waving of his tiny hand
Will summon all unto his stand;
No mighty monarch of the land
Is half so bold.
He was a tottling little lad
So full of play,
And such a cunning way he had
To pass the day.
He was so winsome and so shy,
With such a big and lustrous eye,
Just like a slice of azure sky—
Both blue and gray.
The Saxon and the Celt combined—
A lusty strain,
The fervor tempered, cooled, refined,
And sure to reign.
The gurgling laughter, cooling rest,
As bells that chime their revelry
When Christmas comes with gracious glee
And glad refrain.
The ruler of the house and home,
Altho' so small,
As free as wind is honeycomb
He beams on all.
Close clasped unto his mamma's breast,
Sung as a plover in the nest,
He shies to sweet and soothing rest
While shadows fall.
—James E. Kinsella, in Chicago Inter Ocean.

SALTING DOWN A BEAR.

An Experience That Gave a Native No Pleasure.

OWN in the Cross Forks in the Pennsylvania hemlock belt one fall a native of one of the back districts came in.

"Do es an y-bady know," said he, "if bar meat 'll salt down anyways nigh proper?"

"For winter?" said an old woodsman, who looked wise.

"Course for winter," replied the man from the back districts. "Didn't s'pect I'd be saltin' of him down for nex' summer, did yee?"

"Yee've got a bar to salt?" asked the wise-looking old woodsman.

"If it were a coon or a ground hog," said the other, "do ye s'pose I'd be astin' yee ez to how a bar would salt down?"

"Is yer bar dead?" asked the wise man.

"Course not!" exclaimed the man from the back districts. "I'm goin' ter salt him down alive, hide an' taller, eiaws an' gizzard, an' all his t'kins, from the top of his snout to the end of his tail. Any durn lunkhead knows that salted live bar is better chawin' long in the winter, than salted dead bar."

"How old is yer bar?"

"I didn't 'zamine his teeth p'ticlar close when he fust showed 'em to me, but from the glimpses I got of 'em, I think he can't be a day less'n four year old, come spring."

"Well, if yee've got a bar, an' he's dead, an' hain't more'n four year old," said the wise-looking woodsman, "he'll salt down better'n anything yee ever soaked y'er teeth in. I don't keer whether it's fish, flesh or fowl. But don't salt down the head. Make head cheese outen it. Ye hain't got no idee how much better bar head cheese is than any other mess o' victuals that ever was put together. An' the grease that ye skim often it when it's cookin' yee can't put no price on that. It's big enough for a ham, or for a pig, or for curin' the country. An' don't salt down the bar's feet. Pickle 'em. Pickled bar's feet sets better to a feller's ribs than mummy in the wilderness did to the children o' Israel, time they run short o' food."

"Will a bar salt down any way nigh proper? Hain't he won't? If yee don't think he will send him to me an' I'll risk it."

"That's all I want to know," said the one who was seeking information. "I don't keer nothin' 'bout making head cheese outen him nor pickin' up his feet. I jist want to salt him down. I'll go buy a bar!" said the bar an' I'll go buy a bar!"

"That's what I mean, by den," the sheep an' the pig all inter it together.

"Inter one bar?"

"Inter one bar!"

"Yer bar must be a durn scraggly runt, then."

"Fatter'n a gremlin, an' weighed four hundred if he weighed an ounce!"

"Gointer p'ke a suckin' pig in with him, then?"

"A two-hundred - and - fifty-pound shoot, by jeezswax!" said the sheep, "the niver was a neerer an' fatter ever riz for nuttin'!"

"Ye mean yer gointer git a hog-head to salt 'em down in?"

"I mean I'm gointer git a bar to salt 'em down in. Jist one bar!" That's what I mean!"

"Then yer lyin' faster'n a boss kin trout. That's what I mean, by den!"

The wise-looking old woodsman was excited. The man from the back districts just grinned. After he had grinned awhile he looked solemn and said:

"I want to tell ye, though, that it hain't no pleasure to me to hef to salt down that bar an' that sheep an' that pig all together in one bar! I'd rather put 'em in three bar's, but bar's is skeerer an' high, an' times is hard. So I'll hef to do it. If ye know where Honey Bee Rock Hole is, on a Kittle creek, then ye know where that bar had fixed up a place fer winterin'. I'd had my eye on him fer better'n a month, an' thort I'd let him save till the weather got threent' an' he had got all the rib fat on him that he could carry fer lastin' him through the long snooze that lay efore him soon ez the threent' weather started him fer the Honey Bee Rock Hole. I had sold a' my sheep but that one ewe, an' I had got her in the threent' kind o' shape to be earned nuttin' for me an' the ol' woman. She were nippin' away in the pastur yet, an' 't'other day me o' woman says:

"'Balam,' she says, 'ye better hef fetidin' that ewe inter the barnyard, fer she's gettin' shont fat enough to snit Reub Shaine,' says she.

"Reub Shaine is a neighbor of our'n, an' I kin give ye an idee o' Reub's standin' over our way by tellin' ye what the reg'lar sayin' is 'mongst ye fer instance, mebbe I'll say to my neighbor, or mebbe my neighbor'll say to me:

"'How's yer sheep gointer come ont'?"

"Then I'll say, or my neighbor'll say, jist accordin' ez to which it mout be:

"'Wall, if the sniffles, or the foot rot, or Reub Shaine don't get 'em, they'll do 't'other class.'"

"So I says to my ol' woman:

"'All right, Bannan. I'll fetch the ewe in to-morrow,' I says.

"'That Berkshire shoat o' mine were fatter'n butter,' 'bout then, a I sot the day fer butcherin' of him the same day I had hid ont to fetch the ewe in from the pastur. I kep' him in that kivered shed o' mine, and altho' he was open so he could git out in the straw yard an' munnix around if he wanted to. Early in the mornin' o' the day I were gointer butcher him Joe Beem come over to help me do the business.

"'Fust,' says I to Joe, 'let's go over and fetch the ewe in from the pastur.'"

"'We went over, an' the ewe wasn't there. She were gone, s'lect an' clean, excused 't'other class.'"

"'Mebbe it were Reub, an' then ag'in mebbe it wasn't,' says he.

"'That were all he said. Then we went back to butcher the shoat. The pig wasn't in the yard an' the shed door were shot.

"'By jeezswax,' says I. 'That's funny,' says I.

"'Mebbe it were Reub, an' mebbe it hain't,' says he.

"'I went up an' opened the door, but I sho' shook his head. But he didn't say nothin' for quite a bit. Then he says:

"'Mebbe it were Reub, an' then ag'in mebbe it wasn't,' says he.

"'Joe Beem he looked around a bit an' shook his head. But he didn't say nothin' for quite a bit. Then he says:

"'Mebbe it were Reub, an' then ag'in mebbe it wasn't,' says he.

"'That were all he said. Then we went back to butcher the shoat. The pig wasn't in the yard an' the shed door were shot.

"'By jeezswax,' says I. 'That's funny,' says I.

"'Mebbe it were Reub, an' mebbe it hain't,' says he.

"'I went up an' opened the door, but I sho' shook his head. But he didn't say nothin' for quite a bit. Then he says:

"'Mebbe it were Reub, an' then ag'in mebbe it wasn't,' says he.

"'That were all he said. Then we went back to butcher the shoat. The pig wasn't in the yard an' the shed door were shot.

"'By jeezswax,' says I. 'That's funny,' says I.

"'Mebbe it were Reub, an' mebbe it hain't,' says he.

"'I went up an' opened the door, but I sho' shook his head. But he didn't say nothin' for quite a bit. Then he says:

"'Mebbe it were Reub, an' then ag'in mebbe it wasn't,' says he.

"'That were all he said. Then we went back to butcher the shoat. The pig wasn't in the yard an' the shed door were shot.

"'By jeezswax,' says I. 'That's funny,' says I.

"'Mebbe it were Reub, an' mebbe it hain't,' says he.

"'I went up an' opened the door, but I sho' shook his head. But he didn't say nothin' for quite a bit. Then he says:

"'Mebbe it were Reub, an' then ag'in mebbe it wasn't,' says he.

"'That were all he said. Then we went back to butcher the shoat. The pig wasn't in the yard an' the shed door were shot.

"'By jeezswax,' says I. 'That's funny,' says I.

"'Mebbe it were Reub, an' mebbe it hain't,' says he.

"'I went up an' opened the door, but I sho' shook his head. But he didn't say nothin' for quite a bit. Then he says:

"'Mebbe it were Reub, an' then ag'in mebbe it wasn't,' says he.

"'That were all he said. Then we went back to butcher the shoat. The pig wasn't in the yard an' the shed door were shot.

"'By jeezswax,' says I. 'That's funny,' says I.

"'Mebbe it were Reub, an' mebbe it hain't,' says he.

"'I went up an' opened the door, but I sho' shook his head. But he didn't say nothin' for quite a bit. Then he says:

"'Mebbe it were Reub, an' then ag'in mebbe it wasn't,' says he.

"'That were all he said. Then we went back to butcher the shoat. The pig wasn't in the yard an' the shed door were shot.

"'By jeezswax,' says I. 'That's funny,' says I.

"'Mebbe it were Reub, an' mebbe it hain't,' says he.

"'I went up an' opened the door, but I sho' shook his head. But he didn't say nothin' for quite a bit. Then he says:

"'Mebbe it were Reub, an' then ag'in mebbe it wasn't,' says he.

"'That were all he said. Then we went back to butcher the shoat. The pig wasn't in the yard an' the shed door were shot.

"'By jeezswax,' says I. 'That's funny,' says I.

"'By jeezswax,' says I. 'That's funny,' says I.

"'Mebbe it were Reub, an' mebbe it hain't,' says he.

TEMPERANCE NOTES.

SERMON BY FIGURES.

The Direful Conditions That Prevail in Districts Where the Saloon is Rife.

The accompanying diagram taken from a pamphlet issued by the Church Temperance Society of New York city brings vividly to mind the sad condition prevailing in parts of all large cities, and shows the terrible burden which the liquor traffic puts upon a class of people less able to bear it. The diagram shows the section which lies east of the Bowery and north of Houston street. It contains 15 blocks, and is pre-eminently the German section. In these 15 blocks live 16,391 persons, of whom 6,531 are German, 7,009 native, 555 Polish and Russian Jews, 331 Irish, 125 Italian, 135 British, and 1,965 miscellaneous. Among the "natives" are included all persons born in this country, and about one-half the whole number are children of German parentage. Of these 16,391 persons, 7,177 are parents, 3,334 sons, 3,238 daughters, and 1,782 lodgers. They are in 3,912 families, of whom 308 families live in suites of over five rooms each at an average rental of \$46.82; 262 families live in five rooms each, average rental, \$36.17; 1,001 in four rooms each, average rental, \$18.19; 1,467 in three rooms each, average rental, \$13.16; 927 in two rooms each, average rental, \$9.62; and 31 families in one room each, average rental, \$3.43.

PLAGER SPOTS ON A CITY'S LIFE.

As to church affiliation, 4,210 persons are Jewish, 5,011 Roman Catholic, 5,471 Lutheran, 1,803 Protestant Episcopal, 556 belong to other Protestant denominations and 1,510 are unknown, having no belief at all, or refusing to state their affiliation.

The diagram shows for this section 147 liquor saloons, an average of nearly 10 per block, and one saloon to every 27 families and to every 112 of population. Allowing the amount taken in by one saloon at \$4,500 per annum, which is about the average for the whole United States, each of the 147 saloons in this section would represent a family supporting one saloon worth \$32.59 per month, which is 1.5 times the average rent of the families occupying three-room apartments (\$13.61), and would, on the average, if spent in rent, increase the number of families in a saloon, the whole area, from 3,912 to 4,210. In a year by this 16,391 people in the 147 saloons is \$707,500, or over \$40 each to every man, which is two and one-half times the average amount spent for liquors in the whole United States.

FIGURES THAT LIE.

Fallacy of a Statistical Statement Issued by the British Medical Association (Largely Proved).

Some curious figures have been given out by the British Medical Association as the result of certain investigations into the question of longevity in connection with the use of alcoholic beverages. Deaths to the number of 4,234, taken at random, show the average age of temperate drinkers to be 63 years; of moderate drinkers, 59 years; of free drinkers, 55 years; of abstemious drinkers, 51 years. The analysis in the case of those who reached the age of 50 or more shows that 15 per cent. were total abstainers, 10 per cent. heavy drinkers, and 74 per cent. moderate drinkers. Of those who lived more than 90 years, 15 per cent. were total abstainers, 8 per cent. were heavy drinkers, and 75 per cent. moderate drinkers.

These results are being seized upon to bolster up the theory that the advancing, vigorous and progressive races are those which consume the largest quantities of alcoholic beverages, while the degenerate and non-progressive races consume the smallest amount; therefore it is argued that the degree of vigor in any race is in proportion to the quantity of alcohol consumed, and on the other hand the degree of degeneracy is in direct ratio to their sobriety and abstinence.

But it will not do to assume that indulgence in liquor is the cause of national vigor on the one hand, nor that sobriety causes racial decay in the other. The reasoning must go deeper than that. It is far more correct to say that the same causes, whether climatic or racial, which produce great physical and mental vigor, and superabundant vitality, in certain races or nations, also create a strong desire for the pleasures of alcoholic stimulation, and give the capacity for resisting the evil-effects of this indulgence; while on the other hand a feeble race can not use strong drink and still continue to exist.

With regard to the figures of the British Medical association, it is certainly fair to assume that the reason there appears to be a greater number of moderate drinkers who reach old age in that country than of total abstainers, is because of the fact that out of any number of persons selected at random, at any age past manhood, but few total abstainers will be found, and also that the moderate drinkers, in England and elsewhere, as a class, are very likely to be the most virile

and vigorous, and for that very reason the appetite for alcohol strongly developed, and the drinkers strong enough to control it. It can not be argued from these figures that the moderate drinkers would be sooner if they entirely abstained, nor that the total abstainers would live longer if they indulged in alcohol in moderation. On the contrary it is not more reasonable to assume that the average age of the moderate drinkers would have been greater had they been abstainers? There is too great a mass of direct medical evidence as to the harmfulness of intoxicating liquors used as a beverage to take better evidence than the figures above quoted to make any temperance man abandon his principles and give up the struggle to pulverize the ram power.—Cleveland Leader.

WHISKY AND BEER.

Appalling Figures Showing the Average Amount Consumed by the American People.

Americans are accounted a fairly sober people in the barbaric nations, but the figures of the internal revenue commissioner for the last year are enough to make a temperance crank stagger without a drop of whisky or beer, says the Atlanta Constitution. We distilled last year 87,349,844 gallons of liquor, not including 1,430,333 gallons of ale and stout, and 88,777,157 gallons of brandy, making in all 177,557,334 gallons of alcoholic spirits. Expert tasters estimate 63 drinks to the gallon. Therefore there were 5,604,062,891 drinks produced in this country. A conservative estimate of how much was imbibed across counters is about 37,000,000 gallons of spirits, or in other words we drink 6,000,000,000 glasses of whisky, for which we paid over the bar \$600,000,000, or \$5,000,000 more than all the annual appropriations of congress combined.

This represents a consumption of 100 glasses of whisky each year for every man, woman and child between the rocky-bound Pacific and the storm-tossed Atlantic, or, counting only the male adults, 500 glasses per week each. Of beer the figures are equally astounding. The consumption was 13,785,100,200 glasses, representing the expenditure for this kind of Teutonic hilarity of \$67,258,400, or about 10 cents for each inhabitant. In the neighborhood of 230 glasses are charged up in this colossal allowance. Therefore, if we do not average our daily glass we may be sure that our neighbors are getting the benefit of our abstinence. By estimating this year's internal revenue receipts from spirits on the basis of last year's production, with the increased tax of \$1.10 per gallon, the internal revenue receipts will be \$97,674,095.

A STRIKING ILLUSTRATION.

How a Doctor Silenced a Patient's Pleas for the Use of Alcoholic Stimulants.

A patient was arguing with his doctor on the necessity of his taking a stimulant, he urged that he was weak and needed it. Said he: "But, doctor, I must have some kind of a stimulant, I am cold and it warms me." "Precisely," came the doctor's earnest answer, "see here; this cork of list taking up a stick of wood from the box beside the hearth, and tossing it into the fire. "Now it is warm, but is the stick benefited?"

The sick man watched the wood first send out little puffs of smoke, then burst into a flame and replied: "Of course not, it is burning itself."

"And so are you when you warm yourself with alcohol, you are literally burning up the delicate tissues of your stomach and brain."—Ram's Horn.

Stimulants for Cavalry Horses. "It has been the custom among cavalry troops to stimulate the horses with whisky," said Col. A. L. Gate, "and I have always thought it the right thing to do. In fact, I have done it myself and with seemingly good results, but I have been reading some reports of experiments made in Germany, where the custom has been followed for a long time, and they seemed to prove that horses so stimulated are much more apt to die from over-exhaustion than those that are not treated in any way. It is a fact which I have noticed myself, that horses frequently become drunkards, the appetite growing until it becomes uncontrollable."—Cincinnati Enquirer.

Not One Redeeming Quality. The dictionary tells us that temperance is total abstinence from all good things and moderation in all good things. Experience, science, and common sense tell us that alcoholic drinks are bad without one redeeming quality. And the mighty army of total abstainers of all the great temperance organizations and churches have accepted the definition as the only true one to adopt.—National Temperance Advocate.

BITS AND BRIEVITIES.

CLEVELAND, O., has one saloon to every 175 inhabitants.

Stop moderate drinking and we will soon have no drunkards.—Ram's Horn.

The saloons would have to stop tomorrow, if the devil had to tell the truth.—Ram's Horn.

Under the "united" or tax law passed by the Iowa legislature last winter, there are over 1,000 open saloons in the state already.

The W. C. T. U. of the District of Columbia have passed resolutions highly commending Mrs. Cleveland for her firm stand against drinking.

Some one commending Philip of Macedonia for drinking freely. "That," said Demosthenes, "is a good quality in a sponge, but not in a king."—Johnston.

The Wesleyan Methodists of Great Britain have 1,154 temperance societies with a membership of 68,798. Their Bands of Hope number 4,222 with a membership of 435,411.

According to the statistical abstract of the United States the total cost of liquors consumed in this country annually is over sixteen dollars per capita, twice as much of the total amount of the federal revenue.

MISCELLANEOUS.

—If the devil couldn't lie he would have to quit.—Ram's Horn.

—Constantine the Great had a sword made to order for \$80.

—Goswills for pens sold in London in 1542 at twenty cents a thousand.

—It is stated that a Congregational lady devotes all eggs laid on Sunday to missionary purposes.

—In 1455 peaches cost in Italy twelve cents a thousand. They were very small, hardly exceeding the size of almonds.

—It is recorded that Elizabeth bought a "cattle of Malta" for \$5.25 from a sailor, and at the same time a "monkey" for \$4.50.

—During the time of Christ two sparrows were sold for a farthing, or, according to another evangelist, five were sold for two farthings.

—The Empress Josephine once paid \$2,000 for a dress, and so angered the emperor that he ordered the dress-maker to be sent to prison.

—It is believed by microscopists that the highest powers of their instruments have not yet revealed the most minute forms of animal life.

—Self-assertion, in utter disregard of the rights and claims of others, has in many famous men amounted almost to madness. Carlyle was a noted example of this form of eccentricity.

—In England the temptation to adulterate tobacco is much stronger than with us on account of the higher price. Dock, rhubarb, colt's foot and other kinds of leaves have been occasionally employed, but their use is not frequent, as a very heavy fine is inflicted for the offense.

—We accompany the youth with sympathy and unfeigned adoration of the wise to the gate of the arena, but it is certain that not by strength of ours, nor by the old sayings, but only on strength of his own, unknown to us or to any, he must stand or fall.—Emerson.

—Tobacco has not been found growing wild in any part of the world, and its original abode is, therefore, unknown. It is believed to be a native of tropical America. It is sometimes found growing as a weed, but in all cases the plants have been traced to an Indian field or settlement.

—The use of the telephone on Australian sheep ranches is becoming popular. In this country its employment is mentioned on the Clark employ in Montana, where all the sheep and shepherds are watched and handled telephonically, by means of six stations, all communicating with a central point from which come weather signals, orders, etc.

—One of the latest applications of electricity is to the sealing of cans of fruit and preserved meats. A conductive layer is formed on the top of the can and a metal coating is deposited by the ordinary methods of electroplating. The process is being also applied to the sealing up of bottles of wine, beer and chemicals with a metallic coating or capsule.

—Persons who complain of the lack of wearing qualities in the silk they purchase, may be interested in knowing that much body and weight is given to the fiber by various treatments. One of the favorite processes consists of giving the silk baths and dips into tin salts. The solution is so strongly acid that the silk cannot be manipulated with the hands. One immersion is a thirty per cent. solution adds eight per cent. to the weight of the silk, and the other baths add twenty-five per cent. or thereabouts. There are various cleansing and finishing processes to follow the treatment, but all are so very carefully conducted that the weighting material may not be disturbed.

—It has for a long time been the belief that meters for gas and water were not as reliable as the companies would like to have consumers believe. Interested persons at Mannheim, Germany, have been investigating meters, with results not at all favorable to the meters themselves. Many of them registered far more than was consumed, and as a rule, they were neither accurate nor regular. The vibrations caused by bad plumbing and other causes accounted for some of the waste, and a check valve and air chamber were recommended in order to equalize the pressure. It is said that very sudden shutting off of either gas or water will cause the meter to over-register. There should be some simple and effective way to regulate meters. As matters now stand, the producer has things all his own way, and the consumer has no redress whatever.

—Odessa, which is frequently described as the Liverpool of Russia, and which in point of trade and prosperity ranks as the most important city of the empire, has just been celebrating the centennial anniversary of its foundation. Built on territory ceded to Russia by Turkey in 1792, the foundations of the present city were laid in 1793, and when, at the beginning of the century, the French empire, the Duc de Richelieu, arrived upon the scene to assume his duties as governor-general—a post to which he had been appointed by Emperor Alexander—there were only 400 houses and about 6,000 inhabitants in the place. Today the population is over 200,000 of whom no less than 150,000 are Hebrews, and there is no city in the empire more beautifully endowed with magnificent public buildings, or where the inhabitants are possessed of greater wealth, mostly amassed by commerce.

A Deliberate Insult. Mother—Why were you fighting with that boy? Little Johnny—He insulted me. He said, "Johnny, get your hair cut."

"I don't see anything very insulting in that."

"You don't? Why, it's just the same as saying I'm not a good at foot ball."

—Good News.

No Hope There. Mistress (thinking about dessert)—What kind of pies are you most familiar with?

New girl—Bakers' pies, mmm.—N. Y. Weekly.

FUNGTEN PARAGRAPHS.

—The speaker of the house—Most anybody's wife.—Philadelphia Record.

—An honest man is the noblest work of God; but many that pass as such are the products of the paint can.—Park.

—We cannot tell how soon we shall have to leave this earthly sphere. Even the hours of a clock are numbered.—Yonkers Gazette.

—"Is drink a poet?" "No; just hard times; couldn't raise enough money to have his hair cut."—Atlanta Constitution.

—Facts and several other animals have a false eyelid, which can be drawn over the eyeball, either to cleanse it or to protect it from too strong a light.

—Over 1,000 yards of linen cloth have been unrolled from one manny. The cloth in texture resembles the cheese-cloth of the present somewhat; it is finer in quality.

—"Do you think blondes have more admirers than brunettes?" She—"I don't know. Why not ask some of the girls who have had experience in both camps?"—Life.

—Friend—If your washwoman charges by the piece, it must be rather expensive. Young Housekeeper—"O, no. She loses so many things that her bills are never high."—N. Y. Weekly.

—"My dear," said Mr. Kleckles, "

RATES OF SUBSCRIPTION:
This paper is published every Thursday morning at the following rates:
One copy one year.....\$ 1.50
One copy six months......75
One copy three months......45
One copy one month......15
Single copies......05

ADVERTISING RATES.
First insertion for square of ten nonpareils 25 cents; each additional insertion after first day 10 cents per square of ten nonpareils. Positively no deviation will be made from the above rates.

REMITTANCES:
Remittances made by money order, postal note, registered letter or bank draft will be at par. If by check, at the risk of the sender. Address: THE REPUBLICAN, Oakland, Md.

THURSDAY, DEC. 20, 1894.

To Our Patrons.

In July we sent out bills for subscriptions, etc., and only a comparatively small number of our friends remitted what they owed us.

On January 1 we will again send bills to all those who are one or more years in arrears, with the full expectation that the accounts will be promptly settled.

We give this notice so that it will be timely and that no one may have any excuse for not settling immediately after they receive their account.

It should be clear to everybody that ex-President Harrison is not seeking another nomination. What is the use of bothering him about the matter and filling the newspapers with columns of incoherent gossip? General Harrison has served his country well. If it shall have further use for his public services it will get as good an article as before. This should make everybody happy and willing to await developments.

Gold Vanishing Again.
Notwithstanding the two \$50,000,000 loans the gold reserve of the treasury is again below the \$100,000,000 point with signs of going lower. Persons who put in the gold to get the bonds are coming forward with the governments' notes to get back the gold. So it goes and will go as long as the present system continues. The administration does not attempt to deal with this situation, but exerts its influence to drive through a measure with a state-bank issue attachment. Of course it will be necessary to sell more bonds to stiffen up the gold reserve. How often this process will have to be repeated is an interesting question.

The Sunday American's political review for the week contains the following: "The name of Mr. Lloyd Lowndes, of Cumberland, is also being very favorably received in connection with the next governorship. Mr. Lowndes is regarded as possessing in an eminent degree those qualifications which make a popular and successful candidate."

The Sunday News likewise mentions Mr. Lowndes as being very strong in Washington, Allegheny and Garrett counties. In the opinion of a great many well informed people in various parts of the State, Mr. Lowndes is by far the strongest and most available candidate yet named in connection with the Republican nomination for governor. The Lowndes boom is losing none of its vitality.—Cumberland News.

Much Cry and Little Wool.

A great many people who are not pensioners, as well as the men who receive the bounty of the nation for their services in its hour of trial, will be grateful to Gen. Sickles for the protest uttered by him in the House of Representatives. The general is a Democrat, but he said he wished to express his disgust with the reiterated charges of fraud in the pension roll, which are made in the President's message, the report of the Secretary of the Interior and that of the Commissioner of Pensions.

The administration having conceived an idea that such frauds existed, set about to unearth them, but nothing very startling has been brought to light. The failure to discover frauds, even after a large force of detectives had been employed

for the purpose, had not prevented the officers of the government aforementioned from continuing to harp on the same string; and it is no wonder that the old general felt impelled to defend his comrades from what he aptly terms slander. With almost a million names on the roll and \$150,000,000 disbursed in pensions annually, he declared that the fraud discovered was utterly insignificant, and should be a subject of self-congratulation by every soldier in the land.

Mr. Getty and the "Democrat."

To the Editor of The Republican.
In the Democrat of Dec. 6th was a letter from ex-Senator Wm. R. Getty in which he gave his ideas of the cause of the recent Democratic defeat and tries to steady the nerves of the Democracy of Garrett county as to the result of the coming campaign.

Mr. Getty is a man who has had considerable experience in public life and is to-day one of the ablest leaders of the Democracy in the county. Mr. Getty gives as a reason for the defeat of his party (as we are led to infer from his language) "that it was drifting too near Free Trade." He says, "I believe thousands of Democrats so thought and remained at home on election day trying to find out where they were at." We are glad to see him make the following assertion as to the Wilson bill: "You or I nor any other person now living will ever see a lower all around tariff law become a law in this country." In this we fully agree with him because the people have had enough of Democracy to last them for a generation to come. If they have the tariff as low as they intend to make it, then Othello's occupation's gone.

The leaders of the Democracy are seemingly bowing to the inevitable, but the people will have their "weather eye" upon them for some time to come. If they have truly repented of their foolishness they must bring forth fruits meet for repentance. We have heard it often in the past that they were not in favor of Free Trade, but readers of the political history of the country know otherwise. For many years the Democratic party has been in favor of Free Trade and often have boldly declared in favor of it. For proof of this see Democratic platform of 1848, which says: "The fruits of the great political triumph of 1844 * * * have fulfilled the hopes of the Democracy of the Union * * * in the noble impulse given to the cause of Free Trade by the repeal of the Tariff of 1842." The platform of 1852 was not in favor of Protection by any means, and was not the platform of 1856 a Free Trade platform? Did it not declare that "the time had come for the people of the United States to declare themselves in favor of free seas and progressive Free Trade throughout the world? Was not that plank reaffirmed in 1860? Did not the platform of 1888 endorse Cleveland's Free Trade message and the Free Trade Mills bill? Did not the platform of 1892 declare Protection to be unconstitutional?

Is there a leader in the Democratic party in Garrett county who believes that to-day it is not a fact that men of the Sam Randall type were "sat down upon" and made to take a back seat in the councils of the party? The record shows many facts to prove that the Democratic party is a Free Trade party. The people can no longer be deceived by the alluring cry of "Tariff Reform." They have had an "object lesson" which will last them for the next generation.

Mr. Wilson, speaking of the defeat of his party, said it was a "kick from the heels of the American people and that there was very little brains in it." We fully agree with Mr. Getty that "the people are not for Radical Free Trade, not even in solidified sunlight," and it is a fact that to-day we have the lowest duty on coal that we have ever had in the history of the country. It is also a fact that Mr. McKaig, the gentleman whom Mr. Getty helped elect, voted in favor of radical Free Trade on "solidified sunlight." The people thought are with them no more on wool, lumber and iron than on coal.

Mr. Getty asks, "Has not the party carried out to the letter every pledge made in the Chicago platform of 1892?" How about the ten per cent. tax on state bank issues? Did you carry out your pledge to the old soldier? Did you ever carry out your pledge upon the tariff? Mr. Getty asks, "How can we face the people after indulging in such outrageous discriminations and violations of principle?" That does not sound very much like they had redeemed every pledge, does it? Mr. Getty gives good advice to

the Democrats to stop "all Free Trade foolishness." "Foolishness" it surely is and yet Mr. G. adds, "and if we expect to regain that which by our own folly we have lost we must stand as did the party in 1892 and for the same principle of tariff reform," which is in plain language Free Trade, for your platform of 1892 denounces Protection as unconstitutional. No, you must find something new. "Tariff Reform" has become an old chestnut and the people have fully realized what it means.

The Republicans of this section are looking forward to the campaign of next year when Maryland will be redeemed from Democratic misrule and the Hon. Lloyd Lowndes will be governor of this old commonwealth with a Republican legislature that will pass a just and equitable assessment law. The people cannot be deceived longer. Gov. Brown has said "the people are in the saddle" and they fully realize that if we have unjust burdens the Democrats are responsible. As an economical party in State and nation they are a ~~Free~~ failure. A reassessment the people will have, but not from the Democratic party.

There are other questions to be talked of but we will talk of them later.

Mountain Lake Park.
Forty-five families residing in the Park this winter.

Prof. Morton is teaching a select school. He is boarding with Rev. Baumgardner's family.

The ladies of the W. C. T. U. gave a successful box social Friday evening, and Sabbath night had a public lecture, Supt. Rudisill making the address.

M. L. Fleming, of Fairmont, W. Va., purchased last Thursday a lot on F street, for \$300 in cash. He will build in the spring.

C. W. Comer, of Wheeling, spent the latter part of last week at the Park.

Miss Katie Thompson, principal of the Bloomington public school, was a guest of Mr. and Mrs. J. L. Eichard last week.

Prof. Liminger has secured the school house for a private school to be opened after the holidays.

M. M. Comerford, of Fairmont, W. Va., has purchased lot No. 33, Price, \$300.

Mrs. L. A. Rudisill and children left last Wednesday for Cincinnati to spend the holidays. Mr. R. will follow Saturday.

The Canton, O., Bridge Co., put in last week a substantial wrought iron bridge across "Little Young." It is 20x24 feet with a four inch oak floor. The bridge was built especially for the Park and is of a handsome pattern. May many like it be placed over the streams of our country. We congratulate the council in the selection of the design. The bridge rests upon solid rock abutments laid in cement—a splendid job of masonry. The bridge cost the Park Community nearly \$500.

Capt. J. M. Jarboe, of Oakland, has the contract for building the handsome cottage on the lots purchased by Dr. Nibiser, of Baltimore, on the corner of Oakland avenue and I street.

Rev. J. A. Fullerton, D. D., has arranged for the erection of a cottage on his lots on the south-east corner of E and Oak streets, and will occupy it next summer.

The residence of Supt. Rudisill on the north-west corner of F and Oak streets has been enlarged by the addition of a second story on the south wing, the addition of a porch 11x16 feet, a large bay window to the dining room and painting the entire house. Gravel walks have been put down on both street fronts. The grounds have also been improved. When the other contemplated improvements are made this will be one of the most desirable properties in the Park.

Contractor W. R. Johnson has the contract for the erection of an \$1800 double cottage on the north-east corner of F and Cedar streets for Miss Ida Ingman and Mrs. Alice Haymond, of Fairmont, W. Va.

Edward Smouse's two-story cottage on the corner of N street and Wheeling avenue is nearing completion. Ed. is the happy owner of four lots.

Conrad Michael's new eight room cottage is about completed. The cottage is on Deer Park avenue and faces Wheeling avenue and has a picturesque outlook.

S. E. Flowers' new cottage on the corner of K street and Philadelphia avenue will have twenty-one rooms and a large cellar. It will have a mansard roof, and will be used as a boarding house.

The Assembly House is to be considerably improved in the spring. A large front hall, a parlor with a fire place, an enlarged dining room, and a first floor bed room are among the improvements. Mrs. Sawyer has already a number of rooms engaged for next summer.

The plans for the enlargement of Hotel Dennett have been made.

The building, when enlarged, will be twice the size of the present structure, making it one of the largest hotels in this part of the country. Grate fireplaces will be in the halls. Mine host Dennett is a "hustler." Besides running a hotel at the Park, he has large restaurants in Brooklyn, New York City, Philadelphia, Baltimore and San Francisco, and will erect a hotel on the farm on which Abraham Lincoln was born.

Mr. Wolf is putting the eight-acre park of the Mountain Lake Hotel in fine shape. Walks and drives are being laid out, the grand forest of oaks is being trimmed, and the grounds cleaned up. No hotel in this mountain summit has a more beautiful forest of oaks unless it be the B. & O. hotel at Oakland. When the \$5000 addition is put on the west end of the building it will be an imposing structure. Last summer this hotel could not accommodate the demand for entertainment.

Dr. J. G. McLain, of Wheeling, has had his eight lots on the corner of Pittsburgh avenue and O street greatly improved. The doctor expects to build next summer. He has one of the most picturesque outlooks to be found in the Alleghenies. A beautiful view of Mt. Lake is had, also of the surrounding mountain tops. No wonder he is delighted over this, his third investment at the Park.

Dr. J. P. Goucher, president of the Woman's College, Baltimore, has secured eight choice lots on Wheeling avenue, extending from P street to O street. These lots are on the highest grounds in this section of the country. My, what a view! Beautiful, grand! On the east is that beautiful sheet of water—Mountain Lake; beyond that the numerous tall peaks of the mountains; a splendid view of the B. & O. is on the south. It is a charming spot. The doctor possesses ample means to erect a handsome mansion on this delightful location.

Mrs. Capt. Pierce, of Baltimore, has invested \$600 in three lots facing Crystal Spring Drive and overlooking the lake. From them the first view of the B. & O. trains as they enter the glades, is seen. No wonder that so many have envied Mrs. Pierce in her location. In the near future she will build a summer home on this favored spot.

Squire Crane, who has supplied the Mountain Lake Park cottages with ice the past years, taken from the lake, has again leased the ice house and will supply the people of this community with mountain lake crystal ice, notwithstanding all other reports to the contrary. The Squire can appreciate a good thing when he sees it.

The Mountain Lake Park Association, in the enlargement of the lake at a cost of several thousand dollars, has in view the utilizing the lake in winter for ice purposes and expects in the near future to harvest thousands of tons of ice, and as wholesale dealers ship ice to many points on the B. & O. railroad. Three large ice houses are to be erected to store ice in for the summer trade. The first section is now nearing completion. It is 40 feet wide, 80 feet long and 30 feet to the square and will hold about two thousand tons of ice. The engine house will be built south of house No. 1. The ice will be carried from the lake to the ice houses on an endless chain operated by steam. During the ice cutting season cars will be loaded the same way. The latest improved snow plows, markers and cutters will be used to harvest the ice in the most economical and best manner. This new industry of Garrett county will give employment to a number of men during the winter months.

It is not expected that this can all be accomplished this winter, but one year from now orders will be solicited for mountain lake crystal ice. Supt. Rudisill has a force of men getting out cross-ties to extend the switch of the north side of the B. & O. railroad to the lake ice houses. As soon as the ties can be made, the road bed will be made and the track put down.

During the summer this side track will be used by the numerous excursion trains that come to the Park. Excursionists will be landed at the platform at the lake if they desire. By the use of this side track in getting off and on these trains much danger from passing trains will be avoided.

A "lodge," as the English term it, will be built among the trees near the west shore of the lake for the use of the man who will have charge of the boating and fishing of the lake.

The glade between the lake and the railroad will be cleared and seeded to grass. A large scope of ground on the west shore of the lake has been plowed and will be put in grain preparatory to being seeded to grass.

The lake will be one of the largest, if not the largest in the State. The dam at its base is 65 feet. The centre is a core of broken rock,

clay and sand eight to ten feet in width. The top of the dam will be 20 feet wide. The "spill" will be built of solid masonry and will be 50 feet long. A driveway will extend across the dam. The improvement contemplates a drive along the east shore of the lake to the Deer Park road, near the northern boundary line of this 800 tract of land. A bridge will be built across Broad Ford run to Crystal Spring drive, connecting it with the Lake drive.

Thus gradually are the well matured plans of the Park Association being carried out. For years the Association has mapped out a line of improvements, and year after year they have put these plans into execution.

Debt has been avoided. In all these years the Association has never had a check dishonored by the bank; never a judgment rendered against it; never a mortgage placed upon its property; never a promise made but which has been fulfilled, thousands of dollars have been paid to the citizens of Garrett county to make these improvements. Slowly, securely has the work gone on, until to-day an investment at Mountain Lake Park is considered as safe as a government bond.

When an enlarged auditorium was demanded, it was built; when electric lights were required, lo and behold they came; when a system of sewerage and water works were needed, the subject received proper attention. Thus has it ever been and thus will it ever be.

Each year the founders of this Christian resort have seen a steady, reliable growth in the number of new houses, the opening of new streets and avenues and each year has the sale of lots advanced over the preceding year. The sales for the year ending Dec. 15, 1894, reached the gratifying sum of \$11,000.

Wooden bridges are giving place to substantial iron structures, narrow inch walks have disappeared and in their place 8-foot two inch oak walks are enjoyed. The latest improved road machines are used to grade the streets and avenues, and shortly a large iron roller will be here to solidify the drives.

In the past Mountain Lake Park has been the leading resort of the Allegheny regions. Its growth and its prosperity has attracted moneyed men and speculators to this mountain region, and numerous additions and resorts are opening up on the line of the B. & O. railroad from Altamont to Terra Alta. The future growth, the magnificent summer programs of the Park, the extensive advertising of the Association will assist these new ventures in their efforts to become established, and as they grow Mountain Lake Park will continue to develop in all its interests and be the ideal Christian health and summer resort of the Allegheny mountains.

Its great Chautauqua and summer schools, its undenominational and international camp meeting, its national W. C. T. U. school of Methods, the annual convention of local preachers of the United States will continue to attract the best class of people to this mountain summit and add to the income of our county tens of thousands of dollars.

The wonderful sale of lots, the astonishing amount of improvements of the past year is the result of honest advertising, the successful camp meeting, the W. C. T. U. convention and the Chautauqua and the prompt payment of all claims in cash, and the fact that the Association has fulfilled its promises.

The Park has no connection in any way with any other resort, nor does or will its future depend upon anything else than upon the reputation it has made for truthfulness in all its representations, honesty in all its transactions, and a determination to maintain a resort where the sanctity of the Sabbath is observed, where drunkenness and gambling is prohibited by restrictive laws. Mountain Lake Park is no rival of any resort that may be established on this mountain summit. It has its mission and will fill it.

Resolutions of Respect.

At a regular meeting of Miners' Sunshine Council No. 81, Jr. O. U. A. M., of Bloomington, held Dec. 11, 1894, the following resolutions were unanimously adopted:

WHEREAS, In His wise and benevolent ruling, it has been the will of Almighty God, our Heavenly Father, that death has entered our portals for the first time, and taken from us our beloved and esteemed brother, Isaiah Poland.

WHEREAS, In view of the loss we sustain by the removal of our brother and the still greater loss by the bereaved family and relations of the deceased, yet we have the pleasant thought that his name is recorded with the angels in Heaven; therefore be it

Resolved, That we humbly bow in submission to Him who doeth all things well, knowing that his

tender mercies endureth forever.

Resolved, That by the death of our late brother we lose an honest, upright and faithful member, one who has always honored and been an honor to his Council and practiced in his daily life the principles of Virtue, Liberty and Patriotism.

Resolved, That by the suddenness of his departure it furnishes another divine warning to be ready for we know not at what hour the Son of Man cometh.

Resolved, That we as a body tender our heartfelt sympathy to the widow, orphan and relatives in their sad bereavement and commend them to Almighty God for care and protection.

Resolved, That as a token of respect we drape our charter in mourning for sixty days, and that each member wear a bow of mourning for the same period of time, and that a copy of these resolutions be presented to the family of the deceased brother, placed on the minutes of this Council and be published in the papers.

JACOB STUMP,
ROBT. B. JOGAN,
JNO. H. MILLER,
Committee.

North Glade.

The following is the program for the Christmas entertainment to be held at this place Dec. 24th, at 7 o'clock p. m.:

Scripture lesson and prayer, by the superintendent.

Address of welcome, by C. M. Miller.

Song, "Joy to the World the Lord is Come."

Lesson, "The Prince of Peace," by school in concert.

Song, "I'll away to the Sabbath School."

Select reading, by Miss Lillie Garlitz.

Dialogue, by Albert Fitzwater and Miss Mollie Beckman.

Recitation, by Edith Baldwin.

Lesson, "Christ Teaching by Parables," by beginners' class.

Song, "Growing up for Jesus," by children.

Recitation, by Noella Pritts.

Select reading, by Jas. Walters.

Recitation, by Samuel Ralston.

Select reading, by Miss Etta Howell.

Song.

Recitation, by Jennie Beckman.

Recitation, by Letta Fitzwater.

Select Reading, by John L. Fitzwater.

"One Hundred Years Ago," by Lettie Garlitz and J. L. McRobie.

Recitation, by Sinclair McRobie.

Recitation, by Bessie Beckman.

Song.

Presentation of gifts by Santa Claus.

Kind words, by Jas. Hardesty, G. W. Moon and A. F. George.

Closing hymn.

J. L. McRobie, Supt.

A Christmas Reminder.

The Postoffice Department through First Assistant Postmaster General Jones, wants the great American people who are beginning to send Christmas gifts through the mail and who will keep up this sort of thing for about two weeks, to be careful to weigh their packages and put sufficient stamps thereon. There is a heartlessness about the postal machinery which sends Christmas presents to the Dead Letter office if the uttermost farthing of postage has not been prepaid. Letters that are overweight, and which have a 2-cent stamp on them are forwarded, and the excess postage collected from the recipients, but the Postoffice Department does not treat packages with that much consideration. Persons mailing such postal matter, should bear this in mind, if they wish to be sure that their gifts will reach the addressees promptly.

Deer Park.

Christmas is next.

Mr. Frank Laughlin is home to spend the holidays.

Miss Minnie Stemple left for her home at Frankville last Sunday after a week's visit with friends at this place.

Mr. Chas. Bunce of Mt. Lake Park, is doing some carpenter work for Mr. A. Freeland.

Mrs. C. H. Tilton is having her property remodeled. Mr. Ed. Grim is doing the work.

Mr. Joseph Marville and family have again settled in our town after quite an absence.

Our popular cabinet maker, M. V. Ginn, secured the contract for the recitation benches for the new school building at Oakland.

Our country friend, Mr. Holt-smider, has our deepest sympathy in his affliction. He has buried three children in the past week, all of them dying with that dread disease, diphtheria.

Mr. Chas. George is putting a steel roof on the new building of Mr. Channey Glass near this place.

We need a brass band in Deer Park and we have the talent here to get up a good one. Boys, get together and organize. We know you have the brass and the rest don't cost much. Let us get out of the woods. HURRICANE.

ARE YOU HAPPY!

Make yourself and friends happy by purchasing your Christmas Goods of us.

We have just received a full line of Xmas goods, of every description. A nice line of Toilet Cases, Work Boxes, Writing Desks, Photo Albums, Autograph Albums, Jewel Cases, Shaving Sets, Whisk Holders, Photo Cases, Necktie Cases and many other beautiful things suitable for presents.

We have also a beautiful line of celluloid novelties such as Calendars, Necktie Cases, Jewel Cases, Whisk Holders, etc.

RIGHT NOW

whether you wish to buy or not, it is worth your while to see our collection of Xmas Novelties. Assortment full and very attractive. Prices we believe to be the very lowest.

Silverware! Silverware!

We have the latest novelties in silver, such as Pin Trays, Bon Bon Boxes, Calendars, Glove Buttons, Paper Cutters, Book Marks, Satchel Tags, Belt Buckles, and many other novelties.

We also have a full line of sterling and plated hollowware, among which are Butter Dishes, Berry Dishes, Casters, Cream Pitchers, Pickle Dishes, Syrup Pitchers, Sugar Dishes, Cake Baskets, Napkin Rings, Knives and Forks, etc.

Don't forget that we are giving silverware away. We present you with your choice of any of the above pieces of silverware when you have purchased goods from our store to the amount of Thirty Dollars. We guarantee every piece for ten years.

FOUND

Is an exceedingly pleasant word, especially when you have lost anything of value, since it indicates that you have recovered it. There are no lost articles in our stock of

WATCHES, CLOCKS, JEWELRY AND SILVERWARE,

But all the same you will find many things which it will please you to possess. You will find the stock going at very reasonable prices, too. Don't lose a moment in profiting by our offers. Lost jewels may be found, but lost opportunities—never. Find what you want to-day.

ANOTHER ADVANTAGE.

Persons intending to buy goods for holiday presents, but who are for some reason or other not prepared to buy just now, can select from the full stock early, and by depositing 20 per cent of the purchase price have the goods laid away until called for.

Bring us your jewelry repairing. All work guaranteed to give satisfaction. Our work is done by one of the best workmen in Western Maryland, P. J. Smith, of Cumberland, Md.

It is surprising how far a dollar will go in buying goods at our store.

Musical Instruments.

We have the largest and most complete line of Stringed Instruments in town. Guitars, Banjos, Violins, Mandolins, Accordions, Phonoharps, Autoharps, Zithers, Fifes, Drums, Harmoniums, in fact everything in the line of music.

Yes, we can suit you and tickle your purse to the opening point.

OH, HOW SWEET!

We have a Ton of Candy of every description and kind, from 7 cents per pound up to 75.

Of course we have a nice line of fruits and vegetables always on hand.

GROCERIES.

Well, they all come in under the Wilson bill.

We Want Your Trade.

Our stock is large, our goods new, our prices low.

Don't buy until you see what we have.

Inspect us, criticise us, know us, and you will find we deal fair and save you money. Our prices are always right.

We will pay cash or exchange goods for Butter, Eggs, Lard, Poultry, Fruit, Vegetables and Country Produce of all kinds.

Thanking you for your kind patronage thus far, and soliciting a continuance of the same, we remain,

Very truly,

W. H. MALETTE,

Fancy Grocer and Jeweler.

OAKLAND, MD.

The School Question.

To the Editor of the Republican.

Will you please allow me space in your paper for a few thoughts in reply to our friend A. M. of Keyser.

He still seems to think that the teachers' salaries should be reduced \$2 per month in order to run our schools five months. I agree with him that the teachers would rather teach five months at a reduction of \$2 per month than to teach 35 days at the salaries now paid. But would the reduction run our schools five months? By no means. We have about 134 teachers in Garrett county. Deduct \$2 per month and for 12 months, the length of our term this year, and you have \$2469. Now it costs us over \$200 per day to run our schools and with this reduction we could run our schools about two days longer.

Our friend does not realize what it costs a teacher to prepare himself for the position. He must also remember that a teacher has expenses to bear while teaching. I will endeavor to show our friend what the teachers are making at the salaries now paid:

If we should have four months' school a first grade teacher who is getting \$30 per month would make \$120. But now consider the expenses. He must attend Normal a term of ten weeks and that is generally held when work is plenty and wages good. His time then is worth at least \$40 and his board, books and tuition will cost him at least \$36. Boarding while teaching four months will cost him at most places \$36. Now add this up and you have \$112 in expenses. \$120 less \$112 equals \$8, which he will have left.

A second grade teacher that would have to teach for \$33 per month would come out \$19 in debt. As A. M. puts it that would be roosting rather low, would it not? If I am not badly mistaken that would cut him out of a roosting place altogether. I am positive it would be lower than our Keyser friend would like to roost.

I think this statement is sufficient to convince our friend (by using his good common horse sense) that no reduction should be made.

Our friend also says he would like for X Y Z to explain why it is that all classes of laboring men must submit to a reduction of wages. This has nothing to do with the reduction of the teachers' salaries, but I think it is very plain and easy to understand.

The majority of the laboring men are not required to spend two and a-half months of their best time in each year to prepare himself for his work as the teachers do. They can work the entire year and therefore can better afford to submit to a reduction of wages. It matters not how hard the times are the teacher must devote part of his time in preparing himself to discharge his duties. I say in conclusion, give him a decent salary and you may expect some good to result.

X Y Z.

Glade Valley.

Nice weather now. Christmas is coming and the Christmas trees are brought from every direction.

Mr. J. S. Guegy made a trip to Horse Shoe Run last Saturday. He expects to teach a school there this winter.

Mr. Oscar Roth is on the sick list.

Mr. David Guegy is getting ready to build a new barn.

Mosser Bros. are cutting saw logs and hauling them to their mill.

Mr. J. L. Hauser has cut a number of logs for the White Lumber Co., who expect to float them to their mill on the Little Youghiogheny.

Now that the election is over and the bond bill was so disgustingly defeated, everybody is trying to say what is best to be done in order to raise funds to carry on our public schools. One says this and another that, some even favoring a reduction on teachers' salaries. We have been giving some attention to this perplexing problem ourselves the past week and believe we can give them a pointer on this question. Why can't we have a reassessment made of all the taxable property of Garrett county. The last time the county was assessed was in 1876, eighteen years ago, and while there are still some farmers that pay tax to the full value, there are a good many who pay only a small per cent on the property they really possess. Now we believe that a new assessment would increase the funds considerably and could not some of the increase be used profitably in carrying on our public schools?

J. Bird.

FARM AND GARDEN.

THE ROAD LESSON.

It should be taught in Every Farm Home of the Country.

It has been truly said that the common highways of a country are at once the means and the measure of its civilization. This being the fact, it is astonishing that the United States has in it the worst system of common roads of any country enjoying a stable government. By those who have thought upon this important subject it has long been conceded that the wretched country roads in the United States entail upon the millions of the people the most serious tax with which they are burdened. Indeed, if there were any method by which the weight of this burden could be computed I am persuaded that it would be found to be greater than all the taxes levied by national, state, city and county laws combined. And yet the lawmakers in this country, as a general thing, treat this great question as one only of slight importance—a question that each neighborhood should solve for itself, or permit to go unsolved. As long as this indisposition on the part of the lawmakers lasts the road question is likely in its larger aspects to remain unsolved.

But in the meantime much may be done by forces hitherto not enlisted in the ranks of the road improvers to ameliorate the sad conditions existing for the most part in the roads of a neighborhood teaches the people thereof lessons that mere arguments never could. I allude to the wives and the daughters of the farmers of the United States. If they will cast the weight of their influence with the men who are earnestly laboring to improve the condition of the highways, then a great advance will have been made in the good cause.

Good roads contribute more than any other thing to this feeling of dissatisfaction among the young people, the departure of the young people makes farm life more tiresome and less cheery than it was before. It seems inexplicable that American lawmakers, when these facts have been pointed out to them over and over again, should still persist in regarding the road problem as unimportant. But they do so, and it is necessary, before any progress can be made toward better things, to recognize that they do. When we have reached this stage we are at the point where women individually and collectively, that is, each woman acting on her own account and all women working in cooperation, can effectively assist in the solution of one of the very gravest public problems that confront the American people. The men of the present and the men of the near future must be educated to know how grievously they are burdened and hampered by the sorry roads which connect village with village and farm with farm. If the women of America will take up this work of education the lessons will be surely and profitably learned, and we will not much longer be ashamed to have our country roads compared with those of other countries. And there could be no better time than this for the women of America to begin their intervention in this matter. The home is where the best lessons are learned, and the road lesson has been taken up at once, Landscape Architect.

DAIRYING IN DENMARK.

Some of the Implements Used by the Farmers of That Country.

From Prof. Georgeson's recent report on the dairy industry of Denmark we reproduce an illustration of a cooling box for butter. Prof. Georgeson says: "Butter coolers are found in every dairy. The cooler is a simple box made either of wood or in some cases of zinc, in which the butter is kept to cool after it is removed from the butter worker, and it remains there until it is time to give it the next working. The box is provided with one or more elephants on which the butter is put. In the illustration it represents the elephant, the slats and the butter. The box is covered with a lid on which is put a layer of broken ice, and the ice water from the melting of this ice runs

COOLING BOX FOR BUTTER.

down into the bottom of the box. To facilitate the cooling the butter is rolled into an arch, as shown in the cut. In large dairies these boxes are large enough to admit of placing two or three layers of butter to cool at once.

Every dairy is supplied with several scales of varying sizes. The decimal weight is used everywhere. Instead of moving the weight along on the lever arm, as we usually do, there are two platforms, one on which to place the object to be weighed and on the other the weights of different sizes. In many dairies they use a weight on the receiving platform for the milk, which has a basin holding from 50 to 75 gallons. The milk is poured into this, and when a certain weight is reached it is checked off and the basin is tipped so that it empties its contents into the large milk vat.

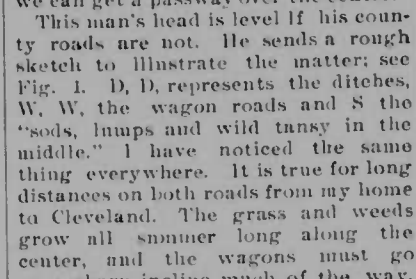

Many styles of buckets and milk cans are used. They are generally made of heavy tin and they are not infrequently enormous in size. The cans in which the milk is transported are of two general forms, square and round, and the mouth is so large that it admits a hand and arm readily. Frequently the weight of the can is stamped upon it, or it is stamped upon a brass plate and soldered to the can, thus obviating the weighing of the can.

If cream of different ripeness is mixed, there will be a loss in the churning.

SODS IN THE ROAD.

An Ohio Man Enters a Protest in Which Everybody Can Join.

An indignant subscriber from Wyoming, O., writes as follows: "Our roadmasters scrape all the lumps and sods and grass that they can get at and pile them along the center of the road for people to wear down. Such roads I can show you for miles and miles in Fulton county. This is a bore on the citizens. On the sides you will have to watch or you will upset into the ditch, and in the center a horse can't get along. If you have your indies with you, you do not hear very pleasant remarks from them on the road question. We want good roads today, and we do not want to wear down the scrapers full all summer and all winter and all next year, so that all winter and all next year, so that we can get a passable road over the center." This man's head is level. If his country roads are not, he sends a rough sketch to illustrate the matter; see Fig. 1. D, D, represents the ditches, W, W, the wagon roads and S the "sods," lumps and wild tansy in the middle. I have noticed the same thing everywhere. It is true for long distances on both roads from my home to Cleveland. The grass and weeds grow all summer long along the center, and the wagons must go on a sharp incline much of the way.

The heavy wear being on the shoulder of the axle on the lower side and on the burrs of the axle on the upper side. One long strip in Twinsburg on the main center road about two miles south of Twinsburg is a series of lumps exactly as the dump-scrapers left the loads—with not a particle of leveling. The sides slant so much that a load of hay will nearly or quite capsize and the middle is so "billyow" as to wrench a wagon terribly. I think the township trustees would be liable for damages should any occur. But small damage and annoyance constantly occur. Where the large four-horse road-scrapers are used they pile the sods, etc., along the center of the road. Unrotted sods should never, in my opinion, be put there, and if lumps are put there they should be well harrowed and rolled until they make a fine, smooth surface which will pack down even. If turf from the ditches must be used it should be plover a year before and rotted thoroughly. Then it handles far more easily and can be worked into a smooth road bed. The place for the wagon track in country roads is the level middle, not the sloping sides of the road—Ohio Farmer.

BIG BUTTER YIELD.

Remarkable Results Obtained by a Connecticut Dairyman.

Examples of very successful feeding of cows are becoming common, showing that dairymen are advancing with great rapidity in the art of dairying. From the homestead we select an example that may serve to inspire some one to better effort: "A yield of 502 pounds of butter per cow in a herd of 20 is the yearly product obtained by N. D. Potter, a progressive dairyman of South Coventry, Conn. Here is his system and his secret. If we use as a criterion, the system appears to be a good one. The cows are nearly all grade Jerseys, 17 of the 20 being dehorned. They are kept in milk from 10½ to 11 months, being bred as soon as possible after calving. The plan is to feed the cows all they will eat and to feed frequently, in order that they will clean up each ration. The grain used is a mixture made up of 100 pounds gluten meal, 200 pounds fine feed or middlings, and 200 pounds provender. The cows are fed at 4 a. m. with 3½ to 4 pounds of grain, this being the time of the morning milking, and at 6 a. m. 22 to 25 pounds corn silage. The stables are cleaned at 8:30 and the cows let out into a yard and watered with warm water. As soon as this is done they are fed from 3 to 5 pounds of good hay. At 12 m. the remnants and a good good hay to make about 2½ pounds per cow are cut up, a tablespoonful of salt and from 3 to 4 pounds grain added for each cow, which is mixed up with warm water.

Never fails of a Market. Dairying is the grandest help-out the farmer has to-day. There is not, in my opinion, the slightest reason for fearing that first-class butter, properly marketed, will ever fail to be profitable to the maker. There is too much poor butter manufactured for that. Let those who wish to profit by it make only a strictly high-grade article, and the price is all right for all they have to sell. Some localities may make one way of selling best, and some another. Each individual butter-maker must study the situation for himself. I am speaking of home butter-making, not to creamery butter-makers. I believe the place to make the butter is at home on the farm. Not that I would do away with the creameries, but for clear profit the home dairy will come out ahead if properly managed. The work, of course, is also greater than where the milk or cream is sent to the creamery.—Colman's Rural World.

How Pure Milk is Obtained. At a famous dairy in Berlin the milk is strained through wire sieves covered with a cloth over which the gravel is sprinkled. After the milk is strained the gravel is put in a hot oven, that any germ that may possibly have been strained from the milk may be destroyed. The gravel is thus used for filtering the milk any number of times. For the butter made at this dairy both sweet and sour cream is used, that made from sweet cream commanding the higher price. After the compartments containing a particular kind of milk are filled the wagon is locked, and the milkman who delivers it has access to the supply only through the faucets on the side of the wagon.

FIRESIDE FRAGMENTS.

—Apples and Cream.—A very pleasant breakfast dish, with the oatmeal may be made of fresh, mellow, uncooked sweet apples, pared, sliced, and covered with sweet cream, a light sprinkling of sugar being added.—Good Housekeeping.

—Canned Corn Soup.—Cook one pint of sliced potatoes until soft, and rub them through a colander. Steep one pint of canned green corn in milk, rub through a colander and mix with the potatoes, then add boiling milk to make the required consistency, season with salt and white pepper and serve.—Christian Inquirer.

—Sweethearts.—Paste may be rolled quite thin to make "sweethearts." Cut out with a heart-shaped cutter and lay one on top of another, or, better still, cut the sheet of pastry in two and lay one on the other, cutting through the two at once. Glaze the top and when done with a sharp knife split them apart and place a spoonful of some tart jelly between them. Place them together again, sprinkle with sugar and serve.—Orange-Judd Farmer.

—Veal Curry.—Cut up about two pounds of lean veal into small pieces. Cut a large onion and one large sour apple into slices, put them into a saucepan with a heaping tablespoonful of butter, and stir them about till lightly browned; then stir in a good tablespoonful of curry powder and a tablespoonful of flour. Add a pint of water and the veal, season with salt, stir thoroughly and cook gently an hour and a half, or until the veal is perfectly tender. Add the juice of half a lemon and stir it round very gently. Turn the curry on a hot dish and serve with a border of rice.—Pittsburg Telegraph.

—Browned Oysters on Toast.—This is a delightful luncheon dish. Take two dozen large oysters, keeping them separate from their juice. Mix smoothly the yolks of two eggs with a teaspoonful of flour; beat the oysters, season with salt and pepper; dip them in this mixture of flour and eggs and brown in hot clarified butter. When brown, lift from the frying pan and pour the juice from the oysters into the butter remaining in the pan; thicken with a dessertspoonful of flour smoothly blended with a gill of milk or cream; simmer until it thickens and the flour is cooked; put in the oysters until thoroughly hot, but do not let them overcook. Serve with French or Vienna bread.—Country Gentleman.

—Sweetbreads.—Sweetbreads require to be very carefully prepared before being cooked in any way. First soak them in lukewarm water to which a teaspoonful of vinegar has been added, for an hour or two. After three times changing the water, and after the third time, change the water and add a half. Then throw the sweetbreads into boiling water, and gently simmer for about seven minutes. After this cooking the flesh should be firm and round, but not hard. Then throw them into cold water for a quarter of an hour, wipe dry, and have them ready for use. After having been treated in this way, sweetbreads may be cooked in a variety of ways for an invalid, as into slices and warmed in a well-flavored white sauce. Another way is after cutting into slices to lightly fry the sweetbread, and then stew it slowly in a thick brown gravy.—Leeds Mercury.

BLACK AND TAN.

Reasons for the Peculiar Color of Certain Dogs.

When in Melbourne last year, I went carefully over all the dogs in show, with one of the judges, and we found the spots in all the black-and-tan terriers, foxhounds, deerhounds, collies, Irishers, etc.; but I could get no information regarding them from the experts.

In some of the highly-bred toy dogs, as the small black-and-tan terrier, I found on inquiry that these spots, formerly so very conspicuous, were being bred out, and had nearly disappeared. Their persistence through so many strongly-marked varieties, except those of late date, is singular, for there is fairly good proof that when first domesticated the dog was red or light brown, like the pointer, dingo, etc.

As far as I can see, we do not find the spots white on a black or dark ground; nor yet black or dark on a white or light ground. My explanation is that they have arisen as a permanent marking after the dogs "sported" to black under domestication, and have been preserved and developed through natural selection. Possibly they are protective, and simulate eyes.

One morning in Asia, just at dawn, I had occasion to go out into the garden, and while stooping to examine some flowers, near a fence partly covered with creepers, I suddenly saw an animal's head looking through, and what seemed to be two black and seemingly large eyes glared at me. Suspecting that a black leopard was about to spring over, I started back, clapped my hands, and shouted. To my relief, however, I saw a tail wag, and found that the spectator was a cow's dog, and very well, and which recognized me. The use of the tan spots—in this case at least—then occurred to me. May it not be that the spots thus serve a protective purpose, and have often saved the lives of dogs (black dogs) from the enemies, the smaller felines, such as the clouded leopard, etc.? Perhaps the matter is not new; but if it is, it seems worth looking into. I have several dogs with black bodies and heads; the tan spots, rather pale, are of the size of a shilling. I have shot one, keeping the skin of the head as a curiosity.—Nature.

Concerning the Nightcaps.

The nightcaps almost universally worn some twenty-five years ago are now quite as universally discarded. There is a diversity of opinion in regard to the wisdom of this change. While some doctors assert that there is much less baldness since they were abandoned, others declare, with equal fervor, that noncholia and catarrh are much more common since the nightcap was banished from the wardrobe.—Philadelphia Press.

Highest of all in leavening strength.—Latest U. S. Gov. Food Report.

Royal Baking Powder

ABSOLUTELY PURE

Economy requires that in every receipt calling for baking powder the Royal shall be used. It will go further and make the food lighter, sweeter, of finer flavor, more digestible and wholesome.

ROYAL BAKING POWDER CO., 105 WALL ST., NEW YORK.

The Sacrifice.
"George," said she, in a low voice, "would you make a sacrifice for my happiness?"
"Certainly," he replied.
"Would you give up smoking for my sake?"

"Give up smoking for my sake?" he repeated. "Then, after a silence, he exclaimed, hoarsely, 'I can refuse you nothing. I will do so. Hereafter when I smoke it will be for my own sake.'—Kansas City Gossip.

The Winner.
Boss—Get up from there and hustle. Nobody ever won success by sitting down.

Office Boy—Didn't they? What's the matter with the champion oarsmen and wheelmen and jockeys and drivers and them kind, I'd like to know.—Detroit Free Press.

Reasons For It.
"Baseball is much more moral than cricket," said the American to the Englishman.
"Aye, nonsense!" replied the Briton.
"It is a fact. Cricket is a wicked game."—Truth.

THE BUSINESS MAN'S LUNCH.

Hard Work and Indigestion go Hand in Hand.

Concentrated thought, continued in, robs the stomach of necessary blood, and this is also true of hard physical labor.

When a five horse-power engine is made to do ten horse-power work something is going to break. Very often the hard-worked man coming from the field or the office will find food in a few minutes which will take hours to digest. Then too, many foods are about as useful in the stomach as a bag of sand. It is in a fair way under a boiler. The ill-used stomach refuses to do its work without the proper stimulus which it gets from the blood. The nerves are weak and "ready to break" because they do not get the nourishment they require from the blood. The ill-used brain is morbidly wide awake when the overworked man attempts to find rest in bed.

The application of common sense in the treatment of the stomach and the full enjoyment of life and healthy digestion when Dr. Pierce's Pleasant Pellets to relieve a bilious stomach, or after a too hearty meal, and Dr. Pierce's Golden Medical Discovery to purify, enrich and vitalize the blood. The "Pellets" are tiny sugar-coated pills, made of highly concentrated vegetable ingredients which relieve the stomach of all offending matters easily and thoroughly. They need only be taken for a short time to cure the biliousness, constipation and flatulence, or torpor of the liver; then the "Medical Discovery" should be taken in teaspoonful doses to increase the blood and enrich it. It has a peculiar effect upon the living membranes of the stomach and the full enjoyment of life and healthy digestion when Dr. Pierce's Pleasant Pellets to relieve a bilious stomach, or after a too hearty meal, and Dr. Pierce's Golden Medical Discovery to purify, enrich and vitalize the blood. OUR WASHINGTON LETTER.

From Our Regular Correspondent.

WASHINGTON, Dec. 17, 1891.

The administration and the Democratic leaders of the House are, by their attitudes on the currency question, giving the country another instructive object-lesson, showing the Democratic idea of statesmanship. Notwithstanding that those financiers of reputation who were heard, either in person or by letter, by the House Banking and Currency Committee, were a unit in condemning, either the whole or a part of Secretary Carlisle's mismanaged plan of currency reform, the bill drawn up by Secretary Carlisle is to be introduced through the House this week, unless Democratic plans miscarry.

It may not be true, although many are inclined to think that it is, that the administration is encouraging the withdrawal of gold from the treasury, in order to frighten objecting Democrats into the support of the currency bill, which as a sop to the overwhelming vanity of Representative Springer, chairman of the committee on Banking and Currency, has been rechristened the "Springer Bill," but those who are unquestionably authorized to speak for the administration are presenting some arguments to secure votes for the bill that are certainly questionable. The Democrat who expresses an objection to the bill, and nearly all of them do, is told that the bill has not the slightest chance to become a law, but that it is merely intended to convince the country that the administration and the majority of the House are anxious to do something, and that its passage by the House will throw the responsibility for the failure of financial legislation upon the already unpopular Senate.

It is not necessary to have an extra good memory to recall that similar arguments were used to rush the Wilson tariff bill through the House in a crude form. It is well known that many of the Senate amendments to the tariff bill were begged for by Democratic members of the House who lacked the courage to either propose them or to vote for them in an open, manly way, but were willing to beg for them secretly, and then to pose as having been compelled against their wills, to accept the Senate bill amendments and all. That is the sort of business which disgusted the people and brought about the Democratic defeat last month. There has not been a single important piece of legislation before Congress since it was controlled by the Democrats, into which this sort of tactics was not introduced to a greater or lesser extent. To put it plainly, if not elegantly, the Democrats in Congress have played, and in spite of their bitter experience, are continuing to play the people for fools.

Even the tottering, God-forsaken government of Turkey, which exists merely by the sufferance of the great powers of Europe, does not hesitate to snub this administration. It has refused to allow the U. S. Consul designated for that duty by Secretary Gresham to accompany the Commission, composed of representatives of Russia and Great Britain, which will investigate the massacre of Christian Armenians by Turkish troops. If Secretary Gresham had not blundered from the start he would not be in his present humiliating position. He has already been taken to task by Congress for several of his blunders, and this last one will certainly be heard from.

The Senate will do nothing in the way of political legislation at this session, although there is still much talk about a cloture rule, but not so much as there was when the silver repeal bill was pending. Bluffs will be made at the sugar schedule of the tariff law from time to time, but they will have a speculative, not a legislative object.

General Sikes, of New York, is one of the few Democrats in the House who has a brilliant Union Army record, and almost the only Democrat who has the courage to openly antagonize the pension policy of the administration. His latest remarks, made just previous to the passing of the pension appropriation bill by the House, are alike creditable to him and to every ex-Union soldier. He said: "I want to say right here to-day, for it may be the last opportunity I shall have to say it here, in vindication of my comrades, that that roll of a million names, with so few instances of fraud, was a monument of honor to American soldiers only less worthy, only less admirable than the heroic services they performed in the preservation of this Union, for which services their pensions were awarded."

Mr. Cleveland is still making extensions of the classified civil service. The civil service reform professions of the administration would be entitled to more respect if less were known of the methods in vogue in the departments to get

big salaries for Democrats at the expense of good clerks, women as well as men. For instance, a \$1400 woman clerk was compelled to exchange salaries with a \$900 Democrat, and they both do the same work they did before the exchange.

of his relative misuses

Order of Publication.

William C. Deane, vs. Francis C. Pulliam, No. 65 Equity. In the Circuit Court for Garrett County, Maryland.

THE object of this suit is to secure a decree of court that certain mortgages filed with the bill as exhibits be recorded among the mortgage records of Garrett County.

The bill states that on or about the 31 day of April, 1887, Francis C. Pulliam executed and delivered to William C. Deane two mortgages upon land in and being in Garrett County, Maryland, to secure the payment of certain sums of money mentioned therein, which sums of money have not been paid.

That said Deane without any fraud or intention on his part, failed to have said mortgages recorded as aforesaid.

The bill further states that said Pulliam is a non-resident of said county of Maryland, and then prays that the court pass an order directing that said mortgages be recorded, and for general relief.

It is therefore the duty of Deane, by causing a copy of this order to be published in some newspaper published in Garrett County once a week for four consecutive weeks before the 7th day of January, 1892, to give notice to the said Deane, defendant, of the filing of said bill and order, and to give notice to the said Deane, defendant, of the filing of said bill and order, and to give notice to the said Deane, defendant, of the filing of said bill and order.

Witness my hand and seal of said court, this 15th day of December, 1891.

W. Z. Towler, Clerk.

COMMISSIONERS' MEETING.

Mr. Samuel Lawton has finished the installation of the steam plant in the new Commercial Hotel. The work is entirely satisfactory and the large building is heated to a very comfortable degree of warmth with a low pressure of steam and very little fire.

Dr. J. Lee McComas, who spent two or three days in Washington, D. C., last week on business returned to Oakland on Saturday night.

Miss Eva Button, of Annapolis, arrived in Oakland last night, and will remain here a few days as the guest of her sister, Mrs. Edward H. Sineell.

Mr. J. L. Rombarger has brought to Oakland for sale two car loads of blooded horses. They range in prices from \$500 to \$9,500 each.

The members of Smith's military band gave a ball at Offut's Hall on Christmas night and increased the exchequer of their treasury a small amount.

Mr. Samuel B. Johns, tenor singer in the Schumann Male Quartette, arrived from the west Tuesday night and will remain here a few days visiting his parents.

Rev. Ernest R. McCanley departed from Oakland for Cedar Rapids, Iowa, where he will in all probability locate permanently as pastor of Rev. O. C. Miller's church.

The barn on the farm of Mr. Madison Dorn, of near New Germany, was burned with all its contents, one night last week. The fire is supposed to have been of incendiary origin.

Wade Hinebaugh, of the Maryland Agricultural College; John Davis, of the Backhampton Seminary and Elwood Offut, of St. John's College, Annapolis, are here spending their holiday vacations.

Mr. Thomas Martin, sr., accompanied by his daughter, Maggie, and his sister, Mrs. David Little, started for Benwood, W. Va., Monday where they will spend a week or two with relatives.

The ball to be given at the Glades to-night by Lily Division No. 9, U. R. K. of P., promises to be a success. Quite a number of persons from out of town will be present. An elaborate supper will be served.

Mr. Geo. W. Moose was summoned to Charlottesville, Va., Friday, by a telegram announcing the serious illness of his mother, who resides there. Mrs. Moose departed Monday morning for the same place.

"T. Jay," the Oakland correspondent of the Cumberland News, contributed a very readable article to that paper last week, descriptive of Loch Lynn Heights, which article is reproduced in our columns this week.

Mr. E. S. Shaw, of Confluence, Pa., reports sales which continued until he had a salary of over \$55 per month and expenses. A few more good agents wanted by Sweet & Shackelford, Mountain Lake Park, Md.

Dr. J. G. Robinson, Dentist, of Baltimore, has decided to locate permanently here in the town of Oakland, where he will be fully equipped to perform in all branches of his profession. Office with Dr. M. C. Hinebaugh. 35-ly.

For rheumatism I have found nothing equal to Chamberlain's Pain Balm. It relieves the pain as soon as applied. J. W. Young, West Liberty, W. Va. The prompt relief it affords is alone worth many times the cost. 50 cents. Its continued use will effect a permanent cure. For sale by Oakland druggists.

A Kansan knows his rights and is generally prepared to defend them. The other day one of them blew out the gas at the hotel, and when the porter broke into the room the old gentleman just had strength enough to get his gun out from under the pillow. He thought the porter was a highwayman and was prepared to make it interesting for him.

Rogers' Sarsaparilla. A specific for all. 100 doses for 75 cents. Rogers' Little Laxer Pills, best on the market; Cough Cure, Liniment, Appetite and Worm Syrup, sold by A. G. Sturgis, Oakland; Cuppet Bros., McHenry; J. A. DeBerry, Corinth; C. F. White, Hutton; P. T. Garthright, Hayden & Eckles, Mt. Lake Park; Dr. Laughlin, Deer Park; Wm. Frederick, Friendsville; Young Store Co., Jonas Frazee, Robert Liston, Selbyport; W. Wass, Mineral Springs; J. E. Guagey, Accident; Smith & Cullis, Hoyes, and by all general dealers.

The holiday entertainments in the different churches in Oakland, were elaborate and the program well carried out by the children and others having parts in them. The Lutheran entertainment was held on Monday night and the Methodist and Presbyterian on Tuesday night. The colored folks had their entertainment also on Tuesday night.

For thirty days we will furnish and print for the trade one thousand XXX No. 6 white envelopes for \$1.75 cash. These envelopes cannot be duplicated in any office in Western Maryland for less than \$2.50 but as we buy our stock direct from the factory and in large lots, we are enabled to furnish them at the price named above. Send in your orders accompanied by the cash.

It is a pleasure to sell Chamberlain's Cough Remedy," says Stickney & Dentler, druggists, Republic, Ohio. "Because a customer after once using it, is almost certain to call for it when again in need of such a medicine. We sell more of it than of any other cough medicine we handle, and it always gives satisfaction." For coughs, colds and croup, it is without an equal. For sale by Oakland druggists.

Mr. Ira P. Westmore, a prominent real estate agent of San Angelo, Texas, has used Chamberlain's Colic, Cholera and Diarrhoea Remedy in his family for several years as occasion required, and always with perfect success. He says: "I find it a perfect cure for our baby when troubled with colic or dysentery. I now feel that my outfit is not complete without a bottle of this Remedy at home or on a trip away from home. For sale by Oakland druggists."

Any one who has children will rejoice with L. B. Mulford, of Plainfield, N. J. His little boy, five years of age, was sick with croup. For two days and nights he tried various remedies recommended by friends and neighbors. He says: "I thought sure I would lose him. I had seen Chamberlain's Cough Remedy advertised and thought I would try it as a last hope and am happy to say that after two doses he slept until morning. I gave it to him next day and a cure was effected. I keep this remedy in the house now and as soon as any of my children show signs of croup I give it to them and that is the last of it." 25 and 50 cent bottles for sale by Oakland druggists.

Temperance lecturer Davis made a good point in his talk in the Methodist church Sunday evening when he said a very long stride in temperance reform will have been made when young womanhood of the land requires of young manhood the same standard of virtue that young manhood requires of young womanhood. If a young man refuses to walk along the street with a young woman smoking a cigar, a cigarette or whose breath is highly scented with the smell of whiskey, why not a young woman refuse to accompany a young man on the street with a cigar in his mouth and his breath highly perfumed with frequent libations?—Sentinel.

Notice. All persons knowing themselves indebted to Andrew Shartzler are requested to call and settle either by note or cash on or before January 1, 1895, otherwise the accounts will be placed for collection.

Valuable Advice. Avoid lawsuits and loss by consulting H. P. Tasker and examining his abstracts of the "conflicting titles" before paying for Military Lots. Charges reasonable. Office in Colardeau Cottage, opposite the bank, Oakland, Md. 41-1f.

Will You Suffer With rheumatic pains, sciatica, sleepless nights, dropsical accumulations, or nervous headaches when Messrs. Cober & Boyer will cure you if their directions are followed. Can be consulted at the Central Hotel or at their room in the Pritchard building, Oakland, Md.

A Quarter Century Test. For a quarter of a century Dr. King's New Discovery has been tested, and the millions who have received benefit from its use testify to its wonderful curative powers in all diseases of the Throat, Chest and Lungs. A remedy that has stood the test so long and that has given so universal satisfaction is no experiment. Each bottle is positively guaranteed to give relief, or the money will be refunded. It is admitted to be the most reliable for Coughs and Colds. Trial bottles free by all Drug Stores. Large size 50c and \$1.00.

THE PUBLIC SCHOOLS.

Features of New York's Compulsory Education Law.

The compulsory education law will go into effect in the state of New York January 1, 1895.

Every child in the state between the ages of eight and sixteen years, of proper physical and mental condition, shall attend a school where the elementary English branches are taught. Children between 14 and 16 years who are employed and not attend school. Children between 12 and 14 years must attend school at least eighty days of each year.

Parents who do not comply with the provisions of the law are guilty of a misdemeanor, punishable for the first offense by a fine of \$5 and for each additional offense by a fine not exceeding \$50 or imprisonment not exceeding thirty days, or by both.

Any person employing a child between 8 and 14 years shall be fined \$50; and anyone who employs one from 12 to 14 years of age, and does not certify to the same with the board of public instruction, shall be fined a like amount.

Each school board must employ one or more attendance officers, whose duties shall be to see that no parent or employer disobeys the law and that all children between the ages of 8 and 16 years, unless excused, are in attendance at school.

These officers may arrest all children playing truant and deliver them to their parents or the school authorities.

Each local board is authorized to establish truant schools for the confinement of habitual and incorrigible truants, who shall be committed by a public magistrate.

Children between seven and fourteen years may be committed. They may also be sent to an orphan asylum if there be no truant school. No such children shall be confined longer than the duration of the school year. The religious faith of the parents shall govern the choice of the institution in each instance.

Every child suspended from a school for just cause for more than one week shall be required to attend the truant school during the period of such suspension. Industrial training shall be furnished in each truant school.

The law will provide employment for hundreds of special officers throughout the state, whose duty it will be to arrest truants, bring them to the schools established for the purpose and report to those over them.

Church Note.

A correspondent of the Pearysburg Virginian writes to that journal in terms of high praise, and the clipping has been sent us by a mutual friend at Salem:

It is a very painful announcement to make that Rev. J. W. Butler, the pastor of the Lutheran church of Newport, has severed his connection with it, and will, by the last of this month, remove to Oakland, Maryland, where he has accepted a call.

Mr. Butler has been with us a little more than a year, and in that short period of time has completely won the confidence and esteem of all who have become acquainted with him; and it is with the deepest regret that we are informed of his purpose to leave us so soon.

He has proven himself to be a zealous and able preacher, and a most watchful and devoted pastor. He is a gentleman of fine intellectual attainments and he exhibits great powers as a preacher in the pulpit. He has an unusual faculty for grasping the prominent and essential points of a text and giving them clear, forcible and interesting exposition. While the Lutheran church here will sustain a great loss by the removal of Mr. Butler, the loss will be felt as fully by the entire community, irrespective of all church lines or divisions. The people of his new charge have every reason to congratulate themselves on gaining the pastoral services of so able and earnest a minister. He leaves us with the wish of every one who knows him that he may have a cordial reception in the new field to which he goes, and his new charge may show him high appreciation to which he is so eminently entitled, both as a man and a preacher. He will hold his farewell service in the Lutheran church in our town next Sunday night. It will be a time to bring sadness of heart to all who attend the services, and, doubtless, that number will be sufficient to fill the house to its utmost capacity. It will be hard to fill his place here. We will not know how great is our loss till he is gone.

HOW TO GET GOOD ROADS.

Don't Depend on Resolutions but Go Down in Your Pockets.

More good resolutions have been expended upon good roads than upon any other subject under heaven except that of religion. And what have they all amounted to? A few hundred dollars in cash were worth a hundred times all the determination of society to have the public highways improved by resolute syntax.

Bicycle clubs, farmers' alliances, granges, political parties, every interest under the shining blue sky has recorded in round, smooth sentences a desire for the permanent improvement of country roads. And yet when anybody shoved under their noses a proposed law compelling them to pay a few dollars for the thing they profess to want most, it is invariably voted down.

You see, resolutions cost nothing. They are patriotic in sentiment and do not involve five cents additional tax. It is said of Americans that when they want anything very badly they get together and pass resolutions. Then they go home and imagine that the flounder in the sea will bring it to them because they wished for it. If it doesn't materialize in the course of two years they presume the flounder was engaged elsewhere and didn't hear them. So they get together again and issue some more resolutions.

Of course this is a comfortable and cheap way of dismissing an irritating subject. It costs nothing and at the same time registers the hypercritical demand of the public for good roads at the expense of somebody else.

When Appian Claudius started out to build the now famous Appian Way, he didn't wait for the carriage builders and bicycle clubs and the farmers' penies to pass resolutions on the subject. He simply put men to work and constructed a road 330 miles in length by 14 to 38 feet wide from Rome south through Capua and Brindisi, and although 2,206 years have passed since then the Appian Way is still the best country road in Europe.

When Napoleon determined that France should have the best highways on earth for the rapid movement of troops and the ready supply of armies with provisions from the fields and farms, he didn't pause for the adoption of a constitutional amendment, but at once took his soldiers out and built the roads he wanted. And they are there to-day the finest and best highways ever constructed.

This dictatorial way of doing things is of course neither possible nor advisable in a republican country, but is a part of history which teaches us that the only way to get good roads is to build them, no matter what the cost in blood and treasure.

What is wanted most in the construction of county roads is a disposition to pay the costs, to foot the bills, to give up the cash required for the purpose. Resolutions are very pretty and interesting but a bushel of them never yet built a foot of roadway anywhere under heaven.—St. Louis Republic.

It May Do as Much for You. Mr. Fred Miller, of Irving, Ill., writes that he had a severe kidney trouble for many years, with severe pains in his back and also that his bladder was affected. He tried many remedies but without any good result. About a year ago he began the use of Electric Bitters and found relief at once. Electric Bitters is especially adapted to cure all kidney and liver troubles and often gives almost instant relief. One trial will prove our statement. Price only 50c, for large bottle. At all Drug Stores.

Married. MALE—WILSON.—On December 18, 1894, at the residence of Stephen Wilson, near Mountain Lake Park, by Rev. William E. George, John Wesley Male and Katie Wilson, both of Garrett county.

WHITE—SMITH.—On Monday afternoon last at the residence of the officiating minister, Rev. John M. Davis, Mr. Perry E. White and Miss Eliza E. Smith, both of Oakland.

Died. HOYE.—This morning at 7 o'clock, very suddenly, Mr. Edward Hoyer, at his residence in Oakland. He was aged about 74 years. The funeral will occur on Saturday next. A more extended notice of the deceased will appear in these columns next week.

JOHN A. WOLF, CARPENTER AND BUILDER, Oak street, East End, Oakland

Reduced Rates for Christmas and New Years. The B. & O. R. R. Co. announces that excursion tickets will be sold between all stations on its lines east of the Ohio river during Christmas and New Year holiday at reduced rates, for all trains December 22, 23, 24, 25, 29, 30, 31, and January 1, 1895, valid for return passage until January 3, 1895, inclusive.

Farms for Sale. We offer for sale two farms lying 2 1/2 miles west of Deer Park and 6 miles north of Oakland, containing 123 acres, about 60 acres being clear. The improvements consist of two barns and three houses, an orchard of 1 1/2 acres. The farms are well watered and there is some good timber land. These farms will be sold in one piece or divided to suit purchaser.

MR. C. MIXER, JOHN HALTENDLER, Deer Park, Md.

Notice. On account of the construction of the large hotel, the many other attractive and expensive improvements being made, and the quick sale of over 300 lots at Loch Lynn Heights to over 100 prominent persons within the past four months, I have determined to dispose of no lot after January 1, 1895, at less than \$100, 6 per cent. off for cash, and 10 per cent. additional for building.

Parties desiring to purchase lots can secure them only this month at the old price of \$75 and 6 per cent. off for cash.

J. C. ALDERSON, Gen. Man. Loch Lynn Heights, Md., Dec. 13, 1894. 40-3t.

When Baby was sick, we gave her Castoria. When she was a Child, she cried for Castoria. When she became Miss, she clung to Castoria. When she had Children, she gave them Castoria.

ARE YOU BANKRUPT in health, constitution undermined by extravagance in eating, by disregarding the laws of nature, or physical capital all gone, if so, NEVER DESPAIR

Tutt's Liver Pills will cure you. For sick headache, dyspepsia, sour stomach, malaria, torpid liver, constipation, biliousness and all kindred diseases.

Tutt's Liver Pills an absolute cure.

JENCH & DROMGOLD'S

NEW MALL ENGINES

Small portable engine in Oakland Trade and Exchange Co. has for sale three times as much power as the best engine in the market. It is a new and improved engine in power and economy and is a great find. For full particulars apply to Trade and Exchange Co., 100 North Second Street, Philadelphia, Pa.

\$40.00 PER WEEK FOR WILLING WORKERS

of either sex, any age, in any part of the country, at the employment which we furnish. You need not be away from home over night. You can give your whole time to the work, or only your spare moments. As capital is not required you run no risk. We supply you with all that is needed. It will cost you nothing to try the business. Any one can do the work. Beginners make money from the start. Failure is unknown with our workers. Every hour you labor you can easily make a dollar. No one who is willing to work fails to make money every day. You can be made in three days of any ordinary employment. Send for free book containing the fullest information.

H. HALLETT & CO., Box 200, PORTLAND, MAINE.

FARM AND GARDEN.

CARING FOR SEED CORN.

One of the Most Important Tasks the Farmer Has to Perform.

The importance of having good, strong seed corn is not fully realized by many of our farmers. Many seem to think if it will only grow that it is all that is necessary. And of course it must grow to amount to anything, but to do its best it must not simply grow, but it must grow vigorously, throw out good strong roots and blades.

To get seed corn of the right kind depends upon two things, the selection and the care it has after it is selected. In regard to the best time to save the seed corn there is a difference of practice among good farmers. Some go into the field and pick the largest and best looking ears as soon as the corn is ripe. Others prefer to leave the selecting of the seed till they are husking. Each plan has its advantages. Those who pick from the field can select the earliest ripening ears, and in that way, it is claimed, the corn will come to ripen earlier each year. But those who select while husking have a much better opportunity to select the most perfect ears, unless the one picking from the field picks a large quantity and then selects, and that makes very much more work than to select while husking. But whichever way is selected it must be done before we have hard freezing. And after it is selected those who would have the best and strongest seed must do one of two things: Either dry it thoroughly before freezing weather, or put it where it won't freeze. You mind I say dry thoroughly. Now, it will not do to depend upon the atmosphere to do the drying. Some of our very dry falls it will do, but it is not safe to depend upon it so that some kind of artificial drying must be done. It doesn't make much difference what the method of drying is only so it is thorough. Not only the kernels of the corn must be dried, but the cob must have the moisture all taken out of it. Experiments have been made with seed corn that had been kiln-dried, partially dried and not dried at all. They were all planted in the same time, in the same kind of soil. All came up, but at the end of three weeks the kiln-dried was twice as large as that not dried at all, and a good deal larger than that partially dried. And it kept ahead all the way through. Another advantage of kiln-drying is the corn will not rot in the ground, even though the weather is wet and cold after planting. This one item of insurance against loss by rotting seed will more than pay all the cost of kiln-drying. I have said above that the seed must be dried and kept from freezing. I know some very successful farmers who always put their seed corn in the cellar before any severe freezing weather comes. And where one has plenty of cellar room this is an excellent and safe plan. In the drying, one is not always sure when it is dry enough to be safe, but in the cellar it is safe anyway. The plan is to put a tier of shelves along the side so the corn will not lie more than two ears deep, and that will prevent any possibility of molding, and one is sure to take out as good seed as he puts in. It may be put in the cellar with safety as fast as husked. It does not matter when it goes in if it is done before it is all frozen. Whatever plan you adopt for saving, don't ever plant without testing your seed. Don't test it by putting it in a pan under the stove, but put it outdoors, where the conditions will be as unfavorable as they are sometimes when planted.—S. Pavill, in Prairie Farmer.

STRONG FODDER TABLE.

The Quickest and Cheapest Method of Handling Stock Corn.

Many practical farmers find that the quickest, easiest and most economical method of handling stock corn is to husk it in the field as soon as ripe and bind the fodder in bundles preparatory to hauling to the barn. To facilitate the work of husking and binding the fodder, Elmhurst Herald, of Iowa, uses a table of his own construction which is well shown in the accompanying illustration. It is made of two eight-inch boards ten feet long, nailed about fourteen inches apart thus allowing room for a man to stand between them. The legs are about two or two

FODDER TABLE.

and one-half feet long and well braced after the plan shown in the cut. Across one end and beneath the boards is placed the three-inch roller E. Near the middle of the roller two small holes are bored one-half inch apart. Short, strong pegs are driven into these between which is placed one end of a rope half an inch thick and ten feet in length. The other end is fastened to the strong cross-piece F. A medium-sized shock is easily tipped over upon the table putting it in a convenient position for husking. When enough fodder is obtained for a bundle the twine in the can A, is drawn through the groove in the strip C and caught in the notch at one, two or three according to the size of the bundle. The rope, which hangs across the roller when not in use, is put over the bunch of fodder, then back under the crosspieces D and H, and the knot is caught between the pegs on the roller. Then by turning the roller by means of the crank at one end, the bunch is compressed and the twine brought over the top and tied. Loosen the rope and the bundle is ready to go to the stack, mow or cutting-box.—American Agriculturist.

Hives should have on an average thirty pounds of road honey or sugar sirup in store to begin the winter.

TRAINING THE COLT.

The Process Should Begin with the Life of the Animal.

Some weeks since a subscriber lost his life by breaking a two-year old colt. The colt had been gentle through all the process of breaking, up to the time of the disastrous accident. But never having been accustomed to harness or driving until a short time before, the animal was actually nervous and, as is always the case, under such circumstances, was at all times liable to fright and to do damage. The colt's training, as has been said hundreds of times, should begin with the life of the colt, and before it is ever hitched to a wagon it should be practically broke. It is gross folly to hitch a strong, ignorant colt to a vehicle and take a seat behind the animal. Any man who does it takes his life in his hand. Before hitching the colt up familiarize it with every duty of the horse except pulling. The colt or horse can entertain but one idea at a time, and hence can be taught only one thing at a time. Naturally, therefore, it cannot be taught to harness, drive, guide and pull at the same time. It may be forced to do it, but it may take it into its head to do some forcing itself. Begin to halter break when the colt is two or three days old, teach it to lead by tying it beside the mother on the road, but only for a short distance at first. Then accustom it to harness, first a bit of wood tied over the head with strings, then a surcingle, then a breast strap, then a collar, first one open at the top, and then one put on over the head, and so on until it is accustomed to a full set of harness. Then place the harnessed colt alongside of the mother, as in this figure. Fasten the head by a strong strap extending from the side of the bit next to the

shaft; then have a line running from the other side of the bit to the headstall, as shown in illustration, to the driver. Now you have the colt so that it can be readily driven by the side of the mother, and nothing remains to be done but to put the animal in the shafts at the proper time. To prevent the colt from getting into the shafts, a horse may be attached to the shaft at one end and the other end attached to a piece of iron firmly keyed to the nut of the wheel.—Farmers' Voice.

LIVE ANIMALS' WEIGHT.

Rules According to Which It May Be Estimated Correctly.

The following rules may be applied to estimate the weight of live animals: Take a string, put it around the chest, just behind the shoulder blade; measure on a foot rule the feet and inches the animal is in circumference; this is called the girth; then with the string measure from the bone of the tail which plunges the line with the hinder part of the buttock; direct the line along the back to the fore part of the shoulder blade; take the dimensions on the foot rule as before, which is the length, and work the figures in following manner: Girth of the bull—six feet four inches; length, five feet three inches, which multiplied together, makes 34 square feet; superficial feet that multiplied by 28—the number of pounds allowed to each superficial foot of cattle measuring less than seven and more than five in girth—makes 712 pounds. Where the animal measures less than nine and more than seven feet in girth, 31 is the number of pounds to each superficial foot. Again, suppose a pig or any small beast should measure two feet in girth and two feet along the back, which, multiplied together, make four square feet; that multiplied by 11—the number of pounds allowed for each square foot of cattle measuring less than three feet in girth—makes 44 pounds. Again, suppose a calf or sheep should measure four feet six inches in girth and three feet nine inches in length, which multiplied together, makes 39 square feet; that multiplied by 16—the number of pounds allowed to all cattle measuring less than five and more than three feet in girth—makes 264 pounds.—Farmers' Voice.

Friendship Among Animals.

Nothing in animal life, perhaps, more interesting or curious than some of the friendships formed between animals. Not a few vicious horses have been rendered comparatively good-tempered by having as a companion a dog, cat or donkey; but it is generally supposed that when the presence of another of the same species has the reverse of agreeable. Is it instinct or some sort of refined reasoning that leads two animals entirely different to choose companions in this way? Instinct is a mystic kind of word and so complicated that it can be ascribed to almost any expression. Some people rank instinct next to reason, while others would appear to place it on a higher level than any faculty with which man is endowed; but when two animals naturally oppose to each other, take a mutual dislike to each other there must be some sort of subtle agency at work.—Breeder's Gazette.

FIRESIDE FRAGMENTS.

—A Pretty Dish.—Peel a dozen ripe bananas, dip them in beaten white of egg, then roll carefully in a dish of powdered sugar, place in a hot oven five minutes. Lift them out on a napkin and heap on a pretty glass or silver stand. This makes a delicious and handsome centerpiece for the tea table.—Housekeeper.

—Oyster Sandwiches.—Are very dainty and appetizing, and may be served either hot or cold. Take thin slices of sweet, home-made yeast bread, butter them lay on hot fried oysters, season with a dash of lemon juice, mustard if liked, and lay on the second slice of bread. If they are to be served cold, wrap each sandwich in buttered paper.—Country Gentleman.

—Delicate White Puffs.—Beat a pint of rich milk and the whites of four eggs until very stiff, and add, slowly, beating all the while, a cupful of finely sifted flour and a scant cupful of powdered sugar and the grated peel of half a lemon. Bake in buttered tins in a very hot oven, turn out, sift powdered sugar over them and serve hot with lemon sauce.

—Cuddled Apples.—Peel and core tart apples, arrange them in a dish deep enough so that they may be covered, and fill each cavity with sugar. Dredge sugar over them, pour in a cupful of hot water, cover closely, and simmer in the oven or on the top of the stove, until the apples are tender, till soft. Lift them without breaking into the dish in which they are to be served, add a dust of nutmeg to the sirup and pour it over them.—Good Housekeeping.

—Apple Tapioca Pudding.—Put a cupful of tapioca in four cupfuls of water for three hours, add two large tablespoonfuls of sugar, and keep in a warm place, at the back of the stove. Fill a two-quart pudding dish three-fourths full of peeled and quartered apples, pour over them the warm tapioca, and bake in a moderate oven for an hour. Serve with liquid sauce or sweetened cream.—Cheerful Moments.

—Cold Meat Au Gratin.—Have a pint of cold meat cut into cubes and seasoned with salt and pepper. Mix a generous half pint of white sauce with a little butter, pour over the meat, holding about a pint and a half and cover with half a pint of grated bread crumbs. Dot this covering with a scant tablespoonful of butter. Bake in a rather hot oven for twenty minutes. Serve at once.—Christian Inquirer.

—Speed Porridge for Children.—Save all scraps of bread for this and when you have enough break them small, place on a baking tin, and dry in the oven. While still hot crush these crumbs with a rolling-pin till quite fine. The crumbs, when cold, may be placed in a tin and kept for use. To prepare the porridge, put a large teacupful of dried crumbs into a basin, and pour upon them one pint of boiling milk. Put the porridge into a saucepan and boil for ten minutes, stirring well. Stir in a little butter, pepper and salt. Children often prefer treacle or sugar to the pepper and salt. This will be found an excellent breakfast at small cost.—Leeds Mercury.

PEARLS IN HISTORY.

One That Made an Expensive Dish for Cleopatra.

The value of pearls has been in all ages commensurate with their beauty. In the east, especially, they have been greatly admired, and enormous sums of money have been paid for them. Pliny observes that pearls are the most valuable and excellent of all precious stones, and from our Saviour's comparing the kingdom of Heaven to a pearl, it is evident that they must have been held in very high estimation at that time. It is said that Julius Cæsar gave the mother of Marcus Brutus a pearl valued at £48,415 10s. of our present money; and Cleopatra dissolved one worth £250,000 in vinegar, which she drank at the supper with Marc Antony.

From time immemorial there have been fisheries of pearl in the Persian gulf, the Red sea, and in the bays of the Gulf of Persia on its first voyage to America he was astonished to find the precious gems abounding there in unparalleled quantities. His men landed, and saw the Indian women adorned with splendid pearls round their arms, and when Columbus arrived in the Gulf of Persia on his first voyage to America he was astonished to find the precious gems abounding there in unparalleled quantities. His men landed, and saw the Indian women adorned with splendid pearls round their arms, and when Columbus arrived in the Gulf of Persia on his first voyage to America he was astonished to find the precious gems abounding there in unparalleled quantities. 1895. The Sun! 1895. BARTLETT, M.D.
THE PAPER OF THE PEOPLE.
FOR THE PEOPLE AND WITH THE PEOPLE.
HONEST IN MOTIVE.
FEARLESS IN EXPOSITION.
SOUND IN PRINCIPLE.
UNSWERVING IN ITS ALLEGIANCE TO
RIGHT THOUGHTS AND
RIGHT PRACTICES.
THE SUN PUBLISHES ALL THE NEWS ALL
THE TIME, BUT IT DOES NOT ALLOW ITS EDITORS
TO BE DEGRADED BY MEAN, IMMORAL OR
PURELY SENSATIONAL MATTER.
EDITORIALY, THE SUN IS THE CONSISTENT
AND UNFATHOMABLE CHAMPION AND DEFENDER
OF POPULAR RIGHTS AND INTERESTS AGAINST
POLITICAL MACHINES AND MONOPOLIES OF EVERY
CHARACTER. INDEPENDENT IN ALL THINGS, EX-
CEPT IN PRINCIPLE. IT IS FOR GOOD LIVES, GOOD
GOVERNMENT AND GOOD ORDER.

FINANCIAL REVIEW.
Henry Clews' Weekly Letter on the
Business Situation.
NEW YORK, Dec. 23.—Wall street
is now in the midst of its annual
retrospective mood, balancing ac-
counts, settling firm's affairs and
reviewing the results of a very
unsatisfactory business year. From
now until New Year is therefore
not a period for active business, and
operations are languid and timid.
This naturally makes an opening
for the "bears," who seek to make
the most of it: but with indifferent
success. The encouraging event of
the week has been the declaration
of their usual dividends by each of
the Vanderbilt lines. This appears
to have been made possible by a
large reduction in operating ex-
penses, in spite of a material decrease
of gross earnings and of the large
falling off in comparative passenger
receipts for the months covered by
the World's Fair. The exports of
gold can hardly be said to have
more than a momentary effect: for
the movement has been discounted
and the outflow is not expected to
exceed what is usually incident to
this season.

Wall street can hardly be said to
be optimistic as to the position of
the treasury in regard to gold. It
anticipates a steady decline in the
treasury stock of the metal and the
necessity of the government bor-
rowing another fifty millions to
replenish its gold reserve in the
course of a few months, unless
Congress should devise means of
averting the result, of which, how-
ever, there is not much expectation.
Some uneasiness is caused by the
steady withdrawal of gold from the
treasury, materially in excess of
what is required for current ex-
ports of metal. The drain appears
to come from the banks, and to be
for their account, and is probably
caused by a desire to replenish them-
selves for the large amounts they
parted with in their subscriptions
for the late loan. No more serious
nervousness is supposed to be at the
bottom of the movement, and it is
expected to prove only transient.

In financial circles unusual interest
is felt in the pending legislation
relating to the currency question.
So far as respects Secretary Car-
lisle's bill, there is more or less of
a concurrence in its proposals to
retire the legal tender circulation
(if done in a conservative way), to
change the basis of bank note guar-
antee, to permit the issue of notes
to the extent of 75 per cent. of
capital, to make more effective pro-
vision for the current redemption
of notes, and to admit the state
banks to the privilege of issuing
notes upon safe conditions. The
measure, although in a crude form,
is regarded as affording a basis for
a reconstruction of our currency
system; and if there were any
expectation of the bill being enacted
with the necessary needed material
amendments, it would be
welcomed as an aid towards the
restoration of business. But the
bill contains certain provisions and
hacks others which, it is thought,
will defeat its enactment; or, if it
becomes law, would vastly counter-
act its possible good results.

Among the causes deemed objec-
tionable is the requirement that the
banks of issue shall deposit legal
tenders at the treasury to the
amount of 30 per cent. of their
circulation; which would largely
restrict the net earnings from the
notes and so far lessen the induc-
ement for the banks to avail them-
selves of their privilege of issuing;
besides which it might keep a very
large amount of legal tenders in
existence after the rest had been
retired—an incident which would be
inconsistent with the secretary's
purpose to extinguish all the legal
tender notes. To those familiar
with the principles and operations
of banking, the safety fund clause
of the bill requiring a deposit of
lawful money amounting to 5 per
cent. of the outstanding circulation
is regarded as highly objectionable
on the ground that it involves a
mutual guarantee as between all
banks, in opposition to all sound
principles of banking; besides which
this fund would be wholly superfluous
regarded as a source of guaran-
tee. With respect to the provision
repealing the revenue laws of the
national banks, although not a
little may be said in its favor, yet
strictly conservative financiers are
disposed to regard it as an unsafe
innovation.

Outside the national banking
interest, the proposal to permit the
state banks to issue notes must be
modified to provide strong safe-
guards to meet with approval, the
terms of issue must necessarily be
the same in the case of both the
national and state institutions; but
the secretary's bill makes marked
discriminations in favor of the state
banks; which is universally viewed
as unjust and invidious. The
great and universal objection, how-
ever, is that Mr. Carlisle fails to
make any adequate provision for
carrying out the main feature of
his plan, the retirement of the 500
millions of legal tender notes. He
asks for authority to use for that

purpose any money in the treasury
not otherwise appropriated, but
does not mention authorization to
borrow money for these vast liqui-
dations. His scheme, if adopted,
must inevitably break down at
this point; for beyond the mere
possibility of getting small amounts
from surplus income he
would have no shadow of disposable
means, while the notes going into
the 30 per cent. guarantee fund
would simply be taken from circula-
tion and withheld from liquida-
tion.

Under the circumstances no hope
is entertained of relief from the
pending bill in the form in which
it was presented to the House. All
hope of mending the currency situ-
ation is therefore dependent upon
the chances of a radical revision of
Mr. Carlisle's plan. What these
chances may amount to depends
principally upon political consid-
erations. If both parties in Congress
could be brought to waive party
motives and work together for real-
izing Mr. Carlisle's main purposes
with fuller and more consistent
details, we might hope then to see
a settlement of this disturbing
money question before the present
session of Congress closes. But to
insure this result, the men of intel-
ligence and the organizations rep-
resenting our great commercial and
financial interests must make
themselves heard in tones of im-
perative urgency.

HENRY CLEWS.

January Forecast, 1895.

The cold following the last storm
of December will relax about the
1st, and the temperature will grow
much warmer, resulting in rain and
snow, followed by a wave of freez-
ing weather. On the 6th, changes
of temperature will start, growing
warm attended by east to south
winds culminating on or about the
7th, in rain or snow followed,
by cold freezing weather. Changes
in temperature will result
about the 12th, growing warmer
attended by storms in process of or-
ganization, when local rains and
snows will prevail on the above date
and the next one when a wave of
freezing weather will follow. About
the 14th a warm wave of much
energy will spread over central and
eastern parts, advancing the tem-
perature generally attended by
storm organization culminating in
a general storm wave, the most in-
tense of any of the months prior to
the disturbance in question, when
rain, sleet and snow are likely to
show up a larger winter crop than
preceding disturbed conditions have
done which will be followed by
much cold freezing weather. We
noted in a former bulletin that De-
cember would not be an arctic weather
slide, neither do we apprehend
much extreme freezing weather of
long enough duration to produce
an abundant ice harvest in the early
part of the month. However, after
passing the 20th weather conditions
are likely to be much more severe
and of longer duration than they
were in the earlier part of the
month. From the 24th, to the 26th
storms will be in progress and a
renewal of cold will follow. The
month will close attended by storms
on their passage and a very cold
wave following. Extreme cold
weather conditions will quite likely
develop in February.

P. R. SMITH

December 20, 1894.

Church Dedication at Grantsville.

The dedication of the Grantsville
M. E. church Sunday, Dec. 2nd,
was a grand success. Dr. A. H.
Norcross, of Pittsburg, Pa., preach-
ed an excellent sermon in the
morning from Heb. 11:1, and con-
ducted the finances.
In the afternoon a platform
meeting was held at which Rev. D.
Flanagan, of McKeesport, Pa., and
J. H. Enlow, pastor, spoke. In
the evening Rev. Flanagan preached
a good sermon which was enjoyed
by all. Notwithstanding the in-
clement weather and the small
number possible to be present, at
the three services \$1232 was raised
in cash and good subscriptions fully
provided for all claims. The little
band of but about two dozen mem-
bers now rejoices that by the
blessing of God they have a hand-
some building in which to worship,
worth fully \$3000.

The plan and specifications were
drawn by B. D. Price, of Philadel-
phia. The building was erected by
home mechanics with Wm. A.
Kann, of Salisbury, Pa., as fore-
man. The church with two rooms,
auditorium and lecture room,
thrown together by enameled glass
windows hung on weights, and
finished in oak, cathedral glass and
slate roof, is a gem for beauty. The
windows were all donated as well
as a twenty-five dollar communion set
with gold lining, baptismal bowl
and collection plates.

Another interesting feature of
the church is the pulpit, of solid
walnut, manufactured by the Cam-
berland Furniture Company. This
beautiful piece of church furniture
was contributed by Mrs. Elizabeth
Compton and her friends in Cum-
berland. Upon a solid silver plate

attached is inscribed, "Elizabeth
Brown Compton, sixty years a
member of the M. E. church."
The building committee, as well as
a number of others who stood by
them, deserves great credit for their
wise planning and successful carry-
ing out of the enterprise.

The Ladies' Aid Society labored
heroically and assumed \$150 on the
day of dedication. The pastor, on
his fifth year on the charge, was
untiring in his efforts and rejoices
in the results achieved.

Since the church is dedicated to
the worship of God, may many pre-
cious souls find peace around its
altar and great prosperity follow
the church.

Dead Letter List.

TEMPERANCE NOTES.

A REMARKABLE CONVERSION.

WAS but a dirty heap of rags. Found in a man's room. The workman's face beamed with delight. As he thus told the story: No soul had ever deeded them worth the trouble of the taking. Their simple minds had never thought of paper or its making.

The house was bought, the workman came. New brooms, they say, sweep cleanly. And one there was who had a taste For pipe and mug most keenly. So quickly he the rags swept up. As pleased as ass with flax. Said he: "At least they'll fill a pipe. Or maybe wet our whistle."

The rags were sold, and reached the mill. And were in time converted Into some sheets of paper white. And it has been asserted That very leaves, with sterling truth, The world made pure and better.

And one of them the workman's heart Reached in a touching letter.

So from a dirty heap of rags, Deceived with age and yellow, Came the best message of a life To this cure thoughtless fellow.

For like those rags, he soon became Changed, purified and in the end And ceased to worship pipe and mug As he became enlightened.

—Ogden Palmer.

MADE BRUTAL BY DRINK.

Incident of a Barfly's Conversion Toward His Helpless Little Wife.

Policeman Anthony Monaghan is looked up in a cell in the grand avenue station house, Brooklyn, on a charge of intoxication. Monaghan went off duty at six o'clock in an apparently sober condition, and started for his home at 726 Bergen street. At half past seven o'clock, hatless, with disheveled hair and clad only in uniform trousers and shirt, with a looting and whistling crowd at his back, he appeared again at the station house. He was very drunk and was dragging after him a slight and thin-clad woman who, sobbing and crying, was vainly trying to release herself from the vice-like grip which he had upon her arm.

"What's the matter?" asked Sergt. Gallagher.

"She is my wife, sergeant," said Monaghan, thickly, as he lurched up in front of the desk, and clung to the railing for support. "I arrested her for being drunk. She was drunk when I got home, so I thought I'd take her in."

"He was very drunk," sobbed the woman. "I don't know what to do with this man."

It took the doorman and several policemen to get Monaghan into a cell. In his drunken fury he struggled like a maniac, and raved and swore long after the cell door had been closed on him.

To Capt. Cullen B. Monaghan said that when her husband reached his home, which is only a few blocks from the grand avenue station. She saw he was quite drunk. She tried to prepare his breakfast for him, and he at once accused her of being drunk. She denied it and tried to reason with him, but he seized her by the arms and dragged her into the street and to the station house. She at the time only wore her underclothing and a light wrapper, which was badly torn by her husband on the way to the station house. Her arms were black and blue from the rough handling she had suffered at the hands of her husband, who is about six feet tall, weighs about 200 pounds, and is very powerful.

—N. Y. Witness.

A DISEASE OF THE NERVES.

Reasons for the Growing Use of Stimulants Among Women and Its Disastrous Effects.

It is said by those in a position to know that it is of no use to disguise the terrible fact that intemperance is more frequent among women than it has ever been before, more general, and more ruinous to the point of physical and mental mortality.

According to the police and the hospital returns, the increase has been small but steady. This has been among a class of women from whom one does not expect the best. But according to the statements of physicians the increase is large among those from whom one does expect the best.

It makes us shudder to hear the facts in the case, to listen even to the suppositions concerning its causes, one supposition being that suddenly acquired wealth, giving people the opportunity of going through life at a great pace, makes it necessary that they should resort to whip and spur to maintain the gait—that is, that having money they must and will spend it fast, and spending it fast engenders pleasures to whose enjoyment the strength is not equal without the help of the exciting and stimulating drink.

Another cause is said to be the prevalent absence of both religious and moral sentiment, the disdain for everything that can be seen or felt, the reign of pure reason or positivism, the custom of considering that if one wants a thing one should have it, and that there

should be no restraint upon one's desire further than the liability to gratify them. A third cause is given as the cigarette, it being stated that many more young and middle-aged women than we have dreamed of having acquired a fancy or a fashion for the use of this vile little article, and its use creates thirst, and the thirst which only strong drink slakes. These are business, too, where the dreadful evil has been brought about by the prescription of physicians, the invalid thus having the habit established before being aware of what is done. But those instances are few in comparison to the number of those which result from the apparently innocent glass taken at the table or elsewhere. The taste once formed, it may be indulged with all the other tastes, at table or on the shopping tour or in the privacy of the restaurant, where trouble or depression of any sort causes the stimulant to be resorted to with a hope that its temporary exhilaration will tide over the gloom.

There may be women in middle life and in old age with whose physician and whose conscience it may be a question whether or not they need the building and sustaining power of a stimulant. But it is evident from facts to be had at first hand by any who will investigate them that the young woman, and most especially the young woman of a nervous temperament, should avoid intoxicating drinks. She would avoid poison. It should again be good form, as it was fifty years ago, for the young woman at the dinner-table not merely to touch her lips to the glass in courtesy, but to decline it altogether. These are perilous times; all the circumstances of life are rapid, exciting, nerves straining. The great stress under which we live occasions a degeneration of the nerves, and the swift and easiest resource then is the stimulant. Knowing this, knowing that young girls are liable to such degeneration, it becomes doubly important that they should be sheltered by the force of a public opinion which may make it at any rate difficult for them to begin the drinking habit in its most insidious and delicate first approaches. —Harper's Bazar.

COOKS AND INTOXICANTS.

Reasons for the Widespread Use of Liquors Among the Professional Class.

"You ask if she is a drinking woman, ma'am?" said the proprietor of a restaurant to a lady who had inquired about the character of a cook. "Why, yes, to be sure, she has her speech, and she always seems to me to be in the work well. I gave her a recommendation as a first-class cook, and I didn't think it necessary to say anything about her drinking, for they nearly all drink. They need it to keep themselves up, because they swallow so much hot air. We give them spirits on principle, and other houses do the same."

Various reasons have been given for the intemperance of this class. It is said to be due to the tasting of sauces, etc., flavored with spirits; to the lack of appetite which the constant sight and odor of cooking produce, and the consequent necessity for stimulants to give strength to continue work; or to the exhaustion of the system by the high temperature, which produces a craving for spirits. Whatever the cause, it is pitiable to know that many excellent habits that brighten their lives and entail a miserable old age.

Women who cook for small families, and whose work is not exhausting, are not specially prone to the excessive use of stimulants. The trouble is with those who, in hotels, restaurants, large boarding houses, etc., are in the kitchen and over the stove from morning to night. Undoubtedly, there are temperate women among these, but many are intemperate. —N. Y. Tribune.

BEER VS. BUTTERMILK.

Reasons for the Growing Use of Stimulants Among Women and Its Disastrous Effects.

Buttermilk seems likely to equal, and perhaps rival, beer as a popular drink. A Pittsburgh paper reports the proprietors of one of the largest bars in the city as saying recently: "If the demand for buttermilk increases each year as in the last few years, it will soon be a rival to beer as a popular drink." He added: "Never before has the demand for this cooling beverage been so great as it is this year. It is not heralded and advertised by signs in the saloons, for the reason that there is more money in beer. Nevertheless, one would be surprised at the large quantities consumed. One bar gets away with ten gallons a day, while another that I know of uses six gallons. It is the greatest bugbear to the bars now, and the demand makes them keep it, no matter how they may seek to hold it in the background." All hail to this health-giving drink; it will make a good ally to temperance reform. —Ran's Horn.

TEMPERANCE TIDINGS.

It does not take the last drink to make a drunkard—but the first. —Ran's Horn.

Nor to train up the boys properly to help the barkeeper. —Ran's Horn.

This man who does not overcome ennui by occupying himself soon tries to fly from it by intemperance. The idle man is almost necessarily vicious; an occupied man is almost always good. —Ran's Horn.

It is proposed to introduce a bill in the next legislature of Indiana limiting the number of saloons in the state to one for each one thousand inhabitants. Saloon keepers are organizing to prevent its passage.

It is estimated that about \$10,000,000 have been invested in coffee houses, as an antidote of the saloon, in England. It is said there are about 7,000 of them, employing 55,000, and they are a paying investment.

Temperance advocates in Copenhagen have decided to follow a course of instruction in the manufacture of intoxicating liquors, and the physiological action of alcohol, in order to propagate that useful knowledge in the ordinary day schools.

INDIA RUBBER.

A Substance of Great Utility in the Present Day.

In our own day it really seems as if we couldn't possibly get on without India rubber and gutta percha. Though both are of comparatively recent introduction, the number of purposes to which they are applied is so immense that our civilization without them would at least be very different from the form in which we actually know it. To lump a few miscellaneous examples in a single paragraph—without those impossible telegraphs, which would be many unlike modifications, postboxes would not exist, water-proof and machine-forges would be a beautiful dream, and a rubberless world, a hideous reality. Elastic, in the sense in which ladies use the word, for tying hats or making garters, would never have been evolved, and as it soups to us now, its disposable basket? Fancy putting out fires without the invaluable hose, fancy whirling manufactures without the inevitable gearing. The bicyclist would miss his pneumatic tires; the artist would miss his ever-ready eraser.

When we go to a delightful excursion, a happy hour is made happier for us by the India rubber sheet with which he dextrously contrives to cloak undue loquacity. When we go to the gymnasium, half the apparatus we employ is based on it. And what would life be for the present-day Indian?—Lancet Magazine.

MYSTERIOUS DISAPPEARANCES.

Native of India Who Isolated Himself in the Woods.

Some find, and six years ago, the son of the late Rajah of Tanjore—a man some forty or fifty years of age, and of course, the chief native personage in that part of India—made up his mind to become a devotee. He one day told his friends he was going on a railway journey, sent off his servants, and entered the palace to the station, saying he would follow, gave them this slip, and has never been heard of since. His friends went to the man who was known to have been acting as his guru, who simply told them, "You will never find him." Supposing the guru to be a Pret, he has not been seen since.

To illustrate this subject, I may tell the story of Tillemantham Swamy, who was the teacher of the guru whose acquaintance I am referring to in this chapter. Tillemantham was a wealthy ship owner of his native place, the Prince of Wales, and since 1855, when he became "venerated," after his attainment he felt sick of the world, and so he wound up his affairs, divided all his goods and money among relatives and dependents, and went off stark mad. His wife and sisters were grieved, and repeatedly pursued him, offering to surrender all to him if he would only return. At last he simply refused to answer their importunities, and they desisted. He appeared in Tanjore after that in 1867, 1868, 1869, and 1872; he has not been seen since. He is supposed to be living somewhere in the Western Ghats. —From Adams Peak to Elephantia—Carpenter.

THE ROAST OF ELAND.

A Rare Animal that Produces Excellent Meat.

The flesh of the eland is excellent—fat, well tasted, and resembling young beef, with a gamelike flavor. The slims of the animal is, of course, well known. For many years specimens of the unstriped South African variety have been bred and exhibited in the Zoological Society gardens. These elands, however, scarcely fairly represent the beast in its wild state, and grow to nothing like the size and bulk. Mr. Bartlett informs us also that the breed shows in captivity a tendency to deterioration, and occasionally requires fresh blood. Many of these beautiful animals have been imported and bred as ornaments to noblemen's parks.

A former Lord Derby bred them for some years—the present stock at the Zoological gardens represents, I believe, his herd. Lord Hill also had some, and there are still a few here and there in parks about the country. A butcher in Shrewsbury once had the carcass of an eland of Lord Hill's for sale, but found it an impossibility to induce people to buy and eat it. Good as was the meat, his customers, with typical British mistrust, would have nothing to say to such newfangled stuff.

The eland is so comely, so striking, and yet withal so gentle a beast, uniting some of the finest points of the mulelope family with those of the zebu of India, and is so easily domesticated and bred in this country that the wonder is how he has not been more often seen in private grounds. A little fresh blood now and again would serve to keep up the required condition and growth. —Chambers's Journal.

Trying to Smooth Matters.

Mistress—Did any one call while I was out?

New Girl—Yes, ma'am; Mrs. Waynup called.

"Did she come disappointed when you said I was not at home?"

"Well, she did look a little queer, but I told her she wouldn't get mad about it, 'cause it was really true this time." —N. Y. Weekly.

A long controversy was waged many years ago with regard to the origin of maize, one party holding that it was brought from the east into Europe in 1492, and the other that it was a true cross and various other sacred relics.

FANTASTIC NAMES.

New England Country People Inflicted Their Children With Them.

New England country people have always had a preference for naming their children after Bible characters or great men, their choice in other names being chiefly confined to a small range of Matildas, Louisas and a few such common and ancient English names. But when a New England couple fifty or sixty years ago did desire to confer upon their baby a more elegant, rare or fanciful appellation they often made curious work of it. They appropriated, adapted or invented fearlessly, with results usually more peculiar than successful.

In a recent account of Abby and Julia Smith, of Glastonbury, famous in their day for their oddities, their ardent as pioneer woman suffragists, their learning and their shrewd Yankee logic, the names of their family were given. The father, the Rev. Zephaniah Smith, married Hannah, daughter of the five children were named Hancy Zephaniah Zephaniah for a feminine form of Zephaniah, Cynthia Sacretia, Laurilla Alroya, Julia Evelina and Abby Hadassah.

Such combinations are perhaps less unusual than they were, now that public libraries and the spread of cheap literature have introduced through the medium of history and romance a wider knowledge and variety of names.

Nevertheless, Ostanella, Estanella and Luellina Jones were doubtless the only girls of their names in school when they were old enough to be pupils, but it is doubtful if they enjoyed that distinction as much as did a certain little Gladys, who recently while in the primary department consoled herself for all shortcomings in class by the admiration of the other girls for her beautiful name, which really appeared to confer as much distinction as the names of Markia, Valora, Pineta, Adolphina, Dorebella and Blandina can hardly be congratulated on their parents' choice, and Emilia is still less desirable. Phana Jane has a comic rather than a romantic value, while Romietta, though ingenious, is hardly a satisfactory union of the ill-fated lovers, Romeo and Juliet.

EXTREME COLD.

Its Remarkable Effects Upon the Faculties of Man.

We have gleaned enough from the observations of early polar explorers to warrant the assertion that an excessively low temperature paralyzes the senses, stammers the tongue, and, but with the exception of what data was gathered by Prof. Payer in St. Joseph's Land, away back in 1875, we know nothing of its effects on mental operations, hearing and eyesight.

It is known that a temperature of from 60 to 65 degrees below zero of Fahrenheit causes excessive thirst, said to be more tormenting than that endured by travelers on the most torrid deserts. This thirst is, no doubt, caused by the evaporation of moisture from the body. Prof. Payer does not exactly say that such is the case, but he gives us an illustration of it in such cases as something wonderful. In alluding to it he says: "The group of explorers who were walking before me across the snow fields on that particular morning a morning when the temperature was at its lowest, below zero, were almost completely enveloped by thick vapors, caused by emanations from their bodies, which had escaped and become condensed, notwithstanding the furs in which they were dressed. These vapors fell to the ground with a slight noise, being frozen in the form of minute crystals. * * * Both smell and taste became greatly enfeebled in these high latitudes and strength gives way under the paralyzing influence of the cold to such an extent that the eyes lose their clarity, the under jaw drops, and the hand releases its hold upon objects supposed to be firmly within its grasp." A curious fact which Prof. Payer does not mention is that in such high latitudes the beard does not freeze together as it does in the temperate zones in winter, because the exhaled breath is instantly transformed into dry, the crystals of ice. —St. Louis Republic.

ONE BITER WAS BITTEN.

The Second-Hander Man Thought He Had a Second-hand Clothing Store in Sixth Avenue, near Eighth Street, and Unrolled from a package a pair of summer trousers. As he threw them on the counter, the buxide or something else made a noise, a strong tint attracted the attention of the dealer.

"How much will you give me for these?" asked the dapper man.

"Late in the season for summer goods," answered the dealer, as he held up the trousers for examination and slipped his hands in the pockets as he did so.

"Well, how much?" asked the man.

"Twenty-five cents is all they are worth."

"Then roll them up, I will give them to some poor fellow before selling them for that."

"Let me see," said the storekeeper, as he turned them over and thrust his hand in the left pocket. "Well, call it fifty cents."

"Roll them up, I won't take less than three dollars."

"Three dollars?" exclaimed the merchant. "That will buy a new pair."

"All right. Roll them up."

"Well, my friend, considering it is you, I will give you three dollars."

The money was paid, the seller walked out, and the purchaser went to the back of the store and from the left pocket of the trousers took a wad of paper and two old-fashioned pennies. —N. Y. Herald.

COUNTERFEIT COMPLIMENTS.

The Hollowness of Mutual Admiration Society Flattery.

There is a great deal for us to hear and to learn about ourselves that is disagreeable, so long as we are human and consequently imperfect beings. The choice is between knowing our defects as faults, understanding is half cured—hugging ourselves in the conviction that we are as tasteful, as well bred, as intelligent and high-minded as we should or can be, and making ourselves ridiculous often in this belief. Nothing is so supposedly absurd as a little mutual admiration society of such a kind, or so treacherous, let me add, the selfishness of human nature is there under the pleasant flatteries and soothing manners, and no persons have their sensibilities and self-love so easily scratched as your hyper-amiable folks who can scarcely bear to hear you speak against the east wind, because it blows where they came from. The ingrained truth-teller, who speaks truth from justice and obligation, are the kindest, most self-sacrificing and most faithful of friends. They say disagreeable things when the occasion is necessary, and it costs them much more to speak them than to lend their last hundred dollars. Endlessly disagreeable things are often no more the truth than the fictions which we call politeness. The end of truth is neither to please nor to displease, but to say the thing which is, and to avoid saying the thing which is not. When we are asked for bread we are to hold out in return the empty hand, or give the stone wrapped in paper and nicely tied? We would not pass counterfeit coin for worlds, how is it then that we are so ashamed of passing counterfeit opinions and comments daily? Harsh language, do you say? We are growing so thin that we scarce dare speak of the meridian crossing the equator for fear of hurting the feelings of either the equator or the meridian. The details of a life are genuine or not, and your folly is not so superlative that you can take much comfort in her favor after that. You come to know the counterfeit nickel, no matter how bright it is, and soon despise people who are passing spurious coin on you every day. For these busy men I know who look up from their desks to give me unqualified sincerity of opinion, whether I like it or not; I would not part with their friendship for their weight in gold. One girl I know, still at school, has such a loveable, friendly way of saying the candid truth—telling it as though she thought too much of you to possibly do otherwise—that hearts cleave to her and love goes with her steps, and will to the end of her pilgrimage. Telling the truth is love. Here is the secret of character, the great secret which gives a woman its depth and branches, while, Mrs. Hamilton Mott, in Ladies' Home Journal.

A PAGE AT COURT.

What He Saw and Did When Napoleon Was Emperor.

It was a new life into which this imperial appointment plunged the active boy of fourteen. It was discipline and yet it was delightful; it was slavery, yet it was splendor; there was labor to the both feet and brain; there were long hours of monotony, but many opportunities for pranks and frolics. It was run here and run there; it was this and that; it was not soldiering, and yet it had its conflicts; it was a call for courage, and yet it was duty joined to temptation and tried by opportunity. The life of a page of the palace was not all play, though passed in the midst of splendor; nor was it all dignity, though spent in a constant round of fete and ceremonial.

And into fete and ceremonial young Philip Desnoettes was speedily introduced. It was the year 1810. In that year Napoleon, the emperor, married the Archduchess of Austria. The son of a poor Corsican lawyer wedded the daughter of the Austrian emperor, was a year of brilliant of excitement, restless repetitions of display and constant reminders of marvelous entertainments.

Never was a boy of fourteen surrounded by more of glitter, or permitted to be a part of more royal "going on." All this might ruin a boy of a weak nature; but Philip was blessed with a cool head, a well-balanced mind and much common sense. He had "cut his wisdom teeth" as a street boy of Paris; he had learned discipline in the school of St. Cyr; and so, though often sorely tried and many a time in scrapes and in disgrace, he was, too much a fellow to "lose his head," and so he was really developed as well by the temptations as by the duties that filled his daily life in those most brilliant surroundings—the court of the First Empire.

As a page of the palace he was on duty both at the splendid Tuilleries and at beautiful St. Cloud. And through the month of March there was enough going on in both these great palaces to give any ordinary boy and keep his head awash with bewilderment. For then it was that Paris and the palace were making ready for the reception of the new mistress of France, the girl empress, Marie Louise of Austria.

Philip could not understand it all. Austria had been a "red rag" to every French boy since the days of Marie Antoinette. And at St. Cyr, Philip had been brought up to hate the Austrians, with whom the emperor was often at war, and whom three times he had faced and conquered. —Elbridge S. Brooks, in St. Nicholas.

SCIENCE AND INDUSTRY.

A Russian physician has been making some curious experiments to find out how far animals can count. He declares that the crow can count up to ten, and is thereby superior in arithmetic to certain Polynesian tribes of men, who cannot get beyond five or six.

—According to one of our consuls in Germany there is a great field in that country for factory-made furniture from the United States. Not only is the German furniture more expensive than ours, because less efficient machinery is used to make it, but it is also less beautiful, convenient and durable.

—In 1881 the world produced 768,000 tons of tobacco, grown on 2,629,000 acres of ground. The United States was the largest producer, 210,000 tons; next came India, with 170,000; Russia, with 75,000; Austria, with 65,000; the remainder being produced in small quantities by other countries.

—Russia has produced this year, according to the estimate of the minister of agriculture, 275,000 bushels of wheat, as compared with 336,000,000 last year. Her rice crop is 792,000,000 bushels, as against 732,000,000 a year ago. The barley yield is 176,000,000 and that of oats 675,000,000. There is no famine in the czar's empire this year.

—Dr. J. A. Allen, describing the seasonal change of color in the varying hare (Lepus Americanus), notes the winter and summer pelage, the autumnal and the vernal change, and their irregularities. The change of color from brown to white is due to a change of pelage, not to a change of color in the hair; it is gradual and seasonal, and the order of the parts first affected in spring is the reverse of the autumnal change.

—In some parts of Europe—Sweden and Russia—the rainfall is as low as fifteen inches per annum; the average for twenty years at Marseilles was 28.4 inches, and at Alicante the total for the year has fallen as low as 7.1 inches. The New South Wales rainfall is greatest in the coastal regions, and least in the inland districts beyond the Darling. The mean rainfall of the whole colony during the last thirty-three years is about twenty-five inches.

—Dr. Franz Stuhlman, who accompanies Emir Pasha into the heart of Africa, saw much of the people called Pygmies. He looks upon them as the remnant of a primeval race, which at one time occupied the whole of tropical Africa and southern Asia. They have lost their original language and have been enervated upon by surrounding tribes, even within the dense forests to which they retired, until they are met with only in scattered remnants. A trace of degeneracy is to be found among them.

—The sensation of thirst is caused by a lack of fluids in the system. In a state of health it indicates that the body wants moisture. Thirst is caused by a failure of the salivary and other glands to secrete a proper amount of fluid for use in the stomach. It is possible to quench thirst not only by the ordinary means, but through the blood vessels and the skin. Much of the water drunk passes out through the skin by means of the blood vessels, and is known as insensible perspiration. It is a well-known fact that the loss of blood is always followed by intense thirst.

ONE-SIDED ADVICE.

The Men of the Family Need Look Pleasant.

Women are always being told how they should behave when the man of the house comes home; they are advised to be cheerful and well dressed, no matter how tired they feel, and in all ways to make the home-coming bright and pleasing, putting the annoyances of the day and of the morning to the view of the lord and master only the best side, when in reality there has been much to vex and worry, and which if told to a sympathizing husband or father would not seem half so burdensome.

"This advice is backward, and seldom, if ever, is there a word said about the behavior of the self-same men, whom women are supposed to please, even at the expense of their own feelings. How many men, even though they do find their wives looking sweet and pretty to welcome them, ever tell them so? They take the good looks, the pleasant smile and the womanly courtesy as their right, and never think that it would please their life partners to have some pleasant little complimentary speech made to them, as in the olden days before my lord, the head of the house, was quite so sure of a dinner.

Then, again, women are told to keep "their own counsel," so that she may be able to enter into mental companionship with her husband. Some men, perhaps, sit up and talk or keep awake long enough to read about a few chapters from some widely-discussed novel, but too many find it impossible for them to keep awake when once the comfortable slippers and lounging jacket are donned. In many families the representative evening is the one which the husband dozes on the couch, and the wife reads or sews in undisturbed and maddening silence.

A man will argue in refutation of these statements that the wage-earner is tired and needs rest. Granted that he does, then let him be just, and not expect too much from his wife, whose day is far more wearing and vexatious than his own. If he likes to see his wife dressed up, let him pay particular attention to the neatness of his own toilet. If he expects her to be well informed, let him prove himself to be a companion who can talk and help her by a pleasant interchange of thought. It is not fair to demand so much in a woman and pass over such glaring defects in man. —Philadelphia Times.

So, Pretty Good?

"Have you been successful in affairs of the heart?" she asked of an old-time acquaintance.

"Well, rather," was the reply. "Twenty thousand from one suit, eight thousand from three others, and half a dozen brought me a thousand."

—Judge.
